Jaguar Land Rover to restart production following cyberattack

therecord.media

After halting global production last month, Jaguar Land Rover says it will restart operations and provide financial support to some of its suppliers.

Russia is at 'hybrid war' with Europe, warns EU chief, calling for members 'to take it very seriously'

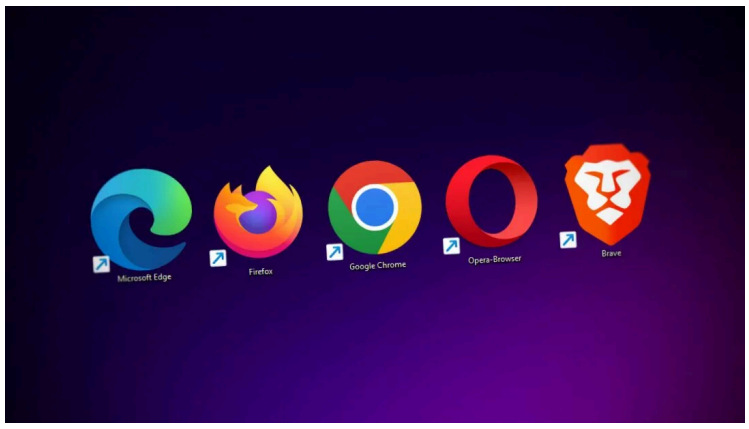
therecord.media

Russia is behind a campaign of cyberattacks, sabotage and provocation across Europe, according to the president of the European Commission, who warned on Wednesday morning: "It is time to call it by its name. This is hybrid warfare, and we have to take it very seriously."

LockBit, Qilin, and DragonForce Join Forces to Dominate the Ransomware Ecosystem

thehackernews.com

Three prominent ransomware groups DragonForce, LockBit, and Qilin have announced a new strategic ransomware alliance, once underscoring continued shifts in the cyber threat landscape.



California enacts law giving consumers ability to universally opt out of data sharing

therecord.media

California Gov. Gavin Newsom on Wednesday signed a bill which requires web browsers to make it easier for Californians to opt-out of allowing third parties to sell their data.

FBI, UK gov't urge orgs to patch Oracle E-Business vuln after alleged Clop campaign

therecord.media

Oracle issued a security alert this weekend urging customers to patch a vulnerability currently being exploited by cybercriminals.

Germany will not support 'Chat Control' message scanning in the EU

therecord.media

German officials on Wednesday said they will vote against a European Union proposal to allow the scanning of private messages even on end-to-end encrypted messaging platforms, signaling that the bloc will not have the votes to move forward with a controversial measure known as Chat Control.

ShinyHunters Wage Broad Corporate Extortion Spree

krebsonsecurity.com

A cybercriminal group that used voice phishing attacks to siphon more than a billion records from Salesforce customers earlier this year has launched a website that threatens to publish data stolen from dozens of Fortune 500 firms if they refuse to pay a ransom. The group also claimed responsibility for a recent breach involving Discord user data, and for stealing terabytes of sensitive files...

Russian hackers turn to AI as old tactics fail, Ukrainian CERT says

therecord.media

Russian hackers are now using AI not only to write phishing messages but also to generate malicious code itself.

Renewal of cyber information-sharing law must mind the gap, senator says

therecord.media

Companies that are still sharing threat information with the government despite the lapse of the law known as CISA 2015 should be protected retroactively when Congress revives that authority, Sen. Gary Peters says.
