Overview

This COVID-19 dashboard presents data in an easy to interpret way and enhances the information provided in the previous daily reports with trends and situational insights into the epidemic. While this dashboard includes the same information from the daily reports, it presents new visuals of data and displays trends over time.

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences, the Registry of Vital Records and Statistics, and MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Note: all data are cumulative and current as of 10:00am on the date at the top of the page for all statistics except current hospitalizations/hospitalization trends, which are current as of 12:00pm.

Daily and Cumulative Confirmed Cases

Confirmed COVID-19 Cases To Date

● New Cases by Date ● Cumulative Total Cases by Date

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.
Note: all data are cumulative and current as of 10:00am on the date at the top of the page

Testing by Date

Number of Tests* Performed by Date

● New Tests Performed by Date ● Cumulative Tests Performed by Date

Percent of Tests* that are Positive by Date

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are cumulative and current as of 10:00am on the date at the top of the page; *The on-site mobile testing (nursing homes, assisted living residence, etc.) program launched as a pilot on 3/31, increasing daily capacity throughout the first week of April, and began testing at full facilities on April 9th.

Note: all data are cumulative and current as of 10:00am on the date at the top of the page; *Hospitalized at any point in time, not necessarily the current status; **Only includes data from deaths following completed investigation, figures are updates as additional investigations are completed

Cases, Hospitalizations, & Deaths by Race/Ethnicity

The following caveats apply to these data:

1. Information on race and ethnicity is collected and reported by laboratories, healthcare providers and local boards of health and may or may not reflect self-report by the individual case.
2. If no information is provided by any reporter on a case's race or ethnicity, DPH classifies it as missing.
3. A classification of unknown indicates the reporter did not know the race and ethnicity of the individual, the individual refused to provide information, or that the originating system does not capture the information.
4. Other indicates multiple races or that the originating system does not capture the information.

Note: COVID-19 testing is currently conducted by dozens of private labs, hospitals, and other partners and the Department of Public Health is working with these organizations and to improve data reporting by race and ethnicity, to better understand where, and on whom, the burden of illness is falling so the Commonwealth can respond more effectively. On 4/8, the Commissioner of Public Health issued an Order related to collecting complete demographic information for all confirmed and suspected COVID-19 patients.

1. Staff and residents

Note: This list includes Nursing Homes, Rest Homes, and Skilled Nursing Facilities with at least 2 reported COVID-19 cases to date (staff and residents).

Assisted living residences are not currently included. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified.

Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence

1. Staff and residents

Note: This list includes Nursing Homes, Rest Homes, and Skilled Nursing Facilities with at least 2 reported COVID-19 cases to date (staff and residents).

Assisted living residences are not currently included. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified.

Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence
