

Ice Sled Locations 2018

Calling the rink in advance is recommended.

Ice sleds offer a seated option for skaters with disabilities. Seated skaters can propel themselves or be pushed by another skater using a handle. Skate walkers provide balance support for standing skaters.

Sled skaters must provide their own transfer support. Please bring your own helmet to use with skate walkers. All equipment is best for use during uncrowded public skating times.

Contact DCR's Universal Access Program at (413) 545-5353 for more information on adaptive skating equipment or accessible recreation opportunities.
