

Wait! Please don't feed the gulls.

They may be fun to feed, but gulls are potential carriers of such dangerous bacteria as *Salmonella* and *E. coli*, and may also carry bacteria that can cause staph infections and stomach flu. ***Please don't feed the gulls.***

Gulls feed here and then roost for the night on Wachusett Reservoir and other water supplies, threatening the drinking water for more than 2 million people.

Please help keep our drinking water clean.

*Walmart Store Management and the Massachusetts Department of Conservation and Recreation **thank you for your help!***
