

Build awareness of importance of farm viability in land protection

What this project will do

- Education and technical assistance for land trusts connecting the importance of farm viability to farmland protection processes.

Task being implemented from the MA Farmland Action Plan²³

- Action I.A.6 – Build capacity of state agencies, land trusts, municipalities, and other entities to protect agricultural land.
- Task 1432 – Build the capacity of restriction-holding entities to effectively identify, review, and acquire restrictions that allow agriculture.
