Note: For definitions, please see the Glossary at the end of this document in "Definitions and Disclaimers". Average age of hospitalized cases and deaths are calculated for a two week period covering 10/25/2020 to 11/07/2020. Please see the most current weekly dashboard for more details [https://www.mass.gov/info-details/covid-19-response-reporting](https://www.mass.gov/info-details/covid-19-response-reporting)

*Last updated Wednesday, November 11, 2020
7-Day Average of New Confirmed Cases

- **7-Day Weighted Average of Positive Molecular Test Rate**: 1% to 2%
- **7-Day Average of Number of COVID-19 Patients in Hospital**: 320 to 600
- **7-Day Average of COVID-19 Deaths**: 15 to 20

**7-Day Average of Positive Molecular Test Rate**: *Calculated from total molecular tests for all of MA; **Includes only confirmed cases of COVID-19; ***Includes deaths in only confirmed cases of COVID-19

Note: LOV = Lowest observed value, i.e. the lowest value the public health indicator has been since tracking started on April 15, 2020. Due to data lags, counts for most recent dates are likely incomplete, and thus measures are subject to change.

Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, November 12, 2020

Testing by Date - Molecular (Percent Positive)

7-Day Weighted Average of Percent of Tests By Molecular Method that are Positive by Test Date

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. This includes individuals who have had more than one molecular test.
Confirmed COVID-19 Cases To Date by Date Individual Tested

Total Confirmed Cases
174,953

Average Daily Incidence Rate Per 100,000 (last 14 days)*
20.7

Note: all data are current as of 8:00am on the date at the top of the page. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.

Massachusetts Department of Public Health COVID-19 Dashboard -
Daily Confirmed Cases (Past 6 Weeks)

Confirmed COVID-19 Cases by Date Individual Tested

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.
Note: all data are current as of 8:00am on the date at the top of the page. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.
Massachusetts Department of Public Health COVID-19 Dashboard - Positive Tests by Age Group

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.
Note: this data was last updated on Wednesday, November 11, 2020. This includes individuals who have had more than one molecular test.
Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, November 12, 2020

Testing by Date - Molecular (Total Tests Conducted Since March)

Total Molecular Tests by Date

- All Molecular Tests
- 7-Day Average of All Molecular Tests

Note: all data are current as of 8:00am on the date at the top of the page. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. This includes individuals who have had more than one molecular test.
Thursday, November 12, 2020

Massachusetts Department of Public Health COVID-19 Dashboard - Testing by Date - Molecular (Total Tests Conducted Past 6 Weeks)

Total Number of Molecular Tests Performed by Date

- **First Molecular Test Per Individual**
- **Molecular Tests that are Repeated in Individuals**

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. This includes individuals who have had more than one molecular test.
Newly Reported Probable Cases: 166

Total Probable Cases: 5,236

Newly Reported Deaths Among Probable: 0

Total Deaths Among Probable Cases: 227

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health. Note: all data are cumulative and current as of 8:00am on the date at the top of the page. For the COVID-19 probable case definition, please see the Glossary at the end of this document in “Definitions and Disclaimers”.
Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, November 12, 2020

Testing by Date - Antigens

Number of Individuals Tested by Antigens by Test Date

- New Test Count
- Total Individuals Tested

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.

Massachusetts Department of Public Health COVID-19 Dashboard-
Daily Confirmed Hospitalizations

Thursday, November 12, 2020

Total Confirmed COVID Patients in Hospital

- Confirmed COVID Hospitalizations
- 7-Day Average of Confirmed COVID Hospitalizations

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 3:00pm the day before the date at the top of the page. For purposes of this reporting, “confirmed” are cases with a PCR test. Data prior to July 22, 2020 include both confirmed and suspected COVID hospitalizations, as confirmed COVID hospitalizations were not reported separately during this time.

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 3:00pm the day before the date at the top of the page. For purposes of this reporting, “confirmed” are cases with a PCR test. Data prior to July 22, 2020 include both confirmed and suspected COVID hospitalizations, as confirmed COVID hospitalizations were not reported separately during this time.
Massachusetts Department of Public Health COVID-19 Dashboard - Daily COVID-19 Hospitalizations

Patients Reported as Hospitalized with Confirmed COVID-19 by Date

- Changes in Confirmed Hospitalized Patients by Date
- Total Hospital Census Today

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 3:00pm the day before the date at the top of the page. For purposes of this reporting, "confirmed" are cases with a PCR test.
Patients Reported in ICU with COVID-19 by Date

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 3:00pm the day before the date at the top of the page.

Patients Reported as Intubated with COVID-19 by Date

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: data are current as of 3:00pm the day before the date at the top of the page.
Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, November 12, 2020

Total Hospital Capacity by Region (Non-ICU)

Data collected as of 11/11/2020 3:00pm

Occupancy/ availability as reported by hospitals to DPH.

Regions shown represent EOHHS Regions. Note that total bed estimates may change day-to-day due to hospitals updating surge planning. As of June 16th, data reflects updated data collection methodology and the removal of unstaffed beds from this analysis. Analysis here reflects total beds that hospitals could staff within 12-24 hours. As of 9/8/20, all observation beds and observation status patients will be included in the Available Non-ICU Beds and Occupied Non-ICU Beds categories.

Massachusetts Department of Public Health COVID-19 Dashboard -

Daily Confirmed Deaths (Since March)

Thursday, November 12, 2020

Confirmed COVID Deaths by Date of Death

- Confirmed Deaths
- 7-Day Average of Confirmed Deaths

Total Deaths Among Confirmed Cases

10,015

Note: all data are current as of 8:00am on the date at the top of the page.
Total Deaths* in COVID-19 Cases by Date of Death

- New Confirmed Deaths
- New Probable Deaths

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health

Note: all data are current as of 8:00am on the date at the top of the page; *Counts on the trend chart do not match total number of deaths reported, as there is a several day lag in reporting by date of death. Includes both probable and confirmed cases. For confirmed and probable case definitions, please see the Glossary at the end of this document in "Definitions and Disclaimers".

Total Deaths in COVID-19 Cases: 10,242

Glossary of Terms

Please Note: the following terms and definitions apply to COVID-19 only.

**Case Definition:** A standard set of criteria (including symptoms, laboratory tests and exposure) used to count persons who may have COVID-19. Case definitions tell public health professionals which people with disease to count; they don't tell healthcare providers how to diagnose or treat COVID.

**Confirmed Case:** A person is counted as a confirmed case of COVID-19 if they have a positive molecular test.

**Probable Case:** A person is counted as a probable case in three ways:
1. if they have a positive antigen test;
2. if they have COVID symptoms AND were exposed to someone with COVID;
3. if they died and their death certificate lists COVID as a cause of death.

**COVID-19 Antigen Test:** This test identifies the presence of proteins on the surface of the virus. These diagnostic tests are somewhat less accurate (i.e., low sensitivity) than molecular tests but a positive result is suggestive of current infection.

**COVID-19 Molecular Test:** Also known as a PCR test. This diagnostic test identifies the presence of virus’s genetic material. These tests are very accurate and a positive result means someone has current or very recent infection.

**Estimated active cases:** Patients with a confirmed COVID-19 diagnosis in the last 21 days.

**Testing by Date:** This refers to the date the sample (usually nasal swab or blood) was taken. Most reports and figures in this dashboard use this date.

**Total Tests:** This represents the total number of tests done and includes people who have had multiple tests.
