

A close-up photograph of a person's hands, wearing a blue long-sleeved shirt, using a blue sponge to wash a car. The sponge is covered in white soap suds. The background is blurred, showing a car and some outdoor lighting.

# WATER SAVER TIP

## WASHING THE CAR YOURSELF

To conserve water, first soap it up using a bucket of water, biodegradable detergent and sponge. Then turn the hose on and quickly rinse it clean. Better yet, take it to a car wash that recycles its water.
