

Health and Safety Training Providers

4/13/2023

Many OSHA regulations require employee safety training for the equipment they use and tasks they perform.

A summary of training requirements for municipal departments is provided on the *Massachusetts State Plan* website:

DPW Garage mass.gov/doc/safety-training-requirements-for-dpw-garage/download

DPW Operations mass.gov/doc/safety-training-requirements-for-dpw-operations/download

Water and Sewer Departments mass.gov/doc/safety-training-requirements-water-and-sewer/download

K-12 Schools mass.gov/doc/safety-training-requirements-for-schools-2018/download

The *OSHA 10 Training Card* is not required for municipal employees because the OSHA 10 Class is a general overview and does not cover all of the mandatory training that is required by OSHA regulations. Training efforts should be focused on specific hazards in the workplace, such as: trench; confined space; ladders; chainsaws; woodchippers; excavators; lockout tagout.

The Massachusetts Department of Industrial Accidents offers annual safety training grants. Municipalities are encouraged to apply for training grants. mass.gov/dias-workplace-safety-grant
