

Dear Dept of Energy Resources,

There are better ways to generate energy than wood-burning biomass power plants and waste-to-energy garbage incinerators. We do not want those.

We want:

- 1) That the regulations must explicitly state that combustion-based technologies shall not be considered Clean Peak Resources...clean must be clean!
- 2) That you note that the draft regulations are incomplete, because they refer to numerous Guidelines that DOER has not published, including a Guideline on Clean Peak Resource Eligibility.
- 3) That DOER please post the draft Guidelines and extend the public comment period by at least 60 days for the public to review and comment on them.

Thank you,
Gwyn Peterdi
