Password Tips!

Password Strength

- ✓ **1.** Create long passwords. Longer passwords are harder to guess or crack.
- ✓ **2.** Create complex passwords.
 - a. Use capital and lower-case letters.
 - b. Use symbols and numbers.
 - c. Do not use any word that is found in the dictionary.
- ✓ **3.** Use a password manager to securely store complex passwords. Search your preferred application store to decide which password manager works best for you.
- ✓ **4.** Never reuse passwords for different accounts.
