

### Massachusetts Department of Public Health

### Methamphetamine Use Commission Overview of Methamphetamine and Stimulant Use in Massachusetts DPH/BSAS

December 8, 2021

- <u>Amphetamines</u>: a class of central nervous system stimulants. Can be legally prescribed and used to treat attention-deficit hyperactivity disorder (ADHD) under the name Adderall and Ritalin. They can be highly addictive if used incorrectly/recreationally.
- <u>Methamphetamines</u>: a potent amphetamine, which can be legallyprescribed for certain medical conditions. Regular methamphetamine is a pill or powder. Crystal methamphetamine resembles glass fragments or shiny blue-white "rocks" of various sizes.
- <u>All Stimulants</u>: we will use this term to include all amphetamines, methamphetamine, and crack/cocaine.

#### **Methamphetamine & Other Stimulant Data - Key Points**

- An increase in *Methamphetamine* use in MA is visible in DPH data sources, although rates are low compared to other stimulants.
- *Crack/Cocaine* use continues to be used at much higher rates and cross-contamination with fentanyl is of great concern.
- Methamphetamine use is higher in Suffolk County and the eastern portions of the state and in BSAS treatment data is seen largely among the white non-Hispanic population.
- Crack/Cocaine use is seen statewide and has higher prevalence among black African/American and Latinx populations in BSAS treatment data.

#### **Data Sources in this Overview**

- BSAS Substance Use <u>Helpline</u> Calls/Searches
- Hospital Emergency Department Admissions
- DPH Vital Records Mortality Data
- BSAS <u>Treatment</u> Admission Data

### Proportion of all Calls/Searches to <u>BSAS Substance Use Helpline</u> for *Stimulants* (July 2018 - July 2021)

➢ In CY2021, 4% of all

calls/searches were

calls/searches, 14%

Methamphetamine

for *Stimulants*;

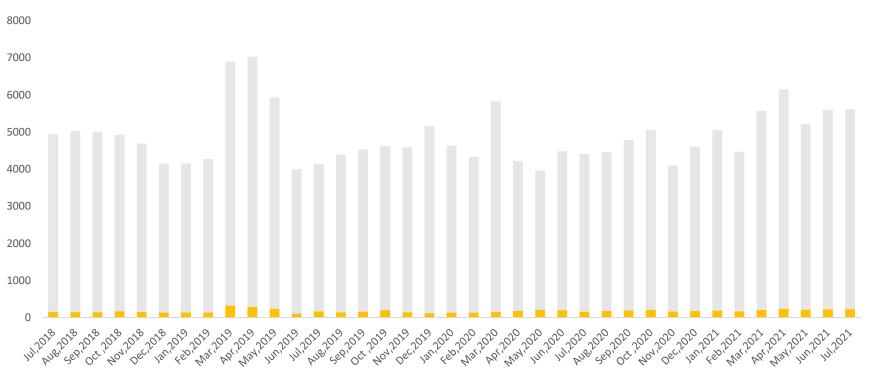

Helpline

> Of these

were for

and 76% for

Crack/Cocaine

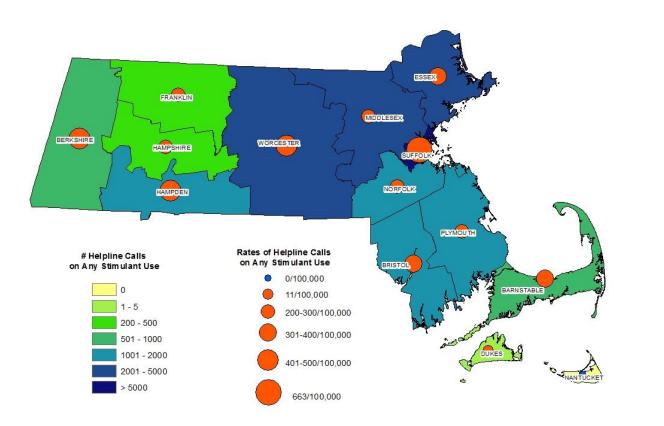

Stimulant Searches All Helpline Searches

\*\*These data refer to all helpline calls, web searches, and live chats conducted between July 2018 and July 2021

#### **BSAS Helpline** Stimulant Calls & Rates (CY2020)

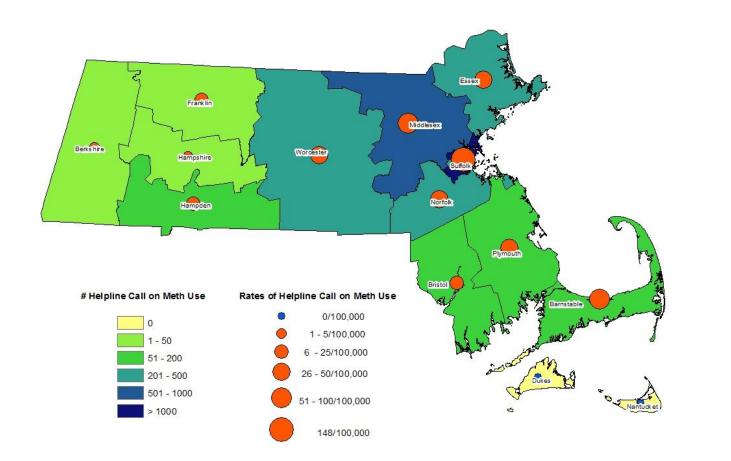

Over 50% of the calls for stimulants during the July 2018-July2021 period originated from Middlesex, Suffolk and Worcester

Data source: Massachusetts Substance Use Helpline, https://helplinema.org/

\*Please exercise caution when interpreting these data. One user may conduct several searches/calls or seeking referral/information for other persons.

\*\*These data refer to all helpline calls, web searches, and live chats conducted between July 2018 and July 2021

#### **BSAS Helpline** *Methamphetamine* Calls & Rates (CY2020)

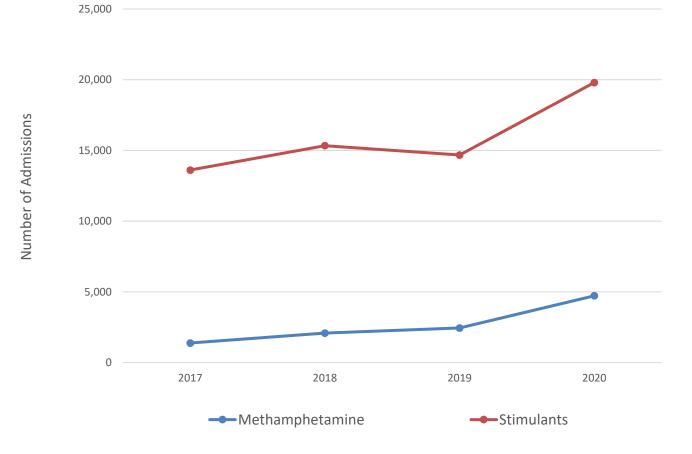

60% of the Methamphetamine related calls during the July 2018-July2021 originated in Essex, Middlesex, and Suffolk counties.

Data source: Massachusetts Substance Use Helpline, https://helplinema.org/

\*Please exercise caution when interpreting these data. One user may conduct several searches/calls or seeking referral/information for other persons.

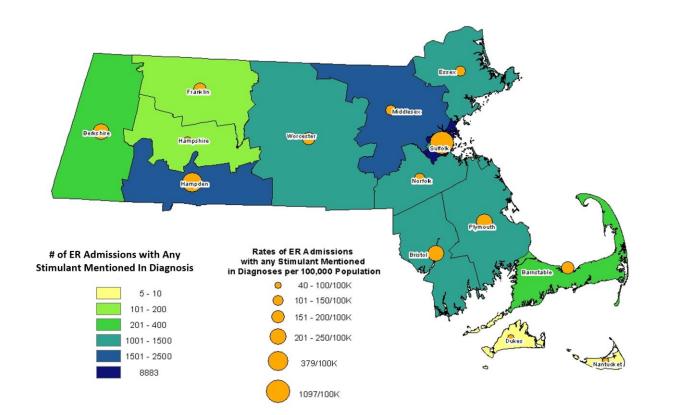

\*\*These data refer to all helpline calls, web searches, and live chats conducted between July 2018 and July 2021

### All Stimulants and Methamphetamine-Related Emergency Department (ED) Admissions (FY2017-2020)

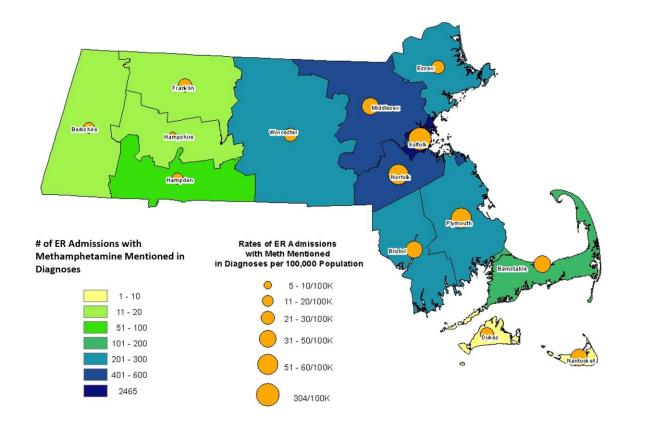

- ED Admissions increased by approx.
  5,000 for stimulants between FY19-FY20
- Of this increase in admissions, approx. one-half of these were due to an increase in *methamphetamine*related incidents.

# **Stimulant**-Related <u>ED</u> Admissions and Rates by County of Residence (FY2020)

 Highest number of ED admissions in FY2020 were from Suffolk, Hampden and Middlesex counties.

### **Methamphetamine**-Related <u>ED</u> Admissions and Rates per 100,000 Population by County of Residence (FY2020)

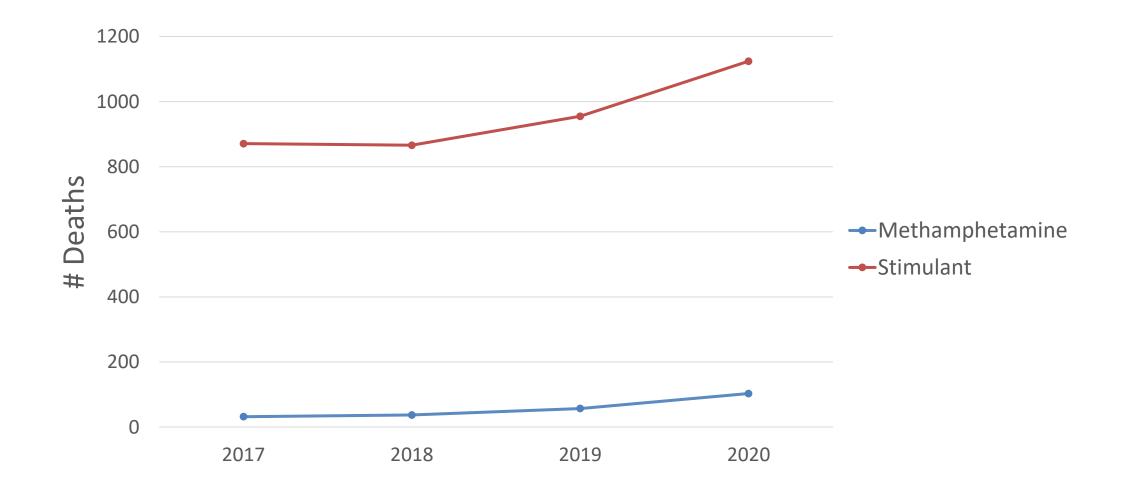

Methamphetamine related ED admissions and rates are the highest in the eastern part of the state.

#### Stimulant-Related ED Admission Rates by County (FY2017-2020)

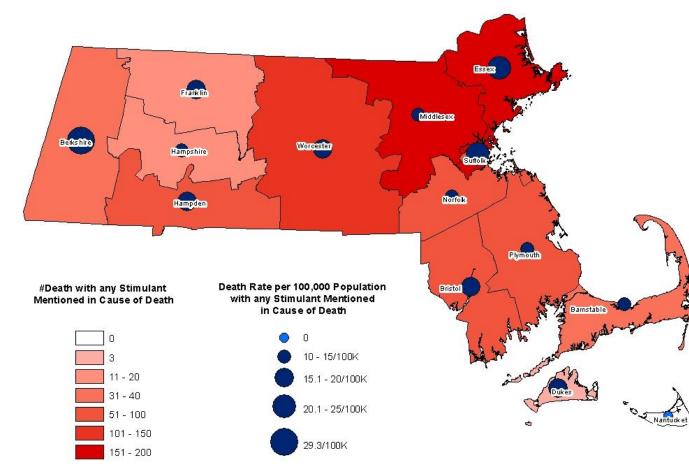

When examining the data on ED admissions by county, the spike in ED admissions related to any *stimulant* were driven by a large spike in Suffolk county, while trends for other counties remained flat.

# All Stimulants and Methamphetamine-Related Deaths in Massachusetts (CY2017-2020)

Source: Mortality data is maintained by the Registry of Vital Records and Statistics, and includes annual death record files for deaths occurring in Massachusetts.

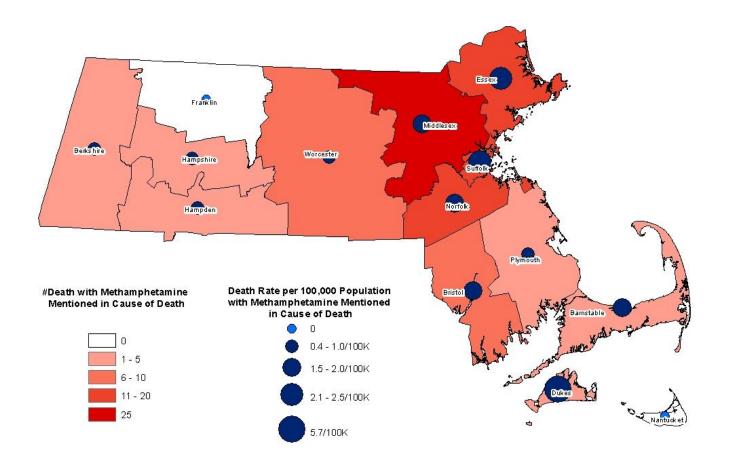

# All *Stimulant*-Related <u>Death Counts</u> and Rates by County of Residence (CY2020)

- The largest number of stimulant-related deaths were concentrated in Eastern part of the state
- The highest rates were seen in Berkshire followed by Suffolk and Essex.

Source: Mortality data is maintained by the Registry of Vital Records and Statistics, and includes annual death record files for deaths occurring in Massachusetts.

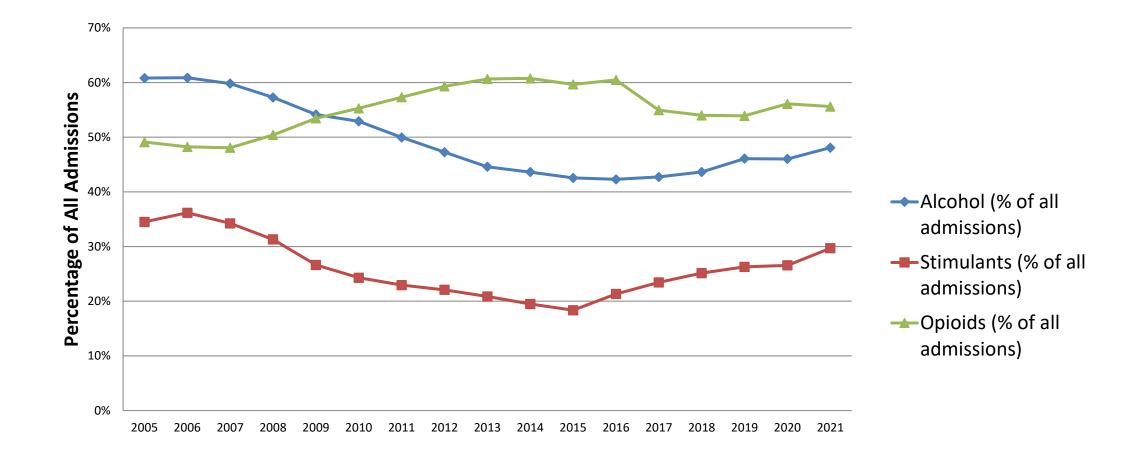

# **Methamphetamine**-Related <u>Death Counts and Rates</u> by County of Residence (CY2020)

- Most of the Methamphetamine deaths are seen in the Eastern part of the state with the highest rates observed in Suffolk and Essex
  - \* Dukes county has a very high rate but relatively small numbers.

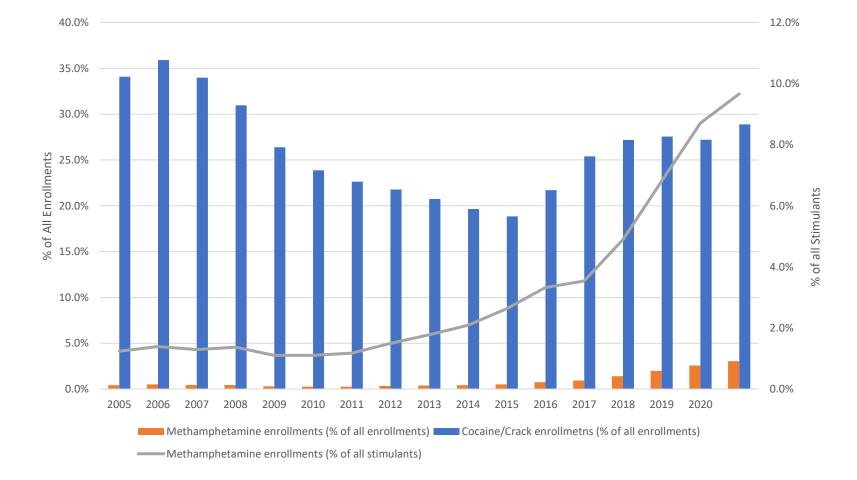

Source: Mortality data is maintained by the Registry of Vital Records and Statistics, and includes annual death record files for deaths occurring in Massachusetts.

### Substances Reported at Admission as a Percentage of <u>All BSAS</u> <u>Admissions (CY2005-2021)</u>

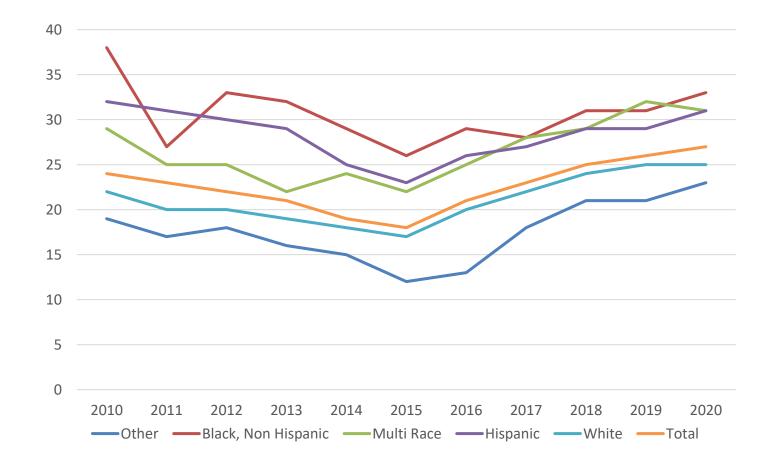

Source: Treatment statistics prepared by the Office of Statistics and Evaluation, Bureau of Substance Addiction Services, Massachusetts Department of Public Health

# **BSAS Admission Trends for Crack/Cocaine and Methamphetamine (CY2005-2021)**

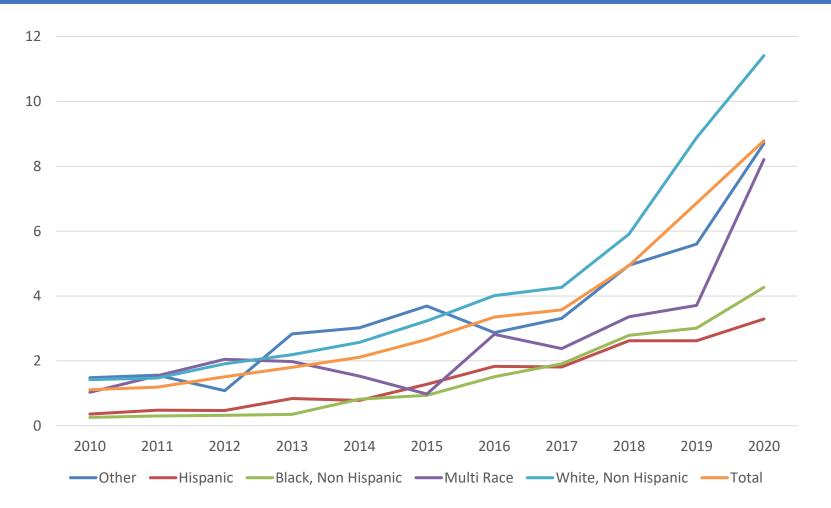

- Stimulant admissions have been rising since 2015.
- Methamphetamine represented 9.7% of all stimulant related admissions in 2021, up from 1.4% in 2005

## **Stimulants** Use Reported at <u>BSAS Admission</u> by Race (CY2010-2020)

- The percentage of enrollments reporting stimulants use at the time of enrollment increased from 18% in 2015 to 27% in 2020.
- Black non-Hispanic and Hispanic enrollments consistently report higher rates of stimulant use than White non-Hispanics.

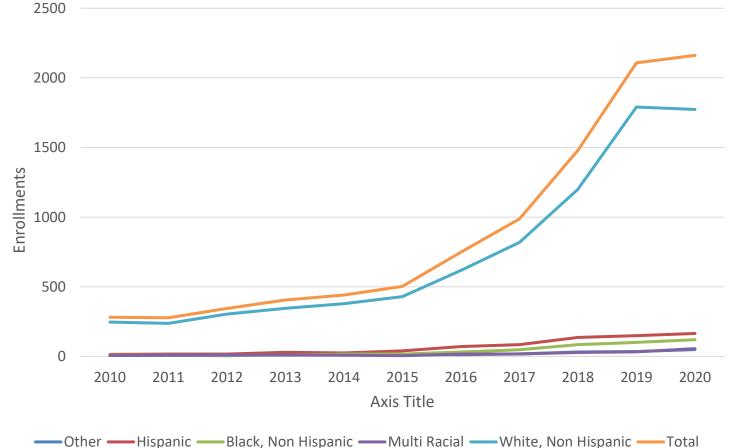

# Methamphetamine Use as a Percentage of All Stimulants Reported at BSAS Admission by Race (CY2010-2020)

- Methamphetamine use reported by BSAS enrollments has been on the rise since 2010.
- While this increase was noticed across all races, white non-Hispanic, other and multi-racial enrollments experienced the highest increase.

Source: Treatment statistics prepared by the Office of Statistics and Evaluation, Bureau of Substance Addiction Services, Massachusetts Department of Public Health

### BSAS Enrollments Who Reported Methamphetamine Use by Race (CY2010- CY 2020)

- Enrollments reporting Methamphetamine as a problem substance increased sharply from 2015 - 2020.
- White non-Hispanics represented majority of these admissions.
