Scalese	The design looks excellent. Three items:	Hyde PArk	MA	02136
	Please switch the game tables and benches so the benches look into the park.			
	Move one of the trash cans to the Charles St entrance so there is a trash can at each entrance.			
	Review the possibility of thinning a few of the weed trees on the bank.			
Nelson	Thank you for bringing water into the public garden!	Hyde Park	MA	02136
Forrester	I am the owner of the red house adjacent to the park, 96 Sunnyside Street and was the initiator of redeveloping Factory Hill Park, My one request is for a fence that runs the perimeter of the park to prevent leaves and debris from blowing onto my property. Every yr. I end up spending close to \$1000 in yard clean up because of the leaves and debris. A fence along the Town street perimeter would prevent this from happening. I also think there should be a small number of parking spaces to accommodate visitors of the park. Visitors tend to park on Town Street which also impacts resident parking.	Hyde Park	MA	02136
Forrester	After listening to the public meeting I would like to follow up on a few things. Joseph's comment resonated with me because as much as we are mentioning the community input around factory hill, actually, some of the input was not taken from a safety standpoint. This is why I mentioned in my previous comments, a fence, and potential parking there's a lot of late night for traffic in the area, which cannot be prevented, but can be somewhat isolated in a way that allows for visitors to pull up enjoy the space how they would like, and potentially be a bit more responsible. Most of what we have been talking about is really around the garden and folks don't live right on Sunnyside Street that utilize the garden. Again, I will mention that the process to renovate and create a safe space at factory hill was initiated by me before certain neighborhood members had the time to take the lead. I have emails from when I met with Senator Rush years ago to address the issue with the park. And cultivated the relationship with the architects that informed the pro Bono Park renovation plan. My concern is some small infrastructure items are being left out of the process like a fence and maybe cut back curbside parking in the front of the park.		MA	02136
