

# Tobin Bridge Repair Project

US 1 NORTHBOUND AND RAMPS - CHELSEA

The Maurice J. Tobin Memorial Bridge (U.S. Route 1) is in need of repair to continue service through the 21st century. Work on the Chelsea approach spans will take place between 2018 and 2020.

Route 1 Northbound (lower deck) will undergo steel repairs and Route 1 Southbound (upper deck) will also be repaved. The Everett Avenue Ramp, the southbound on ramp, will be resurfaced and undergo steel repairs. The off ramp at Beacon Street will undergo deck rehabilitation. Work will also include construction of a new parking area.

## CONSTRUCTION OVERVIEW

- 2018** Work will include repairs to the upper and lower decks, followed by paving, repairs and resurfacing of both the Beacon Street on ramp and the Everett Avenue off ramp.
- 2019** Work will include utility installation to prepare the future parking lot as well as upper and lower deck repair and paving.
- 2020** Repairs to the lower deck will be completed. Curbing and paving of the new parking lot will occur.

## TRAFFIC IMPACTS

On Route 1 Northbound (lower deck), one lane will be closed throughout each construction season. Lane closures on Route 1 Southbound (upper deck) will occur during off peak hours. During ramp work, crews will make every effort to keep closures to a minimum. The public will be informed in advance of all work impacting traffic.

## STAY INFORMED

Sign up for the mailing list and reach out to us any time with questions, concerns, or comments. Distribution of a monthly construction look-ahead will begin shortly. Our next meeting is anticipated for March 2018 in Chelsea. Meetings are anticipated for Spring of 2019 and 2020 as well.
