Department Of Industrial Accidents

High Level Description of the EDI FROI File layout

the file must contain a Header record, Trailer Record, 148 type record and a R21 record.

each pair of the 148 and the R21 records contain the FROI details. the R21 record contains variable segments at the end.

Please visit the IAIABC website for the version 3.0 standard

A file should look like that (click in the links for the record fields details):

HD1 (Header Record)

101 transaction	**148**		
	R21....	(**R21 injury** narrative variable segments)	(**optional R21 witness** variable segments)
101 transaction	148		
	R21....	(R21 injury narrative variable segments)	(optional R21 witness variable segments)

TR2 (Trailer Record)
