Description

Risk Watch is an injury prevention program for children in preschool through eighth grade. The activities combine education and imagination to help children acquire lifesaving skills through experiential learning. This program contains lesson plans, colorful lesson cards, information letters and evaluation tools for the educator.

Getting into character as **Detectives.** Students and teachers play the role of detective to look for important information on how to be safe. As safety detectives, the students will investigate mysteries in the eight risk areas. They will find clues and put together puzzles about safety situations.

890-037	Tobacco Consequences
890-030	Water Safety
890-033	Disabilities And Safety

Description

Risk Watch is an injury prevention program for children in preschool through eighth grade. The activities combine education and imagination to help children acquire lifesaving skills through experiential learning. This program contains lesson plans, colorful lesson cards, information letters and evaluation tools for the educator.

Getting into character as Reporters. Students and teachers take on the roll of reporter to identify and talk about situations that are risky so that they and others will become proficient in safety instruction and practice.

678-015	Electrical Safety

Description

Project Burn Prevention was a collaboration of the Shriners Burn Institute-Boston, Educational Development Center, and Massachusetts General Hospital. Materials and guides for other ages and community groups are available from the NFPA.
The guide contains information about the primary causes of burns to young children as well as the misconceptions children have about fire. This is very useful as background information. Activities, a letter to parents and helpful hints on working with this age group are included. There is also a bibliography for anyone interested in doing more reading and research.

No longer distributed, but the DFS library has a copy.

AGES 10-12 FIFTH & SIXTH GRADES

Key Fire Safety Behaviors

Description

Project Burn Prevention was a collaboration of the Shriners Burn Institute-Boston, Educational Development Center, and Massachusetts General Hospital. Materials and guides for other ages and community groups are available from the NFPA.
The guide contains information about the primary causes of burns to middle school age children and using “investigative reports” helps develop critical thinking skills on how burn injuries can be prevented. Good for use in both individual and group learning projects. Although not widely available and a little dated, it is a good resource that can easily be adapted.
Lessons on flammable liquid safety particularly useful.

AGES 10-12 FIFTH & SIXTH GRADES

Key Fire Safety Behaviors

1012-038 Tobacco Consequences

Description

Designed to be used in a classroom or youth group setting, this program invites youth to become critical movie and TV viewers. By drawing attention to how smoking is normalized (made to look acceptable) or glamorized (made to look cool) in many films and on television, Smoke Screeners will increase student awareness of tobacco use in popular entertainment. Very simply, the Smoke Screeners message for young people is "View and think!" Smoke Screeners was a project of the Massachusetts Department of Public Health and with their permission, adapted by the Centers for Disease Control and Prevention for national distribution. Schools and youth centers who work with kids ages 11 to 14 can obtain a complete Smoke Screeners kit free of charge from the CDC. The kit includes the Smoke Screeners video, poster and deluxe moderator's guide, written and designed by the educational media team at FableVision, and features a ready-to-go course guide with reproducibles (fact sheets, storyboards, resource listings and movie review sheets.) Now available on DVD.

1012-034 Surviving Severe Storms

1012-002 Understanding What Is Fire

1012-035 Community Role in Safety

Description

This program is aimed at middle school aged children in grades 6, 7, and 8. The goal of the curriculum is for students to develop critical thinking skills and learn to make responsible choices about fire and life safety. The core concepts taught in this program are that accurate knowledge about fire is essential, human-caused fires can be prevented, fire and life safety skills can be learned and fire and life safety skills are your personal responsibility. The program also teaches the role that the media plays in influencing our attitudes about fire.

Key Fire Safety Behaviors

Description

This curriculum on DVD was produced by the Society of Fire Protection Engineers in cooperation with Discovery Education and funded by a U.S. Department of Homeland Security grant. It contains segments on the role of fire safety in buildings, demonstrations of experiments associated with the chemistry of fire, and career opportunities in fire protection engineering. It is designed for high school chemistry students. Its lessons teach students about the dangers of fire and as a result, increase the students' awareness of fire and the importance of home fire prevention.

Comes on a DVD.
