The front page of the dashboard has been reformatted. Antibody tests (individual and total numbers) can be found on page 18.
Massachusetts Department of Public Health COVID-19 Dashboard - Dashboard of Public Health Indicators

Sunday, November 01, 2020

7 Day Weighted Average of Positive Molecular Test Rate*

3 Day Average of Number of COVID-19 Patients in Hospital**

Number of Hospitals using Surge Capacity

3 Day Average of COVID-19 Deaths***

*Calculated from total molecular tests; **Includes both confirmed and suspected cases of COVID-19; ***Includes deaths in only confirmed cases of COVID-19

Note: Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data previously reported. As of 9/8/20, patients on an observation stay with confirmed or suspected COVID are included in total COVID hospitalization figures in addition to patients who are admitted. This update will create consistency in reporting and provide a more complete picture of total COVID hospitalizations. Most hospitals were already including observation status patients in their reporting, so this update is not expected to have a significant impact on daily trends. LOV = Lowest observed value, i.e. the lowest value the public health indicator has been since tracking started.

Massachusetts Department of Public Health COVID-19 Dashboard-Glossary of Terms

Please Note: the following terms and definitions apply to COVID-19 only.

**COVID-19 Molecular Test:** Also known as a PCR test. This diagnostic test identifies the presence of virus’s genetic material. These tests are very accurate and a positive result means someone has current or very recent infection.

**COVID-19 Antigen Test:** This test identifies the presence of proteins on the surface of the virus. These diagnostic tests are somewhat less accurate (i.e., low sensitivity) than molecular tests but a positive result is suggestive of current infection.

**COVID-19 Antibody Test:** Also known as a serology test. This test identifies antibodies; antibodies are the proteins produced by the immune system to fight off an infection. Because antibodies take days to weeks to make after infection, a positive result indicates infection at some point in the past. It is not a diagnostic test.

**Testing by Date:** This refers to the date the sample (usually nasal swab or blood) was taken. Most reports and figures in this dashboard use this date.

**Total Tests:** This represents the total number of tests done and includes people who have had multiple tests.

**Persons Tested:** This represents the total number of persons who had at least one test done. If a person had more than one test, they are still counted only once.

**Case Definition:** A standard set of criteria (including symptoms, laboratory tests and exposure) used to count persons who may have COVID-19. Case definitions tell public health professionals which people with disease to count; they don’t tell healthcare providers how to diagnose or treat COVID.

- **Confirmed Case:** A person is counted as a confirmed case of COVID-19 if they have a positive molecular test.
- **Probable Case:** A person is counted as a probable case in three ways:
  1. if they have a positive antigen test;
  2. if they have COVID symptoms AND were exposed to someone with COVID;
  3. if they died and their death certificate lists COVID as a cause of death.

**Suspected Hospitalized Cases:** Patients without a laboratory confirmed COVID-19 diagnosis but who, as determined by the hospital, have signs and symptoms compatible with COVID-19 (most patients with confirmed COVID-19 have developed fever and/or symptoms of acute respiratory illness, such as cough, shortness of breath, or myalgia/fatigue).
Massachusetts Department of Public Health COVID-19 Dashboard - Daily and Cumulative Confirmed Cases

Confirmed COVID-19 Cases To Date by Date Individual Tested

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page; Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.
Testing by Date - Molecular (Individuals)
Total Number of Individuals with at Least One Molecular Test Performed by Date

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page. Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. Testing by Date - Molecular (Individual) counts the number of individuals with at least one molecular test; Testing by Date - Molecular (Total Tests Conducted) counts the total number of molecular tests performed. This includes individuals who have had more than one molecular test.
Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page. Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. Testing by Date - Molecular (Individual) counts the number of individuals with at least one molecular test; Testing by Date - Molecular (Total Tests Conducted) counts the total number of molecular tests performed. This includes individuals who have had more than one molecular test.
Massachusetts Department of Public Health COVID-19 Dashboard-
Testing by Date - Molecular (Percent Positive)

Percent of Tests By Molecular Method that are Positive by Test Date

- Percent of Tested Individuals who are Positive
- Percent of All Molecular Tests that are Positive

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page. Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete; this graph is lagged by one day as a result. Percent of Tested Individuals who are Positive counts the number of individuals with at least one molecular test; Percent of all Molecular Tests that are Positive counts the total number of molecular tests performed. This includes individuals who have had more than one molecular test.
Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 12:00pm on the date at the top of the page. These data include both confirmed and suspected COVID-19 cases. For purposes of this reporting, “confirmed” are cases with a PCR test. “Suspected” are those with symptoms who have not had a test result yet. Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously. As of 9/8/20, patients on an observation stay with confirmed or suspected COVID are included in total COVID hospitalization figures in addition to patients who are admitted. This update will create consistency in reporting and provide a more complete picture of total COVID hospitalizations. Most hospitals were already including observation status patients in their reporting, so this update is not expected to have a significant impact on daily trends.
Massachusetts Department of Public Health COVID-19 Dashboard - Sunday, November 01, 2020

New Daily COVID-19 Hospital Admissions

Confirmed and Suspected COVID-19 Hospital Admissions by Day

- Confirmed COVID-19 Hospital Admissions
- Suspected COVID-19 Hospital Admissions

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 12:00pm on the date at the top of the page. For purposes of this reporting, "confirmed" are cases with a PCR test. "Suspected" are those with symptoms who have not had a test result yet. Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously.
Massachusetts Department of Public Health COVID-19 Dashboard -

Daily and Cumulative COVID-19 ICU and Intubations

Patients Reported in ICU with COVID-19 by Date

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 12:00pm on the date at the top of the page. Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously.
Massachusetts Department of Public Health COVID-19 Dashboard - Daily and Cumulative Deaths

## Daily and Cumulative County Data

**County** | **New Confirmed Cases Reported Today** | **Cumulative Confirmed Cases To Date**
--- | --- | ---
Barnstable | 22 | 2,051
Berkshire | 5 | 789
Bristol | 104 | 12,812
Dukes | 1 | 90
Essex | 181 | 24,500
Franklin | 4 | 483
Hampden | 105 | 10,359
Hampshire | 11 | 1,520
Middlesex | 224 | 32,781
Nantucket | 3 | 172
Norfolk | 98 | 12,089
Plymouth | 68 | 11,631
Suffolk | 180 | 29,031
Unknown | 10 | 335
**Worcester** | **123** | **17,017**

**Total** | **1,139** | **155,660**

**County** | **New Confirmed and Probable Deaths Reported Today** | **Cumulative Confirmed and Probable Deaths To Date**
--- | --- | ---
Barnstable | 0 | 185
Berkshire | 0 | 52
Bristol | 2 | 763
Dukes and Nantucket | 0 | 2
Essex | 2 | 1,358
Franklin | 0 | 73
Hampden | 4 | 821
Hampshire | 0 | 155
Middlesex | 7 | 2,288
Norfolk | 1 | 1,112
Plymouth | 2 | 839
Suffolk | 2 | 1,183
Unknown | 0 | 5
**Worcester** | **2** | **1,177**

**Total** | **22** | **10,013**

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health
Note: all data are current as of 8:00am on the date at the top of the page. Includes both probable and confirmed cases. For confirmed and probable case definitions, please see the Glossary on p. 4.
Deaths by Sex, Previous Hospitalization, & Underlying Conditions

Total Deaths by Sex+

- Female: 5,417 (54.1%)
- Male: 4,590 (45.9%)

Total Deaths with a Previous Hospitalization*

- Yes: 5,231 (52.2%)
- unknown: 1,643 (16.4%)
- No: 3,139 (31.3%)

Total Deaths** with Underlying Conditions

- Yes: 5,130 (98.2%)
- No: 96 (1.8%)

Data Sources:
COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital survey; Tables and Figures created by the Office of Population Health.

Note: all data are cumulative and current as of 8:00am on the date at the top of the page; *Hospitalized at any point in time, not necessarily the current status; **Only includes data from deaths following completed investigation, figures are updates as additional investigations are completed; + Excludes unknown values. Includes both probable and confirmed cases.
Massachusetts Department of Public Health COVID-19 Dashboard—
Cases, Hospitalizations, & Deaths by Race/Ethnicity

Sunday, November 01, 2020

The following caveats apply to these data:
1. Information on race and ethnicity is collected and reported by laboratories, healthcare providers and local boards of health and may or may not reflect self-report by the individual case.
2. If no information is provided by any reporter on a case’s race or ethnicity, DPH classifies it as missing.
3. A classification of unknown indicates the reporter did not know the race and ethnicity of the individual, the individual refused to provide information, or that the originating system does not capture the information.
4. Other indicates multiple races or that the originating system does not capture the information.

**Note:** COVID-19 testing is currently conducted by dozens of private labs, hospitals, and other partners and the Department of Public Health is working with these organizations to improve data reporting by race and ethnicity, to better understand where, and on whom, the burden of illness is falling so the Commonwealth can respond more effectively. On 4/8, the Commissioner of Public Health issued an Order related to collecting complete demographic information for all confirmed and suspected COVID-19 patients.

---

**Data Sources:**
COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health. Note: all data are cumulative and current as of 8:00am on the date at the top of the page; *Hospitalization refers to status at any point in time, not necessarily the current status of the patient/demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital surveys. Includes both probable and confirmed cases.
Residents/Healthcare Workers of Long-Term Care Facilities with Probable or Confirmed COVID-19: 25,714

Long-Term Care Facilities Reporting At Least One Probable or Confirmed Case of COVID-19: 391

Probable or Confirmed COVID-19 Deaths Reported in Long-Term Care Facilities: 6,426
Sunday, November 01, 2020

Probable Case Information

Newly Reported Probable Cases Today: 0
Total Probable Cases: 4,047

Newly Reported Deaths Among Probable Today: 0
Total Deaths Among Probable Cases: 225

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health.

Note: all data are cumulative and current as of 8:00am on the date at the top of the page. For the COVID-19 probable case definition, please refer to the Glossary on p.4.
Massachusetts Department of Public Health COVID-19 Dashboard - Testing by Date - Antibody

Number of Individuals Tested by Antibody by Test Date

New Individuals Tested by Antibody Tests: 153
Total Individuals Tested by Antibody Tests: 127,372

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratories Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page. Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. Please note that some individuals have been tested by both molecular and antibody methods.
Massachusetts Department of Public Health COVID-19 Dashboard -
Sunday, November 01, 2020

Testing by Date - Antigens

Number of Individuals Tested by Antigens by Test Date

- Individuals with Negative Antigen Tests
- Individuals with Positive Antigen Tests
- Cumulative Patients Tested by Antigen Method

New Individuals Tested by Antigen Tests: 698
Total Individuals Tested by Antigen Tests: 188,181

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page. Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.
Massachusetts Department of Public Health COVID-19 Dashboard -
Total Hospital Capacity by Region

Data collected as of 10/31/2020 5:00pm

By Region

- **Boston**
  - Available Alternate Medical Site Beds: 20%
  - Available non-ICU Beds (including Surge): 7%
  - Available ICU Beds (including Surge): 7%
  - Occupied Alternate Medical Site Beds: 10%
  - Occupied non-ICU Beds: 7%
  - Occupied ICU Beds: 5%
- **Central**
  - Available Alternate Medical Site Beds: 21%
  - Available non-ICU Beds (including Surge): 7%
  - Available ICU Beds (including Surge): 7%
  - Occupied Alternate Medical Site Beds: 7%
  - Occupied non-ICU Beds: 5%
  - Occupied ICU Beds: 5%
- **Metro West**

  - Available non-ICU Beds (including Surge): 5%
  - Available ICU Beds (including Surge): 7%
  - Occupied Alternate Medical Site Beds: 5%
  - Occupied non-ICU Beds: 7%
  - Occupied ICU Beds: 5%
- **Northeast**
  - Available Alternate Medical Site Beds: 29%
  - Available non-ICU Beds (including Surge): 7%
  - Available ICU Beds (including Surge): 5%
  - Occupied Alternate Medical Site Beds: 7%
  - Occupied non-ICU Beds: 7%
  - Occupied ICU Beds: 5%
- **Southeast**
  - Available Alternate Medical Site Beds: 30%
  - Available non-ICU Beds (including Surge): 5%
  - Available ICU Beds (including Surge): 5%
  - Occupied Alternate Medical Site Beds: 5%
  - Occupied non-ICU Beds: 5%
  - Occupied ICU Beds: 5%
- **West**
  - Available Alternate Medical Site Beds: 37%
  - Available non-ICU Beds (including Surge): 11%
  - Available ICU Beds (including Surge): 47%
  - Occupied Alternate Medical Site Beds: 7%
  - Occupied non-ICU Beds: 5%
  - Occupied ICU Beds: 5%

Occupancy/ availability as reported by hospitals to DPH.
Regions shown represent EOHHS Regions. Note that total bed estimates may change day-to-day due to hospitals updating surge planning. As of June 16th, data reflects updated data collection methodology and the removal of unstaffed beds from this analysis. Analysis here reflects total beds that hospitals could staff within 12-24 hours. Note: Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously. As of 9/8/20, all observation beds and observation status patients will be included in the Available Non-ICU Beds and Occupied Non-ICU Beds categories.

Occupancy/ availability as reported by hospitals to DPH; *Specialty hospital data may be delayed and patient composition may vary.

Note: Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously. As of 9/8/20, patients on an observation stay with confirmed or suspected COVID are included in total COVID hospitalization figures in addition to patients who are admitted. This update will create consistency in reporting and provide a more complete picture of total COVID hospitalizations. Most hospitals were already including observation status patients in their reporting, so this update is not expected to have a significant impact on daily trends.
