

5 QUICK ACTIONS *to improve* INDOOR AIR QUALITY

1. Contact HVAC Vendors

Reach out to professionals to complete a heating, ventilation, and AC system assessment.

2. Short Term Fixes

Implement short term solutions, such as replacing air filters and repairing duct work.

3. Install Portable Tools

Install supplementary, portable air quality equipment, such as air cleaners and purifiers.

4. Monitor Quality

Set up indoor air quality monitoring system for ongoing observation and maintenance.

5. Maintain Ventilation

Conduct regular maintenance of ventilation systems to ensure ongoing efficacy.

Improve Air Quality
