Joint Office of Energy and Transportation

Re: FHWA Request for Update on NEVI Plan

This letter and the attachments are intended as a re-submittal of MassDOT's submission of initial information to the Joint Office on 8/1/2023.

MassDOT understands that FHWA and the Joint Office of Energy and Transportation are interested in an update on implementation of the NEVI program in Massachusetts, including whether changes have been made to our NEVI Plan.

MassDOT submitted the plan required by the Infrastructure Investment and Jobs Act (IIJA) on July 29, 2022. The MassDOT NEVI Plan is a robust five-year plan and MassDOT has spent the past fourteen months (14) implementing the details of that Plan. The existing five-year MassDOT NEVI Plan is intended to provide certainty for other investors in electric vehicle infrastructure implementation to make complementary investments. MassDOT does not anticipate making significant changes to the plan soon – but instead we intend to implement the 2022 Plan as submitted. The Plan is attached for your reference.

MassDOT has concluded the planning stage of the NEVI program in Massachusetts and is now focused on implementing as state and federal procurement processes will allow. Details of these implementation efforts are included in this submittal.

Please let me know if you have any questions or need more information.

Sincerely,

David Mohler
Executive Director, MassDOT Office of Transportation Planning

INFORMATION TOPICS REQUESTED BY FHWA

INTRODUCTION—UPDATES FROM PRIOR PLAN

MassDOT's NEVI Plan remains unchanged and is attached.

PUBLIC ENGAGEMENT—COMMUNITY ENGAGEMENT OUTCOMES REPORT

FHWA regulation¹ states the following:

States must include in the State EV Infrastructure Deployment Plan a description of the community engagement activities conducted as part of the development and approval of their most recently-submitted State EV Infrastructure Deployment Plan, including engagement with DACs.

MassDOT's NEVI planning activities and associated public engagement are complete. MassDOT's focus has now turned toward implementation of this five-year plan.

MassDOT strategically front-loaded community engagement activities in developing the MassDOT NEVI Plan. Section 3.0 of the Plan describes how MassDOT implemented an extensive community and stakeholder engagement strategy to gather input from the general public, underserved communities, and other key stakeholder groups. Section 9.1 of the Plan further describes how MassDOT identified and conducted outreach to disadvantaged communities.

CONTRACTING—STATUS OF CONTRACTING PROCESS

MassDOT issued a Request for Information (RFI) on 6/1/23 and is currently reviewing the responses.

As noted in the RFI, MassDOT intends to partner with a private entity to deploy DCFC equipment to serve long-distance travel corridors in Massachusetts through a competitive solicitation process. Specific responsibilities of the private partner may include, but are not limited to, permitting, financing, constructing, maintaining, and operating the DCFC equipment.

MassDOT intends to utilize a single private partner approach for implementation. This approach will maximize administrative efficiency, including the Commonwealth's ability to ensure a private partner complies with federal reporting requirements. Solicitation of a single private partner also simplifies EV AFC coverage, which would be complicated by coordination with multiple private partners. The single private partner approach does not necessarily preclude multiple subcontractors and/or site hosts from participating.

¹ [23 CFR 680.112](#)

MassDOT may decide to choose a different contracting approach and a different contract for MassDOT owned sites and privately owned sites. Detailed solicitation and contract provisions will be developed in the future.

MassDOT has not issued a Request for Qualifications (RFQ) or a Request for Proposals (RFP) at this time. COMMBUYS is the official procurement record system for the Commonwealth of Massachusetts. MassDOT anticipates that any procurement-related documents issued in the future will be available on COMMBUYS. We will, of course, also provide updates to FHWA as contract documents are developed during procurement.

CONTRACTING—AWARDED CONTRACTS

MassDOT has not awarded any contracts related to NEVI Plan implementation.

CONTRACTING—SCORING METHODOLOGIES UTILIZED

MassDOT has not yet developed its final scoring methodologies. To the extent any scoring methodologies for NEVI-related procurements are shared in advance of the selection process, they will be made available via COMMBUYS and provided to FHWA.

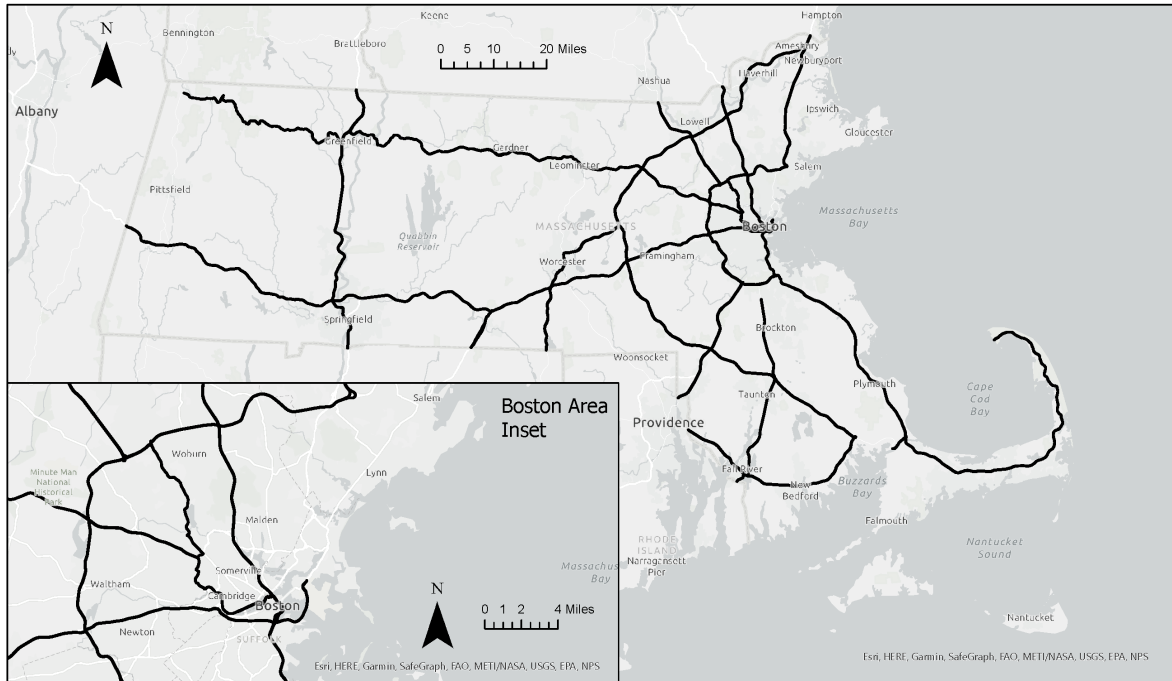

The implementation effort is designed to include metrics related to equity and Justice40 to ensure that implementation of the MassDOT NEVI Plan supports disadvantaged communities' access to reliable fast charging infrastructure and delivers on the Plan's equity goal that disadvantaged communities will have access to DCFC for long-distance travel that meets or exceeds the access to DCFC of non-disadvantaged communities.

PLAN FOR COMPLIANCE WITH FEDERAL REQUIREMENTS

Any NEVI-funded contract that MassDOT enters with a private entity will include provisions mandating compliance with all applicable state and federal regulations.

EXISTING AND FUTURE CONDITIONS ANALYSIS—ALTERNATIVE FUEL CORRIDOR (AFC) DESIGNATIONS

Section 5.3 of the MassDOT NEVI Plan includes a map (Figure 6, included below) and description of the designated EV Alternative Fuel Corridor (AFC) network in Massachusetts.

The electric vehicle corridors currently designated in Massachusetts are the appropriate set of corridors for prioritizing charging that supports long-distance trip making. MassDOT has not nominated additional AFCs since submission of the MassDOT NEVI Plan and FHWA has not made any further EV AFC designations.

EXISTING AND FUTURE CONDITIONS ANALYSIS—EXISTING CHARGING STATIONS

MassDOT does not collect or maintain data on EV charging stations other than those that MassDOT is responsible for. The analysis underlying the MassDOT NEVI Plan used station data from the U.S. Department of Energy’s Alternative Fuels Data Center (AFDC). MassDOT will continue to rely on the AFDC as the authoritative source for charging station location data.

EV CHARGING INFRASTRUCTURE DEPLOYMENT

Section 6.0 of the MassDOT NEVI Plan describes MassDOT’s deployment strategy for NEVI-funded projects.

This deployment strategy will follow a two-stage approach. NEVI formula funds will first be used to eliminate 50-mile gaps in the EV alternative fuel corridor network in Massachusetts as identified in the Plan. Additional NEVI funds will then be used to focus on zones within the AFC network where there is the most unserved demand, with higher priority given to zones with high percentages of environmental justice communities.

EV CHARGING INFRASTRUCTURE DEPLOYMENT—PLANNED CHARGING STATIONS

At this time no NEVI-funded stations are under construction in Massachusetts.

The guidance requests the following information about future NEVI-funded stations: “the general anticipated location of the charging stations, the anticipated number of ports at each charging station, and the anticipated year that each station will be operational.”

Figure 11 and Table 5 in the MassDOT NEVI Plan respectively identify the gaps between NEVI-compliant DCFC and describe the order in which MassDOT will prioritize electrification zones for investment.

MassDOT’s NEVI procurement is being designed to specify site locations during the solicitation and contract negotiation process. As noted in the MassDOT NEVI Plan: “By using this zoned approach, rather than specifying the exact locations of NEVI-funded infrastructure in this plan, MassDOT can both ensure that investments are located where they will be effective at supporting range confidence and also provide flexibility for a private partner to identify and propose sites that meet the many conditions needed to successfully host NEVI DCFC.”

All stations will meet the minimum regulatory requirement of four 150-kW ports.

As the MassDOT NEVI Plan describes, station construction and operation timelines will depend on a variety of factors. Tables 8 and 9 in the Plan provide an estimate of the high-level use of each fiscal year’s funds.

EV CHARGING INFRASTRUCTURE DEPLOYMENT-PLANNING TOWARDS A FULLY BUILT OUT DETERMINATION

MassDOT does not expect to seek out a “fully built out” determination as defined in the most recent FHWA guidance, which provides a further redefinition of the term. Targeting NEVI investments in such a manner as to achieve this certification would conflict with the deployment strategy described in Section 6.0 of the MassDOT NEVI Plan. Furthermore, FHWA’s definition of what constitutes fully built out continues to evolve.

One of the MassDOT NEVI Plan’s key goals is for a statewide AFC network with no gaps greater than 50 miles between NEVI-compliant stations with the intention of reducing range anxiety for EV drivers.

As described in the MassDOT NEVI Plan, MassDOT intends to use NEVI formula funds to support a reliable DCFC network for long-distance travel on major highways in Massachusetts.

EQUITY CONSIDERATIONS

Section 9.0 of the MassDOT NEVI Plan describes the equity considerations underlying the Plan.

As noted in the Plan:

Equity was one of MassDOT’s key considerations throughout Plan development. MassDOT sought to engage with disadvantaged community members and organizations through multiple outreach methods. In addition to engaging with

disadvantaged groups, all stakeholder outreach methods included equity considerations as a topic.

When considering National Highway System roadways to nominate as EV Alternative Fuel Corridors during the FHWA Round 6 nomination cycle, MassDOT developed and utilized a range of equity criteria to help identify the highest priority roadways to nominate as EV AFCs. Several of the corridors that were nominated pass through environmental justice (EJ) communities in Massachusetts and enable MassDOT to consider NEVI DCFC investments on roadways that serve these communities.

EQUITY CONSIDERATIONS—IDENTIFICATION AND OUTREACH TO DISADVANTAGED COMMUNITIES (DACS) IN THE STATE

As noted in Section 9.1 of the MassDOT NEVI Plan:

Engagement with disadvantaged communities and equity considerations were at the forefront of stakeholder and public engagement in developing this plan, as described in Section 3.0. MassDOT used multiple outreach methods to solicit feedback and input from disadvantaged community members, environmental justice organizations, rural organizations, and other community-based organizations. To help identify disadvantaged communities, MassDOT used both the Electric Vehicle Charging Justice40 Map and the Commonwealth's definition of an environmental justice (EJ) population.

The Justice40 map shows that many of Justice40 communities in Massachusetts are located in urban centers such as Pittsfield, Springfield, Worcester, and Boston. MassDOT also made use of the state's EJ population definition in order to capture disadvantaged communities in more suburban and rural regions of the state and to be consistent with other state and regional programs and policies (including long-range transportation planning and programming) considering these defined EJ communities.

Massachusetts defines a community as an "environmental justice population" if the Census block group meets one or more of the following criteria:

- 1. Annual median household income is not more than 65 percent of the statewide annual median household income;*
- 2. Minorities comprise 40 percent or more of the population;*
- 3. 25 percent or more of households lack English language proficiency; or*
- 4. Minorities comprise 25 percent or more of the population and the annual median household income of the municipality in which the neighborhood is*

located does not exceed 150 per cent of the statewide annual median household income.

MassDOT facilitated two focus groups with members of disadvantaged, underserved, and environmental justice communities in Massachusetts. Recruitment targeted members of communities identified by the Electric Vehicle Charging Justice40 Map and Massachusetts' criteria for an environmental justice population.

MassDOT also conducted three virtual roundtables. This included one roundtable focused on entities representing rural issues in Massachusetts, including staff from rural Metropolitan Planning Organizations (MPOs) and community-based groups in rural areas, and two roundtables including participants from environmental protection and environmental justice organizations and community-based organizations across the Commonwealth.

Administration and evaluation of the project statistical survey also ensured adequate demographic representation of disadvantaged population groups.

The feedback, recommendations, and challenges to program success identified through the stakeholder engagement process are integrated throughout the plan and the vision, goals, and metrics reflect consideration of stakeholder input as obtained through the public and stakeholder outreach.

Examples of how information provided by parties during the extensive public and stakeholder engagement process for MassDOT NEVI Plan influenced the final Plan include:

- Stakeholders raised the potential for electrical grid infrastructure associated with DCFC, such as additional substations, to have an adverse impact on property values or quality of life for adjacent communities. This influenced MassDOT to indicate in the Plan that MassDOT will encourage the use of existing grid capacity and storage technologies. Accordingly, after submission of the MassDOT NEVI Plan, MassDOT prepared and submitted an application for the federal Charging and Fueling Infrastructure Discretionary Grant Program (CFI Program) to install battery electric storage systems to support DCFC sites built through the NEVI Program.
- Stakeholders cited the lack of existing fast charging infrastructure as one of the barriers to adoption of EVs, particularly in disadvantaged communities. This influenced MassDOT to include as a key goal of the NEVI Plan that disadvantaged communities will have access to DCFC for long-distance travel that meets or exceeds the access to DCFC of non-disadvantaged communities. A performance metric was developed and included in the NEVI Plan to measure if this goal is achieved.
- Stakeholders identified the reliability of DCFC stations as a barrier to a positive user experience and to the NEVI Program's success in Massachusetts. This influenced MassDOT to signal in the NEVI Plan that MassDOT would consider making some or all payments to a private partner contingent on DCFC station uptime.

- Stakeholders identified disadvantaged community member involvement in building, supporting, or maintaining DCFCs as an indirect benefit from the NEVI program. This influenced MassDOT to include disadvantaged business enterprise (DBE) participation as a potential solicitation criterion/requirement. Subsequent FHWA guidance has indicated that “State DOTs may not establish DBE goals for NEVI-funded contracts.”
- Stakeholders raised concerns about the potential burdens of data reporting requirements for DCFC operators/owners. This influenced MassDOT to signal in the MassDOT NEVI Plan that “MassDOT does not anticipate including data reporting requirements that are more stringent or periodic than those required by applicable federal regulations.”

EQUITY CONSIDERATIONS—PROCESS TO IDENTIFY, QUANTIFY, AND MEASURE BENEFITS TO DACS

As noted in Section 9.2 of the MassDOT NEVI Plan:

The goal and principal direct benefit of DCFC sited along highway corridors is the reduction in range anxiety and associated increased ability for community members to benefit from electromobility. This includes the ability of households to make trips to and from their communities in electric vehicles and for goods and services to be delivered to and from their communities using electric vehicles.

In the outreach conducted to develop this plan, stakeholders expressed strong support for serving disadvantaged communities as part of building out charging networks.

For this plan, benefits to disadvantaged communities will be evaluated considering access and proximity to corridors planned for DCFC infrastructure. As noted in Section 4.0, this metric is the ratio of the percentage of the Commonwealth’s EJ Community population within five miles of a NEVI-served zone to the percentage of the Commonwealth’s non-EJ Community population within five miles of a NEVI-served zone.

In addition to the mobility benefits, stakeholder input raised a range of indirect benefits that may occur due to DCFC investment:

- *Generation of business, jobs, and income for disadvantaged community member-owned businesses nearby, such as restaurants or stores.*
- *Supporting and growing tourism, such as visitor information locations and emerging tourism destinations.*
- *Improved air quality and reduced noise along corridors.*
- *Disadvantaged community member involvement in building, supporting, or maintaining DCFCs.*
- *Increased awareness and understanding of electric vehicles and driving range confidence, supporting adoption of EVs.*

In addition to potential indirect benefits stakeholder input noted possible adverse impacts from DCFC investments:

- *Gentrification could drive up the prices of land, or rents, near DCFCs.*
- *Valuable public green spaces could be taken by DCFCs causing negative environmental impacts such as heat islands.*
- *Investment in charging stations could divert attention from investing in other transportation modes that could serve disadvantaged communities.*
- *Additional infrastructure needed to improve the electrical grid, such as additional substations, could adversely affect property values or quality of life.*

MassDOT expects these indirect community impacts to be modest to minimal for corridor-based fast charging, since most sites are expected to be located adjacent to major highways (e.g., at rest areas or service plazas), or at commercial properties near those highways. By encouraging the use of existing grid capacity and storage technologies, MassDOT seeks to minimize the need for additional electricity infrastructure and associated community impacts.

The locations where NEVI formula funds can be invested are heavily restricted (sites must be less than a one-mile drive from a designated alternative fuel corridor and have 600 kW of grid capacity). However, this is not the case for other IIJA funds supporting electric vehicle infrastructure. In particular, the IIJA provides \$1.25 billion that can be used for community EV charging and other alternative fueling infrastructure in publicly accessible locations, such as parking facilities at public buildings, schools, and parks. MassDOT encourages FHWA to consider the potential indirect community impacts identified by Massachusetts stakeholders above when making decisions about these discretionary funds.

The project focus groups and roundtables with members and/or representatives of disadvantaged (including EJ, Justice40, and rural) communities confirmed that the price to own or lease an EV is one of the most significant barriers to adoption. While not part of this plan, programs and policies that lower barriers to EV ownership for low-income households would enhance the equity benefits of NEVI program investments as many disadvantaged community members are unlikely at this point to be able to afford to own or lease an EV. As noted in Section 6.4, Massachusetts is pursuing a range of programs that lower barriers to EV adoption.

A table identifying benefits, metrics, and data sources is included below.

Benefit	Metric	Data Source(s)
---------	--------	----------------

Access to network of fast charging infrastructure with 4x150kW chargers no greater than 50 miles apart	Ratio of % of state's population in EJ communities that are within 5 miles of a zone served by NEVI-funded DCFC to the % of non-EJ community population within 5 miles of those zones	MassDOT Road Inventory, Mass GIS Environmental Justice Populations, Department of Energy Alternative Fuels Data Center.
Proximity to EV Alternative Fuel Corridor network with potentially reduced levels of air pollutants.	Number of EJ communities that are within 5 miles of the EV Alternative Fuel Corridor network	MassDOT Road Inventory, Mass GIS Environmental Justice Populations, Department of Energy Alternative Fuels Data Center.

LABOR AND WORKFORCE CONSIDERATIONS

In compliance with [23 CFR 680.106\(j\)](#) to ensure that the installation and maintenance of chargers is performed safely by a qualified and increasingly diverse workforce of licensed technicians and other laborers, all electricians installing, operating, or maintaining Electric Vehicle Supply Equipment must receive certification from the Electric Vehicle Infrastructure Training Program (EVITP) or a registered apprenticeship program for electricians that includes charger-specific training developed as part of a national guideline standard approved by the Department of Labor in consultation with the Department of Transportation, if and when such programs are approved. The additional apprenticeship and/or training programs that are referenced in the MassDOT NEVI Plan can only be utilized in place of the EVITP if and when such programs are approved by the Department of Labor per the 23 CFR 680.106(j).

Section 10.0 of the MassDOT NEVI Plan describes the labor and workforce considerations that are informing implementation.

Any NEVI-funded contract that MassDOT enters into with a private entity will include provisions mandating compliance with all applicable state and federal regulations, including those requiring the NEVI-associated workforce in Massachusetts have the appropriate licenses, certifications, and trainings.

PROGRAM EVALUATION

Section 12.0 of the MassDOT NEVI Plan describes the performance metrics that MassDOT will use to evaluate the NEVI program deployment in Massachusetts.

FHWA-REQUESTED ITEMS (9-14-23)

COMMUNITY ENGAGEMENT OUTCOMES REPORT

With the conclusion of the planning stage of the NEVI program in Massachusetts, MassDOT is now moving ahead with implementing the MassDOT NEVI Plan as rapidly as state and federal procurement processes will allow.

MassDOT has complied with 23 CFR 680.112 (d), which reads in full:

(d) **Community engagement outcomes report.** This paragraph (d) only applies to the NEVI Formula Program projects. States must include in the State EV Infrastructure Deployment Plan a description of the community engagement activities conducted as part of the development and approval of their most recently-submitted State EV Infrastructure Deployment Plan, including engagement with DACs.

The National Electric Vehicle Infrastructure (NEVI) Program Deployment Plan for Massachusetts ("MassDOT NEVI Plan"), was submitted as required by the Infrastructure Investment and Jobs Act (IIJA) on 7/29/2022.

Section 3.0 of the Plan describes how MassDOT implemented an extensive community and stakeholder engagement strategy to gather input from the general public, underserved communities, and other key stakeholder groups. Section 9.1 of the Plan further describes how MassDOT identified and conducted outreach to disadvantaged communities.

In June of 2023, MassDOT initiated a Request for Information (RFI) process with the intent of hearing from both industry and the public about what they would like MassDOT to know. This included 28 detailed questions to help the Commonwealth structure the future MassDOT NEVI RFP. A list of those receiving MassDOT's RFI email included everyone who commented on the original 2022 NEVI plan – over 1,200 in all.

MassDOT received 24 responses to the RFI and one request from a concerned citizen requesting more EV signage along Interstates and Highways. This information, along with additional work over the past few months has MassDOT confident that an RFP can be released by the end of calendar 2023.

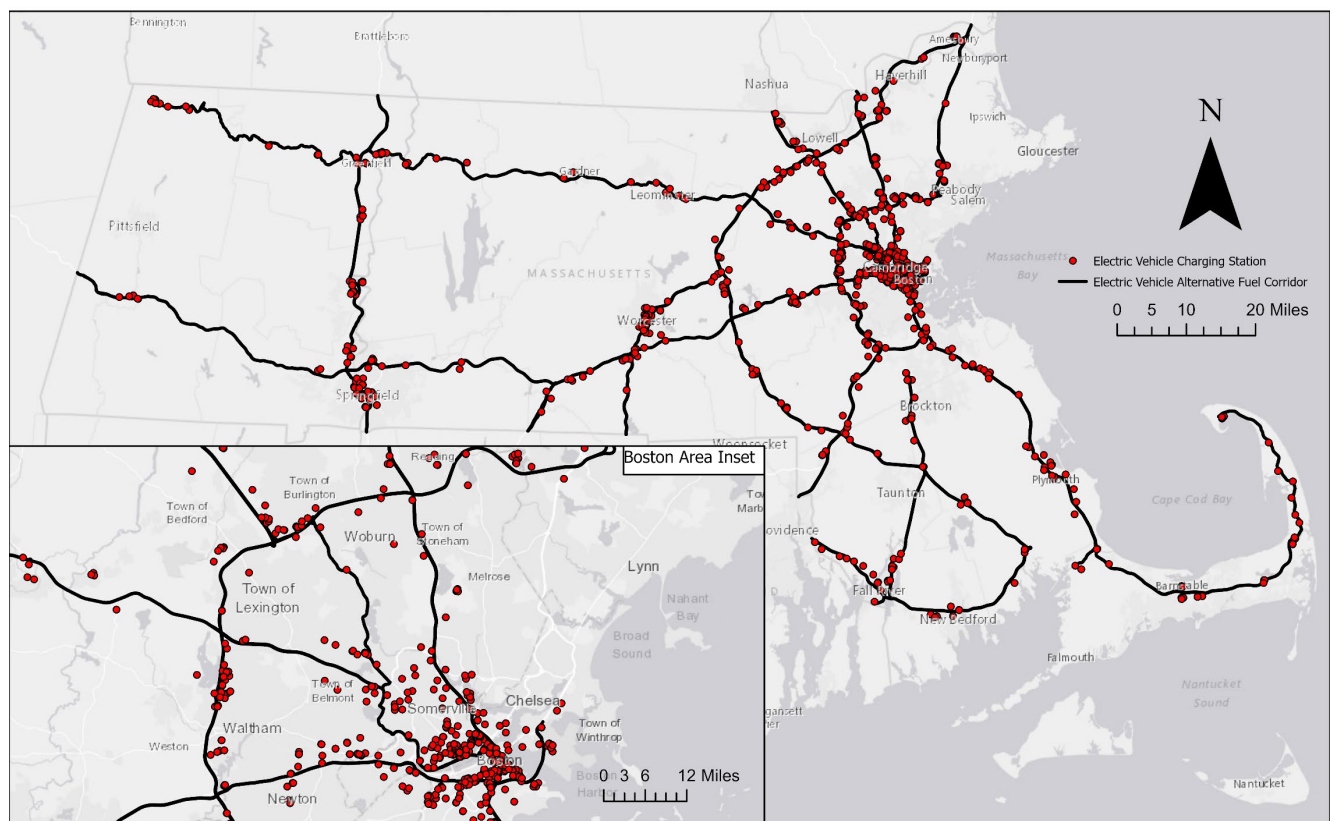

The RFI responses have focused MassDOT on developing the procurement of a vendor to implement the plan and addressing questions we received in three core areas – Risk, Term, and Fee Structure. When MassDOT undertakes public engagement as part of the final implementation of our NEVI Plan, we will provide FHWA with a description of these additional activities and an outcomes report in a future update.

EXISTING EV CHARGING STATIONS

Figure 1 displays all existing Level 2 and DCFC stations in Massachusetts that are within a one-mile buffer of the EV Alternative Fuel Corridor (AFC) network.

The table of existing charging stations requested by FHWA includes approximately 1600 entries. Due to its length, it is appended as Table 1 to the end of this document. Table 1 and Figure 1 rely on data from the U.S. Department of Energy's Alternative Fuels Data Center.²

Figure 1. Existing EV Charging Infrastructure Along EV AFC Network

PLANNED EV CHARGING STATIONS

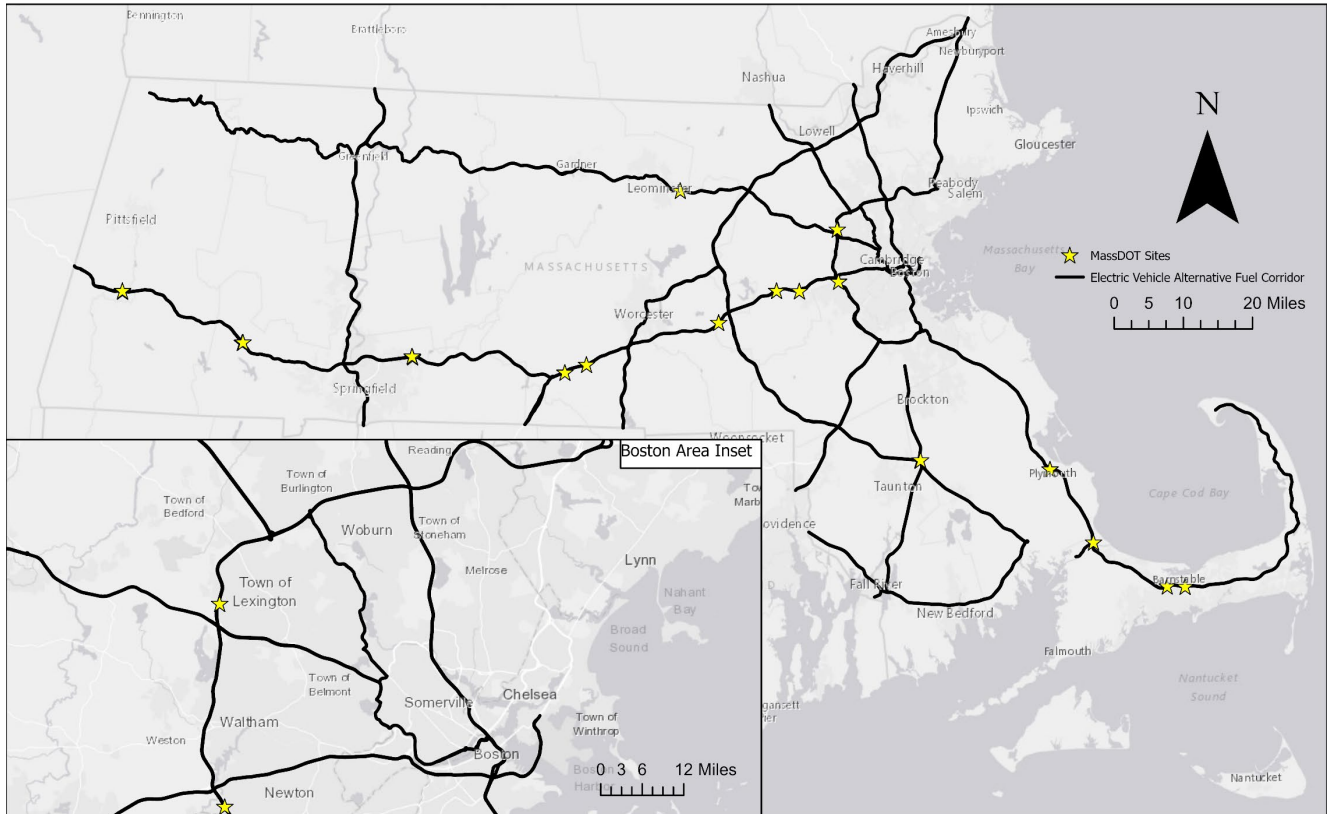

The specific locations of NEVI-funded DCFC stations will be determined by MassDOT's procurement process, which is currently underway. MassDOT can provide this information to FHWA as soon as this procurement process allows.

MassDOT is considering the role for MassDOT-owned sites in NEVI implementation. Figure 2 displays a range of MassDOT sites that include attributes suitable for hosting corridor fast charging

² Accessed 9/15/2023.

infrastructure. Coverage goals of the plan not addressed by MassDOT owned locations will be addressed with additional stations located on sites owned by others.

Figure 2. MassDOT Sites

23 CFR 680 MINIMUM STANDARDS

As noted in MassDOT's 8/1/23 letter to the Joint Office, any NEVI-funded contract that MassDOT enters with a private entity will include provisions mandating compliance with all applicable state and federal regulations.

This will include contract provisions mandating compliance with 23 CFR 680.106(j) and its requirements concerning qualified technicians for NEVI-funded projects.

Any NEVI-funded contract will also include contract provisions mandating compliance with 23 CFR 680.112 and its requirements concerning data submittal. The data collected may be used to help inform MassDOT's strategy for program evaluation as described in Section 12.0 of the MassDOT NEVI Plan.

*23 CFR 680 applies to EV chargers that are funded with U.S.C. Title 23 funds, including any EV charging infrastructure project funded with Federal funds that is treated as a project on a Federal-aid roadway. To the best of MassDOT's knowledge, none of the chargers on this list meet this criterion and if any do, they are likely not compliant with 23 CFR 680 (i.e. meeting the 97% uptime requirement, submitting quarterly data, being installed with EVITP-certified electricians).
