Mar 11, 2022

Commissioner Patrick Woodcock  
MA

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Dr. James Liu

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I, as a member of the Chelmsford Climate Action Team, will be pushing to make sure Chelmsford opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

As recent events in Ukraine and Russia have shown, the world needs to stop relying on fossil fuels for our energy needs. Geothermal and air source heat pumps are a local, readily available source of clean energy with minimal environmental costs, that do not rely on foreign imports.

DOER must be visionary to address the future threats to our economy from both climate change and geopolitical instabilities.

Climate change isn't a future concern. Just this week in Eastern MA, we had a day of temperatures in the 60s followed by a day with several inches of snowfall. We are already experiencing the impacts of climate change, and they will only get worse if we do not take drastic action in the here and now.

MA

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

While I don't think outright bans on fossil fuels use in new construction are appropriate, I think towns should be allowed to make rules that make it difficult (which boils down to more expensive) to incorporate fossil fuel use. (Higher property tax rates. Higher permit costs)

Sincerely,

Mr. CARL HAYSEN  
6 Winchester Dr

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Mrs. Darcy Donald

AND the state needs to focus this program into the Gateway Cities and not the suburbs. Build net energy zero neighborhoods in places where huge swaths look like Dresden, Germany in 1946 after it was fire-bombed in 1945. That is where this program will have its most important impact.

Investing in places, disinvested-in for 2-3 generations is the right way to steer this.

And while you're at it, please make the Mass Save program equitable.  
It is NOT at this time.

In the 1920s, when the state government allowed the creation of municipal utilities due to the unfair actions of investor-owned utilities--usually in the Gateway Cities.

Today, with Mass Save, the program is a beneficial and important way to make houses more energy efficient. Except in the places with municipal gas & electric utilities--usually in the Gateway Cities. Mass Save is really not worth anything in those places and that needs to be addressed too.

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Ms. Nicole Da Silva  
6736 Robert Drive Unit 6736  
South Easton, MA 02375

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my city opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

The cost and the time to retrofit existing buildings will be great - there is no excuse for increasing that financial and time cost by continuing to allow construction of buildings with gas and oil energy requirements.

Please act now.  
Thank you.

Sincerely,

Ms. Sarah Brooks  
1241 Adams St F312  
Dorchester, MA 02124

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

If we don't allow for cities and towns across the state to push for fossil fuel free construction, we are silencing a call for action.

Don't you want us to meet our climate goals? It takes significant local actions do this. Please allow the towns to push for these advances in every way they can.

Sincerely,

Ms. Anna Baker  
1009 Union St  
Marshfield, MA 02050
