Multiple Vulnerabilities in Google Chrome Could Allow for Arbitrary Code Execution

www.cisecurity.org

>Multiple vulnerabilities have been discovered in Google Chrome, the most severe of which could allow for arbitrary code execution. Successful exploitation of the most severe of these vulnerabilities could allow for arbitrary code execution in the ...

A Plan to Protect Critical Infrastructure from 21st Century Threats

www.cisa.gov

On April 30th, the White House released National Security Memorandum-22 (NSM) on Critical Infrastructure Security and Resilience, which updates national policy on how the U.S. government protects and secures critical infrastructure from cyber and all-hazard threats. NSM-22 recognizes the changed risk landscape over the past decade and leverages the enhanced authorities of federal departments and a
