

## About Co-op Power

Co-op Power is a member-owned sustainable energy cooperative. We operate within a regional network of Local Organizing Councils to create a multi-class, multi-racial movement for a sustainable and just energy future.

We are owned by over 455 Members in New England and New York. Membership is open to all and entitles you to discounts on products and services.

In addition, Member equity supports the development of community-scale clean energy projects designed and implemented by Local Organizing Councils for their regions.

## SunMate Testimonials

**John Hatch, MA** - "My solar heating system works great, I have easily halved my fuel bills with a clean, quiet, reliable system. I was surprised at how the system kept the house warm all day long even on the coldest days."

**Daphne, MA** - "I don't understand why everyone hasn't put your panels on their houses and businesses. I love my solar panels. Last winter, we had heat during the daylight hours during the coldest part of the winter. In the fall and spring we had heat until eight or nine at night and used no other heat. Old man winter doesn't worry me any more."

**Jason, MA** - "The SunMate Solar heating panels are working well. They are an excellent investment. Last Friday, it was in the 20's and they kept our house at 70 degrees all day! My only regret is not buying them sooner!"

# SunMate Solar Hot Air Systems

By Environmental Solar Systems Inc.

*Solar energy doesn't have to break the bank!*

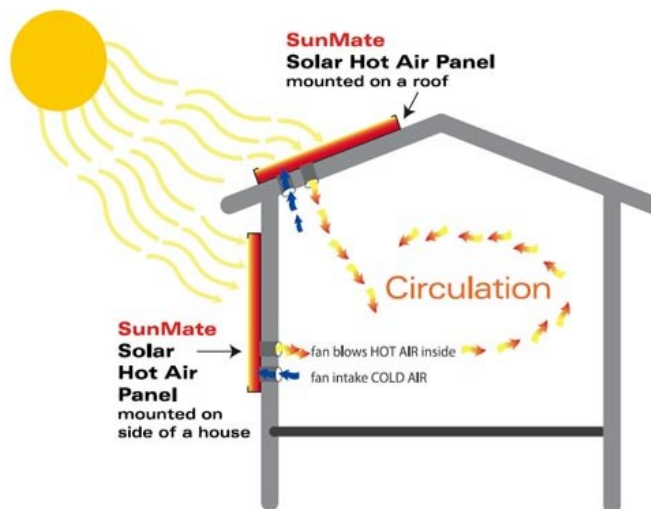

When most people think of solar energy, they think of solar electric systems that can cost tens of thousands of dollars. Solar hot air systems are affordable, environmentally friendly, and can halve your heating bills.

Co-op Power has partnered with Environmental Solar Systems to give discounts on SunMate Solar Systems. Manufactured in Methuen MA, SunMate is the most efficient solar hot air system on the market.

MA Department of Energy Resources is currently developing a Solar Thermal Energy Credit Program.

Modeled after the SREC program for solar electric power, the Thermal Credits will be offered in 2016 and will be retroactively paid to owners of solar thermal systems installed in 2015.

## How It Works

The SunMate™ pulls cool air from your home, channels it through the absorber plate where it's warmed by the free energy of the sun, then circulates it back into your home. They can heat up to 750 sqft, are easy to install, and extremely affordable using tax rebates:

Retail:	\$1999
15% MA Tax Credit	- 300
30% Fed Tax Credit	- 600
Total:	\$1099*
10% Member Discount	- 199
Member Total:	\$ 900*

**Save with a Co-op Power  
Neighbor to Neighbor Installation!**

## Features
