Commonwealth of Massachusetts

Department of Mental Health

VISION AND MISSION STATEMENT

VISION

Mental Health is an essential part of health care. The Massachusetts Department of Mental Health, as the State Mental Health Authority, promotes mental health through early intervention, treatment, education, policy and regulation so that all residents of the Commonwealth may live full and productive lives.

MISSION STATEMENT

The Department of Mental Health, as the State Mental Health Authority, assures and provides access to services and supports to meet the mental health needs of individuals of all ages, enabling them to live, work and participate in their communities. The Department establishes standards to ensure effective and culturally competent care to promote recovery. The Department sets policy, promotes self-determination, protects human rights and supports mental health training and research. This critical mission is accomplished by working in partnership with other state agencies, individuals, families, providers and communities.

AUTHORITY

Massachusetts General Law: Chapters 19, 123

Regulations: 104 CMR

Departmental policies issued from time to time by Commissioner

Mental Illness and Recovery

Serious, long-term mental illness describes disorders that cause severe disturbances in thinking, feeling and relating that result in a substantially diminished capacity for coping with the ordinary demands of life. Mental illness may affect anyone, regardless of age, sex, gender, race, income, religion or education. One in every five Americans experiences an episode of mental illness at least once in a lifetime or experiences numerous or persistent episodes.

We know that recovery from mental illness is possible. The Department of Mental Health (DMH) supports recovery in many ways, most importantly through its Community First Initiative. “Recovery Through Partnership” is the guiding principle that supports Community First for adults, children, adolescents and families with serious mental illness and serious emotional disturbance. We champion people’s right to live as independently as possible in the community, and it is DMH’s responsibility to support recovery and success of individuals with the lived experience of serious mental illness.

Community First Goals:

- Sustain a person and family centered agency that is culturally competent and eliminates disparities.
- Use evidence based and emerging practices and data-driven decision making while achieving operational efficiencies.
- Engage in meaningful consumer and family involvement and peer support in all aspects of the Department of Mental Health.
- Rely on services that are flexible, trauma-informed, and that value respect and dignity.

Community First focuses on the individual and that for every individual there are as many paths to recovery. DMH consumers include those with serious mental illnesses. These include schizophrenia, depression and manic depression. Current research indicates that many severe mental illnesses are biological diseases that interfere with normal brain function. Genetic factors, family history, psychological or social factors, chronic medical illness, substance use and severe traumatic life crises can create a predisposition to mental illness. Mental illness is not the result of a lack of "willpower" or weak character. Mental illness can occur at any age, even when a child is very young or in elderly people.

Researchers continue to pursue the study of how biochemical, psychological, genetic and environmental factors interact and contribute to the onset of mental illness and severe emotional disturbance.

The majority of psychiatric disorders can be effectively treated. Treatment, which often combines medications with therapeutic and social rehabilitation interventions, can effectively alleviate the symptoms of mental illness and stabilize children and adolescents diagnosed with severe emotional disturbance.

Community support services are a critical component of recovery. Living independently, building social relationships, getting an education and holding a job are goals for most people with mental illness while others may need supports for longer periods to achieve and maintain independence.

HOW TO USE THIS DIRECTORY

The Department of Mental Health (DMH) has a Central (administrative) Office, located in Boston, with 5 Area Offices located throughout the state. In addition, there are local service delivery sites within each Area. The DMH Areas are: Metro Boston, Southeast, Northeast, Central Massachusetts, and Western Massachusetts.

To get information about mental health services or the names of key DMH managers serving your city or town:

- 1) Locate the city or town of your residence in the alphabetical listing at the very back of the Directory; the Area is identified in parentheses after the city or town.
- 2) Locate the appropriate Area office from the Table of Contents at the front of the Directory.
- 3) Under the Area office, find your city or town under "Local Service Sites" and contact the "Person in Charge". The "Person in Charge" will be able to provide you with information or direct you to the appropriate resource.
- 4) The names of key managers in the Department's Central Office are also listed in this Directory.

INDIVIDUALS WHO ARE DEAF, HARD OF HEARING, OR SPEECH DISABLED

Individuals who are deaf, hard of hearing, or speech disabled may access any of the Department of Mental Health's offices via a number of relay services. DMH staff may also reach out to deaf, hard of hearing or speech disabled persons through these services. The most common are:

- **Video Relay Service (VRS)** is federally funded telecommunications service where a remotely situated American Sign Language (ASL) interpreter interprets between a Deaf person who is using a video phone at one location and a hearing person who is using any voice phone, at another location. At the Deaf user's end, a videophone and a high-speed internet connection are necessary; nothing is needed at the hearing caller's end. VRS allows conversations to flow in near real time and in a faster and more natural manner than via TTY. VRS is a free service available 24 hours a day/7 days a week. Some VRS agencies also have trilingual interpreters who can interpret between eg Spanish and ASL. For more information visit the [VRS consumer guide](#).
- **Video Remote Interpreter (VRI)** is conceptually similar to VRS in that it uses a remotely situated ASL interpreter to interpret between a Deaf ASL user and a hearing person. The difference is that this service is not federally funded and is designed to facilitate communication between a Deaf person and a hearing person at the same location, using a remotely situated ASL interpreter. For this service, a video connection and high-speed internet is required for the location where the Deaf and hearing person are located.
- The **Massachusetts Relay Service (MassRelay)** is a free service for the residents of Massachusetts. It enables people who are deaf, hard of hearing, late-deafened, or speech disabled to use the telephone system via a text telephone (TTY) or other device to call persons who can hear, and vice versa. Mass Relay is available 24 hours a day/7 days a week and is accessed by dialing 711. The call can be initiated from any TTY or telephone.
- **Captioned Telephone Service (CTS)** for people with a special "captioned telephone" that enables them to read what the other person is saying through captions displayed on the "captioned telephone", while communicating through spoken language.
- **Speech-to-Speech Relay Service (STS)** is used by a person with a speech disability. A communication facilitator, who is specially trained in understanding a variety of speech disorders, repeats what the caller says in a manner that makes the caller's words clear and understandable to the called party. No special telephone is needed. For more information visit the [STS Relay Service consumer guide](#).

For more information about these and other forms of relay services, see the FCC factsheet at <http://www.fcc.gov/cgb/consumerfacts/trs.html>.

For all relay services, a Relay Operator will facilitate the call by dialing the party being called and then will stay on the line to relay messages via ASL (VRS/VRI), a TTY or regular telephone (STS) and verbally to people who can hear. Relay Operators provide exact interpretations/transcriptions of what they hear and see. All relay calls are confidential.

How to use VRS

The ASL user, using a television or a computer with a video camera device and a broadband (high-speed) Internet connection, dials the VRS number and is connected to a qualified ASL interpreter. They communicate with each other in ASL through this video link. The VRS interpreter places a telephone call to the party the VRS user wishes to call and relays the conversation back and forth between the parties. The ASL user sees the interpreter on the monitor, and the person who can hear is connected via a regular telephone/cellphone. People who can hear can also initiate a VRS call; they simply call the ASL user's 10-digit number (regular telephone number) and will automatically be connected to a VRS interpreter.

There are a number of VRS providers, all of which provide the same service. Some people have a preferred provider, some do not. The current FCC-approved providers are:

- **ASL Services Holdings, LLC (branded as GlobalVRS)**
Website: <https://www.globalvrs.com>
- **Convo Communications, LLC**
Website: <https://www.convorelay.com>
- **Sorenson Communications, LLC (branded as Sorenson VRS and CaptionCall)**
Website: <https://www.sorenson.com>
- **ZP Better Together**
Purple (sub-brand)
Website: <https://www.purple.us>
ZVRS (sub-brand)
Website: <https://www.zvrs.com>

How to use MassRelay

NOTE: This particular form of communication is almost obsolete. There are rare instances when a person may try to reach out via a TTY, but for the majority of Deaf and hard of hearing consumers; their preferred method of access is now through VRS.

1. Dial **711**.
2. A Relay Operator will answer the call. Inform the Relay Operator either verbally or via the TTY of the number of the person you are calling and the connection will be made.
3. The Relay Operator will type the spoken words to the deaf/hard of hearing person's TTY and read/voice the typed words from the TTY back to the person who can hear.
4. The person who can hear should speak slowly and directly to the deaf/hard of hearing person, not to the Relay Operator.
5. The phrase "Go Ahead" is used each time one party has finished and is ready for a response.

Several DMH site offices also have VideoPhones, which can be used for direct communication between staff and ASL users.
