## Background

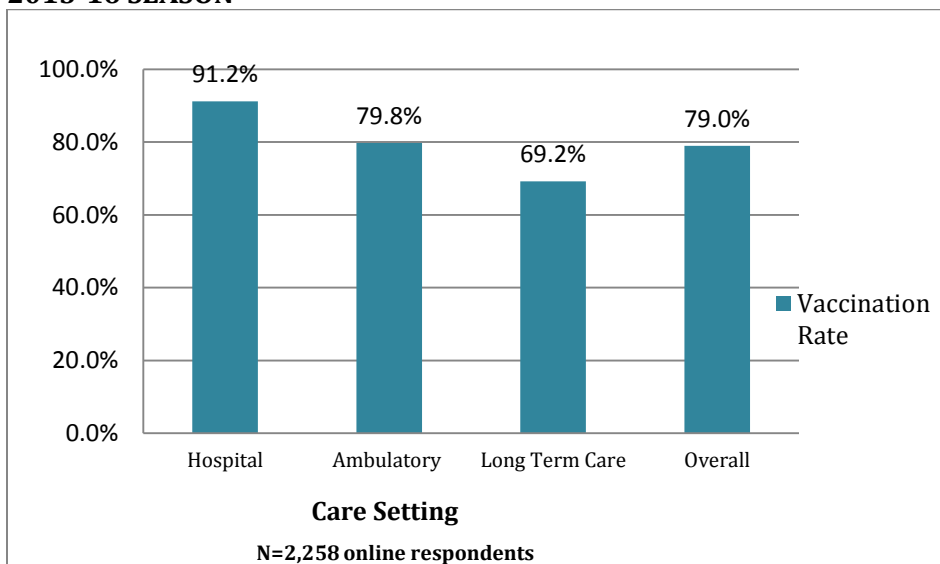

The Massachusetts Department of Public Health (DPH) requires licensed health care facilities, including clinics, nursing homes, rest homes, and adult day health centers to report influenza vaccine coverage among employees.<sup>1</sup> Health care personnel (HCP) are at high risk for influenza exposure and may be a source of influenza virus transmission in health care settings. Annual immunization is the most effective method of preventing influenza and potentially serious complications.

In 2008, DPH mandated that all licensed health care facilities offer personnel free, annual influenza vaccine. Facilities must document and report receipt of vaccine by personnel, whether administered within or outside the facility, and all declination of immunization. This report presents data on influenza vaccine coverage of non-acute health care facility personnel for 2015-16. Health care facilities included in this report are long term care facilities, rest homes, clinics and adult day health centers. Acute care hospitals, ambulatory surgical centers, dialysis facilities and non-acute hospitals are required to report health care personnel influenza data through the National Healthcare Safety Network (NHSN) of the Centers for Disease Control and Prevention (CDC). Data describing influenza vaccination of health care personnel in acute care hospitals can be found at the following link:

<http://www.mass.gov/eohhs/gov/departments/dph/programs/hcq/healthcare-quality/health-care-facilities/flu-vac-hc-personnel/flu-vaccination-reports.html>

While the CDC's Advisory Committee on Immunization Practices recommends annual influenza vaccination for all health care personnel, Massachusetts is one of only a handful of states that mandates reporting of influenza vaccination rates in order to understand coverage rates. The CDC conducted a national online survey of health care personnel in the spring of 2016 to promote coverage. In a sample of 2,258 respondents, 79.0% of all health care personnel reported receiving the influenza vaccination during the 2015-2016 season<sup>2</sup>. Figure 1 illustrates reported vaccination coverage by care setting.

**FIGURE 1. CDC's SURVEY OF NATIONAL HEALTH CARE PERSONNEL INFLUENZA VACCINATION RATES FOR 2015-16 SEASON**

<sup>1</sup> See 105 CMR 140.150 for the influenza vaccination reporting requirements for clinics; 105 CMR 150.002(D) for the influenza vaccination reporting requirements for nursing and rest homes; and 105 CMR 158.030(L) for the influenza vaccination reporting requirements for adult day health centers.

<sup>2</sup> Black CL, Yue X, Ball SW, et al. Influenza Vaccination Coverage Among Health Care Personnel — United States, 2015–16 Influenza Season. MMWR Morb Mortal Wkly Rep 2016;65:1026–1031. DOI: <http://dx.doi.org/10.15585/mmwr.mm6538a2>

## Methodology

The DPH Healthcare Associated Infection (HAI) Prevention Program provided a Microsoft *Excel* spreadsheet to licensed non-acute health care facilities, for the purpose of capturing HCP influenza vaccination data. The required data elements included the total number of employees as of December 31, 2015; the total number of employees receiving seasonal influenza vaccination provided by the health care facility or administered outside the health care facility between August 1, 2015 and March 31, 2016; and the total number of HCPs who declined vaccination. Facilities were required to complete and submit this spreadsheet by April 15, 2016. DPH distributed guidance to all facilities at the beginning of the influenza season. Facilities that did not report data by the deadline were contacted via electronic mail and phone to request data submission.

The facility vaccination rate was calculated by dividing the number of facility HCPs vaccinated by the total number of facility HCPs. The overall mean percentage of HCPs vaccinated by facility type was calculated as the mean of all facility vaccination rates.

Health care personnel is defined as “individuals, both full-time and part-time employees, who are on the health care facility payroll as of December 31, 2015.”<sup>3</sup> This includes, but is not limited to: physicians, nurses, interns/residents, fellows, physician assistants; physical, occupational, respiratory and speech therapists; laboratory and operating room technicians, central supply staff, pharmacists, maintenance/environmental services staff, dietary staff, attendants/orderlies, secretarial and administrative staff, and contract staff; whether or not an individual provides direct patient care. Due to the fluctuation in staff on payroll over the course of the fall and winter, it is possible for the number of immunizations and declinations documented to exceed 100% of the employees identified as of December 31, 2015.

DPH has utilized this definition of health care personnel since the 2010-11 influenza season, making comparison of data from the 2011 through the 2016 influenza seasons appropriate.

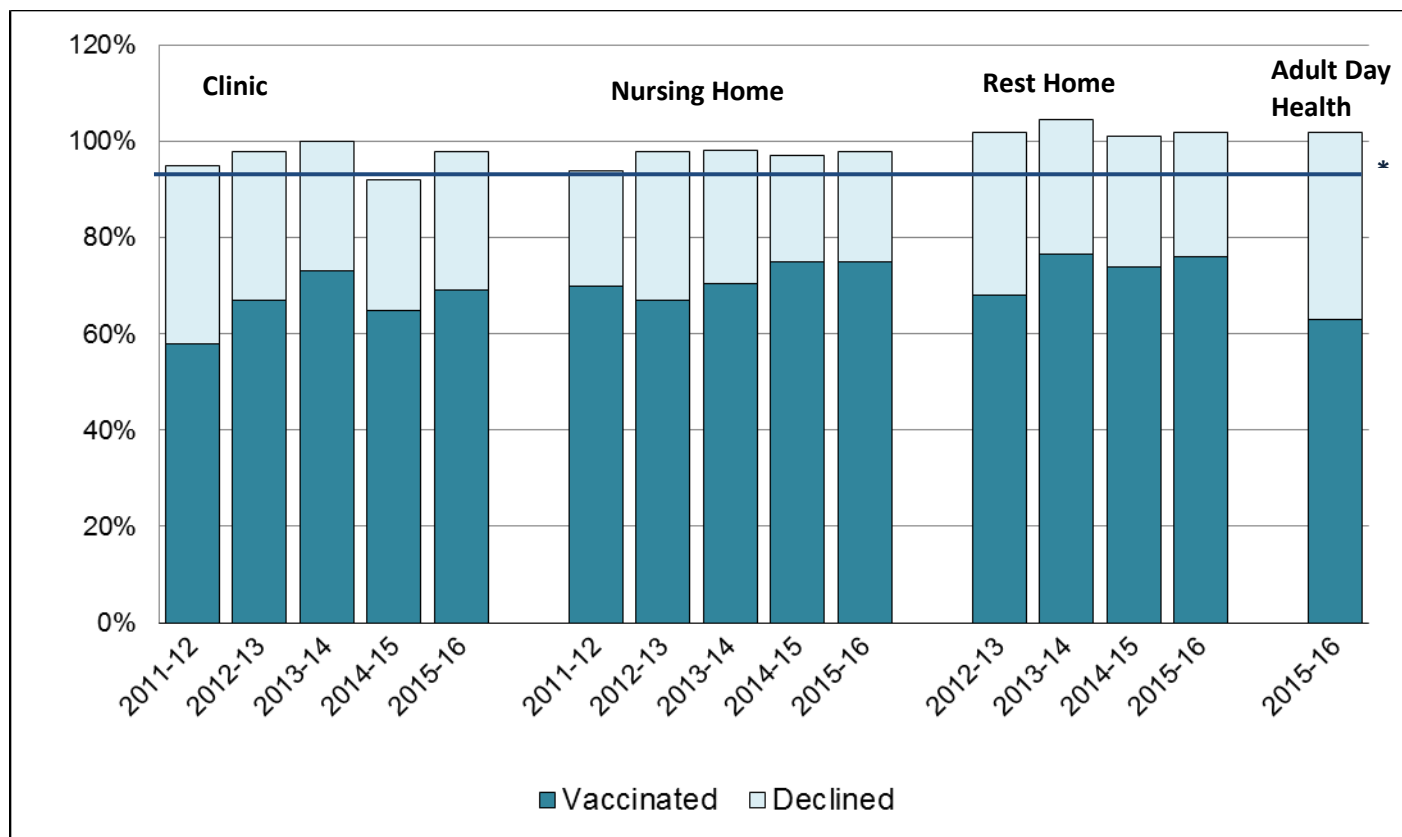

## Results

Figure 1 depicts trends in influenza vaccination rates in facilities in Massachusetts from the 2011-12 flu season through the 2015-16 season. Public reporting of influenza vaccine status of licensed rest home personnel began in the 2012-13 season and reporting of vaccination status for adult day health centers began in the 2015-16 season. Overall, most facilities reported a slightly improved mean vaccine coverage rate in 2015-16 when compared to 2014-15. While nursing homes had a slight decrease in vaccine coverage when compared to the previous season, clinics and rest homes reported a small increase in coverage. Overall, no facility type reached the United States Department of Health and Human Services Healthy People 2020 90% coverage goal, though many individual sites did achieve this goal. Sites with greater than 90% coverage are listed in the appendix with an asterisk.

---

<sup>3</sup> Definition was developed as part of the HAI expert panel process based on CDC recommendations and described in 2010 guidance found at <http://www.mass.gov/eohhs/docs/dph/quality/hcq-circular-letters/2010/dhcq-1009535.pdf>

**FIGURE 2. MEAN PERCENT OF HCP RECEIVING AND DECLINING INFLUENZA VACCINATION: 2011-2016**

### Clinics

During the 2015-16 influenza season, 142 out of 326 licensed clinics (46%) submitted HCP influenza vaccination data. The average influenza vaccine coverage at clinics was 66%, with a mean of 31% declining the vaccine (Table 1, Figure 1). Thirty-eight clinics, representing 27% of reporting facilities in 2015-16, had an overall vaccination rate of 90% or greater, an increase from 25% in 2014-15. Personnel most frequently received vaccination outside their place of employment: a mean of 35% were vaccinated outside their workplace, and 31% were vaccinated at their place of employment.

**TABLE 1. MEAN PERCENT OF CLINIC HCP VACCINATED AGAINST INFLUENZA DURING 2015-2016 (N=142)**

	Mean % Vaccinated	Range
<b>Total Vaccinated</b>	66%	(0-118%)
<b>Vaccine Declination Rate</b>	31%	(0-100%)
<b>Location Vaccinated</b>		
<b>At Place of Employment</b>	31%	(0-100%)
<b>Outside Place of Employment</b>	35%	(0-118%)

## Nursing Homes

In nursing homes, 351 of 419 licensed facilities (84%) reported data for 2015-116 flu season. On average in 2015-16, 73% of HCP at nursing homes were vaccinated against influenza and 23% declined to be vaccinated (Table 2). The vaccine coverage rate decreased from 76% in the 2014-15 season to 73% this season, though the declination rate was the same for this season as the 2014-15 season. (Figure 1). In 2015-16, 98 nursing homes in Massachusetts, representing 28% of reporting facilities, reported an overall vaccination rate of 90% or greater, which is the same percentage as the previous year. Fifty-five percent (55%) of employees received vaccination at their place of employment and 19% were vaccinated elsewhere.

**TABLE 2. MEAN PERCENT OF NURSING HOME HCP VACCINATED AGAINST INFLUENZA DURING 2015-2016 (N=351)**

	Mean % Vaccinated	Range
<b>Total Vaccinated</b>	73%	(0-108%)
<b>Vaccine Declination Rate</b>	23%	(0-90%)
<b>Location Vaccinated</b>		
<b>At Place of Employment</b>	55%	(0-108%)
<b>Outside Place of Employment</b>	19%	(0-73%)

## Rest Homes

Thirty-two of 74 (43%) licensed rest homes reported data for this flu season. On average, 76% of HCP were vaccinated against influenza during 2015-16, and 26% declined (Table 3). Vaccine coverage increased slightly from 74% to 76% between 2014-15 and 2015-16, while 10 rest homes (31%) reported an overall vaccination rate of 90% or greater. More rest home employees received vaccine outside their place of employment (40%) rather than at their place of employment (36%).

**TABLE 3. MEAN PERCENT OF REST HOME HCP VACCINATED AGAINST INFLUENZA DURING 2015-2016 (N=32)**

	Mean % Vaccinated	Range
<b>Total Vaccinated</b>	76%	(0-100%)
<b>Vaccination Declination Rate</b>	26%	(0-58%)
<b>Location Vaccinated</b>		
<b>At Place of Employment</b>	36%	(0-100%)
<b>Outside Place of Employment</b>	40%	(0-97%)

## Adult Day Health

Seventy-two percent (72%) of adult day health centers reported flu data for the 2015-16 flu season. On average, of the 114 reporting adult day health facilities, 63% of HCP were vaccinated against influenza during 2015-16, and 39% declined (Table 4). Twenty-three adult day health centers reported an overall vaccination rate of 90% or greater. More adult day health center employees received vaccine at their place of employment rather than elsewhere, 33% and 30%, respectively.

**TABLE 4. MEAN PERCENT OF ADULT DAY HEALTH HCP VACCINATED AGAINST INFLUENZA DURING 2015-2016 (N=114)**

	Mean % Vaccinated	Range
<b>Total Vaccinated</b>	63%	(0-113%)
<b>Vaccination Declination Rate</b>	39%	(0-100%)
<b>Location Vaccinated</b>		
<b>At Place of Employment</b>	33%	(0-113%)
<b>Outside Place of Employment</b>	30%	(0-100%)

### ***Public Health Actions***

- DPH will continue to monitor trends and report annual compliance with the HCP influenza vaccination requirements. Compliance will also be assessed by surveys conducted by DPH.
- DPH will continue to promote continuous quality improvement, and recommend licensed facilities share vaccination rates with all staff, including administrators, boards of directors, practice managers, ombudsperson and patient/family councils.
- DPH encourages facilities to review reported data and current HCP influenza policies, and as necessary implement processes to maximize vaccination coverage.
- DPH will continue to promote a continuous, comprehensive influenza prevention program in all licensed health care settings.
- DPH will continue to promote the DPH and Healthy People 2020 target to vaccinate 90% or greater of eligible HCP in all licensed health care settings.
- DPH will continue to collaborate with public health partners to intensify efforts to improve immunization rates among HCP.

## APPENDIX

Asterisk\* indicates site achieved greater than 90% flu vaccine coverage in 2015-16

“n/a” indicates data not reported by facility to DPH. DPH distributed guidance to all facilities at the beginning of the influenza season. Facilities that did not report data by the deadline were contacted via electronic mail and phone to request data submission.
