*Last updated Wednesday, 12/9/2020

Note: For definitions, please see the Glossary at the end of this document in 'Definitions and Disclaimers'. Average age of hospitalized cases and deaths are calculated for a two week period covering 11/22/2020 to 12/5/2020. Please see the most current weekly dashboard for more details [https://www.mass.gov/info-details/covid-19-response-reporting](https://www.mass.gov/info-details/covid-19-response-reporting)
Massachusetts Department of Public Health COVID-19 Dashboard - Dashboard of Public Health Indicators

Sunday, December 13, 2020

Percent of Change Since Lowest Observed Value (LOV)

7-Day Average of New Confirmed Cases

7-Day Weighted Average of Positive Molecular Test Rate*

7-Day Average of Number of COVID-19 Patients in Hospital**

7-Day Average of COVID-19 Deaths***

*Calculated from total molecular tests for all of MA; **Includes only confirmed cases of COVID-19 in acute hospitals and alternate care sites; ***Includes deaths in only confirmed cases of COVID-19

Note: LOV = Lowest observed value, i.e. the lowest value the public health indicator has been since tracking started on April 15, 2020. Due to data lags, counts for most recent dates are likely incomplete, and thus measures are subject to change.

Massachusetts Department of Public Health COVID-19 Dashboard - Sunday, December 13, 2020

Testing by Date - Molecular (Percent Positive)

7-Day Weighted Average of Percent of Tests By Molecular Method that are Positive by Test Date

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 11:59pm on 12/12/2020. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. This includes individuals who have had more than one molecular test.

MA Statewide (metric on p.2)  MA Higher Education Only  MA with Higher Education Tests Removed
Confirmed COVID-19 Cases To Date by Date Individual Tested

- Confirmed Cases by Date
- 7-Day Average Confirmed Case Count

Total Confirmed Cases: 279,574

Average Daily Incidence Rate Per 100,000 (last 14 days)*: 50.0

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; State Population Estimate 2019: Small Area Population Estimates 2011-2020, version 2019, Massachusetts Department of Public Health, Bureau of Environmental Health; Tables and Figures created by the Office of Population Health. Note: all data are current as of 11:59pm on 12/12/2020. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.
Note: all data are current as of 11:59pm on 12/12/2020. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.
Massachusetts Department of Public Health COVID-19 Dashboard -
Testing by Date - Molecular (Total Tests Conducted Past 6 Weeks)

Total Number of Molecular Tests Performed by Date

- First Molecular Test Per Individual
- Molecular Tests that are Repeated in Individuals

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 11:59pm on 12/12/2020. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. This includes individuals who have had more than one molecular test.
Newly Reported Probable Cases: 176
Total Probable Cases: 11,004
Newly Reported Deaths Among Probable: 1
Total Deaths Among Probable Cases: 251

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health Note: all data are cumulative and current as of 11:59pm on 12/12/2020. Due to ongoing data cleaning efforts, the number of newly reported cases may not exactly match the change in total cases from the previous day. For the COVID-19 probable case definition, please see the Glossary at the end of this document in 'Definitions and Disclaimers'.
Number of Individuals Tested by Antigens by Test Date

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.
Note: all data are current as of 11:59pm on 12/12/2020. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.

Massachusetts Department of Public Health COVID-19 Dashboard -

Daily Confirmed Hospitalizations

Total Confirmed COVID Patients in Hospital

- Confirmed COVID Hospitalizations
- 7-Day Average of Confirmed COVID Hospitalizations

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 3:00pm on 12/12/2020. For purposes of this reporting, "confirmed" are cases with a PCR test. Hospitalization data includes alternate care sites beginning on December 6, 2020. Data prior to July 22, 2020 include both confirmed and suspected COVID hospitalizations, as confirmed COVID hospitalizations were not reported separately during this time.
Patients Reported as Hospitalized with Confirmed COVID-19 by Date

- Changes in Confirmed Hospitalized Patients by Date
- Total Hospital Census Today

Confirmed COVID-19 Cases Currently Hospitalized: 1,707

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 3:00pm on 12/12/2020. For purposes of this reporting, "confirmed" are cases with a PCR test. Hospitalization data includes alternate care sites beginning on December 6, 2020.
Sunday, December 13, 2020

Massachusetts Department of Public Health COVID-19 Dashboard - Daily and Cumulative COVID-19 ICU and Intubations

Patients Reported in ICU with COVID-19 by Date

- Changes in ICU Count by Date
- Confirmed Patients in ICU

Patients Reported as Intubated with COVID-19 by Date

- Changes in Intubation Count by Date
- Confirmed Patients Intubated

Count of Cases Currently in ICU: 342
Count of Cases Currently Intubated: 178

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 3:00pm on 12/12/2020.
Previous these graphs were based on rounded bed counts. As of 12/11/2020, they display the bed counts as reported.

Occupancy/ availability as reported by hospitals to DPH.

Regions shown represent EOHHS Regions. Note that total bed estimates may change day-to-day due to hospitals updating surge planning. As of June 16th, data reflects updated data collection methodology and the removal of unstaffed beds from this analysis. Analysis here reflects total beds that hospitals could staff within 12-24 hours. As of 9/8/20, all observation beds and observation status patients are included in the Available Non-ICU Beds and Occupied Non-ICU Beds categories.
Total Hospital Capacity by Region (ICU)

Data collected as of 12/12/2020 3:00pm

By Region

- **Boston**: 82% occupied, 18% available
- **Central**: 63% occupied, 37% available
- **Metro West**: 73% occupied, 27% available
- **Northeast**: 85% occupied, 15% available
- **Southeast**: 66% occupied, 34% available
- **West**: 59% occupied, 41% available

Massachusetts

- **Total**: 73% occupied, 27% available (1,461 beds)

Previously these graphs were based on rounded bed counts. As of 12/11/2020, they display the bed counts as reported. Occupancy/ availability as reported by hospitals to DPH.

Regions shown represent EOHHS Regions. Note that total bed estimates may change day-to-day due to hospitals updating surge planning. As of June 16th, data reflects updated data collection methodology and the removal of unstaffed beds from this analysis. Analysis here reflects total beds that hospitals could staff within 12-24 hours. As of 9/8/20, all observation beds and observation status patients are included in the Available Non-ICU Beds and Occupied Non-ICU Beds categories.

Testing and Cases

Hospitalization

Deaths

Demographics, Activities, and Key Settings

Definitions and Disclaimers
Total Deaths* in COVID-19 Cases by Date of Death

- New Confirmed Deaths
- New Probable Deaths

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 11:59pm on 12/12/2020; *Counts on the trend chart do not match total number of deaths reported, as there is a several day lag in reporting by date of death. Includes both probable and confirmed cases. For confirmed and probable case definitions, please see the Glossary at the end of this document in ‘Definitions and Disclaimers’.

Total Deaths in COVID-19 Cases

11,349
Massachusetts Department of Public Health COVID-19 Dashboard - Sunday, December 13, 2020
All Molecular COVID-19 Tests Associated with Higher Education Testing

7-Day Average Total Molecular Tests by Date
- MA without Higher Education
- Higher Education

7-Day Average Total Positive Molecular Tests by Date
- MA without Higher Education
- Higher Education

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.
Note: all data are current as of 11:59pm on 12/12/2020. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. This includes individuals who have had more than one molecular test.
Massachusetts Department of Public Health COVID-19 Dashboard -
COVID-19 Cases in Long-Term Care (LTC) Facilities

| Residents/Healthcare Workers of Long-Term Care Facilities with Probable or Confirmed COVID-19 | 28,750 |
| Long-Term Care Facilities Reporting At Least One Probable or Confirmed Case of COVID-19 | 404 |
| Probable or Confirmed COVID-19 Deaths Reported in Long-Term Care Facilities | 7,007 |

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health.
Note: all data are cumulative and current as of 11:59pm on 12/12/2020. Data includes nursing homes, skilled nursing facilities, and rest homes.

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 11:59pm on 12/12/2020. Includes both probable and confirmed cases. For the COVID-19 probable case definition, please see the Glossary at the end of this document in Definitions and Disclaimers.

Direct links to the DOC information found on those pages include:
- Staff data - https://www.mass.gov/lists/doc-covid-19-staff-testing-reports
Please Note: the following terms and definitions apply to COVID-19 only.

**Case Definition:** A standard set of criteria (including symptoms, laboratory tests and exposure) used to count persons who may have COVID-19. Case definitions tell public health professionals which people with disease to count; they don't tell healthcare providers how to diagnose or treat COVID.

**Confirmed Case:** A person is counted as a confirmed case of COVID-19 if they have a positive molecular test.

**Probable Case:** A person is counted as a probable case in three ways:
1. if they have a positive antigen test;
2. if they have COVID symptoms AND were exposed to someone with COVID;
3. if they died and their death certificate lists COVID as a cause of death.

**COVID-19 Antigen Test:** This test identifies the presence of proteins on the surface of the virus. These diagnostic tests are somewhat less accurate (i.e., low sensitivity) than molecular tests but a positive result is suggestive of current infection.

**COVID-19 Molecular Test:** Also known as a PCR test. This diagnostic test identifies the presence of virus’s genetic material. These tests are very accurate and a positive result means someone has current or very recent infection.

**Estimated active cases:** Patients with a confirmed COVID-19 diagnosis in the last 21 days.

**Testing by Date:** This refers to the date the sample (usually nasal swab or blood) was taken. Most reports and figures in this dashboard use this date.

**Total Tests:** This represents the total number of tests done and includes people who have had multiple tests.
