**Description**

Project Burn Prevention was a collaboration of the Shriners Burn Institute-Boston, Educational Development Center, and Massachusetts General Hospital. Materials and guides for other ages and community groups are available from the NFPA. The guide contains information about the primary causes of burns to young children as well as the misconceptions children have about fire. This is very useful as background information. Activities, a letter to parents and helpful hints on working with this age group are included. There is also a bibliography for anyone interested in doing more reading and research.

No longer distributed, but the DFS library has a copy.

**AGES 10-12 FIFTH & SIXTH GRADES**

**Description**

Project Burn Prevention was a collaboration of the Shriners Burn Institute-Boston, Educational Development Center, and Massachusetts General Hospital. Materials and guides for other ages and community groups are available from the NFPA. The guide contains information about the primary causes of burns to middle school age children and using "investigative reports" helps develop critical thinking skills on how burn injuries can be prevented. Good for use in both individual and group learning projects. Although not widely available and a little dated, it is a good resource that can easily be adapted. Lessons on flammable liquid safety particularly useful.

Description

Get Real About Tobacco is a K-12 curriculum designed to decrease the likelihood that students will start using tobacco, to encourage students who use tobacco to quit and to help students promote messages the use of tobacco.

The curriculum comprises four units, addressing students in grades K-4, 4-6, 6-9, and 9-12. It has lessons that focus on information and lessons that focus on attitudes. They are taught in a variety of ways in order to accommodate different learning styles. This program also contains three videos to enhance student learning.(1997)

Developed by the Comprehensive Health Education Foundation 1-800-323-2433. Distributed by Altschul Group Corp. 1-800-323-9084.

**TARGET GROUP**

**AGES 10-12 FIFTH & SIXTH GRADES**

**Description**

Designed to be used in a classroom or youth group setting, this program invites youth to become critical movie and TV viewers. By drawing attention to how smoking is normalized (made to look acceptable) or glamorized (made to look cool) in many films and on television, Smoke Screeners will increase student awareness of tobacco use in popular entertainment. Very simply, the Smoke Screeners message for young people is "View and think!" Smoke Screeners was a project of the [Massachusetts Department of Public Health](#) and with their permission, adapted by the [Centers for Disease Control and Prevention](#) for national distribution. Schools and youth centers who work with kids ages 11 to 14 can obtain a complete Smoke Screeners kit free of charge from the CDC. The kit includes the Smoke Screeners video, poster and deluxe moderator's guide, written and designed by the educational media team at [FableVision](#), and features a ready-to-go course guide with reproducibles (fact sheets, storyboards, resource listings and movie review sheets.) Now available on DVD.

**TARGET GROUP**

**AGES 10-12 FIFTH & SIXTH GRADES**

**Description**

This program is aimed at middle school aged children in grades 6, 7, and 8. The goal of the curriculum is for students to develop critical thinking skills and learn to make responsible choices about fire and life safety. The core concepts taught in this program are that accurate knowledge about fire is essential, human-caused fires can be prevented, fire and life safety skills can be learned and fire and life safety skills are your personal responsibility. The program also teaches the role that the media plays in influencing our attitudes about fire.

**TARGET GROUP**

**High School**

**Description**

This curriculum on DVD was produced by the Society of Fire Protection Engineers in cooperation with Discovery Education and funded by a U.S. Department of Homeland Security grant. It contains segments on the role of fire safety in buildings, demonstrations of experiments associated with the chemistry of fire, and career opportunities in fire protection engineering. It is designed for high school chemistry students. Its lessons teach students about the dangers of fire and as a result, increase the students' awareness of fire and the importance of home fire prevention.

Comes on a DVD.

<b>MEDIA TYPE</b>	VIDEO	<b>REFERENCE #</b>	V9		Starring local television reporter Jack Harper, this film burns a suburban ranch-style home. It shows the home before, during and after the fire and then again with sprinklers. During the fire, started by a cigarette in a waste basket next to the couch, test instruments measure the temperature and you hear about how much time has elapsed as you watch the smoke rise, hear the smoke alarms sound, and see the fire progress from both inside and outside the home. High impact. Use for adults and carefully with older grades. Video and DVD.

				2002 NFPA presents news footage of children who said they knew what to do in a fire, who actually slept through a home smoke alarm activation. After practicing several home night time fire drills, the children were filmed again. This time they all responded appropriately. Excellent film to use with adults to get them to actually practice home fire drills.
