Subject: Agricultural Systems Guideline Comments

Dear DOER,

I am writing to SUPPORT the proposal put forth by the Department of Energy Resources in regards to the Agricultural Solar Tariff Generation Units (Solar over farmland). As a resident in an area where a large scale solar project is trying to enter, I appreciate the recommended changes by the DOER. I believe that clean energy is important to our future, but it must be done in a responsible way that doesn't deteriorate our existing clean and natural environment.

Thank you for the consideration.

Best,
Molly Jacques
