As a funeral director in the State of Massachusetts for many years, I have seen the tremendous increase in cremation. Most funeral homes are batting 50% or higher and this percentage does not seem to be decreasing. Because the Board is encouraging written comments from funeral directors across the state, it would seem good to at least look at the regulation, which prohibits funeral homes operating crematories.

Thank you for the time and consideration given to this comment.

Douglas M. Stone,
