

FEMA GRANTS OUTCOMES

What is FEMA GO?

FEMA Grants Outcomes (FEMA GO) is the new grants management system supporting all grants programs in the Agency. This new system is being developed by the **Grants Management Modernization (GMM) Program**, which is a multi-year effort to modernize and transform the way the Agency conducts grants management. **FEMA GO** is being developed to simplify and coordinate business management approaches across all the FEMA's grants programs by establishing a common grants life cycle and platform for its users.

The below illustration summarizes how FEMA GO will replace the ten primary legacy systems as a single IT platform and manage all FEMA grants from pre-award through post close-out activities throughout the grants management life cycle.

How will FEMA GO improve grants management?

FEMA GO will allow users to apply for, track, and manage all FEMA grants, both disaster and non-disaster. FEMA GO will support all the active grants programs in the Agency which support our missions in prevention, protection, mitigation, response and recovery. FEMA GO will improve the oversight and monitoring of funding allocations and support integrated data analytics across the program areas for improved efficiencies.

Need help?
