

am writing at behest of my friends who oppose the development of nantucket sound for private profit. while wind energy may be a good idea, this is wrong place, time, scope, everything. please consider strongly these opposing views that one of the commonwealth's most values and valuable resources is in danger of being irreparably damaged in perpetuity. i support governor romney's ocean mangement act because it brings some sense to what is now a loop hole filled quagmire that the businessmen at cape wind wish to exploit. thank you.
