

One Care Enrollee Assessment and Long-Term Supports (LTS) Coordinator Referral Quarterly Report April 2016 – June 2016*

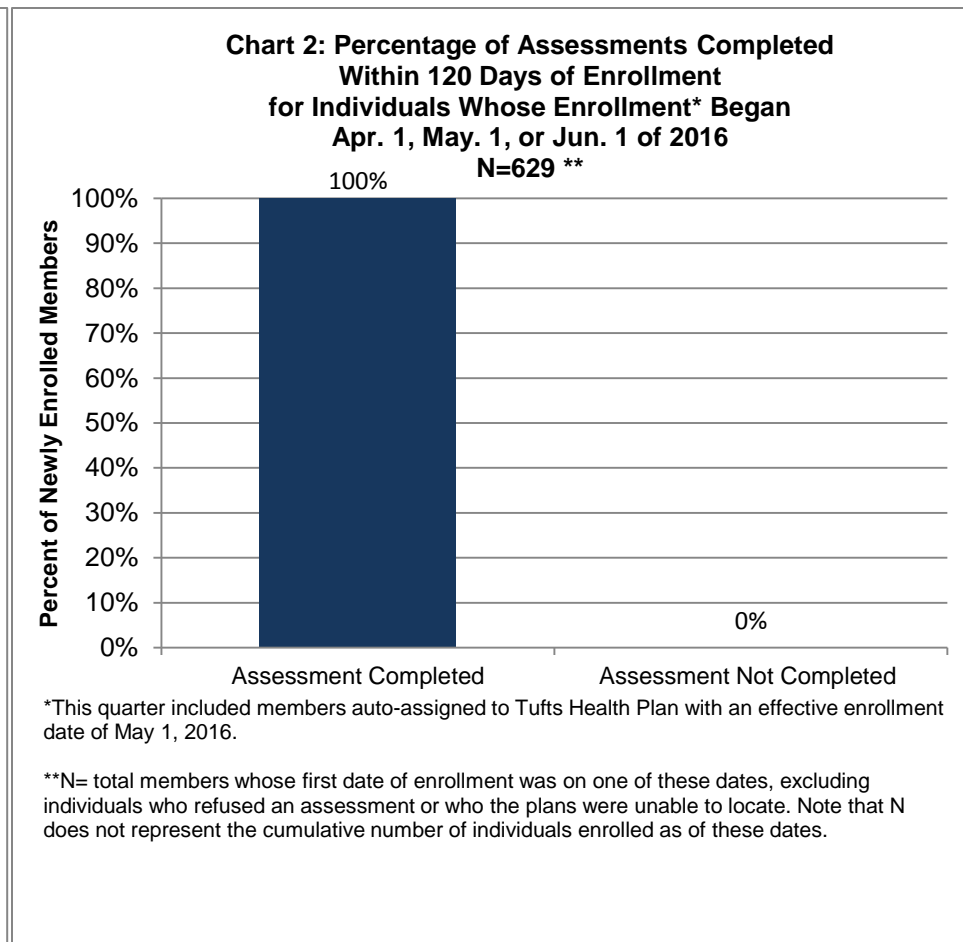

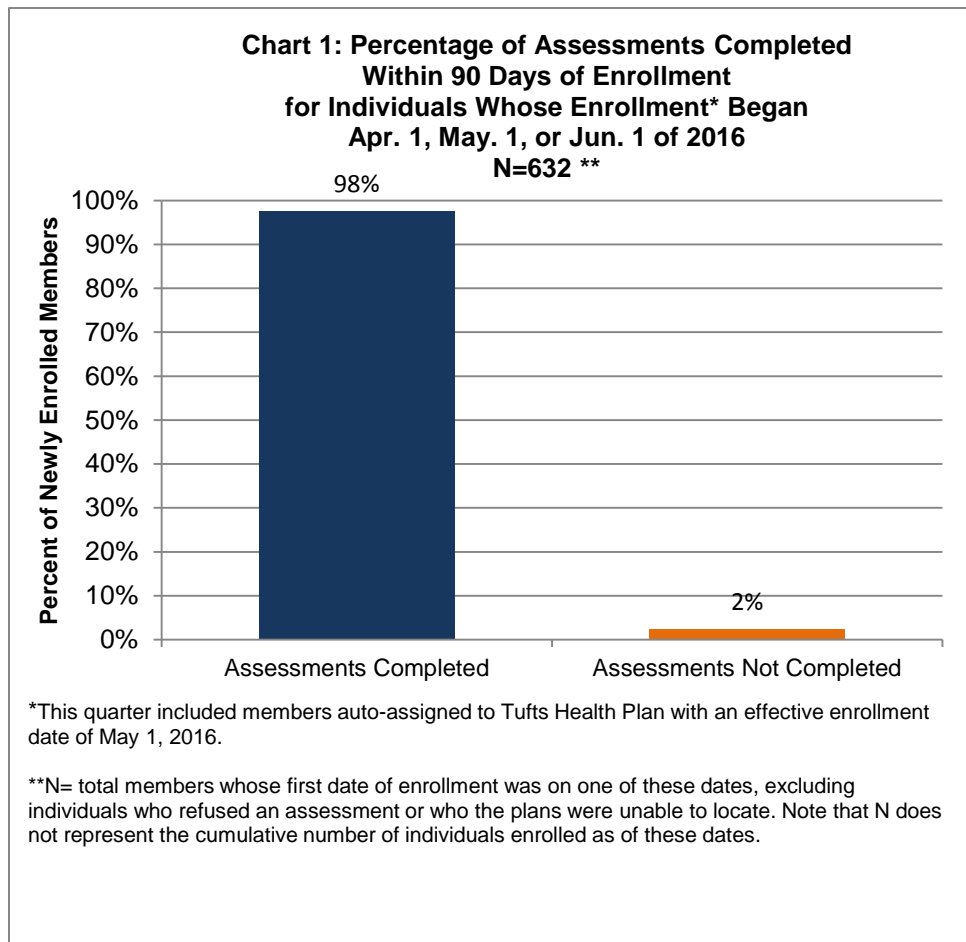

Chart 1 shows how One Care plans are performing with respect to the Core 2.1 measure from the demonstration reporting requirements. The Centers for Medicare & Medicaid Services (CMS) requires Medicare-Medicaid Plans participating in all capitated model demonstrations under the Financial Alignment Initiative to regularly report core measures, including Core 2.1.

* As of August 7, 2015, Commonwealth Care Alliance (CCA) temporarily stopped accepting new One Care enrollments. Members previously enrolled with CCA for One Care could re-enroll. CCA opened enrollment for a May 1, 2016 effective date for up to 100 new One Care members in Suffolk County. CCA reopened fully in May 2016 to new enrollments in all of their covered counties for effective dates of June 2016 and later.

One Care Enrollee Assessment and Long-Term Supports (LTS) Coordinator Referral Quarterly Report April 2016 – June 2016*

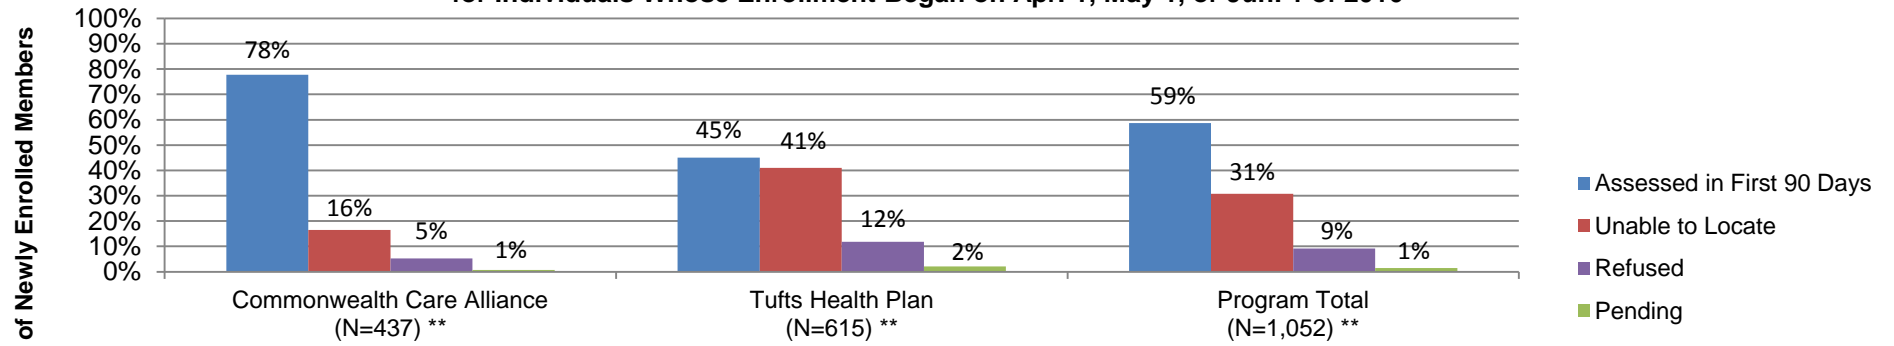

The Core 2.1 measure tracks how many One Care members have had a comprehensive assessment within 90 days of their enrollment effective date into a One Care plan. This measure is cumulative based on monthly data submissions from the One Care plans, and for the period covered in this report includes members who enrolled as of April 1, May 1, or June 1 of 2016. The measure excludes members who were unwilling to participate in an assessment or who did not respond to at least three attempts to contact them (“unable to locate”). The Core reporting requirements document, including the specifications for the Core 2.1 measure, are posted on the MMCO website: <http://www.cms.gov/Medicare-Medicaid-Coordination/Medicare-and-Medicaid-Coordination/Medicare-Medicaid-Coordination-Office/FinancialAlignmentInitiative/InformationandGuidanceforPlans.html>. This graph shows that 98% of members who enrolled in One Care during this time period, who the plan was able to locate, and who agreed to participate in an assessment, received a comprehensive assessment within 90 days of their first effective date of enrollment.

While it is not a measure required by CMS, Chart 2 shows how many members were assessed within 120 days. Note that because some members may choose to disenroll between their 90th and 120th day of enrollment (between their 3rd and 4th months), the total number of enrolled individuals (the denominator) is lower in Chart 2 than it is in Chart 1. Chart 2 demonstrates that One Care plans have continued to conduct assessments for members between their 90th and 120th day of enrollment; 100% of One Care members who were enrolled during this time frame were assessed within 120 days (compared to 98% who were assessed within 90 days).

* As of August 7, 2015, Commonwealth Care Alliance (CCA) temporarily stopped accepting new One Care enrollments. Members previously enrolled with CCA for One Care could re-enroll. CCA opened enrollment for a May 1, 2016 effective date for up to 100 new One Care members in Suffolk County. CCA reopened fully in May 2016 to new enrollments in all of their covered counties for effective dates of June 2016 and later.

One Care Enrollee Assessment and Long-Term Supports (LTS) Coordinator Referral Quarterly Report April 2016 – June 2016*

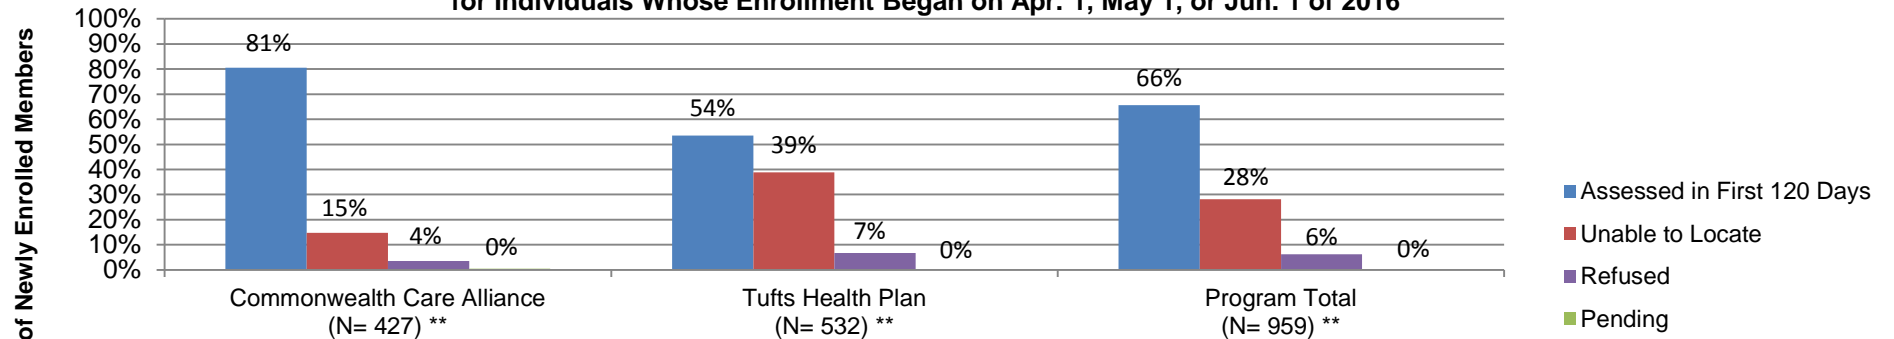

Chart 3: Assessment Status Within 90 Days of Enrollment*
for Individuals Whose Enrollment Began on Apr. 1, May 1, or Jun. 1 of 2016**

* This quarter included members auto-assigned to Tufts Health Plan with an effective enrollment date of May 1, 2016.

**N= total members whose first date of enrollment was on one of these dates, including individuals who refused an assessment or who the plans were unable to locate. Note that N does not represent the cumulative number of individuals enrolled as of these dates.

Chart 4: Assessment Status Within 120 Days of Enrollment*
for Individuals Whose Enrollment Began on Apr. 1, May 1, or Jun. 1 of 2016**

*This quarter included members auto-assigned to Tufts Health Plan with an effective enrollment date of May 1, 2016.

**N= total members whose first date of enrollment was on one of these dates, including individuals who refused an assessment or who the plans were unable to locate. Note that N does not represent the cumulative number of individuals enrolled as of these dates.

* As of August 7, 2015, Commonwealth Care Alliance (CCA) temporarily stopped accepting new One Care enrollments. Members previously enrolled with CCA for One Care could re-enroll. CCA opened enrollment for a May 1, 2016 effective date for up to 100 new One Care members in Suffolk County. CCA reopened fully in May 2016 to new enrollments in all of their covered counties for effective dates of June 2016 and later.

One Care Enrollee Assessment and Long-Term Supports (LTS) Coordinator Referral Quarterly Report April 2016 – June 2016*

Charts 3 and 4 show the percentage of assessments completed out of the total number of One Care members with an enrollment date of April 1, May 1, or June 1 of 2016, including individuals who refused to participate in an assessment and members the plans were unable to locate (members who did not respond after three or more attempts to contact them). Charts 3 and 4 also break these percentages out by plan. The “pending” category includes members who have not yet had an assessment within 90 days or have not refused an assessment and who the plan may have scheduled for an assessment. Note that the number of enrolled members in Chart 4 is lower than in Chart 3 due to members in the ‘unable to locate’ or ‘refused’ categories who disenrolled between their 90th and 120th day of enrollment.

For example, Chart 3 shows that for members with April 1, May 1, or June 1 of 2016 effective enrollment dates, Commonwealth Care Alliance conducted assessments with 78% of those members within 90 days; made at least 3 outreach attempts to 16% of those members and did not receive a response; and received refusals from 5% of those members. In total, the plan met its contractual requirements for approximately 99% of members, while approximately 1% of members were in the “pending” category.

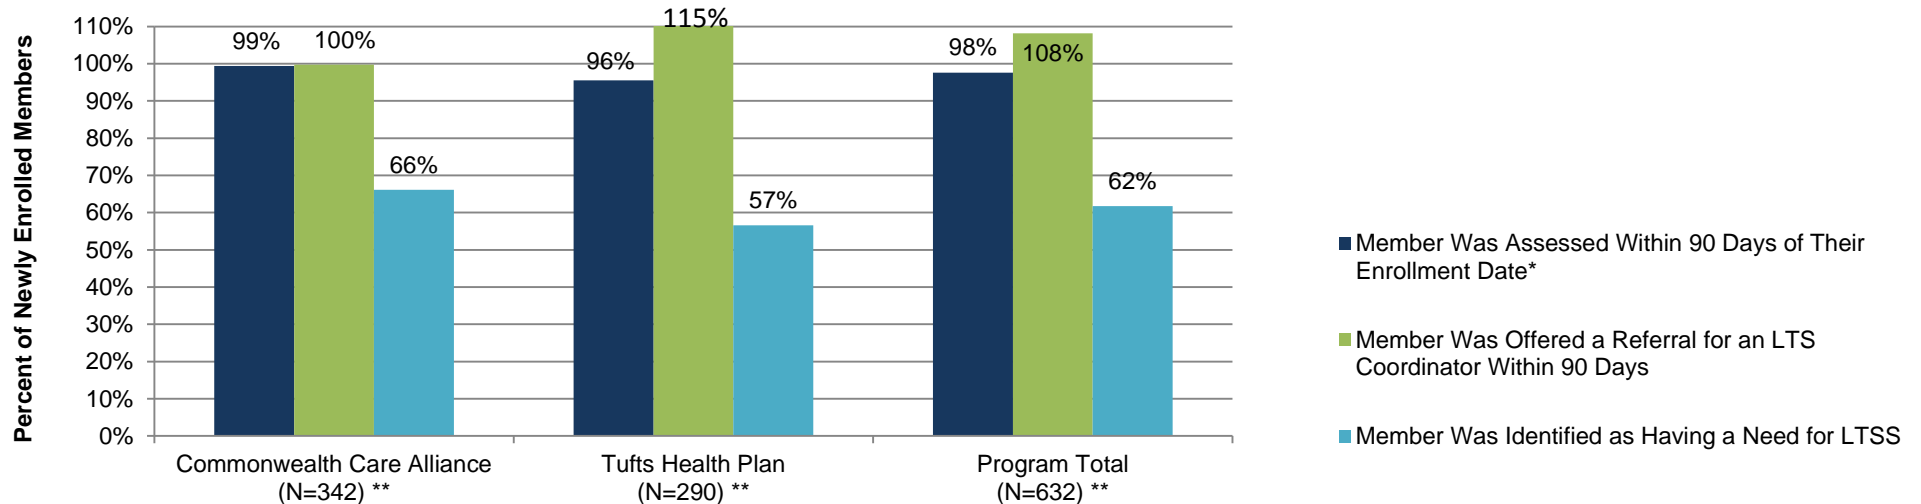

The charts show variation between each of the two plans in the number of members who were newly enrolled during this period (identified in the chart as “N”), and the status of members’ assessment completions. Note that this period includes members who were enrolled through auto-assignment to Tufts Health Plan effective May 1, 2016. These charts also show that the two One Care plans had members they were unable to locate with at least three contact attempts, although the actual numbers and percentages vary.

Chart 4 again demonstrates that the number of completed assessments increases overall by 120 days of enrollment, while the number of members whose assessments have been pending decreased. In this quarter, the percentage of members the plans were unable to locate decreased between 90 and 120 days, indicating that the plans were later able to make contact with many of the members in this enrollment cohort. Tufts Health Plan (Tufts) experienced the largest decline in this category (2%), with many of these members moving into the “pending category,” indicating that contact was made but an assessment was not yet completed during this time frame. One Care plans are expected to continue outreach to members they are unable to locate by attempting to contact them at least once every three months.

* As of August 7, 2015, Commonwealth Care Alliance (CCA) temporarily stopped accepting new One Care enrollments. Members previously enrolled with CCA for One Care could re-enroll. CCA opened enrollment for a May 1, 2016 effective date for up to 100 new One Care members in Suffolk County. CCA reopened fully in May 2016 to new enrollments in all of their covered counties for effective dates of June 2016 and later.

One Care Enrollee Assessment and Long-Term Supports (LTS) Coordinator Referral Quarterly Report April 2016 – June 2016*

Chart 5: Assessment Completion, Identified Long-Term Services and Supports (LTSS) Needs, and Offering of a Referral for a Long-Term Supports (LTS) Coordinator Within 90 Days of Enrollment* for Individuals Whose Enrollment Began Apr. 1, May 1, or Jun. 1 of 2016**

*This quarter included members auto-assigned to Tufts Health Plan with an effective enrollment date of May 1, 2016.

**N= total members whose first date of enrollment was on one of these dates, excluding individuals who refused an assessment or who the plans were unable to locate. Note that N does not represent the cumulative number of individuals enrolled as of these dates.

Chart 5 shows how many members whose effective enrollment dates were April 1, May 1, or June 1 of 2016 (the denominator for each column), received a comprehensive assessment within 90 days; how many were determined by the plan to be in need of LTSS¹; and how many members were offered a referral for an LTS

¹ The need for LTSS may be identified by the assessment, by the enrollee, by other Interdisciplinary Care Team (ICT) members, or by any other party as identified in Section 2.5C (4)(g) of the three-way contract:

- At any time at an Enrollee's request;
- During Comprehensive Assessments for all Enrollees in C3 and F1 Rating Categories, and for all Enrollees in any Rating Category who request it;
- When the need for community-based LTSS is identified by the Enrollee or ICT;
- If the Enrollee is receiving targeted case management, is receiving rehabilitation services provided by the Department of Mental Health, or has an affiliation with any state agency; or
- In the event of a contemplated admission to a long-term care facility

* As of August 7, 2015, Commonwealth Care Alliance (CCA) temporarily stopped accepting new One Care enrollments. Members previously enrolled with CCA for One Care could re-enroll. CCA opened enrollment for a May 1, 2016 effective date for up to 100 new One Care members in Suffolk County. CCA reopened fully in May 2016 to new enrollments in all of their covered counties for effective dates of June 2016 and later.

One Care Enrollee Assessment and Long-Term Supports (LTS) Coordinator Referral Quarterly Report April 2016 – June 2016*

Coordinator (the numerators for each of the columns). For example, this chart shows that for members with April 1, May 1, or June 1 of 2016 effective enrollment dates: Commonwealth Care Alliance assessed 99% of those members who they could locate and agreed to participate in an assessment within 90 days; Commonwealth Care Alliance reported offering a referral for an LTS Coordinator to 100% of those members; and 66% of those members were identified as having a need for LTSS.

The percentage of members who are offered a referral for an LTS Coordinator may actually be slightly higher than the percentage of those who received an assessment, resulting in a percentage that is greater than 100%. For example, Tufts assessed 277 new members who they were able to locate within 90 days, all of whom were offered a referral for an LTS Coordinator. Tufts was also able to offer a referral for an LTS Coordinator to 56 additional members who had refused a full assessment or who were in the pending category, resulting in a percentage of 115% (where the total number of members whose first date of enrollment was during this time period, (excluding individuals who refused an assessment or who the plans were unable to locate) (290), is the denominator, and the total number of members who were offered a referral for an LTS Coordinator (333) is the numerator).

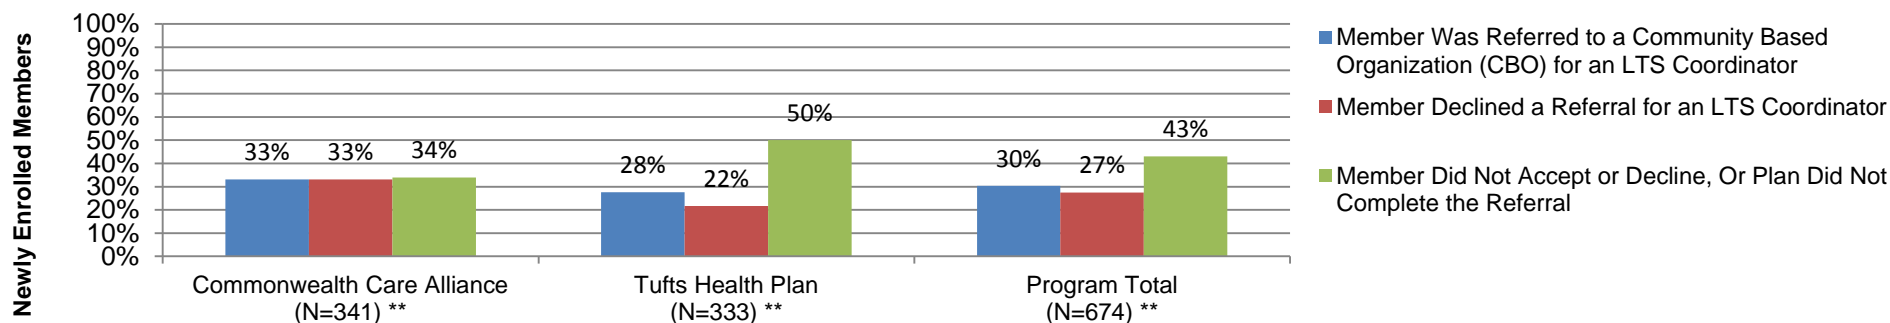

The One Care plans are contractually required to offer a referral for an LTS Coordinator to all of their enrollees when they make contact with them (including members who may not yet have had an assessment). In this time period, the number of people who were offered a referral for an LTS Coordinator was significantly higher than the number of people identified as having a need for LTSS. Members who initially decline a referral for an LTS Coordinator may request one at any time.

Note that enrollment in Chart 5 excludes members who were unwilling to participate in an assessment or who the plans were unable to locate, as with Charts 1 and 2.

* As of August 7, 2015, Commonwealth Care Alliance (CCA) temporarily stopped accepting new One Care enrollments. Members previously enrolled with CCA for One Care could re-enroll. CCA opened enrollment for a May 1, 2016 effective date for up to 100 new One Care members in Suffolk County. CCA reopened fully in May 2016 to new enrollments in all of their covered counties for effective dates of June 2016 and later.

One Care Enrollee Assessment and Long-Term Supports (LTS) Coordinator Referral Quarterly Report April 2016 – June 2016*

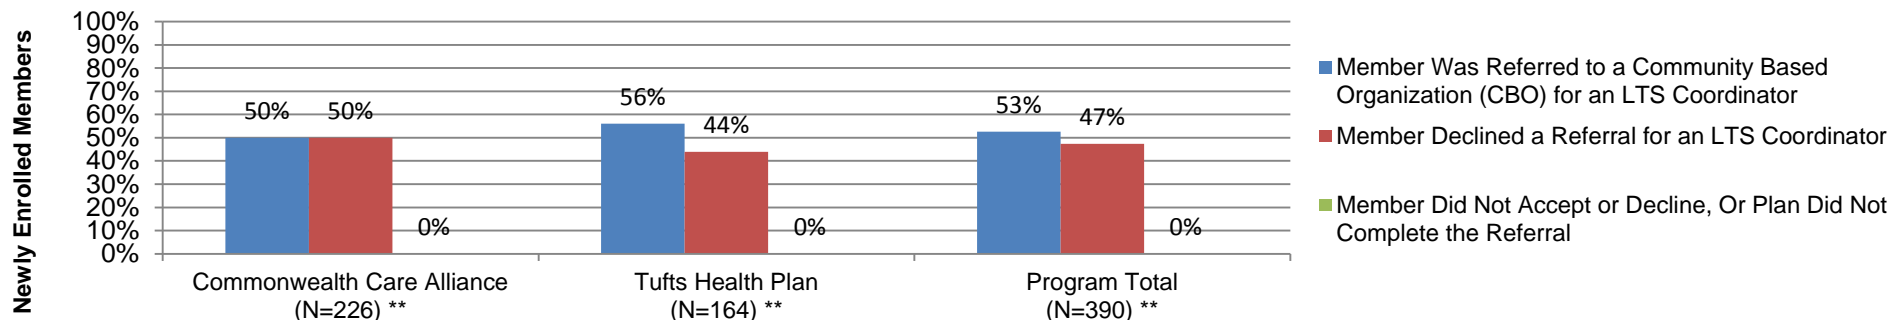

Chart 6: Long-Term Supports (LTS) Coordinator Referrals for Individuals Whose Enrollment* Began on Apr. 1, May 1, or Jun. 1 of 2016 and Who Were Offered a Referral Within 90 Days of Enrollment**

*This quarter included members auto-assigned to Tufts Health Plan with an effective enrollment date of May 1, 2016.

**N= total members from Chart 5 who were offered a referral for an LTS Coordinator.

Chart 7: Long-Term Supports (LTS) Coordinator Referrals for Individuals with an Identified LTSS Need Whose Enrollment* Began on Apr. 1, May 1, or Jun. 1 of 2016 and Who Were Offered a Referral Within 90 Days of Enrollment**

*This quarter included members auto-assigned to Tufts Health Plan with an effective enrollment date of May 1, 2016.

**N= total members from Chart 5 who were identified as having an LTSS need.

* As of August 7, 2015, Commonwealth Care Alliance (CCA) temporarily stopped accepting new One Care enrollments. Members previously enrolled with CCA for One Care could re-enroll. CCA opened enrollment for a May 1, 2016 effective date for up to 100 new One Care members in Suffolk County. CCA reopened fully in May 2016 to new enrollments in all of their covered counties for effective dates of June 2016 and later.

One Care Enrollee Assessment and Long-Term Supports (LTS) Coordinator Referral Quarterly Report April 2016 – June 2016*

Chart 6 shows how many members, of the total who were offered a referral for an LTS Coordinator, either declined the offer of a referral or accepted and were subsequently referred to a Community Based Organization (CBO).² Because in some cases members may not have made an affirmative choice to be referred or decline a referral to a Community Based Organization (CBO) within the 90 day time period or the plan may not have completed a referral, some members may be in the “pending category.” Chart 7 shows how many of the members with an identified need for LTSS (Chart 5) either declined the offer for a referral to an LTS Coordinator, or accepted and were subsequently referred to a CBO.

As might be expected, these charts demonstrate that acceptance of a referral for an LTS Coordinator is much higher among individuals with an identified LTSS need, though some individuals with identified LTSS needs chose not to have a referral for an LTS Coordinator. It is important to understand that choosing not to receive a referral for an LTS Coordinator does not mean the member is not receiving LTSS. This chart is only looking at a member’s choice to accept a referral for an LTS Coordinator or not, and does not indicate receipt of LTSS.

² In One Care, all members who choose to have an LTS Coordinator are referred to an independent Community Based Organization (CBO) that is contracted with the member’s One Care plan to provide the plan’s members with LTS Coordinator services. This chart does not reflect how many members who were referred to the CBO actually met with an LTS Coordinator.

* As of August 7, 2015, Commonwealth Care Alliance (CCA) temporarily stopped accepting new One Care enrollments. Members previously enrolled with CCA for One Care could re-enroll. CCA opened enrollment for a May 1, 2016 effective date for up to 100 new One Care members in Suffolk County. CCA reopened fully in May 2016 to new enrollments in all of their covered counties for effective dates of June 2016 and later.
