

Appendix A. Proposed Projects Using NHFP Funds

The Capital Investment Plan (CIP) serves as the definitive capital planning document for MassDOT. The CIP is the annual prioritized list of all projects using all sources of available funding and should not be superseded by mode (or sector)-specific planning documents that are developed on a five-year cycle.

Projects can take several years from conception to programming and advertising. Once the Freight Plan is approved by FHWA, it is expected that project engineers and proponents will begin to design projects that explicitly fulfill the strategies outlined in the Freight Plan.

In the meantime, those projects currently programmed in the CIP that best meet the goals of the draft Freight Plan were selected to use National Highway Freight Program NHFP funding, based on their location on roadway segments designated as Critical Urban Freight Corridors or Critical Rural

Freight Corridors by the MPOs, with concurrence from MassDOT.

Each MPO used its own analysis and discretion to designate their limited mileage allotments in an effort to address their greatest regional freight needs. By programming these projects using a mix of NHFP and other funds, MassDOT will be advancing projects on the roadway segments deemed most critical to freight needs by the MPOs. Each project was additionally screened to make sure it met at least one statutory requirement for use of NHFP funds. The project list will be updated annually following the development of the STIP and CIP.
