
Atrius Health Ambulatory Surgery Center

James Woolman, VP Network Contracting and Financial Integration

Robert Carey, Atrius Finance

New Ambulatory Surgery Center

- Atrius Health plans to establish a state-of-the-art Ambulatory Surgery Center (ASC) that will serve thousands of Atrius patients. Exploring locations in Waltham and Wellesley.
- The ASC will provide patients with a dedicated outpatient surgery facility that will shift surgeries that are currently performed in hospitals.
- Types of procedures to be performed at the ASC include: orthopedics (joints, hand procedures, sports medicine procedures, etc.), ENT procedures (ear, nose, and throat surgeries), Gynecology, and General Surgery procedures appropriate for this setting.

Intended Community Benefits

- **Improve Coordination of Care** – Performing surgeries in a facility owned and operated by Atrius Health will ensure that patient care is well-integrated with Atrius primary care providers, specialists, and other services
- **Improve Access and Convenience** – The location selected will be centrally located and convenient for most Atrius patients and is dedicated solely to providing outpatient surgical care for Atrius patients
- **Reduce Costs** – Receiving surgical care in an ASC reduces out-of-pocket costs to patients relative to care now being performed in a hospital and also helps control overall health care spending

Anticipated Location

- Properties being explored in Waltham and Wellesley.
- Goal is to secure a central location that for most Atrius patients.
