DPH COVID-19 Health Equity Advisory Group:  
Recommendations, Data Release & DPH Response

Public Health Council Meeting

07/08/20

# Table of Contents

1. Description of the Health Equity Advisory Group
2. Health Equity Advisory Group Recommendations and DPH Next Step Examples
3. COVID-19 Health Equity Data Highlight

## Appendices

- A. DPH Health Equity Framework
- B. Full Health Equity Advisory Group Recommendations
- C. Full COVID-19 Health Equity Data (updated July 1<sup>st</sup>)
- D. COVID-19 Community Impact Survey Details

# COVID-19 HEALTH EQUITY ADVISORY GROUP

---

# DPH COVID-19 Health Equity Advisory Group

- The Commissioner convened the Health Equity Advisory Group to advise DPH on the needs of communities and populations disproportionately impacted by the COVID-19 pandemic.
- The 26 Health Equity Advisory Group members represent a cross-sector of community leaders and health and racial equity experts.
- The group met twice weekly throughout the month of May. The group organized its effort into four subcommittees chosen by the members to create a set of recommendations.
- Group members provided reading materials and feedback in between meetings as well.

# DPH COVID-19 Health Equity Advisory Group

- Members selected four areas to address:
  - Data and Metrics
  - COVID-19 Mitigation
  - Community Engagement and Support
  - Social Determinants of Health
- Each subcommittee was led by volunteer co-chairs who were members of the advisory group. Logistical support and note-taking was provided by DPH staff.
- In total the group met 8 times, 5 times as a full group and 3 times in the subgroups.

# DPH COVID-19 Health Equity Advisory Group

- The primary function of the advisory group was to generate a series of recommendations for the Commissioner of the Massachusetts Department of Public Health on how the COVID-19 pandemic response could be informed by a health equity lens to ensure equitable access to resources and services, and prevent inequities and disproportionate negative outcomes.

Members of DPH COVID-19 Health Equity Advisory Group
<b>Monica Bharel</b> , MD, MPH, Commissioner, Massachusetts Department of Public Health (CHAIR)
<b>Dolores Acevedo-Garcia</b> , Ph.D., Director, Institute for Child, Youth and Family Policy, Heller School for Social Policy and Management, Brandeis University
<b>Madeline Aviles-Hernandez</b> , Psy.D., Director of Outpatient and Recovery Services, Gandara Center
<b>Mary Bassett</b> , MD, MPH, Director, FXB Center for Health and Human Rights, Harvard University; FXB Professor of the Practice of Health and Human Rights, Harvard School of Public Health
<b>Bithiah Carter</b> , President and CEO, New England Blacks in Philanthropy
<b>Elisa Choi</b> , MD, FACP, FIDSA, Governor, American College of Physicians, Massachusetts Chapter
<b>Yvette Cozier</b> , DSc, Assistant Dean for Diversity and Inclusion, BUSPH
<b>Michael Curry</b> , Deputy CEO and General Council, Mass League of Community Health Centers
<b>Denise De Las Nueces</b> , MD, MPH, Medical Director, Boston Health Care for the Homeless Program's Barbara McInnis House
<b>Deb Enos</b> , Independent Consultant, Governor's Black Advisory Commission Chair
<b>Isabel Gonzalez-Webster</b> , Director, Worcester Interfaith
<b>Raquel Halsey</b> , Executive Director, North American Indian Center of Boston
<b>Rev. Dr. Conley Hughes</b> , Sr. Pastor, Concord Baptist Church of Boston
<b>Helena DaSilva Hughes</b> , Executive Director, Immigrants Assistance Center

Members of DPH COVID-19 Health Equity Advisory Group, continued	
<b>Claude A. Jacob</b> , Chief Public Health Officer, Cambridge Public Health Department	
<b>Thea James</b> , MD, Vice President of Mission and Associate Chief Medical Officer, Emergency Medicine, Boston Medical Center	
<b>Collin Killick</b> , Executive Director, Disability Policy Consortium	
<b>Jennifer Kimball</b> , Principal Planner, Berkshire Public Health Alliance / Berkshire Planning Commission	
<b>Alden Landry</b> , MD, MPH, Emergency Medicine, physician, BIDMC; Director of Health Equity Education, Harvard Medical School	
<b>Jennifer Lee</b> , Chair, Massachusetts Statewide Independent Living Council	
<b>Juan Lopera</b> , Vice President of Business Diversity, Tufts Health Plan	
<b>Eva Millona</b> , Executive Director, MIRA	
<b>Vanessa Otero</b> , Director, Urban Education Initiative, Smith College	
<b>Claire Pierre</b> , MD, Chief Medical Officer, Harbor Health Services, Inc, Internal Medicine Physician, Board Certified in Clinical Informatics	
<b>Maria Belen Power</b> , Associate Executive Director, GreenRoots, Inc. (Chelsea)	
<b>Tanisha Sullivan</b> , Esq., President, NAACP Boston Branch	
<b>Simone Wildes</b> , MD, Infectious Disease, South Shore Health; Chair, Committee on Diversity in Medicine and Vice-Chair, Committee on Public Health, Mass Medical Society	

# COVID-19 HEALTH EQUITY ADVISORY GROUP RECOMMENDATIONS

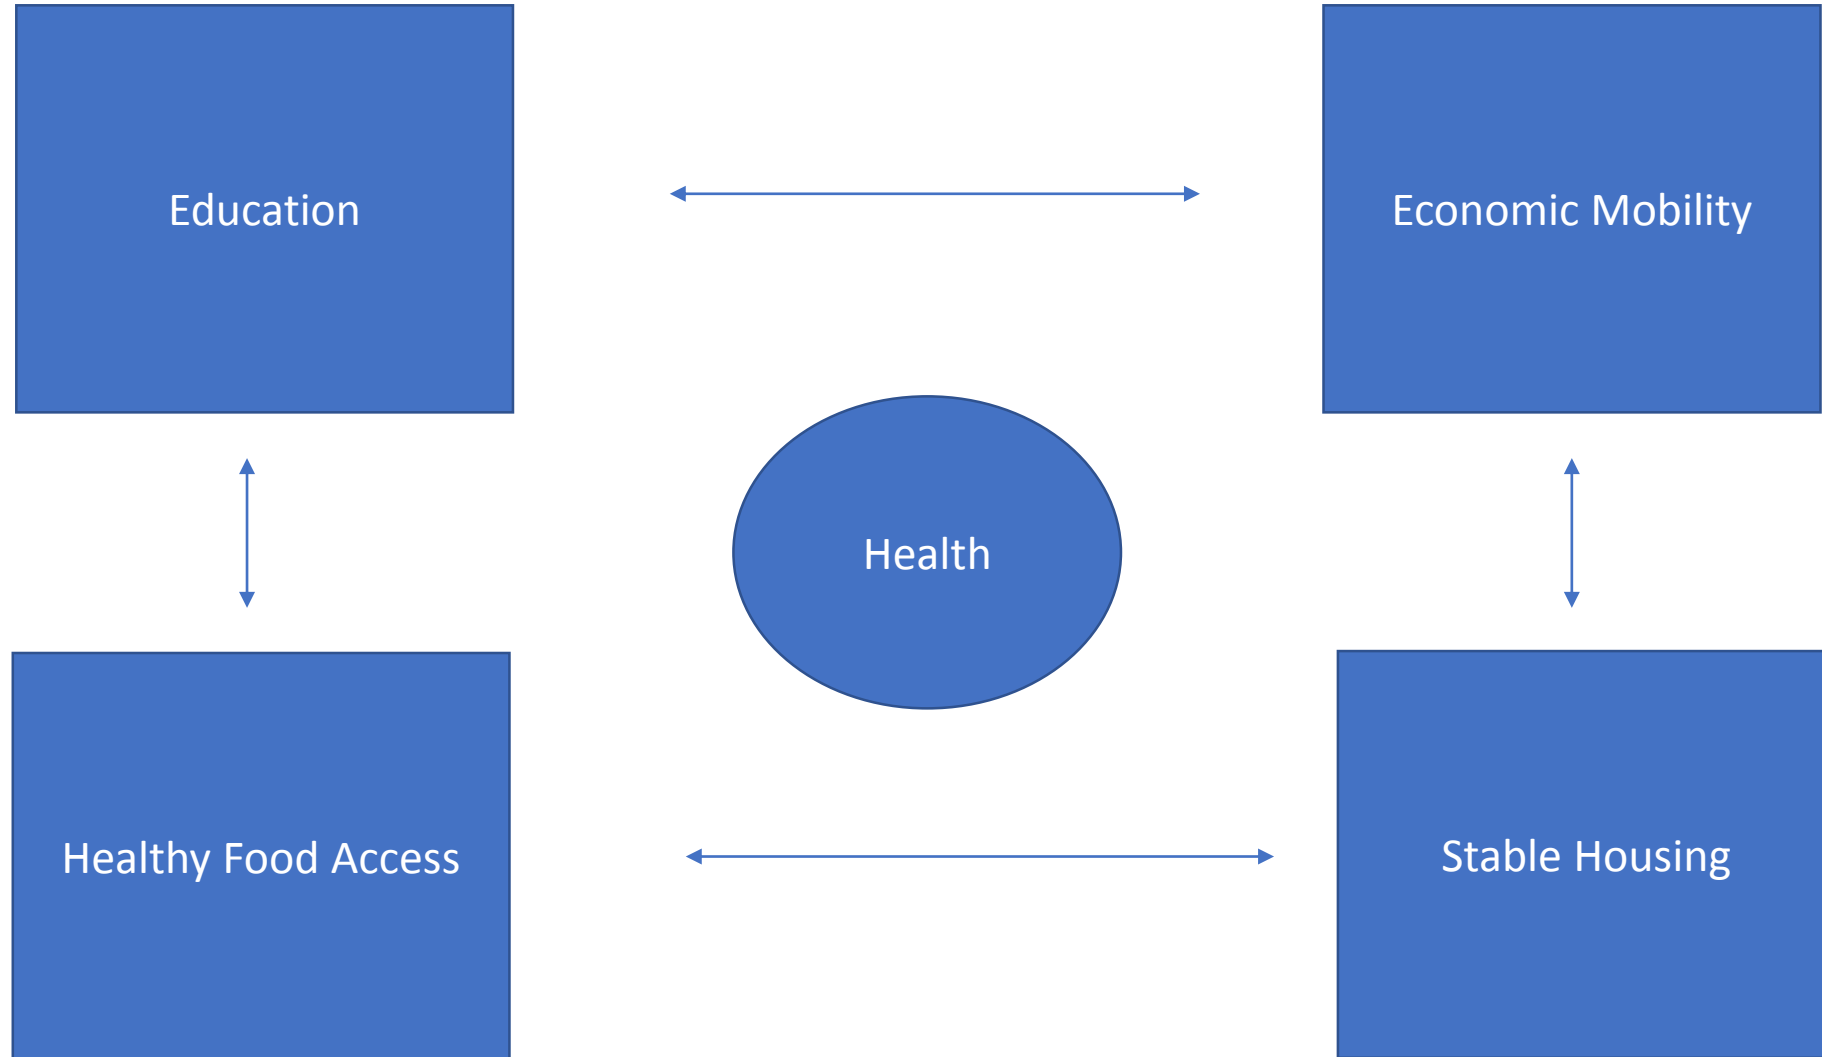

---

# Principles Underlying Recommendations

As part of the development of these recommendations, the Health Equity Advisory Group Social Determinants of Health Subcommittee developed the following principles:

- Acknowledging the fundamental role of racism, xenophobia and lack of economic opportunity as causes of inequitable outcomes;
- acknowledging the role of root causes even if addressing a more immediate and urgent need; at a minimum, ensuring that immediate mitigations are implemented in a way that does not perpetuate inequities and does more than provide a service that alone does not work to change the condition leading to the inequity;
- identifying actions that can have measurable impact and/or where we can demonstrate what success looks like;
- these actions are intended to challenge existing systems that are not working.

# How Social Determinants Interact

# Social Determinants of Health Subcommittee

	Recommendations
<b>Housing Stability</b>	<ul style="list-style-type: none"><li>• Implement policies that increases housing stability</li></ul>
<b>Economic Mobility</b>	<ul style="list-style-type: none"><li>• Develop pathways to financial freedom to prevent further disparities and that support economic mobility</li></ul>

# SDOH Recommendation: Economic Mobility Example

**Recommendation:** Develop pathways to financial freedom to prevent further disparities and that support economic mobility

**Root Cause Identified:** Economic opportunity

**Population(s) Impacted:** Communities of color as primary focus

**Details:**

- COVID-19 has shined a spotlight on systems that disadvantage communities of color and limit ability to participate fully in the economy. Implementation of a comprehensive economic package that includes but is not limited to relief for small businesses owned by persons of color will strive to change the wealth gap and support economic mobility.

# SDOH Recommendation: DPH Potential Action

---

## **Economic Mobility**

**While recognizing that this recommendation extends beyond DPH, DPH will engage in conversations to address the connection between public health and inequitable economic practices and systems.**

---

# Community Engagement & Support Subcommittee

	Recommendations
<b>Multilingual Messaging</b>	Prioritize investment in multilingual outreach to communities most critically impacted by COVID-19 regarding testing, protection at home and workplace, and how to access state assistance programs and resources available
<b>Engaging the Community</b>	<p>Plan and implement strategy for the active engagement and representation of existing anchor organizations in the communities in decision-making processes related to COVID-19 response and recovery</p> <p>Develop pathways for foreign-trained medical professionals to practice</p>
<b>Partnership</b>	Develop and expand public and private partnerships with community health centers, local governments, other state agencies, quasi-state agencies (e.g. MBTA) and philanthropic organizations

## Community Engagement and Support Recommendation: Multilingual Messaging Example

**Recommendation:** Prioritize investment in multilingual outreach to communities most critically impacted by COVID-19 regarding testing, protection at home and workplace, and how to access state assistance programs and resources available

**Root Cause Identified:** Systemic inequities; lack of accessible + culturally tailored information

**Population(s) Impacted:**

- “Priority communities” defined as: race, class, and language, those that have historically received the least resources, racially and ethnically, low income, ability, immigration status, insurance status, history of incarceration

**Details:**

- Make informational materials on accessing COVID-19 testing and care, Pandemic Unemployment Assistance, and the eviction moratorium available in at minimum the following languages Portuguese, Chinese, Haitian Creole

# Community Engagement & Support: DPH Potential Action

---

<b>Multilingual Messaging</b>	<b>Increase materials &amp; web platforms available in multiple languages and simplified English; Deliver messages through trusted members of the respective community</b>
-----------------------------------	--

---

# COVID-19 Mitigation Subcommittee

	Recommendations
<b>Access to PPE</b>	<ul style="list-style-type: none"><li>• Ensure equitable distribution of personal protective equipment (PPE) to essential workers, residents in professions most at-risk, and communities with high rates of infection</li></ul>
<b>Housing Stability</b>	<ul style="list-style-type: none"><li>• Understand housing instability in response to needs raised by COVID-19</li></ul>
<b>Culturally Appropriate Workforce</b>	<ul style="list-style-type: none"><li>• Create strategic guidance to intentionally recruit diverse, culturally intelligent workforce, including for contact tracing, tracking cases, and other workforce needs</li></ul>
<b>Access to Care</b>	<ul style="list-style-type: none"><li>• Work to ensure all populations have equitable access to culturally appropriate and needed therapies, vaccines, trials, and other necessary medical care</li><li>• Develop pathways for foreign-trained medical professionals to practice</li></ul>
<b>System Coordination</b>	<ul style="list-style-type: none"><li>• Create coordinated effort across healthcare providers and other relevant stakeholders to streamline efforts regarding mitigation and surge</li></ul>
<b>Community Safety</b>	<ul style="list-style-type: none"><li>• Monitor enforcement of COVID-19 guidance to avoid over-policing in disenfranchised communities and increasing inequities</li></ul>

# COVID-19 Mitigation: Community Safety Example

**Recommendation:** Monitor enforcement of guidance to avoid over-policing in disenfranchised communities and increasing inequities

**Root Cause Identified:** Systemic racial and other inequities

**Population(s) Impacted:**

- People of Color (race/ethnicity)
- Sexual orientation and gender identity
- People who have a disability
- People who primarily speak languages other than English and those with varying levels of literacy

**Details:**

- Establish and communicate state guidelines regarding equitable enforcement.
- Monitor communities using city and zip-code level data; consider how guidance is being enforced.

# COVID-19 Mitigation: DPH Potential Action

---

<b>Community Safety</b>	<b>Explore training regarding implementation of public health guidance for required face masks where social distancing is not possible and intersection with law enforcement</b>
-----------------------------	--

---

# Data and Metrics Subcommittee

	Recommendations
<b>Public Health COVID-19 Indicators</b>	<b>Report indicators disaggregated across vulnerable and marginalized populations</b> to ensure resource distribution is equitable and culturally/ linguistically appropriate
<b>‘Safer at Home’ advisory</b>	<b>Track ability to work from home across vulnerable and marginalized populations</b> to ensure resources (\$, PPE, testing, etc.) are geared towards these populations
<b>Caring for Children</b>	<b>Track childcare providers re-opening by diverse ownership</b> to ensure equal opportunity for minority-owned businesses and increased support to meet safety protocols  <b>Track access to childcare across vulnerable and marginalized populations</b> to ensure equitable childcare access for workers required to return
<b>Transit</b>	<b>Track ridership in “hot spot” transit areas</b> to ensure vulnerable and marginalized communities are not subject to increased exposure due to crowded transit

Reopening Massachusetts Plan Details: <https://www.mass.gov/info-details/reopening-massachusetts>

# Data and Metrics: Public Health COVID-19 Indicators Example

**Recommendation:** Track and report on the 6 COVID19 indicators disaggregated across vulnerable populations to ensure equitable and culturally/linguistically appropriate resource distribution

**Root Cause Identified:** Segregation and disinvestment in marginalized communities, inequities in access to resources among marginalized populations

**Population(s) Impacted:** Communities of color, immigrants, people with disabilities

**Details:**

- Demographic and geographic data at a granular level (vulnerable populations and hot spots/gateway city data by zip code), disability status, institutional settings (prisons, group homes)
  - E.g. include data for Native/indigenous populations on reports

# Data and Metrics: DPH Potential Actions

---

## **Public Health COVID-19 Indicators**

- **Improve data collection**
  - **Disaggregate existing data**
  - **Conduct COVID-19 Community Impact Survey:  
applicable across all recommendations for  
data/metrics**
-

# COVID-19 HEALTH EQUITY DATA HIGHLIGHTS: UPDATED JULY 1, 2020

---

Population denominators for rate calculations provided by UMass Donahue Inst. based on *Strate S, et al. Small Area Population Estimates for 2011 through 2020, published March 2020 (original report published Oct 2016)*

# Massachusetts Department of Public Health COVID-19 Dashboard - Wednesday, July 01, 2020

## Cases, Hospitalizations, & Deaths by Race/Ethnicity

The following caveats apply to these data:

1. Information on race and ethnicity is collected and reported by laboratories, healthcare providers and local boards of health and may or may not reflect self-report by the individual case.
2. If no information is provided by any reporter on a case's race or ethnicity, DPH classifies it as missing.
3. A classification of unknown indicates the reporter did not know the race and ethnicity of the individual, the individual refused to provide information, or that the originating system does not capture the information.
4. Other indicates multiple races or that the originating system does not capture the information.

**Note:** COVID-19 testing is currently conducted by dozens of private labs, hospitals, and other partners and the Department of Public Health is working with these organizations and to improve data reporting by race and ethnicity, to better understand where, and on whom, the burden of illness is falling so the Commonwealth can respond more effectively. On 4/8, the Commissioner of Public Health issued an Order related to collecting complete demographic information for all confirmed and suspected COVID-19 patients.

### Total Cases by Race/Ethnicity

### Total Cases Reported as Hospitalized\* by Race/Ethnicity

### Total Deaths by Race/Ethnicity

● Hispanic ● Non-Hispanic Asian ● Non-Hispanic Black/African American ● Non-Hispanic Other ● Non-Hispanic White ● Unknown/Missing

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital survey; Tables and Figures created by the Office of Population Health.

Note: all data are cumulative and current as of 10:00am on the date at the top of the page; \*Hospitalization refers to status at any point in time, not necessarily the current status of the patient/demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital surveys. Includes both probable and confirmed cases.

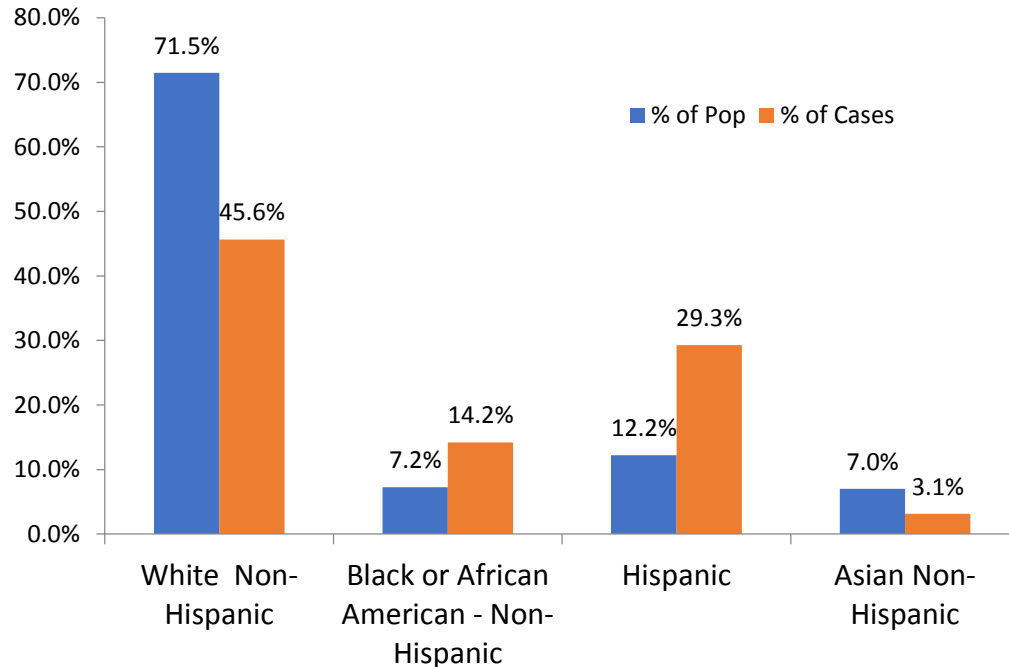

# Following the Executive Order on April 8th, race/ethnicity data reporting has improved for cases, deaths, and hospitalizations

# The Rate of Positive Cases is Highest for Black and Hispanic Residents

- Black non-Hispanics represent 7.2% of the MA population but double that proportion of cases at 14.2% of cases
- Hispanics represent 12.2% of the MA population but more than twice that proportion of cases at 29.3% of cases

**Percent of Total Population and Percent of Cases by Race/Ethnicity**

- The highest rates of positive cases are among Black non-Hispanics and Hispanics which are more than 3x higher than the rate for White non-Hispanics

**Crude Rate of COVID-19 Cases by Race/Ethnicity**

Data as of 07/01/2020

Population denominators for rate calculations provided by UMass Donahue Inst. based on *Strate S, et al. Small Area Population Estimates for 2011 through 2020, published March 2020 (original report published Oct 2016)*

# Cities with the Highest Rates of COVID-19 are Primarily Communities of Color

The ten communities with the highest rates of COVID-19 are shown below. The overall rate in MA of COVID-19 Cases is 1,490.8 per 100,000 people as of 06/30/2020. Almost all of these communities have high (>50%) percentage of residents who are people of color (shaded blue)

# The Rate of Hospitalizations is Highest for Black and Hispanic Residents

- White non-Hispanics represent 71.5% of the population but only 57.2% of the hospitalizations, whereas the percentages of Black Non-Hispanic and Hispanics who are hospitalized are greater than their proportions in the population.

Data as of 07/01/2020

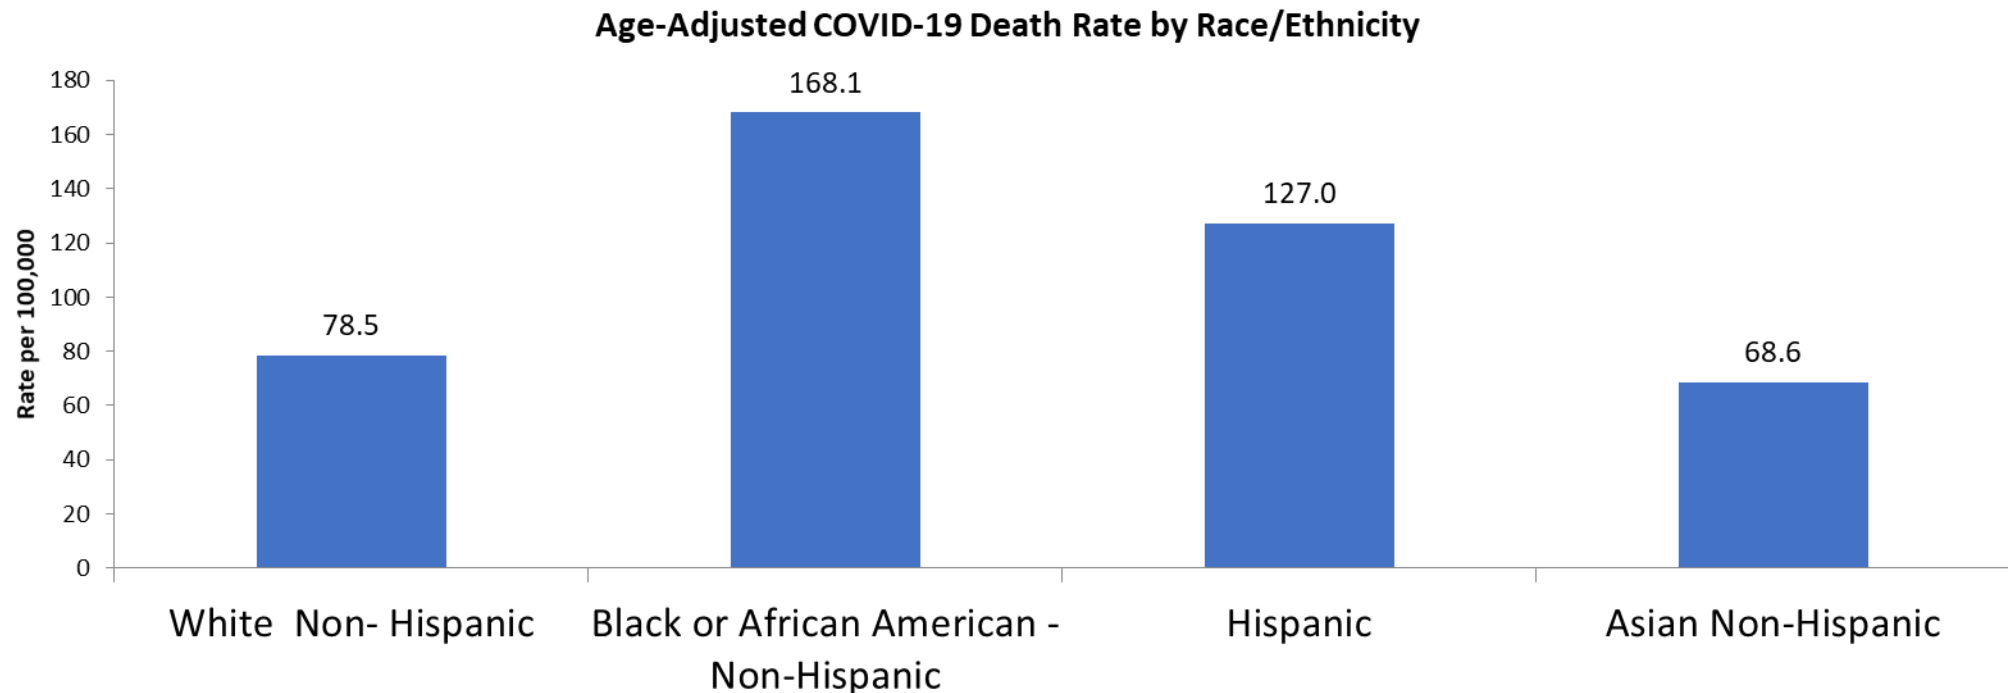

- The rate of hospitalizations for Black non-Hispanics and Hispanics is 2.4x and 1.6x higher (respectively) than for White non-Hispanics.

Population denominators for rate calculations provided by UMass Donahue Inst. based on *Strate S, et al. Small Area Population Estimates for 2011 through 2020, published March 2020 (original report published Oct 2016)*

# Age-Adjusted Death Rates by Race/Ethnicity Reveal Inequities

- The age-adjusted death rate is highest for Black residents, at 168.1 deaths/100,000
- Age-adjusted death rates are recommended for comparisons among race groups given differences in the underlying age distribution of the MA population by race, and differences in COVID-19 death trends by age

Population denominators for rate calculations provided by UMass Donahue Inst. based on *Strate S, et al. Small Area Population Estimates for 2011 through 2020, published March 2020 (original report published Oct 2016)*

Rates are per 100,000 population. Age-adjusted to the 2000 US standard population. See weights used at: <https://www.cdc.gov/nchs/data/statnt/statnt20.pdf>

Data as of 06/30/2020

Count and Rate (per 100,000) of Reported Deaths among COVID-19 Confirmed and Probable Cases by Race and Ethnicity and Age Group in MA (N= 8054).

Data are current as of 6/30/2020 and are subject to change.

# Massachusetts Department of Public Health

Thank You!

Questions?

# APPENDICES

---

# A. DPH HEALTH EQUITY FRAMEWORK

---

## VISION

Optimal health and well-being for all people in Massachusetts, supported by a strong public health infrastructure and healthcare delivery.

## MISSION

The mission of the Massachusetts Department of Public Health (DPH) is to prevent illness, injury, and premature death; to ensure access to high quality public health and health care services; and to promote wellness and health equity for *all* people in the Commonwealth.

### DATA

We provide relevant, timely access to data for DPH, researchers, press and the general public in an effective manner in order to target disparities and impact outcomes.

### DETERMINANTS

We focus on the social determinants of health - the conditions in which people are born, grow, live, work and age, which contribute to health inequities.

### DISPARITIES

We consistently recognize and strive to eliminate health disparities amongst populations in Massachusetts, wherever they may exist.

EVERYDAY EXCELLENCE

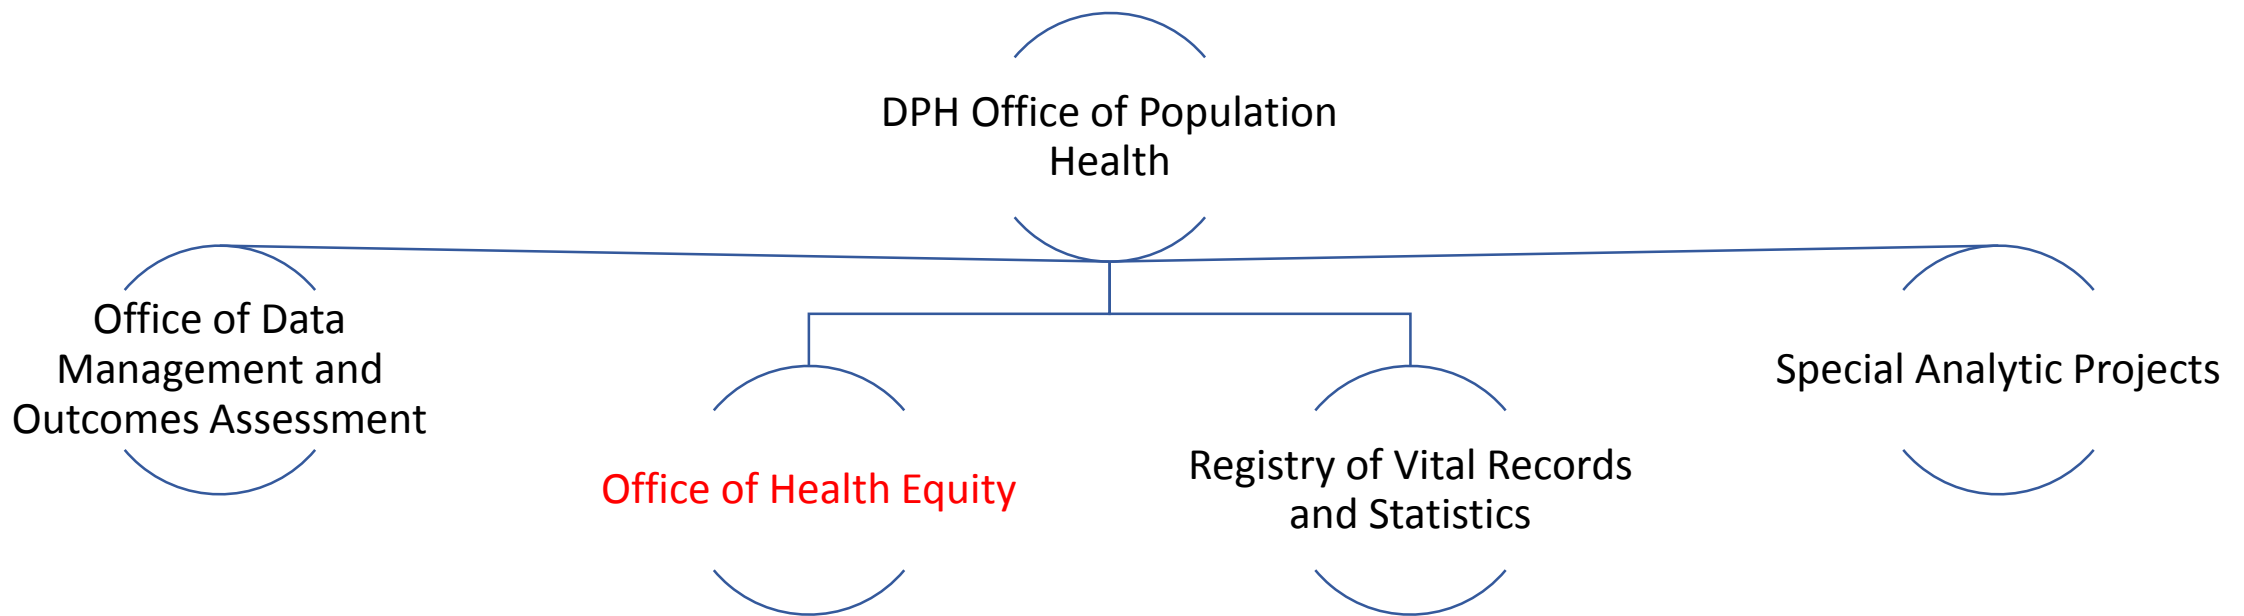

PASSION AND INNOVATION

INCLUSIVENESS AND COLLABORATION

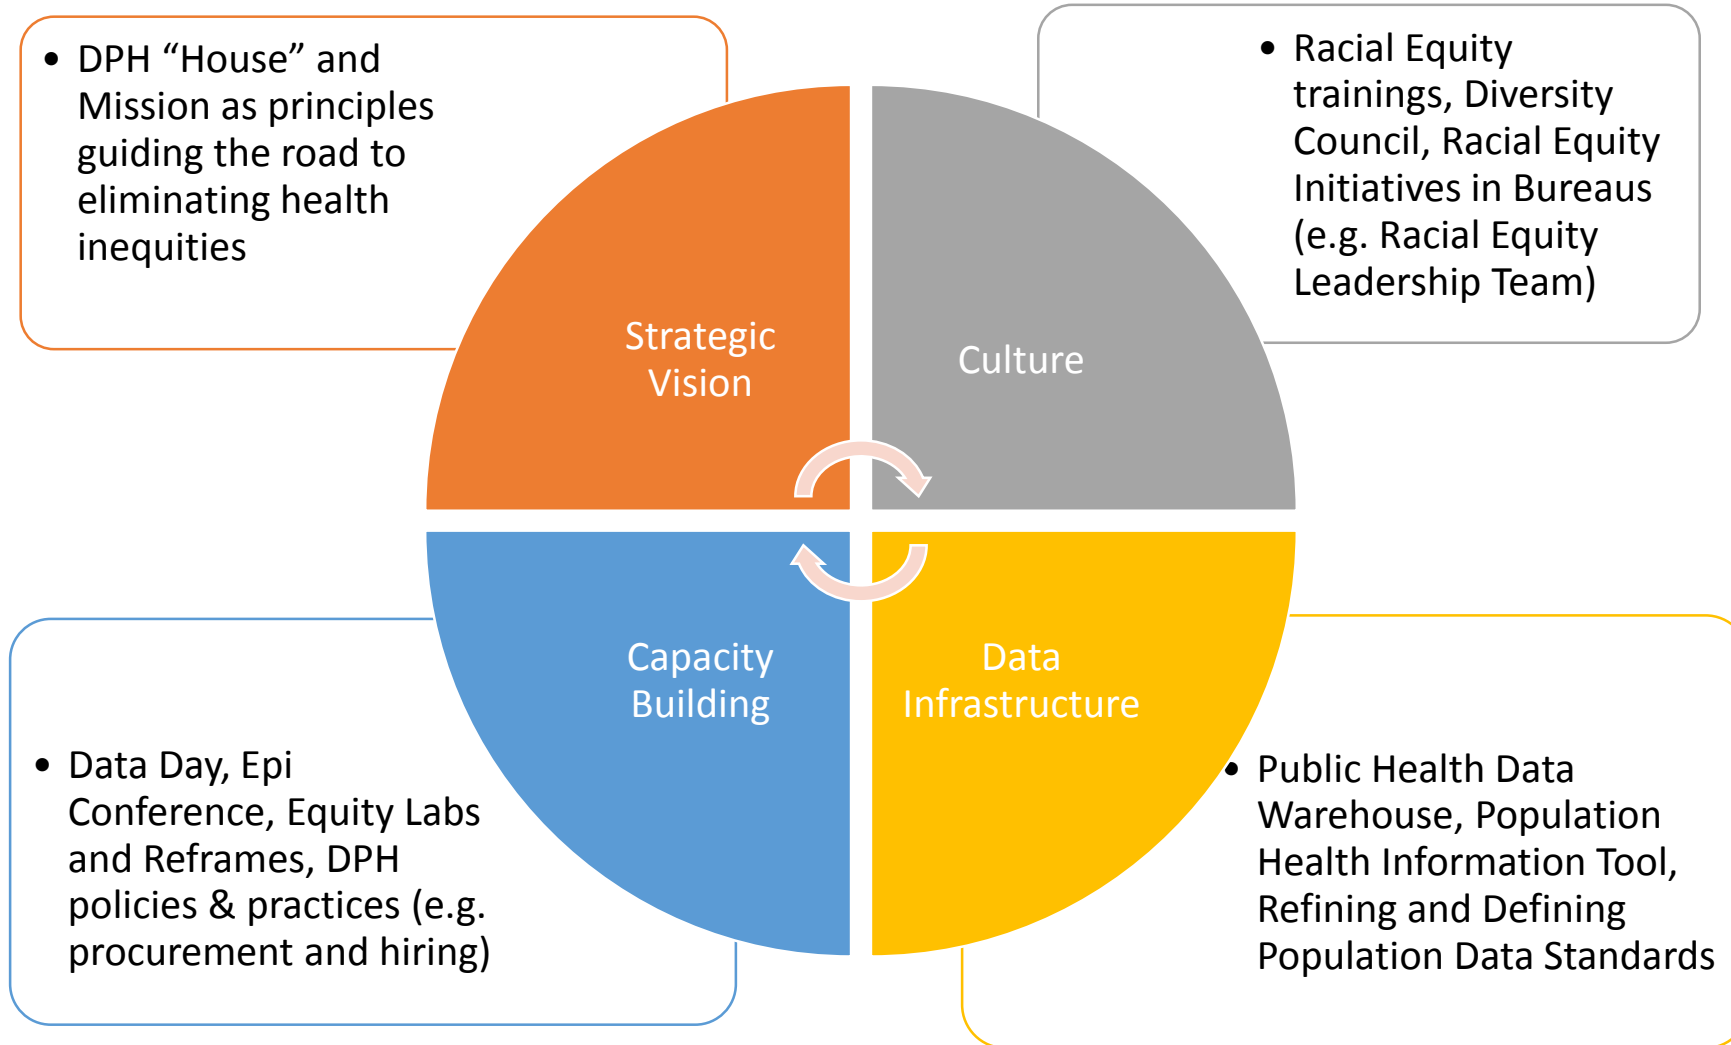

# Office of Health Equity

## Mission:

Leverage public and private partnerships to collect, use and disseminate high quality data and documentation *and* inform and influence policies, programs, practices, prevention strategies and resource allocation **that address inequities in the social determinants of health**. The Office of Health Equity was established at DPH in the 1980s and was expanded in 2018 through an Interagency Services Agreement from the Executive Office of Health & Human Services.

# A working framework for DPH's equity activities

# Definition of Terms

## **What is health equality?**

Everyone is given the same health intervention without consideration of underlying needs.

## **What are health disparities?**

Disparities are significant differences in health outcomes between populations.

## **What are health inequities?**

Inequities are the unjust distribution of resources and power between populations which manifests in disparities.

## **What is health equity?**

Everyone has what they need to attain their highest level of health.

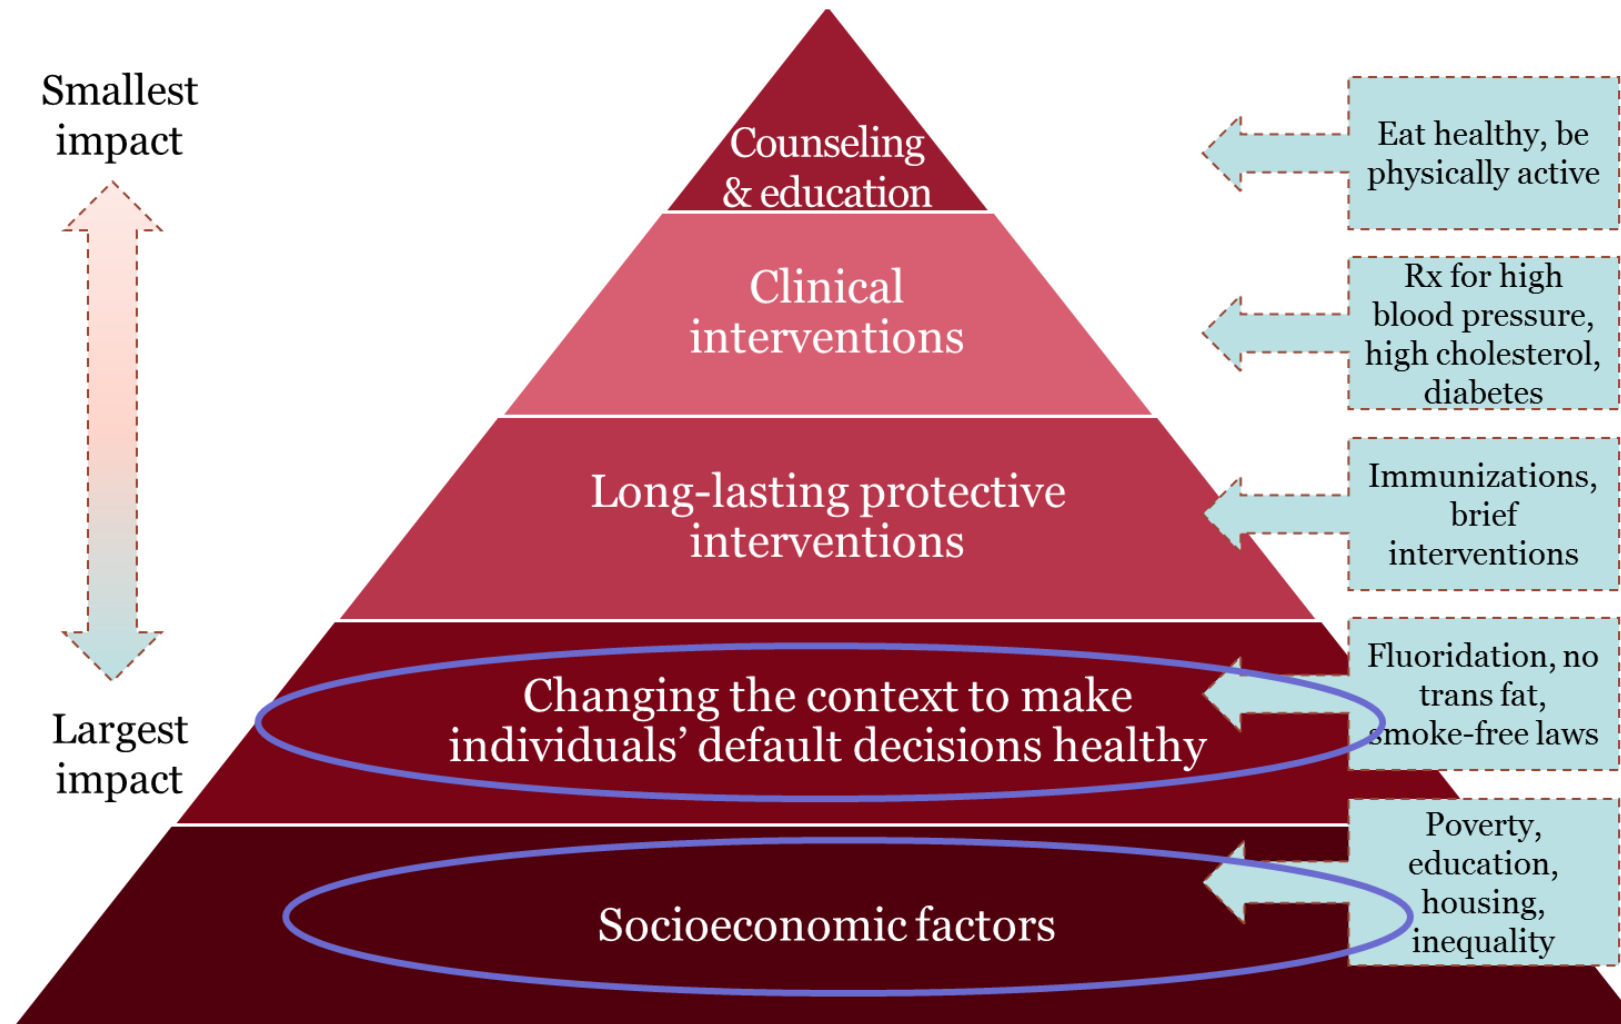

# What Makes Us Healthy?

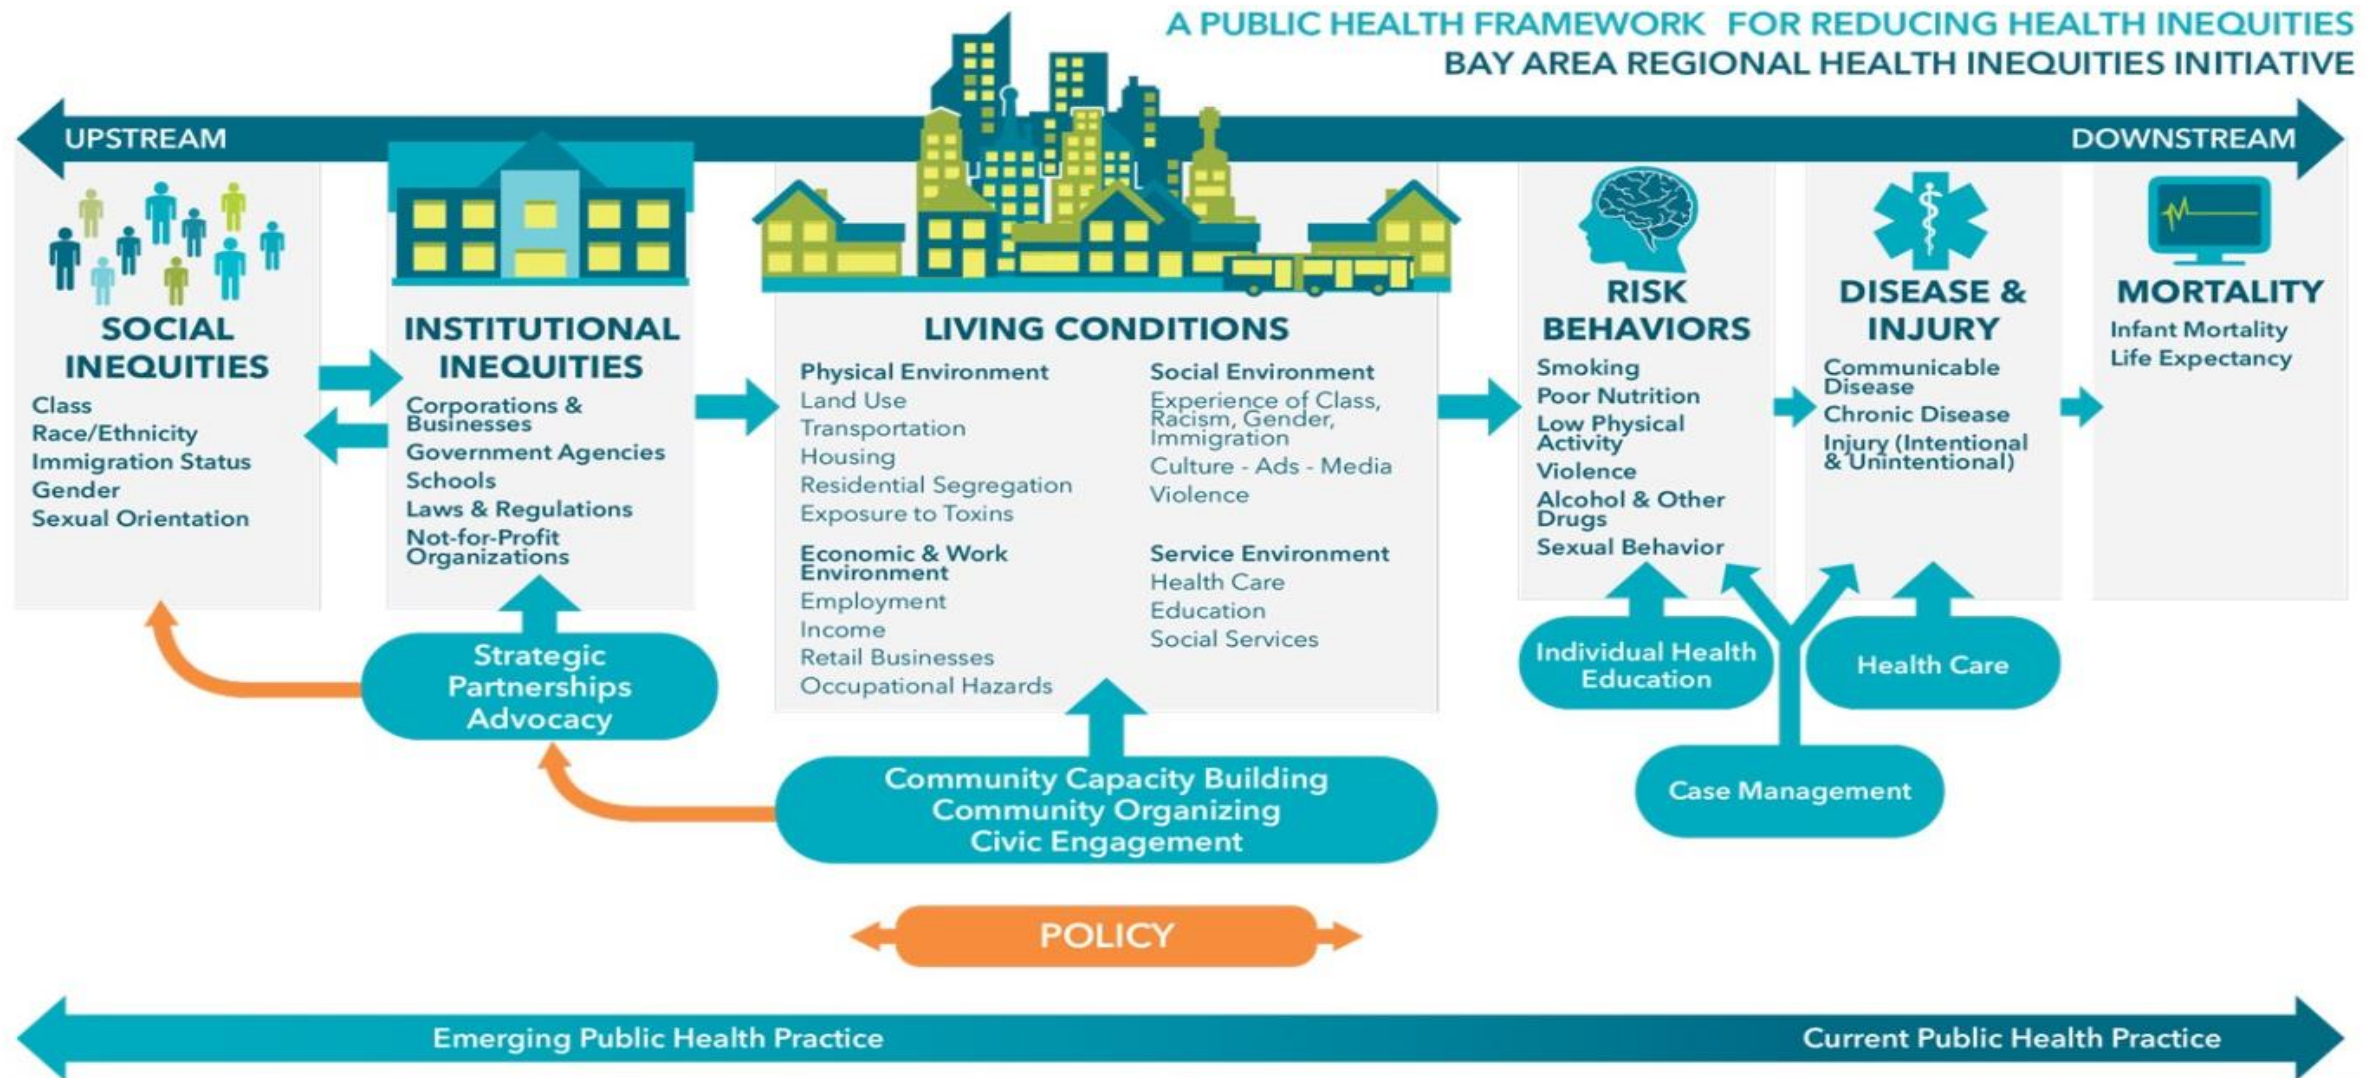

■ Genes & Biology ■ Health Care ■ Physical Environment ■ Health Behaviors ■ Social & Economic Factors

SOURCE: ADAPTED FROM R TARLOV, A. (1999). PUBLIC POLICY FRAMEWORKS FOR IMPROVING POPULATION HEALTH. ANNALS OF THE NEW YORK ACADEMY OF SCIENCES. 896. 281-93.

# CDC Health Impact Pyramid

- Poor conditions prevent people from practicing healthy behaviors **and achieving good health.**

## B. FULL COVID-19 HEALTH EQUITY ADVISORY GROUP RECOMMENDATIONS

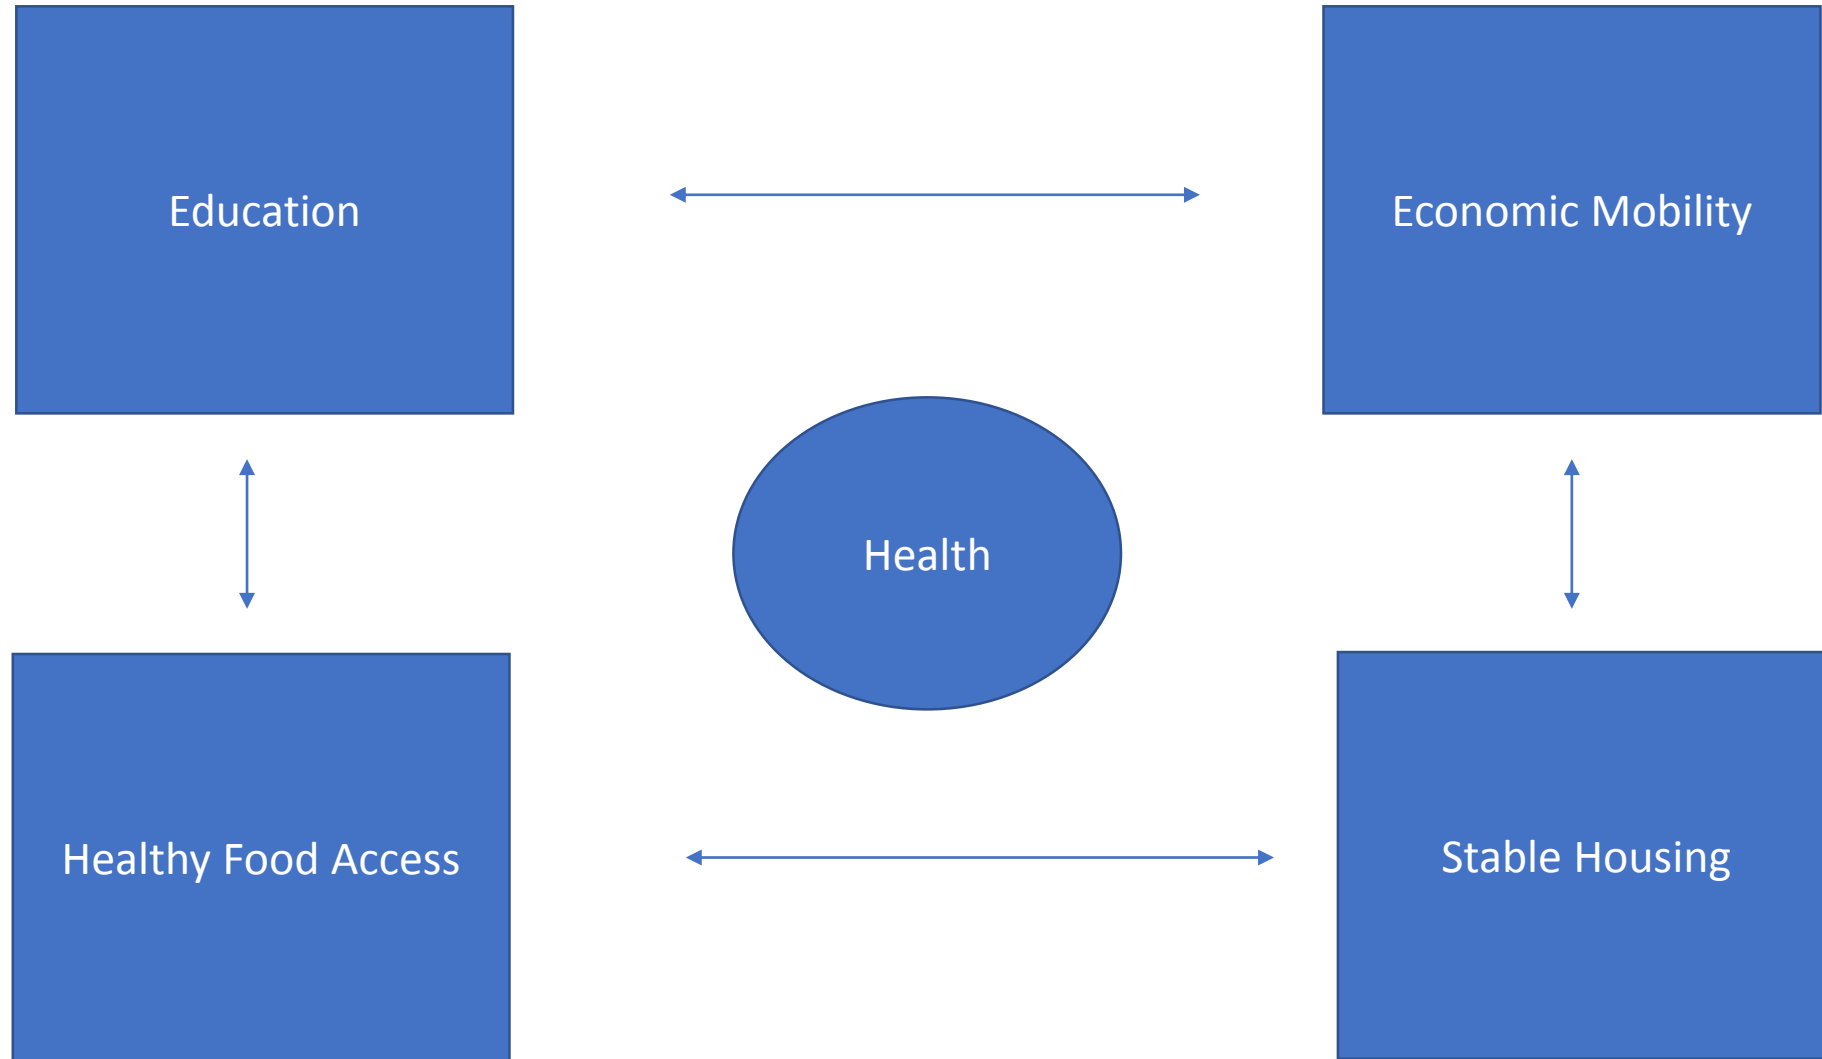

---

# Principles Underlying Recommendations

As part of the development of these recommendations, the Health Equity Advisory Group Social Determinants of Health Subcommittee developed the following principles:

- Acknowledging the fundamental role of racism, xenophobia and lack of economic opportunity as causes of inequitable outcomes;
- acknowledging the role of root causes even if addressing a more immediate and urgent need; at a minimum, ensuring that immediate mitigations are implemented in a way that does not perpetuate inequities and does more than provide a service that alone does not work to change the condition leading to the inequity;
- identifying actions that can have measurable impact and/or where we can demonstrate what success looks like;
- these actions are intended to challenge existing systems that are not working.

# Model of How Social Determinants Interact

# Social Determinants of Health Subcommittee

	Recommendations
<b>Housing Stability</b>	<ul style="list-style-type: none"><li>• Implement policies that increases housing stability</li></ul>
<b>Economic Mobility</b>	<ul style="list-style-type: none"><li>• Develop pathways to financial freedom to prevent further disparities and that support economic mobility</li></ul>

# SDOH Recommendation 1: Implement policies that increases housing stability

**Details:** Moratorium on evictions and foreclosures to include a financial relief package help pay rents and mortgages

**Root Cause Identified:** Redlining, lending practices and segregation have limited communities of color ability to own homes

**Population(s) Impacted:** Communities of color as primary focus

## SDOH Recommendation 2: Develop pathways to financial freedom to prevent further disparities and that support economic mobility

**Details:** COVID-19 has shined a spotlight on systems that disadvantage communities of color and limit ability to participate fully in the economy. Implementation of a comprehensive economic package that includes but is not limited to relief for small businesses owned by persons of color will strive to change the wealth gap and support economic mobility.

**Root Cause Identified:** Lack of economic opportunity

**Population(s) Impacted:** Communities of color as primary focus

# Social Determinants of Health

	DPH Potential Actions
<b>Housing Stability</b>	<ul style="list-style-type: none"><li>• Describe and disseminate model of housing as a social determinant of health and the prevention of homelessness and housing instability as critical for addressing health equity</li><li>• Improve housing data in public health data systems</li></ul>
<b>Economic Mobility</b>	<ul style="list-style-type: none"><li>• Engage in conversations to address the connection between public health and inequitable economic practices and systems</li><li>• Work with community groups to encourage hiring of diverse individuals.</li><li>• Outreach to young adults and other groups where appropriate and set up potential career pathways (e.g. in healthcare, nonprofits)</li></ul>

# Community Engagement & Support Subcommittee

	Recommendations
<b>Multilingual Messaging</b>	Prioritize investment in multilingual outreach to communities most critically impacted by COVID-19 regarding testing, protection at home and workplace, and how to access state assistance programs and resources available
<b>Engaging the Community</b>	<p>Plan and implement strategy for the active engagement and representation of existing anchor organizations in the communities in decision-making processes related to COVID-19 response and recovery</p> <p>Develop pathways for foreign-trained medical professionals to practice</p>
<b>Partnership</b>	Develop and expand public and private partnerships with community health centers, local governments, other state agencies, quasi-state agencies (e.g. MBTA) and philanthropic organizations

## Community Engagement Recommendation 1: Prioritize investment in multilingual outreach to communities most critically impacted by COVID-19 regarding testing, protection at home and workplace, and how to access state assistance programs and resources available

### **Details:**

- Deliver explicit message at the highest level – ensuring people that they should feel safe getting services and health care (especially immigrants, domestic violence victims)
- Provide more information and instruction about how to isolate in closer quarters such as an apartments, where a lot of individuals in are living together
- Make informational materials on accessing COVID-19 testing and care, Pandemic Unemployment Assistance, and the eviction moratorium available in at minimum the following languages Portuguese, Chinese, Haitian Creole
- Create portal for unemployment benefits in the at minimum the following languages, Portuguese, Chinese, Haitian Creole
- Create portal for SNAP benefits in the at minimum the following languages, Portuguese, Chinese, Haitian Creole
- Create portal for RAFT (application for housing) benefits in the at minimum the following languages, Portuguese, Chinese, Haitian Creole

Community Engagement Recommendation 1 (cont.): Prioritize investment in multilingual outreach to communities most critically impacted by COVID-19 regarding testing, protection at home and workplace, and how to access state assistance programs and resources available,

**Details, continued:**

- Create portal for MassHealth benefits in the at minimum the following languages, Portuguese, Chinese, Haitian Creole
- Recruit members of priority communities to be health outreach workers, to support with the development and dissemination of culturally informed resources
- Employ foreign-trained medical professionals to deploy statewide campaigns (ex: educational videos that can be shared on social media platforms)

**Root Cause Identified:** Systemic inequities; lack of accessible + culturally tailored information

**Population(s) Impacted:** “Priority communities” defined as: race, class, and language, those that have historically received the least resources, racially and ethnically, low income, ability, immigration status, insurance status, history of incarceration

## Community Engagement Recommendation 2: Plan and implement strategy for the active engagement and representation of existing anchor organizations in the communities in decision-making processes related to COVID-19 response and recovery

### **Details:**

- Invest in the capacity of existing partner organizations
- Allow enough time to engage stakeholders
- Put those with lived experience at the center of this process

**Root Cause Identified:** Systemic inequities; lack of accessible + culturally tailored information

**Population(s) Impacted:** “Priority communities” defined as: race, class, and language, those that have historically received the least resources, racially and ethnically, low income, ability, immigration status, insurance status, history of incarceration

# Community Engagement Recommendation 2: Develop pathways for foreign-trained medical professionals to practice

## **Details:**

- Conduct an inventory of the number of foreign trained medical professionals unable to practice in MA
- Assess current licensing requirements and models (ex. CHW) to develop plan to increase Foreign-trained medical professionals ability to practice

**Root Cause Identified:** Systemic inequities; lack of accessible + culturally tailored information

**Population(s) Impacted:** “Priority communities” defined as: race, class, and language, those that have historically received the least resources, racially and ethnically, low income, ability, immigration status, insurance status, history of incarceration

# Community Engagement & Support

	DPH Potential Actions
<b>Messaging</b>	<ul style="list-style-type: none"><li>• Increase materials &amp; web platforms available in multiple languages and simplified English</li><li>• Deliver messages through trusted members of the respective community</li></ul>
<b>Engaging the Community</b>	<ul style="list-style-type: none"><li>• Develop and disseminate department-wide community engagement guidance<ul style="list-style-type: none"><li>• Invest in the capacity of existing partner organizations</li><li>• Allow enough time to engage stakeholders</li><li>• Put those with lived experience at the center of this process</li></ul></li></ul>
<b>Partnership</b>	<ul style="list-style-type: none"><li>• Work with partners to create local community mitigation teams (e.g., clergy, business owners, community-based organizations, youth leaders) to develop strategies for effective community engagement, education, and distribution of PPE<ul style="list-style-type: none"><li>• Encourage all municipalities to develop these teams</li><li>• Provide guidance on the best ways to empower the teams</li></ul></li></ul>

# COVID-19 Mitigation Subcommittee

	Recommendations
<b>Access to PPE</b>	<ul style="list-style-type: none"><li>• Ensure equitable distribution of personal protective equipment (PPE) to essential workers, residents in professions most at-risk, and communities with high rates of infection</li></ul>
<b>Housing Stability</b>	<ul style="list-style-type: none"><li>• Understand housing instability in response to needs raised by COVID-19</li></ul>
<b>Culturally Appropriate Workforce</b>	<ul style="list-style-type: none"><li>• Create strategic guidance to intentionally recruit diverse, culturally intelligent workforce, including for contact tracing, tracking cases, and other workforce needs</li></ul>
<b>Access to Care</b>	<ul style="list-style-type: none"><li>• Work to ensure all populations have equitable access to culturally appropriate and needed therapies, vaccines, trials, and other necessary medical care</li><li>• Develop pathways for foreign-trained medical professionals to practice</li></ul>
<b>System Coordination</b>	<ul style="list-style-type: none"><li>• Create coordinated effort across healthcare providers and other relevant stakeholders to streamline efforts regarding mitigation and surge</li></ul>
<b>Community Safety</b>	<ul style="list-style-type: none"><li>• Monitor enforcement of COVID-19 guidance to avoid over-policing in disenfranchised communities and increasing inequities</li></ul>

## Mitigation Recommendation 1: Ensure equitable distribution of personal protective equipment (PPE) to essential workers, residents in professions most at-risk, and communities with high rates of infection

### **Details:**

- Increase distribution of PPE (medical grade surgical masks)
- Create and communicate standards and regulatory guidance for equitable access to quality PPE, including its use and reuse

### **Tasks:**

- Identify existing guidance on PPE and testing (beyond federal guidance) and consider universal protocol that could be used across the state and is appropriate for all ages
- Create local community mitigation teams (e.g., clergy, business owners, community-based organizations, youth leaders, etc.) aimed at developing strategies for effective community engagement, education, and distribution of PPE. Encourage all municipalities (cities and towns) to develop these teams. Provide guidance on the best ways to empower the teams. Making sure essential workers, who are not in healthcare, also have access to PPE
  - Consider public-private partnerships, including philanthropy and MBTA
  - Work with efforts already happening at community level

## Mitigation Recommendation 1 (cont.): Ensure equitable distribution of personal protective equipment to essential workers, residents in professions most at-risk, and communities with high rates of infection

### **Tasks, continued:**

- Develop domestic supply chains for 3 to 6 to 12 months out (swabs, gowns, masks, face shields, etc.), and identify the target number needed to meet broader access targets.
- Consider how to intentionally engage communities re: guidance on PPE and testing
- Use mobile units that provide access to care and relevant materials, focusing on hot spots
- Utilize community health centers for mass distribution of masks, especially to vulnerable populations
- Pursue federal reimbursement in Stimulus #4 for mitigation activities taken by states in response to COVID-19 that includes acquisition of PPE.
- Audit the state's response over the past three months generally to determine strengths and weaknesses of the response, but particularly look at where unequal access to PPE may have exacerbated the spread in certain communities. Allow the findings to inform the strategy going forward.

## Mitigation Recommendation 1 (cont.): Ensure equitable distribution of personal protective equipment to essential workers, residents in professions most at-risk, and communities with high rates of infection

### **Tasks, continued:**

- Identify a school reopening strategy (possibly September 2020) that includes PPE needs with prioritization for communities with higher rates of chronic illnesses that make their families more at-risk from COVID-19

**Root Cause Identified:** Systemic racial and other inequities in housing, economic status, employment, reliance on public transportation, as well as barriers to accessing health care and protective measures.

**Population(s) Impacted:** Healthcare workers (includes care attendants and CHWs) and essential workers; Individuals who live or work in congregate settings, homeless shelters, people with disabilities, communities of color, immigrant communities with intentional focus on the undocumented, Department of Corrections and County Jails (those who live and work in corrections facilities) with monitoring

## Mitigation Recommendation 2: Understand housing instability in response to needs raised by COVID-19 and implement policies that increase housing stability

### **Details:**

- Moratorium on evictions and foreclosures to include a financial relief package help pay rents and mortgages
- Establish a broader effort to create temporary housing using college dormitories and hotels for those in isolation or those who feel unsafe to return home and
- Assist individuals in finding or staying in safe, affordable housing.

### **Tasks:**

- Secure interim housing options for those needing to isolate, with a focus on available college dormitories and hotel rooms/suites
  - Develop implementation and management plan in collaboration with colleges and hotels (monitor and manage inventory of available housing)
  - Provide family care support during time of temporary isolation (child and elder care, explore option of utilizing low risk family and friends)
  - Incorporate, to the extent feasible, cultural considerations in location and core elements of temporary housing (e.g. food choices)

## Mitigation Recommendation 2 (cont.): Understand housing instability in response to needs raised by COVID-19 and implement policies that increase housing stability

### **Tasks, continued:**

- Expand the state's three mobile housing subsidies: MRVP, AHVP, and the DMH Rental Subsidy. This will help ensure experiencing economic disruption can find safe, affordable places to live.
- Ensure emergency housing options are available to all regardless of immigration status

**Root Cause Identified:** Redlining, lending practices and segregation have limited communities of color ability to own homes

**Population(s) Impacted:** Communities of color as primary focus; Essential workers with positive COVID-19 test results (health care and other essential workers); Essential workers in dense living arrangements with concerns of family exposure; Other individuals (non-essential workers) who are members of priority populations; Immigrant communities with intentional focus on the undocumented; People who are homeless; Those who have been decarcerated

## Mitigation Recommendation 3: Create strategic guidance to intentionally recruit diverse, culturally intelligent workforce, including for contact tracing, tracking cases, and other workforce needs

### **Details:**

- Work with community groups to hire diverse individuals and outreach to young adults and set up potential career pathway
- Recruit culturally competent and aware workers (CHW model), reflecting the community
- Pursue federal reimbursement in Stimulus #4 and advocate for tracing funds
- Advocate to ensure COVID-19-related workforce reflects the communities being served and demonstrate ongoing commitment to build core of community workers

**Root Cause Identified:** Systemic racial and other inequities in economic status and employment

**Population(s) Impacted:** People of Color (race/ethnicity), sexual orientation and gender identity, people with disabilities, people with limited English proficiency and those with low literacy, immigrant communities with focus on undocumented, low-income, young adults

## Mitigation Recommendation 4: Work to ensure all populations have equitable access to needed therapies, vaccines, trials, and other necessary medical care

### **Details:**

- Create guidance regarding equitable distribution of necessary medical care
- Update the crisis standards of care as they relate to the allocation of resources
- Partner with community health centers and local government to disseminate materials

### **Tasks:**

- Establish and communicate state guidelines to individual providers (either when licenses are renewed or voluntary) regarding equitable distribution of needed therapies, vaccines, trials, antibody testing, and other necessary medical care.
  - Build equity into resource planning to ensure adequate supply and prioritize identified populations
  - Collect data from providers on equitable distribution of resources to target populations
  - Allocate resources based on immediate lives saved- do not allocate resources based on presumed quality of life
- Update the crisis standards of care as they relate to the allocation of resources, including treatments and vaccinations, and remove the consideration of 5-year survival.

## Mitigation Recommendation 4 (cont.): Work to ensure all populations have equitable access to needed therapies, vaccines, trials, and other necessary medical care

### **Tasks, continued:**

- Partner with community health centers and local government to disseminate materials, while partnering with other providers (who need to prioritize access to priority populations) such as labs, pharmaceutical industry, independent living facilities, the recovery community, and the disability community in distribution efforts
  - Educate that everyone deserves equal access to treatments to all stakeholders
  - Include diverse stakeholders at every conversation point around access and allocation
- Increase available resources to avoid scarcity

**Root Cause Identified:** Resources allocated in inequitable manner; discrimination/racism in healthcare and history of trauma/distrust related to unethical testing practices.

**Population(s) Impacted:** People of Color (race/ethnicity), sexual orientation and gender identity, people with disabilities, people with limited English proficiency and those with low literacy, immigrant communities with focus on undocumented, low-income, individuals who are incarcerated

## Mitigation Recommendation 5: Create coordinated effort across healthcare providers and other relevant stakeholders to streamline efforts regarding mitigation and surge

### Details:

- Increase COVID-19 mitigation and surge inclusion and collaboration across all relevant providers – such as hospitals, health centers, congregate arrangements, social services, and others – through partnership, regulations, and guidance, alongside ongoing engagement of representatives of marginalized communities

### Tasks:

- Ensure that representatives of marginalized communities are fully represented in any and all efforts to allocate scarce medical resources during the pandemic.
  - Expand outreach to representatives of marginalized communities, and incorporate them into existing bodies (e.g. Crisis Standards of Care committee, Reopening Advisory Boards) rather than creating separate subsidiary groups for them.
- Ensure all relevant providers are regularly inspected for compliance with infection control procedures. Impose tightened regulations on non-compliant facilities and relocate COVID-negative residents of non-compliant facilities to safe community settings when possible.
  - Develop and publish classification system to identify settings of highest concern

**Tasks, continued:**

- Ensure that all congregate settings, including nursing homes, group homes, adult foster care, and mental health facilities, are treated as healthcare providers for purpose of communication and PPE priority.
  - Establish standing congregate settings stakeholder group that can partner with the state to set policy and share information.
- Establish tighter oversight of transfers between community settings and hospitals. Ensure no COVID-positive individuals are discharged into community settings unless there are clear and adequate plans to provide on-site treatment and isolate them completely from COVID-negative residents.
  - Look for patterns of admission/discharge between community settings and hospitals and formalize communication relationships.

## Mitigation Recommendation 5 (cont.): Create coordinated effort across healthcare providers and other relevant stakeholders to streamline efforts regarding mitigation and surge

### **Details, continued:**

- For patients enrolled in MassHealth Managed Care plans, ensure that care coordinators are involved in all emergency care decision-making regarding that patient.
  - Engage managed care plans and providers in holistic planning for needs of COVID patients with underlying conditions.

**Root Cause Identified:** Existing siloes

**Population(s) Impacted:** People of Color (race/ethnicity); Sexual orientation and gender identity; Individuals who have a disability, especially ID/DD, respiratory disorders, autoimmune disorders, deaf people, people with mental health diagnoses, people who use durable medical equipment; People who primarily speak languages other than English and those with varying levels of literacy

## Mitigation Recommendation 6: Monitor enforcement of guidance to avoid over-policing in disenfranchised communities and increasing inequities

### **Details:**

- Establish and communicate state guidelines regarding equitable enforcement to ensure that communities of color aren't disproportionately targeted for enforcement activities.
- Monitor communities using city and zip-code level data; consider how guidance is being enforced.

**Root Cause Identified:** Systemic racial and other inequities

**Population(s) Impacted:** People of Color (race/ethnicity); Sexual orientation and gender identity; People who have a disability; People who primarily speak languages other than English and those with varying levels of literacy

	COVID-19 Mitigation: DPH Potential Actions
Access to PPE	<ul style="list-style-type: none"> <li>• Support implementation of MA COVID-19 testing plan</li> <li>• Engage with Occupational Health to provide guidance to employees and employers on safe work spaces</li> </ul>
Housing Stability	<ul style="list-style-type: none"> <li>• Bring public health perspective to administration efforts to build state supports for low-income people (e.g. increasing MVRP subsidies) and mobilizing for increased access</li> </ul>
Culturally Appropriate Workforce	<ul style="list-style-type: none"> <li>• Provide best practices to CTC regarding additional hires and additional training to improve cultural intelligence</li> <li>• Explore CHWs for contract tracing roles</li> <li>• Disseminate guidance on steps for foreign-trained medical professionals to practice in MA</li> </ul>
Access to Care	<ul style="list-style-type: none"> <li>• Develop guidance for relevant stakeholders regarding access and inclusion of underserved groups to available services (trials, vaccines, needed medical care, etc.)</li> <li>• Determine best practices from other states and countries regarding equitable access</li> <li>• Leverage efforts on chronic disease management, health insurance status, and continuity of care to identify and address impacts of not seeking care due to COVID-19</li> </ul>
System Coordination	<ul style="list-style-type: none"> <li>• Work with MassHealth &amp; ACOs to support access to care with social supports</li> <li>• Work with community partners to address care coordination gaps and needs</li> </ul>
Community Safety	<ul style="list-style-type: none"> <li>• Explore training regarding implementation of public health guidance for required face masks where social distancing is not possible and intersection with law enforcement</li> </ul>

# Data and Metrics Subcommittee

	Recommendations
<b>Public Health COVID-19 Indicators</b>	<b>Report indicators disaggregated across vulnerable and marginalized populations</b> to ensure resource distribution is equitable and culturally/ linguistically appropriate
<b>‘Safer at Home’ advisory</b>	<b>Track ability to work from home across vulnerable and marginalized populations</b> to ensure resources (\$, PPE, testing, etc.) are geared towards these populations
<b>Caring for Children</b>	<b>Track childcare providers re-opening by diverse ownership</b> to ensure equal opportunity for minority-owned businesses and increased support to meet safety protocols  <b>Track access to childcare across vulnerable and marginalized populations</b> to ensure equitable childcare access for workers required to return
<b>Transit</b>	<b>Track ridership in “hot spot” transit areas</b> to ensure vulnerable and marginalized communities are not subject to increased exposure due to crowded transit

Reopening Massachusetts Plan Details: <https://www.mass.gov/info-details/reopening-massachusetts>

## Data Recommendation 1: Track and report COVID19 indicators disaggregated across vulnerable populations to ensure equitable and culturally/linguistically appropriate resource distribution

### Details:

- Demographic and geographic data at a granular level (vulnerable populations and hot spots/gateway city data by zip code), disability status, institutional settings (prisons, group homes) e.g. include data for Native/indigenous populations on reports
- Include denominators by neighborhood when tracking disaggregated testing data
- Incorporate SDOH into health equity framing. Avoid stigma stereotypes and "blaming" by framing disparities data in the systemic inequities that are causing them.

**Root Cause Identified:** Segregation and disinvestment in marginalized communities, inequities in access to resources among marginalized populations

**Population(s) Impacted:** Racial/Ethnic groups (AAPI, Black, Indigenous, and Latinx); immigrants, women, elders, low-income and people with disabilities

## Data Recommendation 2: Track ability to work from home across vulnerable populations to ensure resources (funds, PPE, testing, etc.) are geared towards vulnerable populations

### Details:

- Working with specific industries or employers to supplement as state data may be limited
- Assess the feasibility of data recommendations, i.e. does the infrastructure already exist to collect this information, or can they be improved?
- Be mindful of the limitations of other data sources, e.g. public schools' challenges collecting Native Alaskan/American Indian/Native Hawaiian student data

**Root Cause Identified:** Lower-paying/hourly wage jobs are often held by people of color both US and foreign born, and women; these jobs are typically harder to do from home or have no telework options

**Population(s) Impacted:** Women and Communities of color, immigrants, and low income

## Data Recommendation 3: Track access to and ownership of childcare services across vulnerable populations and geography to ensure equitable childcare access for workers required to return to work and support minority-owned childcare services in hot spots

### **Details:**

- Certain businesses/industries less likely to work from home presenting higher risk for workers. Those same jobs required to return are less likely to be able to afford and more likely to need childcare
- Populations that are likely to have access to PPE, may exist in areas/serve populations with higher case rates
- Track childcare providers' ownership and ability to afford cost of PPE and safety standards

**Root Cause Identified:** Segregation and disinvestment in marginalized communities, inequities in access to resources among marginalized populations

**Population(s) Impacted:** Communities of color, immigrants, low income population

## Data Recommendation 4: Track ridership in “hot spot” transit areas to ensure minority communities are not subject to increased exposure due to crowded transit

### **Details:**

- Riders that use public transit to commute to/from “hot spot” (areas with high incidence of COVID-19) likely to have increased exposure
- Surveillance data needed for hot spot residents/workers
- Need to track indicators of risk mitigation for riders as well
- Consider State plan to allocate resources MBTA riders at hot spot areas, e.g. provide free masks/PPE at transit stops in these areas

**Root Cause Identified:** Segregation and disinvestment in marginalized communities, inequities in access to resources among marginalized populations

**Population(s) Impacted:** Communities of color, immigrants, low income population

# Data and Metrics

	DPH Potential Actions
<b>Public Health COVID-19 Indicators</b>	<p>Working on internal data resources to disaggregate data:</p> <ul style="list-style-type: none"><li>• Linking data across datasets</li><li>• Using algorithms to impute data</li><li>• Providing mapping overlays with social determinants</li><li>• Disaggregating existing data and improve data collection</li></ul> <p>Conduct a COVID-19 Community Impact Survey-- applicable across all recommendations for data/metrics</p> <p>Work with state agencies to look across recommendations and existing data (e.g. EHS Interagency Health Equity Working Group)</p>
<b>‘Safer at Home’ advisory</b>	<p>Add items related to the re-opening plan into the DPH COVID-19 Health Equity Survey, and share back this information with sister agencies and other stakeholders to inform future data collection efforts.</p>
<b>Caring for Children</b>	
<b>Transit</b>	

# COVID-19 HEALTH EQUITY DATA HIGHLIGHTS: UPDATED JULY 1, 2020

---

Population denominators for rate calculations provided by UMass Donahue Inst. based on *Strate S, et al. Small Area Population Estimates for 2011 through 2020, published March 2020 (original report published Oct 2016)*

# Massachusetts Department of Public Health COVID-19 Dashboard - Wednesday, July 01, 2020

## Cases, Hospitalizations, & Deaths by Race/Ethnicity

The following caveats apply to these data:

1. Information on race and ethnicity is collected and reported by laboratories, healthcare providers and local boards of health and may or may not reflect self-report by the individual case.
2. If no information is provided by any reporter on a case's race or ethnicity, DPH classifies it as missing.
3. A classification of unknown indicates the reporter did not know the race and ethnicity of the individual, the individual refused to provide information, or that the originating system does not capture the information.
4. Other indicates multiple races or that the originating system does not capture the information.

**Note:** COVID-19 testing is currently conducted by dozens of private labs, hospitals, and other partners and the Department of Public Health is working with these organizations and to improve data reporting by race and ethnicity, to better understand where, and on whom, the burden of illness is falling so the Commonwealth can respond more effectively. On 4/8, the Commissioner of Public Health issued an Order related to collecting complete demographic information for all confirmed and suspected COVID-19 patients.

### Total Cases by Race/Ethnicity

### Total Cases Reported as Hospitalized\* by Race/Ethnicity

### Total Deaths by Race/Ethnicity

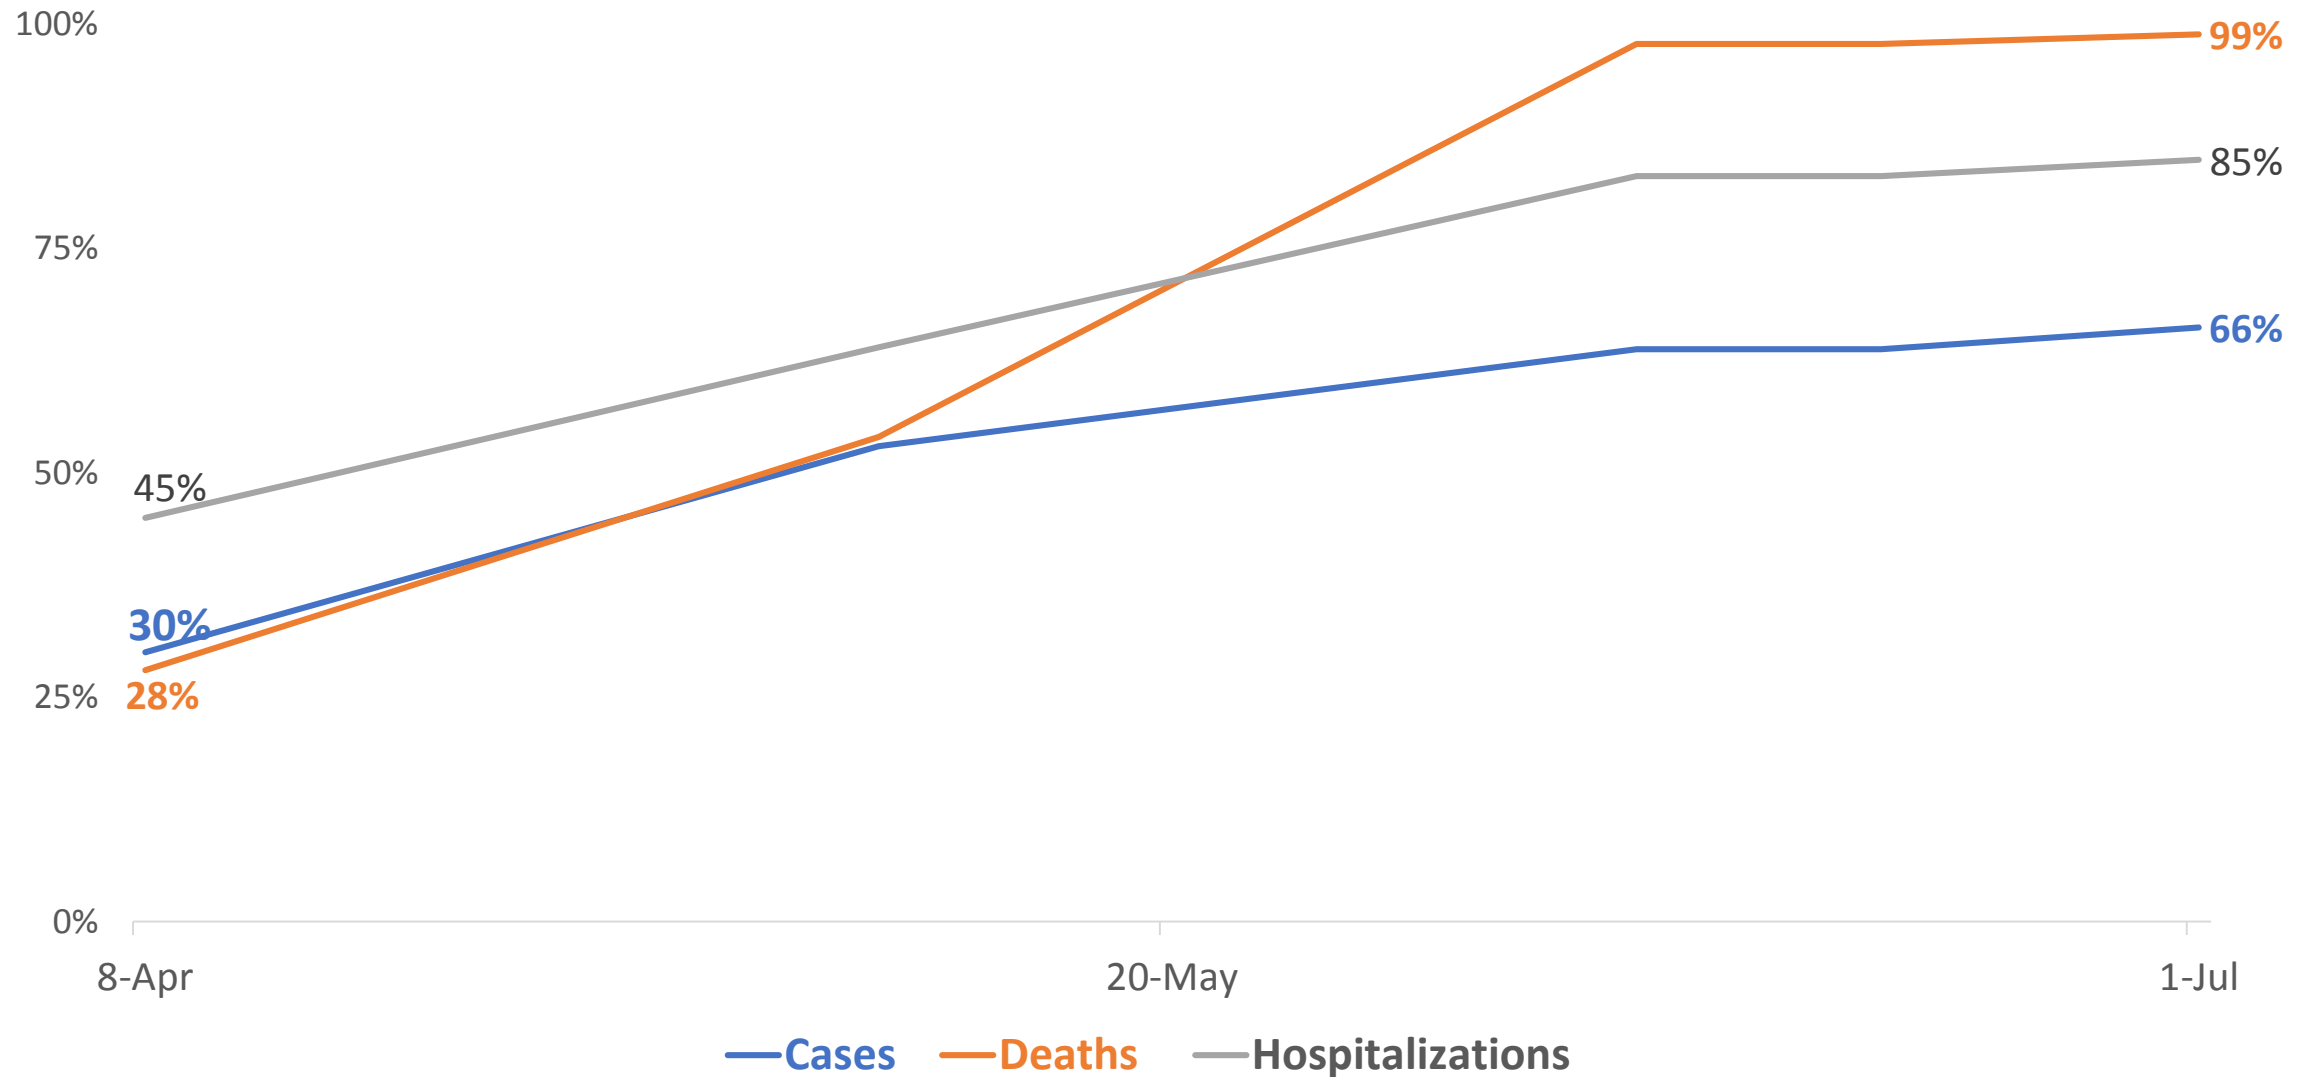

● Hispanic ● Non-Hispanic Asian ● Non-Hispanic Black/African American ● Non-Hispanic Other ● Non-Hispanic White ● Unknown/Missing

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital survey; Tables and Figures created by the Office of Population Health.

Note: all data are cumulative and current as of 10:00am on the date at the top of the page; \*Hospitalization refers to status at any point in time, not necessarily the current status of the patient/demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital surveys. Includes both probable and confirmed cases.

# Following the Executive Order on April 8th, race/ethnicity data reporting has improved for cases, deaths, and hospitalizations

# The Rate of Positive Cases is Highest for Black and Hispanic Residents

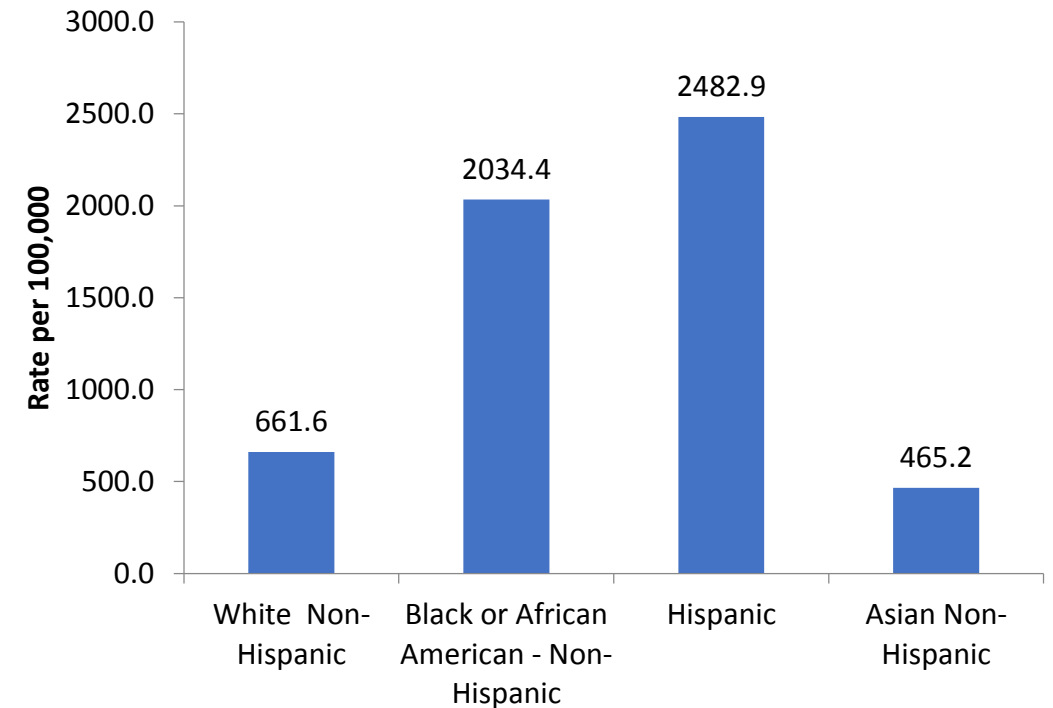

- Black non-Hispanics represent 7.2% of the MA population but double that proportion of cases at 14.2% of cases
- Hispanics represent 12.2% of the MA population but more than twice that proportion of cases at 29.3% of cases

**Percent of Total Population and Percent of Cases by Race/Ethnicity**

- The highest rates of positive cases are among Black non-Hispanics and Hispanics which are more than 3x higher than the rate for White non-Hispanics

**Crude Rate of COVID-19 Cases by Race/Ethnicity**

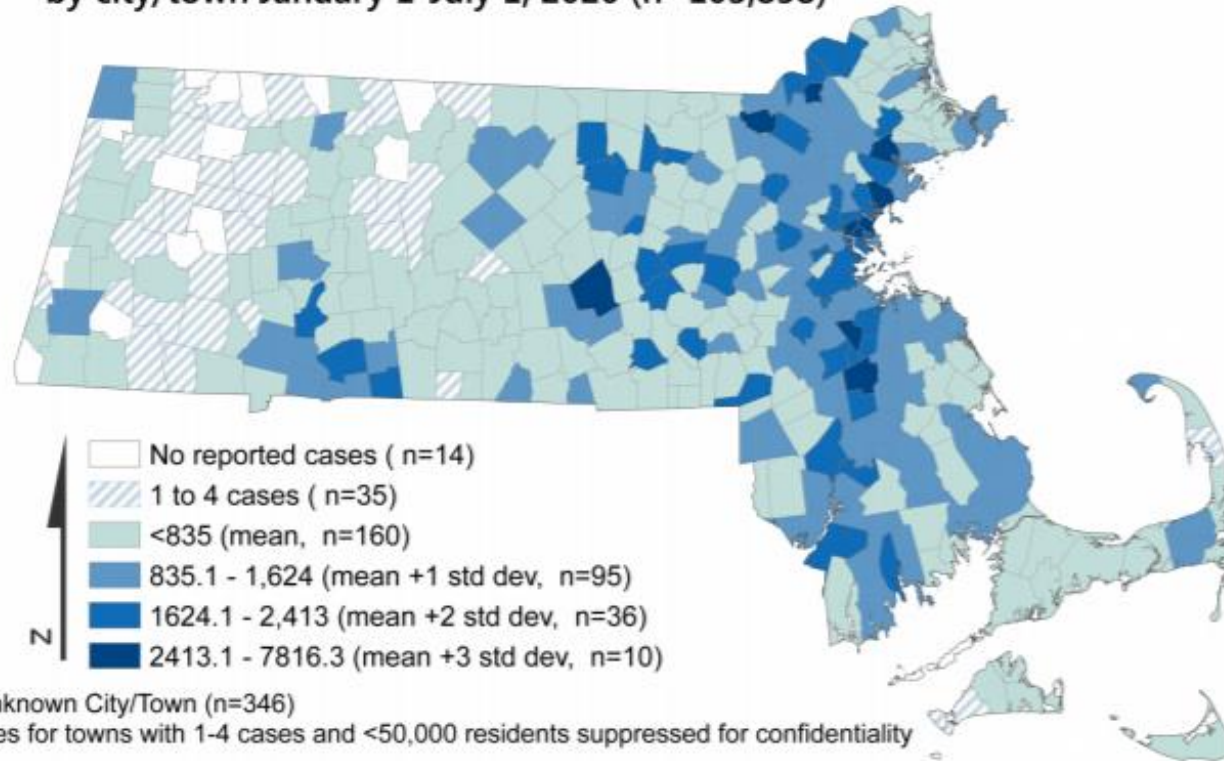

Data as of 07/01/2020

Population denominators for rate calculations provided by UMass Donahue Inst. based on *Strate S, et al. Small Area Population Estimates for 2011 through 2020, published March 2020 (original report published Oct 2016)*

# The Communities with Highest Case Rates are Primarily in High Density Population Areas

Cumulative rate (per 100,000) of confirmed COVID-19 cases  
by city/town January 1-July 1, 2020 (n=103,858)\*

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Map created by the Office of Population Health;  
Town Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018, Massachusetts Department of Public Health, Bureau of  
Environmental Health

- The ten communities with the highest cumulative rates of COVID-19 cases per 100,000 residents were: Chelsea, Brockton, Lawrence, Everett, Lynn, Revere, Randolph, Worcester, Danvers, and Lowell.

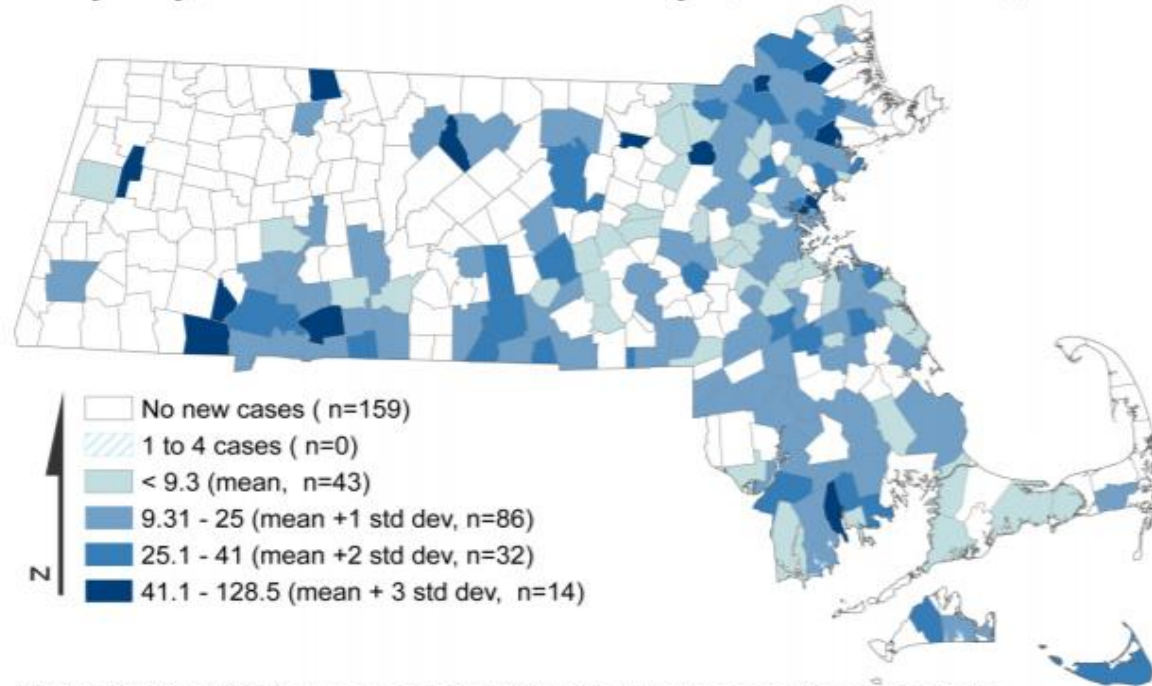

# Cities with the Highest Rates of COVID-19 are Primarily Communities of Color

The ten communities with the highest rates of COVID-19 are shown below. The overall rate in MA of COVID-19 Cases is 1,490.8 per 100,000 people as of 06/30/2020. Almost all of these communities have high (>50%) percentage of residents who are people of color (shaded blue)

# Communities with New Cases include those with High Cumulative Case Rates

Rate of New Confirmed COVID-19 cases (per 100,000)  
by City/Town from June 24 to July 1, 2020 (n=1096)\*

\* Rates for towns with 1-4 cases and <50,000 residents suppressed for confidentiality

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Map created by the Office of Population Health; Town Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018, Massachusetts Department of Public Health, Bureau of Environmental Health

- From June 24<sup>th</sup> to July 1<sup>st</sup> cities/towns with high cumulative case rates reported above state average rate of new cases, these include Chelsea, Danvers, Lawrence, and Revere.
- New communities with high weekly new case rates compared to the average new case rate are Ayer, Hampden, Haverhill, Middleton, New Bedford and Springfield.

# The Rate of Hospitalizations is Highest for Black and Hispanic Residents

- White non-Hispanics represent 71.5% of the population but only 57.2% of the hospitalizations, whereas the percentages of Black Non-Hispanic and Hispanics who are hospitalized are greater than their proportions in the population.

Data as of 07/01/2020

**Percent of Total Population and Percent of Hospitalizations by Race/Ethnicity**

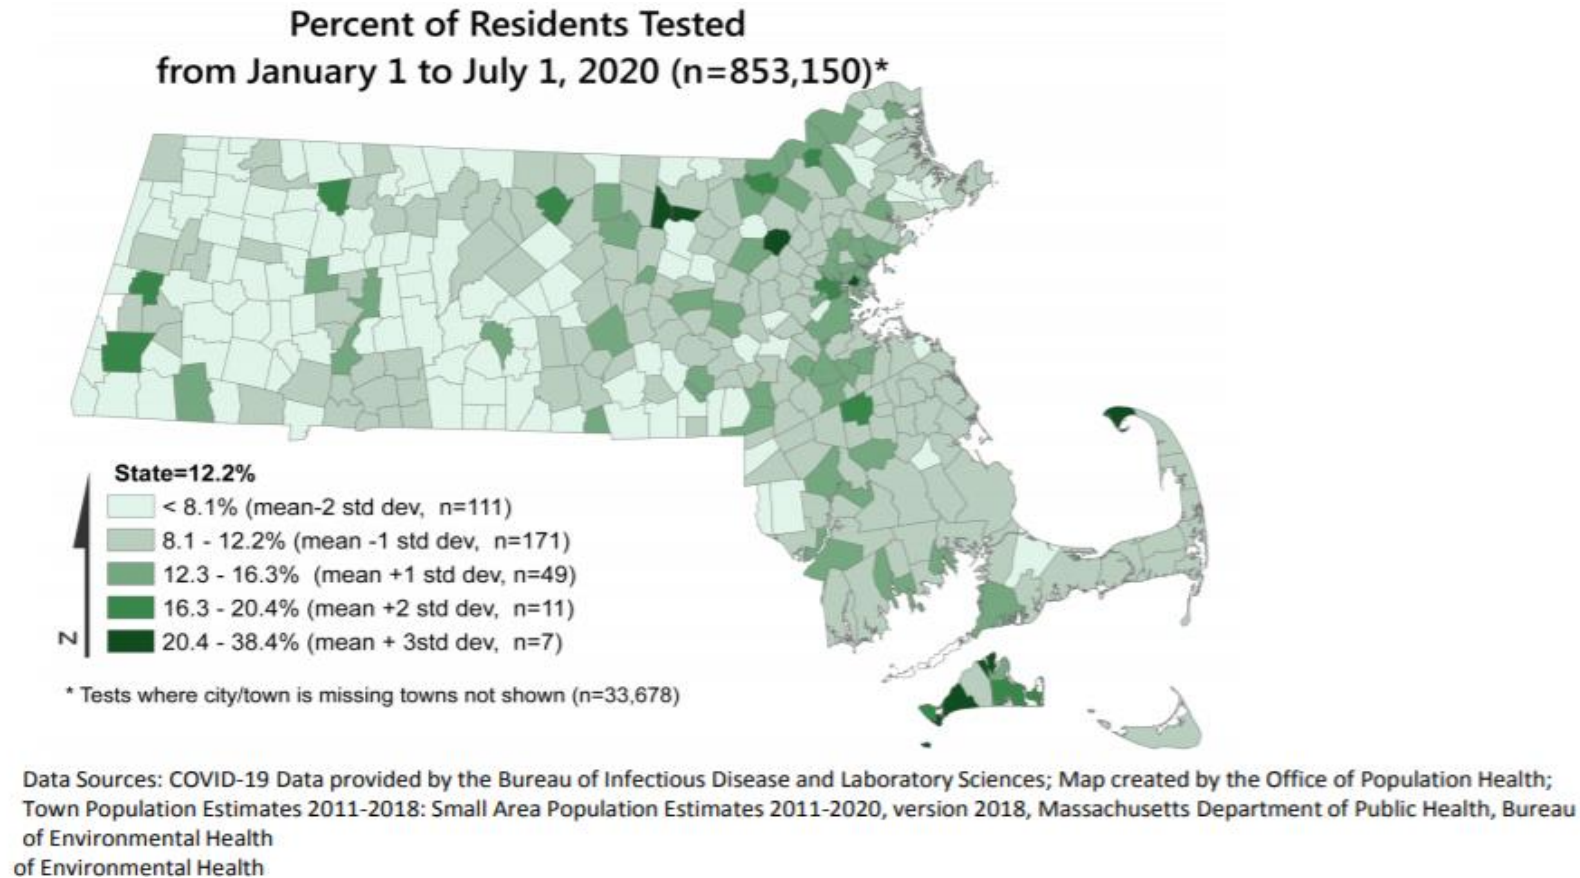

- The rate of hospitalizations for Black non-Hispanics and Hispanics is 2.4x and 1.6x higher (respectively) than for White non-Hispanics.

**Crude Rate COVID-19 Hospitalizations by Race/Ethnicity**

Population denominators for rate calculations provided by UMass Donahue Inst. based on *Strate S, et al. Small Area Population Estimates for 2011 through 2020, published March 2020 (original report published Oct 2016)*

# Testing Rates are High in Communities with Highest Case Rates

- The overall testing rate in MA is 12,246 per 100,000 residents. Sixty-four cities/towns with the high case rates also have testing rates above the state average, including Chelsea.
- Nine towns have high testing rates, but are not among the highest case rate communities: Aquinnah, Ayer, Bedford, Chilmark, Edgartown, Gardner, Provincetown, Shirley, and Tisbury

# Age-Specific Death Rates by Race/Ethnicity Reveal Inequities

- Age-specific death rates reveal that Hispanic, Black Non-Hispanic and Other Non-Hispanic residents have higher rates of death in every age group compared to White and Asian Non-Hispanic. This is most pronounced for age groups under 70. (Caveat: Some of the smaller counts can be unstable.)

	White Non-Hispanic		Hispanic		Black Non-Hispanic		Asian Non-Hispanic		Other <sup>2</sup> Non-Hispanic		Unknown
Age Group	Count	Rate	Count	Rate	Count	Rate	Count	Rate	Count	Rate	Count
0-19 years	0	0	0	0	0	0	0	0	0	0	0
20-29 years	3	0.45	7	4.28	<5		<5		<5		0
30-39 years	11	1.83	11	8.35	*		0	0.00	<5		<5
40-49 years	28	4.72	26	24.80	21	32.93	<5		<5		<5
50-59 years	136	17.77	65	82.49	46	73.95	11	21.77	22	236.21	7
60-69 years	508	73.25	96	209.19	139	318.82	24	68.13	62	957.61	11
70-79 years	1278	308.20	134	603.47	169	797.29	51	281.65	109	3379.20	28
80+ years	4025	1557.78	223	2200.79	279	2486.54	124	1315.66	339	22010.91	39

<sup>1</sup>Data are current as of 6/30/2020 and are subject to change.

<sup>2</sup>Other includes individuals that identify as Native Hawaiian/Pacific Islander, American Indian/Alaskan Native, Multi-Race, and Other.

\*Case counts are suppressed to prevent back calculations.

For populations <50,000 case counts, <5 cases are reported as such or are suppressed for confidentiality purposes. Rates are not calculated for suppressed counts.

Population denominators for rate calculations provided by UMass Donahue Inst. based on Strate S, et al. Small Area Population Estimates for 2011 through 2020, published March 2020 (original report published Oct 2016)

Rates are per 100,000 population. Age-adjusted to the 2000 US standard population. See weights used at: <https://www.cdc.gov/nchs/data/statnt/statnt20.pdf>

Count and Rate (per 100,000) of Reported Deaths among COVID-19 Confirmed and Probable Cases by Race and Ethnicity and Age Group in MA<sup>1</sup> (N=8054)

Data as of 06/30/2020

# Age-Adjusted Death Rates by Race/Ethnicity Reveal Inequities

- The age-adjusted death rate is highest for Black residents, at 168.1 deaths/100,000
- Age-adjusted death rates are recommended for comparisons among race groups given differences in the underlying age distribution of the MA population by race, and differences in COVID-19 death trends by age

Population denominators for rate calculations provided by UMass Donahue Inst. based on *Strate S, et al. Small Area Population Estimates for 2011 through 2020, published March 2020 (original report published Oct 2016)*

Rates are per 100,000 population. Age-adjusted to the 2000 US standard population. See weights used at: <https://www.cdc.gov/nchs/data/statnt/statnt20.pdf>

Data as of 06/30/2020

Count and Rate (per 100,000) of Reported Deaths among COVID-19 Confirmed and Probable Cases by Race and Ethnicity and Age Group in MA (N= 8054).

Data are current as of 6/30/2020 and are subject to change.

## D. COVID-19 COMMUNITY IMPACT SURVEY

---

# COVID-19 Community Impact Survey

- This is a survey of needs, knowledge and issues related to COVID-19 based on a large, tailored convenient sample that will:
  - Collect detailed demographic information
  - Support short and long term action
  - Will be translated into multiple languages
  - Include a strong community engagement strategy.
- Aim of survey is to get actionable information from communities and populations disproportionately impacted by COVID-19

# COVID-19 Community Impact Survey

**Purpose:** To better understand the needs of residents of the Commonwealth arising from the COVID-19 crisis and the mitigation efforts, in order to help address those needs now and plan for longer-term support.

Section 1: Awareness and Perceptions of COVID-19

Section 2: Experiences of COVID-19

Section 3: Comorbid Conditions/Risk Factors for COVID-19

Section 4: Impact of COVID-19 on Basic Needs (includes tech questions)

Section 5: Impact of COVID-19 on Mental Health

Section 6: Impact of COVID-19 on Family

Section 7: Impact of COVID-19 on Substance Abuse

Section 8: Impact of COVID-19 on Education

Section 9: Impact of COVID-19 on Employment/Income

Section 10: Impact of COVID-19 on Safety/Violence

Section 11: Protective Factors

Section 12: Demographics

# Community Impact Survey: Priority Populations

## **Priority populations identified for the adult survey:**

- Young parents (youth age 24 or less with children)
- People who are currently using substances
- People who are incarcerated or have a history of incarceration
- People who are experiencing homelessness or housing instability
- Pregnant and postpartum women
- People of color, including:
  - Foreign born people
  - People with limited English proficiency
- People with disabilities
- LGBTQ+ people
- Geographic: Representation across the state (with oversampling of hotspots)
- People who are essential workers
- People who are recently unemployed
- Elders

# Community Impact Survey: Priority Populations

## **Priority populations identified for the youth survey (age 14-24):**

- Young people who are incarcerated or have a history of incarceration
- Young people who are experiencing homelessness or housing instability
- Young people of color, including:
  - Foreign born young people
  - Young people with limited English proficiency
- Young people with disabilities
- LGBTQ+ young people
- Out of school youth
- Geographic: Representation across the state (with oversampling of hotspots)
- Young people who are essential workers
