

QCML Criteria

Reinforcing Steel Manufacturers

General Requirements:

Reinforcing Steel (rebar) Manufacturers shall provide product in accordance with Section M8.01.0 of the MassDOT Standard Specifications for Highways and Bridges and contract special provisions.

The rebar Manufacturer shall be audited annually by the National Product Evaluation Program (NTPPEP). NTPPEP shall find that the facility is in compliance with the RSW Technical Committee Work Plan.

Product Listing, Expiration, and Re-Approval:

Once approved, the rebar will be listed on the MassDOT Qualified Construction Materials List. The facility shall remain on the approved list unless one of the following occurs:

- MassDOT Research & Materials determines that the rebar no longer meets the minimum requirements of the Standard Specifications or the NTPPEP audit program.
- The facility was not audited by NTPPEP during the most recent audit cycle.
- It is determined that material supplied by the facility does not meet MassDOT requirements.
