

MassDEP Policies for Public Water Systems

Table of Contents

- 87-04 Procedures for Use of EPA's Proposed Maximum Contaminant Levels
- 87-05 Declaration of State of Water Supply Emergency (revised 2/97)
- 87-06 Boil Water Orders or Do Not Drink Orders
- 87-17 Water Vending Machine Policy
- 87-17a Water Vending Machine Policy Addendum
- 87-18 DEP Sampling and Analysis for Public Water Systems
- 87-25 Items to Consider When Conditioning New Source Approvals
- 87-27 Procedures Relative to the Detection of Contaminants During the New Source Approval Process
- 88-03 Interim Wellhead Protection/Area
- 88-06 Estimated Registration Statement
- 88-10 Daily Consumption per Person
- 88-11 Public Water System Determination
- 88-12 Procedure for Changing Public Water Supply Classification
- 88-14 Secondary Standards Exceedances

- 88-16 Volatile Organic Compound Sampling: Confirmation Sampling and Discounting Results
- 88-19 Request for Final Inspection of New or Improved Treatment Facilities
- 88-23 Consecutive Public Water Systems – Bacterial Contamination Validation Sampling
- 88-25 Policy on Metering Requirements for Water Management Act Registrants and Permit Applicants
- 89-01 New Product or Technology Review Policy
- 89-04 Review of Water Conservation Plans Submitted by Public Water Suppliers for Water Management Permits
- 89-06 Public Notice Requirements – Water Management Act Application
- 90-04 Pilot Study Requirements for Proposed Treatment
- 91-02 Treatment for Radionuclide Removal
- 91-05 Follow-up Action for Coliform positive Results from a Single Routine Sampling Point
- 91-06 Variances from the Total Coliform Rule
- 91-07 Acceptability of Results from Radiological Laboratories Certified Outside Massachusetts
- 91-09 Use of Bottled Water by Public Water Suppliers
- 92-05 Procedure for Determining the Activity Type and Status of a Drinking Water Source

92-07 Bulk Water Suppliers – Sampling Requirements and Transport Responsibility

93-01a Requirement for Disinfection with Water Supply Treatment

93-02 Operation and Maintenance Manuals

94-02 Determination of Public or Private Water System Type for Establishments
Serving Food

94-03 Implementation of Zone I Requirements

95-04 PWS Control of Zone I Within Publicly Owned Lands

96-02 Safe Drinking Water Act Assessment Billing and Collection Policy

97-01 Zone II Status Policy

98-01 Antennae Policy Guidelines
DWS G98-01
DWP 98-01

03-01 Review of Sewer Line and Water Supply Protection (updated for Jan 2003)

06-01 Small Water System Operator Requirements

08-01 Substantial Modifications to a Public Water System that Require a Permit

08-02 Actions to Protect Public Health in the Period between Federal Rule Promulgation
and State Promulgation

09-02 Pipe Bursting of Potable Water Mains Using Pre- and Post-Chlorinated HDPE
Pipe

Superseded MassDEP Drinking Water Policies

The following policies have been deleted from the policy page because they have been superseded by: (1) subsequent policy changes, (2) incorporation into the Drinking Water Regulations of Massachusetts (310 CMR 22.00), or (3) incorporation into the *Guidelines and Policies for Public Water Systems*.

Deleted Policy	Name of Deleted Policy
86-01	Submission of Hydrogeological Reports by Hydrogeologists
86-02	Procedure for New Groundwater Source Approvals
86-03	Non-Municipal Water Quality Analysis (incorporated into 310 CMR 22.11A)
87-02	Procedure for Performance of Sanitary Surveys by the Boston Office
87-09	Adoption of DWS Water Supply Contamination Correction Policies WSCC-1 through WSCC-6
87-12	Quality Assurance for Groundwater Modeling
87-14	Microbiological Sampling - Bad and Excluded Samples (incorporated into 310 CMR 22.05(3))
87-19	Definition of a New Source
87-20	The Determination and Management of the Protective Radius (Zone II) for Public Water Supply Wells
87-26	Steps for New Source Approval for Wells With Yields Less Than 100,000 Gallons Per Day
88-01	Trichloroethylene (TCE) Air Stripper Policy
88-02	Review of Sewer Line/Water Supply Protection
88-04a	Procedures for Determining Whether a Potentially Productive Aquifer Constitutes a Potential Public Groundwater Source
88-05	Adoption of DWS Water Supply Contamination Correction Policies WSCC-7 through WSCC-12
88-07a	Point of Use and Point of Entry Drinking Water Treatment Devices
88-09	Watershed Resource Protection Plan Policy
88-13	Use of Registered Well Drillers Only
88-21	Coordination of New Source Approval and Water Management Act Permits
89-03	Policy on Issuance of Interim Permits
89-07	Developmental Procedures for Low Yield Bedrock Public Water Supply Wells
89-09	Watershed Resource Protection Plan
89-10	Developmental Procedures for High Yield Bedrock Public Water Supply Wells
89-11	Developmental Procedures for All Confined Aquifer Public Supply Wells
91-10	When to Use a Pre-enforcement Letter
91-11	Minimum Information for the Cover Page of the Notice of Non-compliance
92-01	Interim Wellhead Protection Area Policy for Small Wells
92-03	Developmental Procedures for the Use of Springs as Public Water Supplies

- 92-04 Procedure for Approving an Exception to an Established DWS Policy /Guideline
- 92-06 Division of Water Supply – Operational Consistency
- 92-08 Use of Floordrains in Water Supply Pump Houses
- 94-01 Viability Assessment and Assurance
- 94-04 Process for Redelineating and Approved Zone II
- 94-06 Default Radii for IWPA and Zone I Areas for Non-Community Wells
