

David Pladziewicz MD MBA
Staff Cardiologist,
Chairman of the Board of Health, Medford
Re: Surgi-center Hearing; Medford Mass. August 22,2018

1. Is there a % allocation of total project cost by law, that must be invested into service area community programs; associated with the building of this project?
2. If Yes, what % of the total cost?
3. Is there a committee that decides where/what community programs that money is allocated too?
4. If so, is a Medford representative on that committee? (ie. Marianne O'Connor-Director of the Medford Board of Health)
 - ? Medford get most of these \$\$ as this community has most adversely impacted with lost services since merger
 - ? utilize independent organization recipients, not Melrose Wakefield HealthCare/Wellforce owned entities (giving to self)
5. Who are the joint partners in this project? What written plans for this are public?
6. Who audits appropriateness of patients that will receive care there? Historically, transfer of broken hips by ambulance for physician convenience, not patient centered
7. If for profit entities, will costs of the procedures/testing be higher; ? comparison list exists
8. Is MD access to this center restricted to only certain Physicians; ie. to only partners in the joint venture or open to all credentialed doctors/patients regardless of specific organization employment?
