Mar 11, 2022

Commissioner Patrick Woodcock  
MA

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Dr. Carol and Arnold Klukas  
526 Thompson Stg  
Halifax, MA 02338

Mar 11, 2022

Commissioner Patrick Woodcock  
MA

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Ms. Eileen Craffey  
98 Center Street  
Bridgewater, MA 02324

Commissioner Patrick Woodcock  
MA

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Despite the many challenges of the past few years, as a mother of a soon to be three-year-old nothing scares me more than the future of our planet. If forward-thinking towns in forward-thinking states can't even make climate policy, then I truly feel doomed. Statistically people support these changes in climate policy and are ready for a new chapter in energy. I hope you can see the dire importance of the policy needed to get us to a place where we can save our planet and therefore our children's futures. Many thanks for reading.

Sincerely,

Mrs. Carly Sweeney

Dear Commissioner Woodcock,

Thank you for your hard work in implementing the 2021 Climate Roadmap Law, and for the opportunity to submit public input on the Stretch Energy Code, one of the 2021 law's most important provisions.

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Commissioner Woodcock,

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. We need this type of state and local partnership if we are going to meet our climate goals.

The planet cannot afford to wait any longer for fossil-fuel free construction; we are seeing drought, fire, extreme weather, and flooding with greater frequency and more severe consequences than ever before, and we need to do what we can to limit the use of non-renewable resources.

Any structure built today with gas or oil systems will need to be retrofitted -- at great expense -- before 2050 if we're to meet our statewide net-zero goal.

Please, let's not delay addressing this critical issue!!

Sincerely,

Ms. Deborah Howe

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

Once you allow cities and towns to ban fossil fuels in new construction, I will be pushing to make sure my town opts into that provision of the building code. It is this type of state and local partnership that is needed if we are going to meet our climate goals.

Sincerely,

Dr. Al Maze

The climate cannot afford to wait any longer for fossil-free construction. Any structure built today with gas or oil systems will need to be retrofitted before 2050 if we're going to meet our statewide net-zero goal, at great future expense.

Please do not kick this can down the road any further. Add a provision to your new building code that allows a city or town to require fossil-fuel free construction. Our most forward-thinking cities and towns are demanding it, and I stand with them.

I'm not some gigantic policy expert, but there's more than enough evidence and effects already happening in the world to reinforce the fact that we need to make changes from housing, to transportation, to planning, to everything related to energy and how we use it. However, when confronted with what needs to happen, we shy away, "NIMBY", too expensive, whatever. I'm in my 30s now. We need to be the generation that makes this stuff happen.

Please help us make it happen.

Sincerely,

Mr. Edgar Hinton
