

MASSACHUSETTS BOARD OF BAR EXAMINERS

FORM 2: MENTAL DISABILITY VERIFICATION

Applications for testing accommodations on the basis of a mental disability (including learning disabilities, AD/HD, and psychiatric disabilities) must include this form, completed by the qualified medical professional(s) involved with the treatment of this disability, and must be accompanied by a comprehensive evaluation report from the qualified professional who conducted an individualized assessment of the applicant and is recommending accommodations on the bar examination on the basis of a mental disability. If multiple diagnoses are given, the evaluator must demonstrate they are qualified to make all diagnoses.

Comprehensive Report: The report must include a summary of a comprehensive diagnostic interview that includes relevant background information to support the diagnosis. **Information collected by the qualified professional must consist of more than self-report.**

Evaluations for Learning Disabilities or AD/HD should include:

- An account of a thorough diagnostic interview that summarizes relevant components of the individual's developmental, medical, family, social, and educational history
- A specific diagnostic statement, including the DSM diagnostic code, and (if applicable) a sufficient number of symptoms (delineated in DSM) in childhood and that have persisted for at least six months to a degree that is "maladaptive" and inconsistent with developmental level. The exact symptoms should be described in detail.
- Objective evidence of current impairment.
- A determination that the symptoms are not a function of some other mental disorder (such as a mood, anxiety, or personality disorder, psychosis, substance abuse, low cognitive ability, etc.).
- A rationale for each recommended accommodation based on diagnostic information presented (background history, test scores, documented observations, etc.).

Evaluations for Psychiatric Disabilities should include:

- Psychiatric/psychological history
- Relevant developmental, educational, and familial history
- Relevant medical and medication history
- Results of full mental status examination
- Description of current functional limitations in different settings
- Results of any tests or instruments used to supplement the clinical interview and support the presence of functional limitations, including any psychoeducational or neuropsychological testing, rating scales, or personality tests
- Diagnostic formulation, including discussion of differential or "rule out" diagnoses
- Objective evidence of how the psychological disability impairs the applicant's functioning on the bar exam and restricts access.

Formal Testing: A neuropsychological or psycho-educational assessment may be necessary in order to determine the individual's pattern of strengths or weaknesses and to determine whether there are patterns supportive of attention problems. **Checklists and/or surveys can serve to supplement the diagnostic profile, but by themselves may not be adequate for the diagnosis of a disability,** and do not substitute for clinical observations, evidence from history, an analysis of current functioning, and sound diagnostic judgment. When testing is used, age-based standard scores must be provided for all normed measures. In addition, effort should be tested to address the issue of malingering.

III. ACCOMMODATIONS RECOMMENDED FOR THE MASSACHUSETTS BAR EXAM

The Massachusetts Bar Examination is a timed, in-person examination administered over two days in four, three-hour sessions, from approximately 9:30a.m. to 12:30p.m. and from approximately 2:00p.m. to 5:00p.m. There are scheduled breaks between each testing session on both testing days. The bar exam is administered twice each year, in February and July.

The first day consists of two performance tests (MPT) in the morning and six essay (MEE) questions in the afternoon. The performance and essay questions are designed to assess, among other things, the applicant's ability to communicate their analysis effectively in writing. Questions are provided in hard-copy booklets, and applicants may handwrite or use their personal laptop computers to record their answers.

The second day consists of 200 multiple-choice questions (MBE), with 100 questions administered in the morning session and 100 questions in the afternoon session. Questions are provided in hard-copy booklets, and applicants record their answers by completing a scantron form.

Applicants are seated at a space pre-assigned by the Board of Bar Examiners. They are allowed to have water at their testing space, and are provided with foam earplugs. Other items requested require approval as accommodations. The examination is administered in-person. Applicants are required to refrain from speaking. They may leave their seat only to use the restroom and must notify the proctor that they are doing so. Applicants are monitored by trained proctors.

Taking into consideration this description of the examination and the functional limitations currently experienced by the applicant, what test accommodations do you recommend?

☐ **Alternate Test Format:**

- ☐ Braille
- ☐ Audio USB
