DMHRSP Calculation Worksheet 2025

DMHRSP Administering Agencies,

Good Morning. As we continue our program improvements, here is the new official DMHRSP Calculation Worksheet. **Effective immediately, please replace any other calculations worksheets you may have and use this one going forward.**

This official DMHRSP Calculation Worksheet:

- Incorporates all of the updates to DMHRSP guidance as well as applicable updates to regulations 760 CMR 5 and 6
- Allows for a variety of DMHRSP specific situations, to more easily and accurately calculate for DMHRSP
- Includes notes in the main calculation sheet (hover over the cells with red triangles) as well as a separate explanation sheet (tab at the bottom) that provides fuller explanations, references, and training links for each item

Please note that this DMHRSP Calculation Worksheet is for Administering Agency use only. As the calculations are very nuanced, service providers and other parties should not be using this calculation worksheet or distributing it.

EOHLC will also freely distribute this to all major software developers (Yardi, PHA Web, PHA Net, etc.). Please contact your software developer to ensure that they received it and are checking that your software is calculating DMHRSP correctly.

As always, please contact me with any questions or concerns. Thank you.

Stephanie Kan
