1	Candidate arrives at test station wearing full complete Firefighting gear, with SCBA.					
2	Assess the search area from the doorway with Thermal Imaging Camera. (6 sides)					
3	Calls out for potential victims and listens for response.					
4	Identifies and verbalizes findings (victims, areas unable to be seen with TIC – behind furniture, around corners, etc.).					
5	Moves into search area to continue searching.					
6	Stops at appropriate points to visualize all parts of the search area.					
7*	Physically inspects any objects that cannot be readily identified via TIC.					
8*	Locates victim(s).					
9	Ensure all parts of the search area have been cleared. Verbalizes findings to examiner.					
10	Verbalizes that the TIC would be cleaned/dried as needed, and placed back on the charger, or fresh batteries installed at the conclusion of the incident.

2	Verbalizes then checks gaskets and connects hose lengths together (no more than 300'). Hose is laid out straight.					
3*	Connects and tightens an open test gate valve to the discharge port.					
4	Attaches a shutoff nozzle to the open end of the test length.					
5	Makes chalk or pencil mark on hose jacket against each coupling.					
6	Fills hoseline with water and increases pressure to 50 PSI.					
7	Discharges all air from the line by opening the nozzle.					
8*	Verbalizes then checks that no couplings are leaking. Tightens any couplings, as necessary.					
9*	Closes test valve and increase pump pressure to 300psi (NFPA 1962).					
10	Maintains pressure for three minutes.					
11	While at test pressure the candidate shall walk along the test hose inspecting it for leaks. At no time shall the candidate be any closer than 15 feet to the hose.					
12	Reduces pump pressure after three minutes, closes discharge valve, open nozzle to bleed off pressure.					
13	Breaks connections and drains water away from the test area.					
14	Observes marks placed on hose at the coupling. Verbalizes if coupling has slipped.					
15*	Determines and verbalizes whether each length can remain in service or be tagged and placed out of service.
