JOB FAIR

Wednesday, May 15th, 2019

1:00 - 4:00 PM

800 Kelly Way
Holyoke, MA 01040

COMPANY OVERVIEW

Back in 1879, Daniel O'Connell probably could not have predicted the company he founded would grow to become The O'Connell Companies. What started out as one man's vision for a small, local construction company, has grown into a sophisticated business offering a full range of construction, engineering, investment, facility management, and energy management services. Daniel O'Connell's integrity, wisdom, and personal commitment to excellence became the principles which have guided the growth of this company for almost 140 years.

ESTABLISHED 1879

DANIEL O'CONNELL'S SONS

*Construction Management Services And
Project Planning Expertise*

SEEKING FIELD ENGINEERS & CONSTRUCTION MANAGERS TO JOIN US....

The successful candidate for these entry level positions will be assigned to work on a project site, under the supervision of a Project Manager and Superintendent on the job. Responsibilities include the following:

- Survey layout of control lines, establish various locations in relation to property lines.
- Interpret drawings and assist construction supervision and trades personnel in maintaining adherence to locations, dimensions and specifications.
- As-built survey of work in place, including generating electronic records.
- Estimate quantity of materials and related items for various aspects of the work.
- Interpret drawings for trade personnel, obtain corrections or clarification of drawings and provide or obtain any missing or additional information required.
- Quality control oversight of the work of various trades as required by project specifications.
- Work with and assist subcontractors in following drawings, specifications, quality standards and in coordinating details of scheduling.
- Maintain effective liaison with construction supervision, architects and engineers.
- Execute company safety requirements, including daily site inspection for conformance with company safety policy and OSHA standards
- Maintain project records and manpower reports. Update contract documents to reflect all supplemental information issued by the design team over the course of the project.
- Perform various other related or associated duties as assigned or as necessitated by the project.

Requirements

- Two or four year degree in Construction Management, Civil Engineering or related curriculum.
