Mar 10, 2022

Commissioner Patrick Woodcock
MA

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Ms. Resa Blatman
42 Bartlett Street

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

This note is a cry for help from my 9yr old son Charlie who lives with our family in Newton MA. Charlie is deeply concerned about global warming and carbon emissions. He understands that his generation and generations to come will bare the impact of decisions taken by adults today. Please help Charlie!

Once you allow cities and towns to ban fossil fuels in new construction, Charlie (and our family) will be pushing to make sure Newton MA opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Ms. Catherine Carney-Feldman

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

We really have no choice but to be forward thinking and leaning. Even meeting our stated climate goals leaves us behind where we needed to be 10 years ago. The laws of nature and physics will act without question in accordance with the conditions we foster. Your decision will have a direct effect on that.

We are beginning to see the effects of global warming on our food supply. Lobsters off our coast are moving away and dying as are temperature sensitive fish. Your holding to meeting our standards sooner rather than later may save jobs and livelihoods in addition to improving our living conditions. Please consider our present and future and act today to require action today. Thank you for your consideration.

Sincerely,

Mr. JAMES MACDONALD

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Blding codes must enable forward-thinking cities and towns to lead the way on clean buildings.

Sincerely,

MA

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Dr. Angela Landerholm

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

The Commonwealth needs to give cities and towns maximum latitude under state codes to do everything possible to negate the effects of climate change. Incentivizing cities and towns to do so is also a good idea.

Sincerely,
