DCR Recreational Advisory: Waterfront Safety

WHAT: Due to continuing warm weather, the Department of Conservation and Recreation (DCR) would like to remind visitors that waterfront services have ended for the season, including lifeguard services at agency-managed inland and coastal beaches and wading pools across Massachusetts, and swimming is no longer permitted at these locations. We encourage waterfront visitors to use caution and stay out of the water. Instead, we urge those looking for relief from the heat to visit DCR-managed spray decks, which will remain open through Sunday, September 15, 2024, daily from 8 a.m. to dusk. For more information, please visit the agency's [swimming webpage](#).

WHERE: DCR-managed inland and coastal beaches, wading pools, and spray decks
