German court rules Meta tracking technology violates European privacy laws

therecord.media

A German court has ruled that Meta must pay €5,000 (\$5,900) to a German Facebook user who sued the platform for embedding tracking technology in third-party websites — a ruling that could open the door to large fines down the road over data privacy violations relating to pixels and similar tools.

The head of the California Privacy Protection Agency on the future of data privacy regulation

therecord.media

Kemp spoke with Recorded Future News about why he believes data brokers are dangerous and whether forthcoming federal privacy legislation is likely to wipe out California's pioneering privacy law.

Manufacturing Security: Why Default Passwords Must Go

thehackernews.com

If you didn't hear about Iranian hackers breaching US water facilities, it's because they only managed to control a single pressure station serving 7,000 people. What made this attack noteworthy wasn't its scale, but how easily the hackers gained access — by simply using the manufacturer's default password "1111." This narrow escape prompted CISA to urge manufacturers to eliminate default...

Securing Data in the AI Era

thehackernews.com

As businesses increasingly rely on cloud-driven platforms and AI-powered tools to accelerate digital transformation, the stakes for safeguarding sensitive enterprise data have reached unprecedented levels. The Zscaler ThreatLabz 2025 Data Risk Report reveals how evolving technology landscapes are amplifying vulnerabilities, highlighting the critical need for a proactive and unified approach to...

Microsoft Patch Tuesday, July 2025 Edition

krebsonsecurity.com

Microsoft today released updates to fix at least 137 security vulnerabilities in its Windows operating systems and supported software. None of the weaknesses addressed this month are known to be actively exploited, but 14 of the flaws earned Microsoft's most-dire "critical" rating, meaning they could be exploited to seize control over vulnerable Windows PCs with little or no help from users.
