

**The Department of Homeland Security (DHS)
Notice of Funding Opportunity (NOFO)
Fiscal Year 2023 Flood Mitigation Assistance**

SUMMARY OVERVIEW OF KEY INFORMATION FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) FLOOD MITIGATION ASSISTANCE (FMA)	
Program Overview	The Flood Mitigation Assistance (FMA) grant program makes federal funds available to states, U.S. territories, federally recognized Tribal governments, ¹ and local governments to reduce or eliminate the risk of repetitive flood damage to buildings and structures insured under the National Flood Insurance Program (NFIP), and within NFIP-participating communities. It does so with a recognition of the growing flood hazards associated with climate change, ² and of the need for flood hazard risk mitigation activities that promote climate adaptation, equity, and resilience with respect to flooding. These include both acute extreme weather events and chronic stressors which have been observed and are expected to increase in intensity and frequency in the future. From Fiscal Year (FY) 1996 to FY 2019, FMA obligated over \$1.5 billion in federal cost share mitigating over 8,000 properties insured by the NFIP
Goals and Objective	The purpose of the FMA program is to reduce or eliminate the flood risk of repetitive flood damage to structures and buildings insured by the NFIP, and to enhance community flood resilience within NFIP-participating communities.
Eligible Projects	The FMA grant program funds three types of activities and projects: Capability and Capacity Building Activities, Localized Flood Risk Reduction Projects, and Individual Flood Mitigation Projects
Deadlines	Application Start Date: 10/16/2023 Applicants Who Experience System-Related Issues Deadline: 02/27/2024 at 3:00 PM ET Application Submission Deadline: 02/29/2024 at 03:00:00 PM ET
Funding Amount	Available Funding for the NOFO: \$800,000,000 <ul style="list-style-type: none"> • Capability and Capacity Building Activities subtotal: \$60,000,000 • Localized Flood Risk Reduction Projects subtotal: \$520,000,000 • Individual Flood Mitigation Projects subtotal: \$220,000,000
Eligible Applicants	<ul style="list-style-type: none"> • States • District of Columbia • U.S. territories

¹ The term “federally recognized Tribal government,” as used in this funding opportunity, has the same meaning as “Indian Tribal government,” as defined at 44 C.F.R. § 77.2(f).

² Climate change is defined as “Changes in average weather conditions that persist over multiple decades or longer. Climate change encompasses both increases and decreases in temperature, as well as shifts in precipitation, changing risk of certain types of severe weather events, and changes to other features of the climate system” (Fourth National Climate Assessment).

Cost Share	<ul style="list-style-type: none"> Federally recognized Tribal governments <p>Capability and Capacity Building Activities federal cost share options:</p> <ul style="list-style-type: none"> Up to 90% federal cost share funding if the average Centers for Disease Control and Prevention (CDC) Social Vulnerability Index (SVI) score is not less than 0.5001 for the benefiting area(s) substantiated by a benefiting area map, and the activity must be funded by Bipartisan Infrastructure Law (BIL). FEMA will determine the CDC SVI score using the following three SVI themes: Socioeconomic Status, Household Characteristics, and Housing Type and Transportation. Or Up to 75% federal cost share funding if a higher federal cost share is not available. <p>Localized Flood Risk Reduction Projects federal cost share options:</p> <ul style="list-style-type: none"> Up to 90% federal cost share funding if the average CDC SVI score is not less than 0.5001 for the project benefiting area containing NFIP-insured properties, and the activity must be funded by the BIL. FEMA will determine the CDC SVI score using the following three SVI themes: Socioeconomic Status, Household Characteristics, and Housing Type and Transportation. Or Up to 75% federal cost share funding if a higher cost share is not available. <p>Individual Flood Mitigation Projects federal share options:</p> <ul style="list-style-type: none"> Up to 100% federal cost share funding for FMA defined Severe Repetitive Loss (SRL) (B)(i) or (B)(ii) properties in 42 U.S.C. § 4104c(h)(3). Or Up to 90% federal cost share funding for FMA defined Repetitive Loss (RL) properties in 42 U.S.C. § 4121(a)(7). Or Up to 90% federal cost share funding for each NFIP-insured property located within a census tract with a CDC SVI score is not less than 0.5001, and the activity must be funded by the BIL. FEMA will determine the CDC SVI score using the following three SVI themes: Socioeconomic Status, Household Characteristics, and Housing Type and Transportation. Or Up to 75% federal cost share funding if a higher federal cost share is not available.
-------------------	---

All entities wishing to do business with the federal government must have a unique entity identifier (UEI). The UEI number is issued by the SAM system. Requesting a UEI using Sam.gov can be found at: <https://sam.gov/content/entity-registration>.

Grants.gov registration information can be found at: <https://www.grants.gov/web/grants/register.html>.

Planned UEI Updates in Grant Application Forms:

On April 4, 2022, the Data Universal Numbering System (DUNS) Number was replaced by a new, non-proprietary identifier requested in, and assigned by, the System for Award Management (SAM.gov). This new identifier is the Unique Entity Identifier (UEI).

Additional Information can be found on Grants.gov:

<https://www.grants.gov/web/grants/forms/planned-uei-updates.html>

9. Program Category

Mitigation: Natural Hazards

10. Program Overview, Objectives, and Priorities

a. *Overview*

The Flood Mitigation Assistance (FMA) grant program makes federal funds available to states, U.S. territories, federally recognized Tribal governments,³ and local governments to reduce or eliminate the risk of repetitive flood damage to buildings and structures insured under the National Flood Insurance Program (NFIP), and within NFIP-participating communities. It does

³ The term “federally recognized Tribal government,” as used in this funding opportunity, has the same meaning as “Indian Tribal government,” as defined at 44 C.F.R. § 77.2(f).

so with a recognition of the growing flood hazards associated with climate change,⁴ and of the need for flood hazard risk mitigation activities that promote climate adaptation, equity, and resilience with respect to flooding. These include both acute extreme weather events and chronic stressors which have been observed and are expected to increase in intensity and frequency in the future. From Fiscal Year (FY) 1996 to FY 2019, FMA obligated over \$1.5 billion in federal cost share mitigating over 8,000 properties insured by the NFIP.

The FMA grant program aligns with the [2020-2024 DHS Strategic Plan](#) through pursuing Goal 5: Strengthen Preparedness and Resilience. Specifically, Objective 5.1: Build a National Culture of Preparedness has several sub-objectives that the FMA program supports. FMA serves primarily to bolster Sub-Objective 5.1.1: Incentivize investments that reduce risk and increase pre-disaster mitigation, including expanding the use of insurance to manage risk through funding hazard mitigation activities and projects, particularly ones that reduce risk to NFIP-insured structures. Additionally, FMA's Capability and Capacity Building Activities also contribute to other sub-objectives. For example, planning, partnerships, and project scoping efforts help improve awareness initiatives to encourage public action to increase preparedness (Sub-Objective 5.1.2), use lessons from past disasters and exercises to inform community investment decisions and anticipate challenges that may emerge during future disasters (Sub-Objective 5.1.3), and coordinate and guide continuity of operations activities through partnerships with government and non-government stakeholders (Sub-Objective 5.1.5).

The [2022-2026 FEMA Strategic Plan](#) outlines a bold vision and three ambitious goals designed to address key challenges the agency faces during a pivotal moment in the field of emergency management: Goal 1 - Instill equity as a foundation of emergency management, Goal 2 - Lead the whole of community in climate resilience, and Goal 3 - Promote and sustain a ready FEMA and prepared nation. Most notably, the FMA program supports Objective 1.2: Remove barriers to FEMA programs through a people first approach, Objective 1.3: Achieve equitable outcomes for those we serve, and Objective 2.2: Build a climate resilient nation. FMA also supports the National Mitigation Investment Strategy and the FIMA FY 2021-2023 Mitigation Strategy by advancing mitigation investment to reduce risks posed by natural hazards and increasing the nation's resilience to natural hazards.

Awards made under this Notice of Funding Opportunity (NOFO) will be funded, in whole or in part, with funds appropriated by the Infrastructure Investment and Jobs Act (IIJA) Pub. L. No. 117-58, 135 Stat. 1387–1388 (2021), also known as the Bipartisan Infrastructure Law (BIL). The BIL is a once-in-a-generation investment in infrastructure, which will grow a more sustainable, resilient, and equitable economy by enhancing U.S. competitiveness, driving the creation of good-paying jobs with the free and fair choice to join a union, and ensuring stronger access to economic and environmental benefits for disadvantaged communities. The BIL appropriates billions of dollars to FEMA to promote resilient infrastructure, respond to the impacts of climate change, and equip our nation with the resources to combat its most pressing threats.

⁴ Climate change is defined as “Changes in average weather conditions that persist over multiple decades or longer. Climate change encompasses both increases and decreases in temperature, as well as shifts in precipitation, changing risk of certain types of severe weather events, and changes to other features of the climate system” (Fourth National Climate Assessment).

BIL authorizes FMA to provide an increased federal cost share for an NFIP property that is located within a census tract with a Centers for Disease Control and Prevention (CDC) Social Vulnerability Index (SVI) score of not less than 0.5001, and the activity is funded by BIL. FEMA will determine the CDC SVI score using the following three SVI themes: Socioeconomic Status, Household Characteristics, and Housing Type and Transportation. Refer to Section C.4, Cost Share or Match of this funding opportunity.

b. Objectives

The purpose of the FMA program is to reduce or eliminate the flood risk of repetitive flood damage to structures and buildings insured by the NFIP, and to enhance community flood resilience within NFIP-participating communities.

c. Priorities

The FMA grant program funds three types of activities and projects: Capability and Capacity Building Activities, Localized Flood Risk Reduction Projects, and Individual Flood Mitigation Projects. FMA encourages flood mitigation projects that will benefit multiple properties located in an NFIP-participating community.⁵

In addition, FMA aims to incentivize flood mitigation activities and projects that advance equity (see [Executive Order 14091: Further Advancing Racial Equity and Support for Underserved Communities Through the Federal Government](#)) and that will benefit disadvantaged communities as referenced in [Executive Order \(EO\) 14008: Tackling the Climate Crisis at Home and Abroad](#). In implementing the Administration's Justice40 Initiative, established in [EO 14008](#) and discussed in subsequent guidance, the FMA program will be identifying a disadvantaged community, also referred to as a Justice40 Community, using version 1.0 of the [Climate and Economic Justice Screening Tool \(CEJST\)](#). Justice40 Communities are considered disadvantaged if they are in census tracts that meet the thresholds for at least one of the tool's categories of burden, or if they are on lands within the boundaries of a federally recognized Tribal government. In addition, census tracts that are completely surrounded by disadvantaged communities are also considered disadvantaged if they meet an adjusted low-income threshold (at or above the 50th percentile). Justice40 Communities have been marginalized by society, overburdened by pollution, and/or underserved by infrastructure and other basic services. More information about the CEJST methodology, datasets, and downloadable files can be found on the CEJST website at <https://screeningtool.geoplatform.gov>.

11. Performance Measures

The following key performance indicators provide strategic and relevant information to decisionmakers and stakeholders about FMA's progress and success toward achieving goals and objectives, and are based on measurable data that are available or could be feasibly collected:

- Total number of NFIP-insured properties selected that are FMA and/or NFIP defined Severe Repetitive Loss (SRL), Repetitive Loss (RL), and Substantially Damaged.

⁵ NFIP participating community information can be found via the Community Status Book at <https://www.fema.gov/flood-insurance/work-with-nfip/community-status-book>.

- Total federal cost share funding invested in or benefitting Justice40 Communities identified using version 1.0 of the [Climate and Economic Justice Screening Tool \(CEJST\)](#).
- Total dollar amount of flood losses avoided in projects or communities funded by FMA subapplications.

FEMA recognizes that many effective resilience solutions, such as nature-based solutions, yield critical benefits that are not monetizable. As such, FEMA notes that these key performance indicators are not determinative of whether an application to the FMA grant program is selected for funding.

FEMA will further assess the recipient's performance against the program objective during the award closeout process as outlined in Section F.3.c of this funding opportunity.

B. Federal Award Information

1. Available Funding for the NOFO: **\$800,000,000**

- | | |
|--|----------------------|
| a) Capability and Capacity Building Activities subtotal: | \$60,000,000 |
| b) Localized Flood Risk Reduction Projects subtotal: | \$520,000,000 |
| c) Individual Flood Mitigation Projects subtotal: | \$220,000,000 |

2. FEMA will distribute the available FY 2023 FMA funding amount and federal activity cap as follows:

a. Capability and Capacity Building Activities

- a. FEMA will select up to **\$60,000,000** Capability and Capacity Building Activities to develop future Localized Flood Risk Reduction Projects and/or Individual Flood Mitigation Projects that will subsequently reduce flood claims against the NFIP.
 - i. Capability and Capacity Building Activities will be prioritized and selected according to the following hierarchical order: Mitigation Plans under 42 U.S.C. § 4104c(c)(3)(F); Technical Assistance by States to Communities under 42 U.S.C. § 4104c(c)(3)(J); Project Scoping; and Additional Capability and Capacity Building Activities (Partnership Development to Conduct Eligible Mitigation Activities; Enhancing Local Floodplain Management; Severe Repetitive Loss (SRL)/Repetitive Loss (RL) Strategy Development; and other eligible Capability and Capacity Building Activities under 42 U.S.C. § 4104c(c)(3)(G)).
 - ii. For more information, refer to the Capability and Capacity Building Activities Fact Sheet at <https://www.fema.gov/grants/mitigation/floods/fma-resources>.
- b. Capability and Capacity Building Activities federal activity cap per subapplication are:
 - i. **\$100,000** for Mitigation Plans under 42 U.S.C. 4104c(c)(3)(F) per Applicant with maximums of:

1. **\$50,000** for state mitigation plan
 2. **\$25,000** for local mitigation plan
- ii. **\$50,000** for Technical Assistance by States to Communities (42 U.S.C. 4104c(c)(3)(J))
 - iii. **\$900,000** for Project Scoping
 - iv. **\$300,000** for Additional Capability and Capacity Building Activities (Partnership Development to Conduct Eligible Mitigation Activities, Enhancing Local Floodplain Management, SRL/RL Strategy Development, and other eligible Capability and Capacity Building Activities under 42 U.S.C. 4104c(c)(3)(G)).

b. Localized Flood Risk Reduction Projects

- a. FEMA will select up to **\$520,000,000** of Localized Flood Risk Reduction Projects that address community flood risk for the purpose of reducing NFIP flood claim payments.
 - i. For more information, refer to the Localized Flood Risk Reduction Projects Fact Sheet at <https://www.fema.gov/grants/mitigation/floods/fma-resources> and to the [2023 Hazard Mitigation Assistance Program and Policy Guide](#).

- b. Localized Flood Risk Reduction Projects federal activity cap per subapplication is **\$50,000,000** per project.

c. Individual Flood Mitigation Projects

- a. FEMA will select at least **\$220,000,000** of Individual Flood Mitigation Projects that mitigate the risk of flooding to individual NFIP insured structures.

- b. Individual Flood Mitigation Projects do not have a federal activity cap.

- d. Funding for Applicant Management Costs is included in each of the priority funding caps provided for Capability and Capacity Building Activities, Localized Flood Risk Reduction Projects, and Individual Flood Mitigation Project caps. Applicants are authorized to receive up to 10% of the awarded activities. For more information, see Section I, Management Costs of this funding opportunity.

- e. For more information on FY 2023 FMA funding priorities and eligible activities, see Section E, Application Review Information, Review, and Selection Process of this funding opportunity.

- f. For more information about uses of assistance under FMA, including how to submit various project types in FEMA Grants Outcomes (FEMA GO), refer to FMA resources at <https://www.fema.gov/grants/mitigation/floods/fma-resources>.

2. Projected Number of Awards: **40 awards; 725 subawards**

3. Period of Performance:**36 months**

The Period of Performance (POP) is 36 months, starting on the date of the recipient’s federal award. Given the complexity of the Localized Flood Risk Reduction Projects, the applicant may submit a request for a longer POP in the application for FEMA to review and approve. A longer POP for a Localized Flood Risk Reduction Project must be requested, documented, reasonable, and justified. Any subsequent amendments to the federal award will not extend the POP unless explicitly stated.

Extensions to the period of performance are allowed. For additional information on period of performance extensions, please refer to Section H of this funding opportunity.

FEMA awards under most programs, including this program, only include one budget period, so it will be same as the period of performance. *See* 2 C.F.R. § 200.1 for definitions of “budget period” and “period of performance.”

4. Projected Period of Performance Start Date(s):**Will vary by award****5. Projected Period of Performance End Date(s):****36 months for all projects from date of award unless otherwise approved by FEMA****6. Funding Instrument Type:****Grant****C. Eligibility Information****1. Eligible Applicants**

- States
- District of Columbia
- U.S. territories
- Federally recognized Tribal governments

Each state, territory, the District of Columbia, and federally recognized Tribal government shall designate one agency to serve as the applicant for FMA funding. The designee is strongly encouraged to conduct outreach with disadvantaged communities as referenced in [Executive Order 14008](#) prior to and during the application process. Each applicant’s designated agency may submit only one FMA grant application to FEMA.

Communities, including local governments, cities, townships, counties, special district governments, and Tribal governments (including federally recognized Tribes who choose to apply as subapplicants), are considered subapplicants and must submit subapplications to their state/territory/Tribal applicant agency. Certain political subdivisions (for example, regional flood control districts or county governments) may apply and act as subapplicants if they are part of a community participating in the NFIP where the political subdivision provides zoning and building code enforcement or planning and community development professional services for that community. Subapplications under which two or more entities would carry out the award are

eligible, such as a multi-state or multi-Tribal initiative; however, only one entity may be the subapplicant with primary responsibility for carrying out the award. Contact information for the State Hazard Mitigation Officers is provided on the FEMA website at <https://www.fema.gov/grants/mitigation/state-contacts>.

2. Applicant Eligibility Criteria

- All applicants and subapplicants must be participating in the NFIP, and not be withdrawn, on probation, or suspended. NFIP community status can be verified at <https://www.fema.gov/flood-insurance/work-with-nfip/community-status-book>.
- Structures eligible for Individual Flood Mitigation Projects must have an NFIP policy (including a Group Flood Insurance Policy [GFIP]) in effect prior to the opening of the application period and the policy must be maintained throughout the life of the structure. The requirement of maintaining flood insurance shall apply during the life of the property, regardless of transfer of ownership of such property. If the subapplicant does not comply with this requirement, FEMA may take one or more actions as remedies for noncompliance, as appropriate. This could include disallowing all or part of the cost of the activity or action not in compliance. For more information, see 44 C.F.R. § 77.6.
- Applicants are required to have a FEMA-approved State or Tribal Hazard Mitigation Plan in accordance with 44 C.F.R. Part 201 by the application deadline and at the time of obligation of the award. More detailed information is provided in Part 4. Eligibility and Requirements, C. Hazard Mitigation Plan Requirements, of the 2023 Hazard Mitigation Assistance Program and Policy Guide at <https://www.fema.gov/grants/mitigation/hazard-mitigation-assistance-guidance>
- Subapplicants are required to have a FEMA-approved Local or Tribal Hazard Mitigation Plan in accordance with 44 C.F.R. Part 201 by the application deadline and at the time of obligation of grant funds for Capability and Capacity Building Activities, Localized Flood Risk Reduction Project, and Individual Flood Mitigation Project subapplications. Capability and Capacity Building Activities' Mitigation Plans subapplications are exempt from the hazard mitigation plan requirement for subapplicants only. Mitigation plan integration, while not required to be eligible for FMA, is encouraged. For additional information, refer to section H.14 of this funding opportunity. Local hazard mitigation plans must conform to the Local Plan Review Guide, or any subsequent local mitigation planning guide that supersedes it.
- To be considered for financial assistance, all applicants must submit their FY 2023 FMA grant applications to FEMA via FEMA GO. Refer to Section D, Application and Submission Information of this funding opportunity.

3. Other Eligibility Criteria

- All activities under FMA must be in conformance with all criteria established by FEMA that is specific to the proposed activity found in the [2023 Hazard Mitigation Assistance Program and Policy Guide](#). All subapplications submitted under the Capability and Capacity Building Activities priority must demonstrate that the Capability and Capacity Building Activities will reduce flood claims against the NFIP. Capability and Capacity Building Activities should result in a resource,

strategy, or tangible mitigation product that will reduce or eliminate risk and damage from future flooding and increase community resilience.

- All Capability and Capacity Building Activities Localized Flood Risk Reduction Project subapplications, and Individual Flood Mitigation Project subapplications submitted as part of an FMA grant application must be consistent with the goals and objectives identified in the current, FEMA-approved State or Tribal (Standard or Enhanced) Mitigation Plan and the local mitigation plan for the jurisdiction in which the project is located. Hazard Mitigation Plans should reflect state-wide mitigation priorities across all potential federal and non-federal mitigation funding sources. Current mitigation plans are not required for applicants and subapplicants submitting Capability and Capacity Building Activities' Mitigation Plans subapplications to develop a new mitigation plan or to update a mitigation plan.
- On April 19, 2022, FEMA updated the State and Local Mitigation Planning Policy Guides ([policies](#)). On April 19, 2023, they went into effect. This means that all state and local mitigation plans must meet the updated requirements. For instance, it is required that state plans weigh equity and the impacts of climate change. FMA funding can be used for mitigation planning grants, with a focus on integrating equity, climate impacts, and floodplain management. For more information on funding and designing the mitigation planning process to integrate floodplain management planning and maximize Community Rating System Activity 510 points, refer to [Mitigation Planning and the Community Rating System: Key Topics Bulletin \(fema.gov\)](#), and the Local Hazard Mitigation Plan and Community Rating System Crosswalk Starter Kit in the [Local Mitigation Planning Handbook \(fema.gov\)](#). For more information on requirements for approved mitigation plans, States should refer to the [State Mitigation Planning Policy Guide](#) (FP 302-094-2, April 19, 2022). Local governments should refer to the [Local Mitigation Planning Policy Guide](#) (FP-206-21-0002, April 19, 2022). Tribal governments should refer to the [Tribal Mitigation Plan Review Guide](#) (December 2017) (https://www.fema.gov/sites/default/files/2020-06/fema-tribal-mitigation-plan-review-guide_12-05-2017.pdf).
- All subapplications submitted under the Capability and Capacity Building Activities - Project Scoping and Additional Capability and Capacity Building Activities priorities, and Localized Flood Risk Reduction Project priority (see Section E, Application Review Information, of this funding opportunity) must demonstrate that the proposed project benefits NFIP insured properties by submitting a map and associated geospatial file(s) (e.g., shapefile, Keyhole Markup Language (KML/KMZ), geodatabase, list of census tracts, or other geo-enabled documents) delineating: the proposed project area or footprint boundary, and for Localized Flood Risk Reduction Projects only the benefiting area in alignment with Hydrologic and Hydraulic modelling as available except for Phased Project: Phase I.
 - The map and associated geospatial file(s) will be used to determine if a project benefits or primarily benefits Justice40 communities. Justice40 communities are defined at the census tract level, but many project benefitting areas are located across multiple census tracts, either partially or fully.

- Although these tools should not be used to determine eligibility, subapplicants may use the Resilience Analysis and Planning Tool (RAPT)—which encompasses geospatial layers including National Risk Index (NRI) and Justice40—to understand the population impacted by a proposed project, delineate the area benefitting, and translate between census tract geographies identified by Justice40.
 - Subapplicants may include narrative descriptions of population benefitting to supplement the data and shapefile provided, particularly in rural areas with limited population data or for projects benefitting geographically dispersed populations.
 - For Capability and Capacity Building Activities, if a proposed benefiting area map is not provided, FEMA will default to the subapplicant jurisdiction to determine NFIP benefits, and CEJST for prioritization.
- All structure elevation, mitigation reconstruction, and dry floodproofing projects; and all projects where HMA funds are used for new construction, substantial improvement, or to address substantial damage to structures⁶ must meet the minimum standards of FEMA’s partial implementation of the Federal Flood Risk Management Standards (FFRMS).⁷
 - If a state, local, Tribal, or territorial government, or federal agency has adopted a higher standard applicable to the specific project, FEMA will require the higher standard.⁸
 - See [EO 14030, Climate-Related Financial Risk](#) and the 2023 [Hazard Mitigation Assistance Program and Policy Guide](#).
 - Subapplicants can direct any questions about the proposed hazard mitigation project’s location in the floodplain to their local floodplain manager and/or State Hazard Mitigation Officers. Contact information for the State Hazard Mitigation Officers is provided on the FEMA website at <http://www.fema.gov/state-hazard-mitigation-officers>.
 - When eligible subapplications include an information technology or operational technology component as part of a larger project, FEMA will allow activities that enable greater community resilience through cybersecurity as eligible costs when those activities are performed in accordance with the cybersecurity performance goals for critical infrastructure and control systems directed by the National Security Presidential Memorandum on Improving Cybersecurity for Critical Infrastructure Control Systems, found at <https://www.cisa.gov/control-systems-goals-and-objectives>. Subapplicants should address cybersecurity in their planning, design, and

⁶ Refer to [44 CFR § 9.4](#) for the definitions of “[new construction](#)” and “[substantial improvement](#),” Refer to [44 CFR § 59.1](#) for the definition of “[substantial damage](#).”

⁷ Refer to the [Hazard Mitigation Assistance Program and Policy Guide, Part 4, I. Federal Flood Risk Management Standards – Partial](#).

⁸ Under 44 CFR § 9.11(d)(6), no action may be taken if it is inconsistent with the criteria of the National Flood Insurance Program (44 CFR part 59 et seq.) or any more restrictive Federal, State, or local floodplain management standards.

project oversight for awards that include a technology nexus that may pose a cyber risk that would affect the reliability or operability of project.

- FEMA encourages the use of environmentally friendly construction practices when completing FMA projects.
 - When subapplications include the use of concrete or asphalt products, FEMA encourages for the inclusion of low embodied carbon concrete and environmentally preferable asphalt.
 - Subrecipients should ensure that federally funded infrastructure investments reduce life cycle emissions of construction materials, specifically concrete, asphalt, and steel.
 - Subrecipients should request disclosure of Environmental Product Declarations (EPD) to evaluate and incentivize acquisition of these lower carbon materials.
 - Subrecipients are encouraged to prioritize the use of American-made, lower-carbon construction materials as referenced in the [Federal Buy Clean Initiative](#).
- Subrecipients are encouraged to place publicly visible signage at sites where federal funding is being used for hazard mitigation projects, identifying the funding source of the project ([Office of Management and Budget's February 24, 2023 Controller Alert, "CA-23-6, Enhancing Transparency Through Use of the Investing in America Emblem on Signs \(UPDATED\)"](#)). The cost of such signs is an eligible project cost. Subapplicants may request up to \$5,000 per project for such costs. Requests for signage costs must be identified as a line item in the subapplication cost estimate. Project costs for signage are subject to the applicable cost-sharing requirements. The contents and other details of the signage must be in accordance with FEMA's signage guidance at <https://www.fema.gov/grants/policy-guidance/bipartisan-infrastructure-law>.
- FEMA encourages applicants and subapplicants to leverage the [Department of Labor's The Good Jobs Initiative](#). The Good Jobs Initiative is an initiative that provides critical information to workers, employers, and government agencies as they work to improve job quality and create access to good jobs free from discrimination and harassment for all working people.

5. Cost Share or Match

Cost share is required for most subapplications funded under this program. FEMA may contribute the federal cost share funding if available, as follows:

- i. **Capability and Capacity Building Activities federal cost share options:**
 - a. Up to 90% federal cost share funding if the average Centers for Disease Control and Prevention (CDC) Social Vulnerability Index (SVI) score is not less than 0.5001 for the benefiting area(s) substantiated by a benefiting area map, and the activity must be funded by BIL. FEMA will determine the CDC SVI score using the following three SVI themes: Socioeconomic Status, Household Characteristics, and Housing Type and Transportation. **or**

- b. Up to 75% federal cost share funding if a higher federal cost share is not available.
- ii. **Localized Flood Risk Reduction Projects federal cost share options:**
 - a. Up to 90% federal cost share funding if the average CDC SVI score is not less than 0.5001 for the project benefiting area containing NFIP-insured properties, and the activity must be funded by the BIL. FEMA will determine the CDC SVI score using the following three SVI themes: Socioeconomic Status, Household Characteristics, and Housing Type and Transportation. **or**
 - b. Up to 75% federal cost share funding if a higher cost share is not available.
- iii. **Individual Flood Mitigation Projects federal cost share options and definitions:**
 - a. Up to 100% federal cost share funding for FMA-defined Severe Repetitive Loss (SRL) (B)(i) or (B)(ii) properties in 42 U.S.C. § 4104c(h)(3), is a structure that:
 - i. Is covered under a contract for flood insurance made available under the NFIP; **and**
 - ii. Has incurred flood-related damage:
 - 1. ((B)(i)) For which four or more separate claims payments (includes building and contents) have been made under flood insurance coverage with the amount of each such claim exceeding \$5,000, and with the cumulative amount of such claim payments exceeding \$20,000, **or**
 - 2. ((B)(ii)) For which at least two separate claims payments (includes only building) have been made under such coverage, with the cumulative amount of such claims exceeding the market value of the insured structure.
 - iii. To receive an increased federal cost share under these provisions, properties must meet the FMA SRL definition. Applicants and subapplicants that are requesting an increased federal cost share must submit documentation with their application or subapplication demonstrating that properties meet the definition.
 - b. Up to 90% federal cost share funding for FMA-defined Repetitive Loss (RL) properties in 42 U.S.C. § 4121(a)(7) is a structure covered by a contract for flood insurance made available under the NFIP that:
 - i. Has incurred flood-related damage on two occasions, in which the cost of the repair, on the average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event; **and**
 - ii. At the time of the second incidence of flood-related damage, the contract for flood insurance contains Increased Cost of Compliance (ICC) coverage.

- iii. To receive an increased federal cost share under these provisions, properties must meet the FMA RL definition. Applicants and subapplicants that are requesting an increased federal cost share must submit documentation with their application or subapplication demonstrating that properties meet this definition.
- c. Up to 90% federal cost share funding for each NFIP-insured property located within a census tract with a CDC SVI score is not less than 0.5001, and the activity must be funded by the BIL. FEMA will determine the CDC SVI score using the following three SVI themes: Socioeconomic Status, Household Characteristics, and Housing Type and Transportation. **or**
- d. Up to 75% federal cost share funding if a higher federal cost share is not available.

To note, the Individual Flood Mitigation Project's Repetitive Loss (RL) 90% federal cost share and the Severe Repetitive Loss (SRL) 100% federal cost share options are only eligible for those NFIP properties meeting FMA definitions under 42 U.S.C. § 4104c(h)(3) and 42 U.S.C. § 4121(a)(7). These federal cost shares are not available for NFIP defined SRL and RL properties.

Generally, the cost share for this program is 75% federal cost share and 25% non-federal cost share. This means federal funding is available for up to 75% of eligible costs. The remaining 25% of eligible costs must be derived from non-federal sources. For example, if the total cost of the activity is \$400,000 and the non-federal cost share is 25%, then the non-federal contribution is \$100,000: 25% of \$400,000 is \$100,000. The non-federal contribution would be provided by the applicant or subapplicant. Likewise, the federal cost share of that activity would be \$300,000: 75% of \$400,000 is \$300,000. The federal contribution would be provided by FEMA. FEMA may consider the non-federal cost share based on availability of remaining federal funds, as noted in Section E, Application Review Information of this funding opportunity.

As a result of FMA funding made available under the BIL, FEMA may contribute up to 90% federal cost share for qualifying FY 2023 funding priorities and criteria. FEMA will determine the CDC SVI score using the following three SVI themes: Socioeconomic Status, Household Characteristics, and Housing Type and Transportation. Applicants and Subapplicants can determine their activities and projects' CDC SVI score by calculating the three SVI themes' averages using information on CDC/ATSDR Social Vulnerability Index webpage, <https://www.atsdr.cdc.gov/placeandhealth/svi/index.html>. When BIL funding is exhausted, the enhanced cost share for properties with CDC SVI not less than 0.5001 as determined by FEMA, cannot be extended to the remaining funds made available in the FY 2023 FMA NOFO.

Structures with different federal cost-share requirements can be submitted in a single project subapplication. The overall project federal cost share documented in the Cost Share Section of the project subapplication should reflect the combined federal cost shares of the structures. For example, in an Individual Flood Mitigation Project subapplication, a project with \$100,000 costs for one SRL structure funded at 100% federal cost share plus \$100,000 costs for one RL structure funded at 90% federal cost share will have an overall project federal cost share of 95%, or \$190,000, of the \$200,000 total cost for both structures.

For insular areas (American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands), FEMA automatically waives the non-federal cost share for the recipient when the non-federal cost share for the entire award is under \$200,000. If the non-federal cost share for the entire award is \$200,000 or greater, FEMA may waive all or part of the non-federal cost share at the request of the recipient. The recipient may request 100% cost-share in its application.

The non-federal cost share may consist of cash, donated or third-party in-kind services, materials, or any combination thereof. Cash and third-party in-kind matches must consist of eligible costs (i.e., same eligibility as the federal share). Applicants cannot apply other federal award funds toward the non-federal cost share unless the other federal statutory authority allows the funds to be used to meet cost-share requirements. For example, FEMA’s Safeguarding Tomorrow through Ongoing Risk Management Revolving Loan Fund (STORM RLF) Program loans may be eligible for non-federal cost share funding. For more information, visit the STORM RLF webpage at <https://www.fema.gov/grants/mitigation/storm-rlf>. In addition, in certain situations U.S. Department of Housing and Urban Development Community Development Block Grant Disaster Recovery (CDBG-DR) program funds, U.S. Small Business Administration Disaster Loans, United States Department of Agriculture Rural Development Single Family Direct Home Loans or Single-Family Repair Loans, the Department of Defense’s Readiness and Environmental Protection Integration (REPI) program, and others may be used towards the non-federal match. Additionally, certain American Rescue Plan funds may be used as non-federal cost share as determined by the Department of Treasury.⁹ Refer to the Hazard Mitigation Assistance Cost Share Guide for more information at https://www.fema.gov/sites/default/files/2020-08/fema_hma_cost-share-guide.pdf. FEMA encourages innovative use of public and private-sector partnerships to meet the non-federal cost share.

FMA funding cannot be used as matching funds for another federal grant. Additionally, third-party in-kind matches used to meet the matching requirement may not be used to meet matching requirements for any other federal grant program.

Ultimately, the recipient is responsible for ensuring that it contributes the proper cost share to its actual project costs. If actual total project costs exceed the projected total project costs stated in the federal award, the recipient will not receive any additional federal funding and will be responsible for contributing additional funds above the required cost match. If actual total project costs are less than the projected total project costs stated in the federal award, the recipient will be responsible for contributing a cost match calculated as a percentage of those actual project costs.

⁹ Treasury funds are available through the Coronavirus State and Local Fiscal Recovery Funds (SLFRF) program. According to U.S. Department of Treasury, the SLFRF program funds available under the “revenue loss” eligible use category (sections 602(c)(1)(C) and 603(c)(1)(C) of the Social Security Act) generally may be used to meet the non-federal cost-share or matching requirements of other federal programs. See Coronavirus State & Local Fiscal Recovery Funds: Overview of the Final Rule at <https://home.treasury.gov/system/files/136/SLFRF-Final-Rule-Overview.pdf>.

More detailed information is provided in Part 4. Eligibility and Requirements, Section L: Cost Share of the [2023 Hazard Mitigation Assistance Program and Policy Guide](#).

D. Application and Submission Information

1. Key Dates and Times

- a. *Application Start Date:*** **10/16/2023**
- b. *Application Submission Deadline:*** **02/29/2024 at 03:00:00 PM ET**

All applications **must** be received by the established deadline. Please note that FEMA deadlines listed in this funding opportunity refer to application deadlines for the applicants. Subapplicants should consult with their applicant agency to confirm subapplication deadlines to the applicant if applicable.

FEMA will not review applications that are received after the deadline or consider these late applications for funding. FEMA may, however, extend the application deadline on request for any applicant who can demonstrate that good cause exists to justify extending the deadline. Good cause for an extension may include technical problems outside of the applicant's control that prevent submission of the application by the deadline, other exigent or emergency circumstances, or statutory requirements for FEMA to make an award.

Applicants experiencing technical problems outside of their control must notify FEMA as soon as possible and before the application deadline. Failure to timely notify FEMA of the issue that prevented the timely filing of the application may preclude consideration of the award. "Timely notification" of FEMA means: prior to the application deadline and within 48 hours after the applicant became aware of the issue.

A list of FEMA contacts can be found in Section G of this NOFO, "DHS Awarding Agency Contact Information." For technical assistance with the FEMA Grants Outcomes System (FEMA GO), please contact the FEMA GO Helpdesk at femago@fema.dhs.gov or (877) 611-4700, Monday through Friday, 8:00 AM – 6:00 PM Eastern Time (ET). For programmatic or grants management questions, please contact your Program Analyst or Grants Management Specialist. If applicants do not know who to contact or if there are programmatic questions or concerns, please contact the FEMA Grants Information Desk by e-mail at fema-grants-news@fema.dhs.gov OR by phone at (800) 368-6498, Monday through Friday, 9:00 AM – 5:00 PM ET.

FEMA GO automatically records proof of timely submission and the system generates an electronic date/time stamp when FEMA GO successfully receives the application. The individual with the Authorized Organization Representative role that submitted the

application will also receive the official date/time stamp and a FEMA GO tracking number in an email serving as proof of their timely submission. For additional information on how an applicant will be notified of application receipt, see the subsection titled “Timely Receipt Requirements and Proof of Timely Submission” in Section D of this NOFO.

c. Other Key Dates

Event	Suggested Deadline for Completion
Initial registration in SAM.gov includes UEI issuance	Four weeks before actual submission deadline
Obtaining a valid Employer Identification Number (EIN)	Four weeks before actual submission deadline
Creating an account with login.gov	Four weeks before actual submission deadline
Registering in SAM or Updating SAM registration	Four weeks before actual submission deadline
Registering in FEMA GO	Four weeks before actual submission deadline
Submitting the final application in FEMA GO	By the submission deadline

2. Agreeing to Terms and Conditions of the Award

By submitting an application, applicants agree to comply with the requirements of this NOFO and the terms and conditions of the award, should they receive an award.

3. Address to Request Application Package

Applications are processed through the FEMA GO system. To access the system, go to <https://go.fema.gov/>.

Hard copies of the NOFO can be downloaded at [Grants.gov](https://www.dhs.gov/grants) or obtained via email from the Awarding Office points of contact listed in Section G of this NOFO, “DHS Awarding Agency Contact Information” or by TTY (800) 462-7585.

4. Requirements: Obtain a Unique Entity Identifier (UEI) and Register in the System for Award Management (SAM)

Each applicant, unless they have a valid exception under 2 CFR 25.110, must:

- 1) Be registered in Sam.Gov before application submission.
- 2) Provide a valid Unique Entity Identifier (UEI) in its application.
- 3) Continue to always maintain an active System for Award Management (SAM) registration with current information during the Federal Award process.

5. Steps Required to Obtain a Unique Entity Identifier, Register in the System for Award Management (SAM), and Submit an Application

Applying for an award under this program is a multi-step process and requires time to complete. Applicants are encouraged to register early as the registration process can take four weeks or more to complete. Therefore, registration should be done in sufficient time to ensure it does not impact your ability to meet required submission deadlines.

Please review the table above for estimated deadlines to complete each of the steps listed. Failure of an applicant to comply with any of the required steps before the deadline for submitting an application may disqualify that application from funding.

To apply for an award under this program, all applicants must:

- a. Apply for, update, or verify their Unique Entity Identifier (UEI) number and Employer Identification Number (EIN) from the Internal Revenue Service;
- b. In the application, provide an UEI number;
- c. Have an account with login.gov;
- d. Register for, update, or verify their SAM account and ensure the account is active before submitting the application;
- e. Register in FEMA GO, add the organization to the system, and establish the Authorized Organizational Representative (AOR). The organization's electronic business point of contact (EBiz POC) from the SAM registration may need to be involved in this step. For step-by-step instructions, see <https://www.fema.gov/media-library/assets/documents/181607>;
- f. Submit the complete application in FEMA GO; and
- g. Continue to maintain an active SAM registration with current information at all times during which it has an active federal award or an application or plan under consideration by a federal awarding agency. As part of this, applicants must also provide information on an applicant's immediate and highest-level owner and subsidiaries, as well as on all predecessors that have been awarded federal contracts or federal financial assistance within the last three years, if applicable.

Applicants are advised that FEMA may not make a federal award until the applicant has complied with all applicable SAM requirements. Therefore, an applicant's SAM registration must be active not only at the time of application, but also during the application review period and when FEMA is ready to make a federal award. Further, as noted above, an applicant's or recipient's SAM registration must remain active for the duration of an active federal award. If an applicant's SAM registration is expired at the time of application, expires during application review, or expires any other time before award, FEMA may determine that the applicant is not qualified to receive a federal award and use that determination as a basis for making a federal award to another applicant.

Per 2 C.F.R. § 25.110(c)(2)(iii), if an applicant is experiencing exigent circumstances that prevents it from obtaining an UEI number and completing SAM registration prior to receiving a federal award, the applicant must notify FEMA as soon as possible by contacting fema-grants-news@fema.dhs.gov and providing the details of the circumstances that prevent completion of these requirements. If FEMA determines that there are exigent circumstances and FEMA has decided to make an award, the applicant will be required to obtain an UEI

number, if applicable, and complete SAM registration within 30 days of the federal award date.

6. Electronic Delivery

DHS is participating in the Grants.gov initiative to provide the grant community with a single site to find and apply for grant funding opportunities. DHS encourages or requires applicants to submit their applications online through Grants.gov, depending on the funding opportunity.

For this funding opportunity, FEMA requires applicants to submit applications through FEMA GO.

7. How to Register to Apply

a. *General Instructions:*

Registering and applying for an award under this program is a multi-step process and requires time to complete. Read the instructions below about registering to apply for FEMA funds. Applicants should read the registration instructions carefully and prepare the information requested before beginning the registration process. Reviewing and assembling the required information before beginning the registration process will alleviate last-minute searches for required information.

The registration process can take up to four weeks to complete. To ensure an application meets the deadline, applicants are advised to start the required steps well in advance of their submission.

Organizations must have an UEI number, an EIN, an active System for Award Management (SAM) registration and Grants.gov account to apply for grants.

b. *Obtain an UEI Number:*

All entities applying for funding, including renewal funding, prior to April 4, 2022, must have a UEI number. Applicants must enter the UEI number in the applicable data entry field on the SF-424 form.

For more detailed instructions for obtaining a UEI number, refer to: SAM.gov.

c. *Obtain Employer Identification Number*

All entities applying for funding must provide an Employer Identification Number (EIN). The EIN can be obtained from the IRS by visiting: <https://www.irs.gov/businesses/small-businesses-self-employed/apply-for-an-employer-identification-number-ein-online>.

d. *Create a login.gov account:*

Applicants must have a login.gov account in order to register with SAM or update their SAM registration. Applicants can create a login.gov account here:

https://secure.login.gov/sign_up/enter_email?request_id=34f19fa8-14a2-438c-8323-a62b99571fd3.

Applicants only have to create a login.gov account once. For applicants that are existing SAM users, use the same email address for the login.gov account as with SAM.gov so that the two accounts can be linked.

For more information on the login.gov requirements for SAM registration, refer to:

<https://www.sam.gov/SAM/pages/public/loginFAQ.jsf>.

e. *Register with SAM:*

All organizations applying online through Grants.gov must register with SAM. Failure to register with SAM will prevent your organization from applying through Grants.gov. SAM registration must be renewed annually. Organizations will be issued a UEI number with the completed SAM registration.

For more detailed instructions for registering with SAM, refer to:

<https://www.grants.gov/web/grants/applicants/organization-registration/step-2-register-with-sam.html>.

Note: As a new requirement per 2 C.F.R. § 25.200, applicants must also provide the applicant's immediate and highest-level owner, subsidiaries, and predecessors that have been awarded federal contracts or federal financial assistance within the last three years, if applicable.

I. ADDITIONAL SAM REMINDERS

Existing SAM.gov account holders should check their account to make sure it is "ACTIVE." SAM registration should be completed at the very beginning of the application period and should be renewed annually to avoid being "INACTIVE." **Please allow plenty of time before the grant application submission deadline to obtain an UEI number and then to register in SAM. It may be four weeks or more after an applicant submits the SAM registration before the registration is active in SAM, and then it may be an additional 24 hours before FEMA's system recognizes the information.**

It is imperative that the information applicants provide is correct and current. Please ensure that your organization's name, address, and EIN are up to date in SAM and that the UEI number used in SAM is the same one used to apply for all other FEMA awards. Payment under any FEMA award is contingent on the recipient's having a current SAM registration.

II. HELP WITH SAM

The SAM quick start guide for new recipient registration and SAM video tutorial for new applicants are tools created by the General Services Administration (GSA) to assist those

registering with SAM. If applicants have questions or concerns about a SAM registration, please contact the Federal Support Desk at

https://www.fsd.gov/gdit_tss/?id=gdit_tss_landing or call toll free (866) 606-8220.

f. *Register in FEMA GO, Add the Organization to the System, and Establish the AOR:*

Applicants must register in FEMA GO and add their organization to the system. The organization's electronic business point of contact (EBiz POC) from the SAM registration may need to be involved in this step. For step-by-step instructions, see

<https://www.fema.gov/media-library/assets/documents/181607>.

Note: FEMA GO will support only the most recent major release of the following browsers:

- ☐ Google Chrome
- ☐ Internet Explorer
- ☐ Mozilla Firefox
- ☐ Apple Safari
- ☐ Microsoft Edge

Users who attempt to use tablet type devices or other browsers may encounter issues with using FEMA GO.

8. Submitting the Application

Applicants will be prompted to submit the standard application information and any program-specific information required as described in Section D.10 of this NOFO, "Content and Form of Application Submission." The Standard Forms (SF) may be accessed in the Forms tab under the [SF-424 family on Grants.gov](#). Applicants should review these forms before applying to ensure they have all the information required.

After submitting the final application, FEMA GO will provide either an error message or a successfully received transmission in the form of an email sent to the AOR that submitted the application. Applicants using slow internet connections, such as dial-up connections, should be aware that transmission can take some time before FEMA GO receives your application.

For additional application submission requirements, including program-specific requirements, please refer to the subsection titled "Content and Form of Application Submission" under Section D of this NOFO.

9. Timely Receipt Requirements and Proof of Timely Submission

All applications must be completed in FEMA GO by the application deadline. FEMA GO automatically records proof of timely submission and the system generates an electronic date/time stamp when FEMA GO successfully receives the application. The individual with the Authorized Organization Representative (AOR) role that submitted the application will also receive the official date/time stamp and a FEMA GO tracking number in an email serving as proof of their timely submission on the date and time that FEMA GO received the application.

Applicants who experience system-related issues will be addressed until 3:00 PM ET on Tuesday, February 27, 2024. No new system-related issues will be addressed after this deadline. Applications not received by the application submission deadline will not be accepted.

10. Content and Form of Application Submission

a. *Standard Required Application Forms and Information*

The following forms or information are required to be submitted via FEMA GO. The Standard Forms (SF) are also available at <https://www.grants.gov/web/grants/forms/sf-424-family.html>.

SF-424, Application for Federal Assistance

Grants.gov Lobbying Form, Certification Regarding Lobbying

SF-424A, Budget Information (Non-Construction)

For construction under an award, submit SF-424C, Budget Information (Construction), in addition to or instead of SF-424A

SF-424B, Standard Assurances (Non-Construction)

For construction under an award, submit SF-424D, Standard Assurances (Construction), in addition to or instead of SF-424B

SF-LLL, Disclosure of Lobbying Activities

Indirect Cost Agreement or Proposal if the budget includes indirect costs and the applicant is required to have an indirect cost rate agreement or proposal. If the applicant does not have or is not required to have an indirect cost rate agreement or proposal, please see Section D.13 of this NOFO, “Funding Restrictions and Allowable Costs,” for further information regarding allowability of indirect costs and whether alternatives to an indirect cost rate agreement or proposal might be available or contact the relevant FEMA staff identified in Section G of this NOFO, “DHS Awarding Agency Contact Information” for further instructions.

Generally, applicants have to submit either the non-construction forms (i.e., SF-424A and SF-424B) or construction forms (i.e., SF-424C and SF-424D), meaning that applicants that only have construction work and do not have any non-construction work need only submit the construction forms (i.e., SF-424C and SF-424D) and not the non-construction forms (i.e., SF-424A and SF-424B), and vice versa. However, applicants who have both construction and non-construction work under this program need to submit both the construction and non-construction forms.

b. *Program-Specific Required Forms and Information*

The following program-specific forms or information are required to be submitted in FEMA GO:

Applicants may require their subapplicants to complete and attach the grant application and/or Assurance and Certifications forms to their Capability and Capacity Building

Activities, Localized Flood Risk Reduction Project, and Individual Flood Mitigation Project subapplications in FEMA GO.

Subapplicants should contact their applicant agency for information specific to their state/territory/federally recognized Tribal government's application process. Contact information for the State Hazard Mitigation Officers is provided on the FEMA website at <https://www.fema.gov/state-hazard-mitigation-officers>.

All applicants must submit an FMA grant application via FEMA GO by the application deadline to be considered for funding. The required format for applications and subapplications is built into FEMA GO:

- FMA applications including Capability and Capacity Building Activities (Mitigation Plans, Technical Assistance by States to Communities, Project Scoping, Additional Capability and Capacity Building Activities (including Partnership Development to Conduct Eligible Mitigation Activities, Enhancing Local Floodplain Management, SRL/RL Strategy Development, and other eligible Capability and Capacity Building Activities), Localized Flood Risk Reduction Project, Individual Flood Mitigation Project, and Management Costs subapplications must be submitted in an **FY 2023 FMA application**.
 - Mitigation Plans must be submitted in a “**plan**” subapplication type.
 - Technical Assistance by States to Communities must be submitted in a “**technical assistance**” subapplication type.
 - Project Scoping must be submitted in a “**project scoping**” subapplication type.
 - Additional Capability and Capacity Building Activities must be submitted in a “**project scoping**” subapplication type.
 - Localized Flood Risk Reduction Project and Individual Flood Mitigation Project must be submitted in a “**project**” subapplication type.
 - Applicant Management Costs must be submitted in a “**management costs**” subapplication type.

I. MANAGEMENT COSTS

Applicants are eligible to receive management costs consisting of a maximum of 10% of the planning and project activities awarded to the state, each fiscal year under FMA. These costs must be included in the application to FEMA.

A federally recognized Tribal government applying directly to FEMA is eligible for management costs consisting of a maximum of 10% of grants awarded for planning and project activities under the FMA program. Subapplicants may include a maximum of 5% of the total funds requested for their subapplication for management costs to support the implementation of Capability and Capacity Building Activities, Localized Flood Risk Reduction Projects, or Individual Flood Mitigation Projects. These costs must be included in the subapplication to the Applicant.

For additional information, please refer to Section D.13.c Management Costs of this funding opportunity.

11. Other Submission Requirements

a. *Benefit-Cost Analysis (BCA) for Hazard Mitigation Projects*

Applicants and subapplicants applying for hazard mitigation projects (Localized Flood Risk Reduction Projects or Individual Flood Mitigation Projects) must provide a BCA or other documentation that validates cost-effectiveness¹⁰. Capability and Capacity Building Activities (Mitigation Plans, Technical Assistance by States to Communities, Project Scoping, Additional Capability and Capacity Building Activities [Partnership Development to Conduct Eligible Mitigation Activities, Enhancing Local Floodplain Management, SRL/RL Strategy Development, other eligible Capability and Capacity Building Activities under 42 U.S.C. 4104c(c)(3)(G)]), and management costs subapplications do not require a BCA. Applicants and subapplicants may use one of three standard approaches. In no case will FEMA award a hazard mitigation project that is not cost-effective.

- i. **Streamlined cost-effectiveness determination method:** FEMA has established streamlined cost-effectiveness determination methods for some hazard mitigation projects and project types. Using one of these methods fulfills the cost-effectiveness requirement if the project meets applicable criteria.
 - For projects with a total cost of less than \$1,000,000, the subapplicant may provide a narrative that includes qualitative and quantitative data demonstrating the benefits and cost-effectiveness of the project. Total project costs include all project costs, not just the federal share. Instructions for completing a cost-effectiveness narrative may be found in [FEMA BCA website](#). FEMA will validate the cost effectiveness and estimate a benefit cost ratio (BCR) of the proposed project during its review.
 - Pre-calculated benefits are available for some project types, including acquisitions, and elevations. Further details, including application submission requirements, may be found in the [HMA Policy and Program Guide](#) and on the [FEMA BCA website](#).
- ii. **Benefit-Cost Analysis (BCA) Assistance:** FEMA will review hazard mitigation project subapplications during the pre-award process that are competitive and otherwise eligible for selection where a small and impoverished communities as defined in 44 C.F.R. 201.2., federally recognized Tribal government, or subapplication for a hazard mitigation project within or primarily benefitting a [Community Disaster Resilience Zone](#) (defined at 42 U.S.C. § 5136(a)(1)) is unable to calculate a BCR to demonstrate cost-effectiveness. FEMA may assist such communities with developing a BCA. Projects with a total cost of less than \$1,000,000 that qualify for BCA Assistance under this provision are not required to submit a cost-effectiveness narrative. FEMA has additional guidance for this approach

¹⁰ <https://www.whitehouse.gov/omb/briefing-room/2023/08/01/accounting-for-ecosystem-services-in-benefit-cost-analysis/>

for selected subapplications that may qualify for this consideration. For more information visit the [FEMA BCA website](#).

- iii. **Benefit-Cost Analysis (BCA):** If a streamlined cost-effectiveness determination method does not apply, a BCA is required to validate cost-effectiveness. FEMA has established a set discount rate of 3% to be used in a BCA for hazard mitigation projects for the FY 2023 BRIC and FMA cycles. FEMA's BCA Toolkit is available on the FEMA website at <https://www.fema.gov/grants/tools/benefit-cost-analysis>. Version 6.0 or newer are the only versions FEMA will accept as documentation for demonstrating cost-effectiveness. FEMA encourages the use of the BCA Toolkit to calculate the project BCR; however, applicants and subapplicants may also use a non-FEMA BCA methodology if pre-approved by FEMA in writing.
- All projects not using a streamlined cost-effectiveness determination method must demonstrate a BCR of 1.0 or greater to be eligible for funding.
 - Even if a streamlined cost-effectiveness determination method applies, applicants and subapplicants may use a BCA to show cost-effectiveness of a project.

Structure acquisitions and elevations located in the Special Flood Hazard Area (SFHA) may use pre-calculated benefits to determine cost effectiveness. The updated values for use of pre-calculated benefits to determine cost effectiveness of elevations and acquisitions in the SFHA are: \$323,000 per structure for acquisitions and \$205,000 per structure for Elevations (and Mitigation Reconstruction). These pre-calculated benefits for acquisition projects are recognized as helping support BCA eligibility for larger community relocation efforts. More detailed information about pre-calculated benefits and how they can be used is available on the FEMA website at https://www.fema.gov/sites/default/files/documents/fema_acquisition-elevation-precaculated-benefits-memo_092021.pdf.

Additionally, FEMA has determined that the acquisition of a structure designated as RL or SRL¹¹, regardless of location within or outside of the SFHA, with total project costs less than or equal to \$323,000 is considered cost-effective. As such, FEMA has expanded the use of pre-calculated benefits to include acquisition projects of RL and SRL properties outside the SFHA with a project cost less than or equal to the existing calculated threshold of \$323,000. More detailed information is available on the FEMA website at <https://www.fema.gov/grants/guidance-tools/benefit-cost-analysis>.

For more information, visit the BCA webpage at <https://www.fema.gov/benefit-cost-analysis>.

b. Acquisition Project Requirements

The subrecipient must provide FEMA with a signed copy of the Statement of Voluntary Participation for each property post- award. The Statement of Voluntary Participation formally documents the Notice of Voluntary Interest and information related to the purchase offer. The

¹¹ Refer to Section E. Application Review Information, 2. Review and Selection Process, III. Individual Flood Mitigation Projects of this funding opportunity.

Statement of Voluntary Participation is available on the FEMA website at https://www.fema.gov/sites/default/files/documents/fema_form-ff-206-fy-21-124.pdf.

Subrecipients must apply deed-restriction language to all acquired properties to ensure that the property is maintained in perpetuity as open space consistent with the conservation of natural floodplain functions, as agreed to by accepting FEMA mitigation award funding. Deed-restriction language is applied to acquired properties by recording the open space and deed restrictions. The FEMA Model Deed Restriction is available at https://www.fema.gov/sites/default/files/2020-08/fema_model-deed-restriction.pdf.

Subrecipients, as well as recipients and FEMA are responsible for enforcing compliance with open space restrictions pursuant to 44 CFR Part 80 requirements.

c. *Go/No-Go Milestones*

The subapplicant, in coordination with the applicant, must identify at least one or more Go/No-Go milestones in the work schedule for a Localized Flood Risk Reduction Project that is a Phased Project. A Go/No-Go milestone is a major milestone in the project that if not completed on time may result in a cancellation of the subaward. Progress towards meeting the Go/No-Go milestones must be reported in the quarterly progress reports submitted to the recipient and FEMA. At these Go/No-Go milestones, FEMA will evaluate project performance, schedule adherence, and contribution to FEMA's program goals and objectives.

d. *National Environmental Policy Act Requirement for Hazard Mitigation Projects*

Applicants and subapplicants applying for hazard mitigation projects (Localized Flood Risk Reduction Project and/or Individual Flood Mitigation Project) must provide information needed to comply with the National Environmental Policy Act (NEPA) (42 U.S.C. §§ 4321–4370h) and the related DHS and FEMA instructions and directives (i.e., DHS Directive 023-01,¹² DHS Instruction Manual 023-01-001-01,¹³ FEMA Directive 108-1,¹⁴ and FEMA Instruction 108-1-1,¹⁵ which can be accessed at <https://www.fema.gov/emergency-managers/practitioners/environmental-historic/laws/ehp-directive-instruction>). The required information is included in the subapplication in FEMA GO. Environmental Planning and Historic Preservation (EHP) Job Aids and Supplements are available on the FEMA website at <https://www.fema.gov/grants/guidance-tools/environmental-historic>. The required information is included in the subapplication in FEMA GO.

12. Intergovernmental Review

An intergovernmental review may be required. Applicants must contact their state's Single Point of Contact (SPOC) to comply with the state's process under Executive Order 12372

¹² DHS Directive 023-01 is titled Implementation of the National Environmental Policy Act.

¹³ DHS Instruction Manual 023-01-001-01 is titled Implementation of the National Environmental Policy Act (NEPA).

¹⁴ FEMA Directive 108-1 is titled Environmental Planning and Historic Preservation Responsibilities and Program Requirements.

¹⁵ FEMA Instruction 108-1-1 is titled Instruction on Implementation of the Environmental Planning and Historic Preservation Responsibilities and Program Requirements.

(See <https://www.archives.gov/federal-register/codification/executive-order/12372.html>).

13. Funding Restrictions and Allowable Costs

All costs charged to awards covered by this NOFO must comply with the Uniform Administrative Requirements, Cost Principles, and Audit Requirements at 2 C.F.R. Part 200, unless otherwise indicated in the NOFO, or the terms and conditions of the award. This includes, among other requirements, that costs must be incurred, and products and services must be delivered, within the period of performance of the award. *See* 2 C.F.R. § 200.403(h) (referring to budget periods, which for FEMA awards is the same as the period of performance).

In general, the Cost Principles establish standards for the allowability of costs, provide detailed guidance on the cost accounting treatment of costs as direct or administrative costs, and set forth allowability principles for selected items of cost. More specifically, except as otherwise stated in this NOFO, the terms and condition of an award, or other program materials, costs charged to awards covered by this NOFO must be consistent with the Cost Principles for Federal Awards located at 2 C.F.R. Part 200, Subpart E. In order to be allowable, all costs charged to a FEMA award or applied to the cost share must be reasonable in nature and amount and allocable to the particular FEMA award.

Additionally, all costs charged to awards must comply with the grant program's applicable statutes, policies, requirements in this NOFO as well as with the terms and conditions of the award. If FEMA staff identify costs that are inconsistent with any of these requirements, these costs may be disallowed, and FEMA may recover funds as appropriate, consistent with applicable laws, regulations, and policies.

As part of those requirements, grant recipients and subrecipients may only use federal funds or funds applied to a cost share for the purposes set forth in this NOFO and the terms and conditions of the award, and those costs must be consistent with the statutory authority for the award.

Grant funds may not be used for matching funds for other federal grants/cooperative agreements, lobbying, or intervention in federal regulatory or adjudicatory proceedings. In addition, federal funds may not be used to sue the federal government or any other government entity.

Applicants should analyze the cost benefits of purchasing versus leasing equipment, especially high-cost items, and those subject to rapid technical advances. Large equipment purchases must be identified and explained. For more information regarding property management standards for equipment and federal procurement requirements, please reference 2 C.F.R. Part 200, available at https://www.ecfr.gov/cgi-bin/text-idx?tpl=/ecfrbrowse/Title02/2cfr200_main_02.tpl.

More detailed information is available in Part III, E.1, Eligible Activities, of the [2023 Hazard Mitigation Assistance Program and Policy Guide](#).

a. *Prohibitions on Expending FEMA Award Funds for Covered Telecommunications Equipment or Services*

Recipients and subrecipients of FEMA federal financial assistance are subject to the prohibitions described in section 889 of the [John S. McCain National Defense Authorization Act for Fiscal Year 2019 \(FY 2019 NDAA\)](#), Pub. L. No. 115-232 (2018) and 2 C.F.R. §§ 200.216, 200.327, 200.471, and Appendix II to 2 C.F.R. Part 200. Beginning August 13, 2020, the statute – as it applies to FEMA recipients, subrecipients, and their contractors and subcontractors – prohibits obligating or expending federal award funds on certain telecommunications and video surveillance products and contracting with certain entities for national security reasons.

Guidance is available at [FEMA Policy #405-143-1 - Prohibitions on Expending FEMA Award Funds for Covered Telecommunications Equipment or Services](#)

Additional guidance is available at [Contract Provisions Guide: Navigating Appendix II to Part 200 - Contract Provisions for Non-Federal Entity Contracts Under Federal Awards \(fema.gov\)](#).

Effective August 13, 2020, FEMA recipients and subrecipients **may not** use any FEMA funds under open or new awards to:

1. Procure or obtain any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology of any system;
2. Enter into, extend, or renew a contract to procure or obtain any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology of any system; or
3. Enter into, extend, or renew contracts with entities that use covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system.

I. DEFINITIONS

Per section 889(f)(2)-(3) of the FY 2019 NDAA and 2 C.F.R. § 200.216, covered telecommunications equipment or services means:

- i. Telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation, (or any subsidiary or affiliate of such entities);
- ii. For the purpose of public safety, security of Government facilities, physical security surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities);
- iii. Telecommunications or video surveillance services provided by such entities or using such equipment; or
- iv. Telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of National Intelligence or the Director of the Federal Bureau of

Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the People’s Republic of China.

Examples of the types of products covered by this prohibition include phones, internet, video surveillance, and cloud servers when produced, provided, or used by the entities listed in the definition of “covered telecommunications equipment or services.” *See* 2 C.F.R. § 200.471.

b. *Pre-Award Costs*

Pre-award costs directly related to developing the FMA grant application or subapplication that are incurred prior to the date of the grant award are allowed subject to FEMA approval at time of award. Such costs may have been incurred prior to application submission, for example gathering data to be used for preparing environmental reviews required by NEPA or developing a BCA (see Section D, Application and Submission Information), preparing design specifications, or conducting workshops or meetings related to development and submission of subapplications. To be eligible for FMA funding, pre-award costs must be identified in the individual line item in the cost estimate of the subapplication.

Pre-award costs may be cost shared or applicants and subapplicants may identify them as their non-federal cost share (see Section C, Eligibility Information, Cost Share or Match).

Costs associated with implementation of proposed projects in the submitted grant application or subapplication that are incurred prior to the date of the grant award are not allowed. Activities initiated or completed prior to the date of the grant award are generally not eligible.

- However, per the Hazard Eligibility and Local Projects (HELP) Act, FEMA may provide assistance for certain acquisition and demolition projects when implementation started after January 3, 2023. In order to be eligible, the project must also: (1) qualify for a categorical exclusion under NEPA; (2) be compliant with applicable floodplain management and protection of wet land regulations and criteria; and (3) not require consultation under any other environmental or historic preservation law or regulation or involve any extraordinary circumstances. An entity seeking assistance under the HELP Act must comply with all other applicable HMA and federal requirements (see [Pub. L. No. 117-332](#)).

If any pre-award activities related to developing an FMA grant application or subapplication result in ground disturbance, the applicant or subapplicant must comply with all applicable federal, state, and local laws and regulations, and obtain any applicable environmental permits and clearances. The applicant or subapplicant must ensure monitoring of ground disturbance, and if any potential archaeological resources are discovered, work will immediately cease, and the appropriate state authority will be notified.

Applicants and subapplicants who are not awarded awards or subawards will not receive reimbursement for the corresponding pre-award costs.

c. *Management Costs*

In addition to funding received as described in Section B.1, Available Funding for the funding opportunity, applicants and subapplicants are eligible to receive management costs (direct and indirect administrative costs pursuant to 2 C.F.R. Part 200, Subpart E).

Subapplicants may submit up to 5% of the total budget of the subapplication for management costs. The total budget refers to the sum of non-federal and federal cost shares of the proposed subapplication. Subapplicants must use subapplicant management costs to manage their subaward activities. Subapplicant management cost activities must be added to the Scope of Work section and identified in the Cost Estimate section of subapplications in FEMA GO¹⁶.

Applicants may submit up to 10% of the application budget (with the total budget including subapplicant management costs) for applicants to administer and manage award and subaward activities. Applicants' management costs will be calculated using the total sum of all non-federal and federal cost shares (the composite of all projects' cost share). FEMA will verify and calculate the management costs based on the applications and subapplications final selections.

Applicant requests for management costs must be submitted in a separate management costs subapplication in FEMA GO¹⁷.

The subapplicant's management costs (up to 5%) must be added to the subapplication total budget prior to the calculation of the applicant's management costs (up to 10%). Applicant management costs will not exceed 10% of the total application budget.

If the applicant is also implementing the award as the subapplicant, the applicant is allowed to claim subapplicant (up to 5%) and applicant management costs (up to 10%). Uses of the applicant management costs must be distinct from subapplicant management costs and must adhere to the stated uses, even if being used by the same entity. The total management costs still will not exceed 15% of the total award. Management costs are governed by 44 C.F.R. Part 77. Management costs are any indirect costs, any direct administrative costs, and other administrative expenses that are reasonably incurred in administering an award or subaward. Eligible applicant or subapplicant management cost activities may include:

- Solicitation, review, and processing of subapplications and subawards
- Subapplication development and technical assistance to subapplicants regarding feasibility and effectiveness and BCA
- Geocoding hazard mitigation projects identified for further review by FEMA
- Delivery of technical assistance (e.g., plan reviews, planning workshops, training) to support the implementation of hazard mitigation activities
- Managing awards (e.g., quarterly reporting including managing Go/No-Go milestones for mitigation projects, closeout)

¹⁶ Refer to Section D, Application and Submission Information, Content and Form of Application Submission of this funding opportunity.

¹⁷ Refer to Section D, Application and Submission Information, Content and Form of Application Submission of this funding opportunity.

- Technical monitoring (e.g., site visits, technical meetings)
- Purchase of equipment, per diem and travel expenses, and professional development that is directly related to the implementation of HMA programs
- Staff salary costs directly related to performing the activities listed above

d. *Indirect Facilities & Administrative (F&A) Costs*

Indirect costs of administering the FMA program are eligible as part of the 10% management costs for the recipient or the 5% management costs of the subrecipient, but in no case do they make the recipient eligible for additional management costs that exceed the regulatory caps. In addition, all costs must be in accordance with the provisions of 2 C.F.R. parts 200 and 3002.

Indirect costs are allowable under this program as described in 2 C.F.R. Part 200, including 2 C.F.R. § 200.414. Applicants with a current negotiated indirect cost rate agreement that desire to charge indirect costs to an award must provide a copy of their negotiated indirect cost rate agreement at the time of application. Not all applicants are required to have a current negotiated indirect cost rate agreement. Applicants that are not required by 2 C.F.R. Part 200 to have a negotiated indirect cost rate agreement but are required by 2 C.F.R. Part 200 to develop an indirect cost rate proposal must provide a copy of their proposal at the time of application. Applicants who do not have a current negotiated indirect cost rate agreement (including a provisional rate) and wish to charge the de minimis rate must reach out to the Grants Management Specialist for further instructions. Applicants who wish to use a cost allocation plan in lieu of an indirect cost rate must also reach out to the Grants Management for further instructions.

Subapplicants are not required to submit negotiated indirect cost rate agreements or proposals directly to FEMA, but they may need to submit them to the applicable applicants per 2 C.F.R. § 200.332.

E. Application Review Information

1. Application Evaluation Criteria

a. *Programmatic Criteria*

FEMA will review subapplications submitted by each applicant to ensure:

- Eligibility of the applicant and subapplicant;
- Eligibility of proposed activities and costs;
- Completeness of the subapplication;
- Cost-effectiveness, alternative cost-effectiveness, BCA assistance, and engineering feasibility of hazard mitigation projects; or expected savings to the National Flood Insurance Fund (NFIF) from expected avoided damages through acquisition or relocation activity;
- Eligibility and availability of non-federal cost share;

- Consistency with approved State Mitigation Plan and Local and/or Tribal Hazard Mitigation Plan;
- Conformance with all applicable federal, state, Tribal and local environmental and historic preservation laws and regulations;
- Proposed project will solve a problem independently, or constitute a functional portion of a long-term solution where there is assurance that the project as a whole will be completed; and
- Requested funds do not duplicate benefits available from another source for the same purpose or assistance that another federal agency or program has more primary authority to provide.

Subapplicants are exempt from the hazard mitigation plan requirement for the following Capability and Capacity Building Activities' Mitigation Plans. A hazard mitigation plan is required for all other Capability and Capacity Building Activities subapplications.

For more detailed information, see Part VI, Application Review Information, of the [2023 Hazard Mitigation Assistance Program and Policy Guide](#).

b. *Financial Integrity Criteria*

Prior to making a federal award, FEMA is required by 31 U.S.C. § 3354, as enacted by the Payment Integrity Information Act of 2019, Pub. L. No. 116-117 (2020); 41 U.S.C. § 2313; and 2 C.F.R. § 200.206 to review information available through any Office of Management and Budget (OMB)-designated repositories of governmentwide eligibility qualification or financial integrity information, including whether the applicant is suspended or debarred. FEMA may also pose additional questions to the applicant to aid in conducting the pre-award risk review. Therefore, application evaluation criteria may include the following risk-based considerations of the applicant:

- Financial stability.
- Quality of management systems and ability to meet management standards.
- History of performance in managing federal award.
- Reports and findings from audits.
- Ability to effectively implement statutory, regulatory, or other requirements.

c. *Supplemental Financial Integrity Criteria and Review*

Prior to making a federal award where the anticipated total federal share will be greater than the simplified acquisition threshold, currently \$250,000:

- FEMA is required to review and consider any information about the applicant, including information on the applicant's immediate and highest-level owner, subsidiaries, and predecessors¹⁸, if applicable, that is in the designated

¹⁸ As defined in 2 C.F.R. Part 25, specifically § 25.447: Predecessor means a non-federal entity that is replaced by a successor and includes any predecessors of the predecessor.

integrity and performance system accessible through the System for Award Management (SAM), which is currently the [Federal Awardee Performance and Integrity Information System](#) (FAPIIS).

- ii. An applicant, at its option, may review information in FAPIIS and comment on any information about itself that a federal awarding agency previously entered.
- iii. FEMA will consider any comments by the applicant, in addition to the other information in FAPIIS, in making a judgment about the applicant's integrity, business ethics, and record of performance under federal awards when completing the review of risk posed by applicants as described in 2 C.F.R. § 200.206.

2. Review and Selection Process

a. Selection Order

FEMA will select subapplications up to the available funding amount of **\$800 million** in the following order:

I. CAPABILITY AND CAPACITY BUILDING ACTIVITIES – UP TO \$60 MILLION

Mitigation Plans under 42 U.S.C. 4104c(c)(3)(F)

FEMA will select highest ranked eligible subapplication(s) for the development or update of a Mitigation Plan(s) of \$100,000 per applicant for mitigation plan with maximums of \$50,000 for state mitigation plans, and \$25,000 for local mitigation plans federal cost share. Mitigation Plan subapplications will be evaluated to ensure that the end result will provide benefits to the NFIP.

Technical Assistance by States to Communities (42 U.S.C. 4104c(c)(3)(J))

FEMA will select highest ranked eligible subapplication(s) for Technical Assistance by States to Communities of \$50,000 per applicant. To be eligible to receive this funding, the applicant must have received an FY 2022 FMA award of at least \$1 million federal cost share. Technical Assistance by States to Communities funding is provided to maintain a viable FMA program over time.

Project Scoping

FEMA will select the highest ranked eligible subapplication(s) for Project Scoping not to exceed \$900,000 federal cost share per subapplicant. Project Scoping can be used to obtain data and to prioritize, select, and develop future Localized Flood Risk Reduction Projects and/or Individual Flood Mitigation Projects based on current FEMA-approved mitigation plans. Project Scoping subapplications will be evaluated to ensure that the end result will lead to an eligible project subapplication that will provide benefits to the NFIP.

Consideration of Project Scoping early in the decision-making process can help facilitate the development of a viable project, as well as project implementation. FY 2023 Project Scoping projects are not eligible for FY 2023 Localized Flood Risk Reduction Project or Individual Flood Mitigation Project funding. There is no guarantee for future FMA project funding if Project Scoping is awarded.

All Project Scoping subapplications must submit a map and associated geospatial file(s) (e.g., shapefile, keyhole markup language (KML/KMZ), geodatabase, list of census tracts, or other geo-enabled documents) delineating the area that will benefit from the project. If a proposed benefiting area map is not provided, FEMA will default to the subapplicant jurisdiction to determine NFIP benefits, and CEJST for prioritization.

Additional Capability and Capacity Building Activities

FEMA will select the highest ranked eligible subapplication(s) for Additional Capability and Capacity Building Activities, not to exceed \$300,000 federal cost share per subapplicant. Additional Capability and Capacity Building Activities, which enhance the knowledge, skills, expertise, etc., of the current workforce to expand or improve the administration of flood mitigation assistance. This includes activities in the following sub-categories: Partnership Development to Conduct Eligible Mitigation Activities, Enhancing Local Floodplain Management, SRL/RL Strategy Development, and other eligible Capability and Capacity Building Activities under 42 U.S.C. 4104c(c)(3)(G).

All Additional Capability and Capacity Building Activities subapplications must submit a map and associated geospatial file(s) (e.g., shapefile, keyhole markup language (KML/KMZ), geodatabase, list of census tracts, or other geo-enabled documents) delineating the area that will benefit from the project. If a proposed benefiting area map is not provided, FEMA will default to the subapplicant jurisdiction to determine NFIP benefits, and CEJST for prioritization.

Please note, Mitigation Plans, Technical Assistance by States to Communities, Project Scoping, and Additional Capability and Capacity Building Activities subapplications have different funding caps indicated above.

a) CAPABILITY AND CAPACITY BUILDING ACTIVITIES PRIORITIZATION

All eligible Mitigation Plans and Technical Assistance by States to Communities subapplications will be funded based on eligibility.

FEMA will then select the remaining highest ranked eligible Capability and Capacity Building Activities subapplication(s) from each applicant according to the following hierarchical order: Project Scoping, and then Additional Capability and Capacity Building Activities (Partnership Development to Conduct Eligible Mitigation Activities; Enhancing Local Floodplain Management; SRL/RL Strategy Development; and other eligible Capability and Capacity Building Activities under 42 U.S.C. 4104c(c)(3)(G).

All Project Scoping and Additional Capability and Capacity Building Activities subapplications will be scored and selected based on the priorities in the following table,

as needed. The subapplications will be selected based on cumulative score, from highest to lowest.

Final Priority Scoring Criteria for Capability and Capacity Building Activities		
Priority	Description	Available Points
Justice40 Community or Community Disaster Resilience Zones	<p>A Justice40 community, also referred as a disadvantaged community, is identified using the version 1.0 of the Climate and Economic Justice Screening Tool (CEJST). Justice40 communities are considered disadvantaged if they are in census tracts that meet the thresholds for at least one of the tool’s categories of burden, or if they are on lands within the boundaries of federally recognized Tribes. In addition, census tracts that are completely surrounded by disadvantaged communities are also considered disadvantaged if they meet an adjusted low-income threshold (at or above the 50th percentile). Justice40 communities have been marginalized by society, overburdened by pollution, and/or underserved by infrastructure and other basic services. Further, all federally recognized Tribes or Tribal entities are Justice40 communities (whether or not they have land).</p> <p>A Community Disaster Resilience Zone is defined in 42 U.S.C. § 5136(a)(1) and all Community Disaster Resilience Zone are located in Justice40 communities. For a complete listing of FEMA identified Community Disaster Resilience Zones, refer to https://www.fema.gov/flood-maps/products-tools/national-risk-index/community-disaster-resilience-zones</p> <p>Subapplications will receive 8 points if the C&CB Activities primarily benefits a Community Disaster Resilience Zone.</p> <p>OR</p> <p>Subapplications will receive 6 points if the C&CB Activities primarily benefits a Justice40 community. Full and partial points are assigned to this category.</p>	Up to 8

Community Rating System (CRS) Participation	<p>The CRS recognizes and encourages community floodplain-management activities that exceed the minimum National Flood Insurance Program standards. Depending on the level of participation, flood insurance premium rates for policyholders can be reduced by up to 45%.</p> <p>Subapplications will receive 3 points if they are a participant in CRS. No partial points are assigned to this category.</p>	3
Cooperating Technical Assistance Partners Program (CTP) Participation	<p>The CTP is a qualified partnership program in which communities commit to collaborate in maintaining up-to-date flood hazard maps and other flood hazard information.</p> <p>Subapplications will receive 3 points if they are a CTP participating community. No partial points are assigned to this category.</p>	3
Public and Private-Sector Partnerships	<p>FEMA encourages innovative use of public and private-sector partnerships, including incentivizing private organizations and businesses that partner with public organization to meet the non-federal cost share.</p> <p>Subapplication will receive 2 points if the subapplication incorporates partnerships (e.g., state, Tribal, private, local community, etc.) that will ensure the project meets community needs, including those of overburdened and underserved populations, and show the outcome of those partnerships (e.g., leveraging resources such as financial, material, and educational resources, coordinating multi-jurisdictional projects, heightened focus on equity related issues, etc). No partial points are assigned to this category.</p>	2

In case of a tie, FEMA will use CEJST, Community Disaster Resilience Zone, or the total dollars in NFIP claims paid in the subapplicant's jurisdiction in the past 5 years as a tiebreaker for projects.

After meeting the **\$60 million** available for Capability and Capacity Building Activities, or when all eligible Capability and Capacity Building Activities subapplications have been selected, FEMA will select eligible subapplications for the remaining funds in the following order.

II. LOCALIZED FLOOD RISK REDUCTION PROJECT – UP TO \$520 MILLION

FEMA will then select the highest ranked eligible Localized Flood Risk Reduction Project subapplication(s) based on the FEMA scoring criteria below. In the event of a tie between two or more Localized Flood Risk Reduction Project subapplications, FEMA will use CEJST,

Community Disaster Resilience Zone, or the total dollars in NFIP claims paid in the subapplicant's jurisdiction in the past 5 years for the project benefiting area as a tiebreaker for projects. Each subapplication shall not exceed **\$50 million** federal cost share.

FEMA will convene an internal review panel to ensure that projects will provide benefits to the NFIP, in accordance with 44 C.F.R. Part 77 and the [2023 Hazard Mitigation Assistance Program and Policy Guide](#). The Localized Flood Risk Reduction Project internal review panel will include experts from across FEMA to broaden understanding of project benefits. Panelists will consider Localized Flood Risk Reduction Project subapplications holistically to determine if the projects will provide benefits to the NFIP, including but not limited to, the context of the project scale, community scale, transformative mitigation potential, and alignment with the Administration's Justice40 Initiative.

All Localized Flood Risk Reduction Project subapplications must include the following elements:

- Demonstrate that the proposed project benefits NFIP insured properties by submitting a map and associated geospatial file(s) (e.g., shapefile, Keyhole Markup Language (KML/KMZ), geodatabase, list of census tracts, or other geo-enabled documents) delineating:
 - The proposed project location or footprint boundary,
 - Area with reduced flood risk or benefiting area (in alignment with Hydrologic and Hydraulic modeling, as available, except for Phase 1 projects), and
 - Active NFIP policies (if data is available).

Eligible activities must benefit NFIP insured properties. Examples include, but are not limited to:

- Localized flood control
- Floodwater storage and diversion
- Floodplain and stream restoration
- Stormwater management
- Wetland restoration/creation

Subapplications will be scored and selected based on the priorities in the following table, as needed. The subapplications will be selected based on cumulative score, from highest to lowest.

Final Priority Scoring Criteria for Localized Flood Risk Reduction Project		
Priority	Description	Available Points

<p>Justice40 Community or Community Disaster Resilience Zones</p>	<p>A Justice40 community, also referred as a disadvantaged community, is identified using the version 1.0 of the Climate and Economic Justice Screening Tool (CEJST). Justice40 communities are considered disadvantaged if they are in census tracts that meet the thresholds for at least one of the tool’s categories of burden, or if they are on lands within the boundaries of federally recognized Tribes. In addition, census tracts that are completely surrounded by disadvantaged communities are also considered disadvantaged if they meet an adjusted low-income threshold (at or above the 50th percentile). Justice40 communities have been marginalized by society, overburdened by pollution, and/or underserved by infrastructure and other basic services. Further, all federally recognized Tribes or Tribal entities are Justice40 communities (whether or not they have land).</p> <p>A Community Disaster Resilience Zone is defined in 42U.S.C. § 5136(a)(1) and all Community Disaster Resilience Zone are located in Justice40 communities. For a complete listing of FEMA identified Community Disaster Resilience Zones, refer to https://www.fema.gov/flood-maps/products-tools/national-risk-index/community-disaster-resilience-zones</p> <p>Subapplications that primarily benefits a Community Disaster Resilience Zone, will receive 300 points.</p> <p>OR</p> <p>Subapplications that primarily benefits a Justice40 community, will receive 200 points. Full and partial points are assigned to this category.</p>	<p>Up to 300</p>
---	--	------------------

National Flood Insurance Program (NFIP) Policy Holder	<p>NFIP provides insurance to help reduce the socio-economic impact of floods. Flood insurance is a separate policy that can cover buildings, the contents in a building, or both. The NFIP provides flood insurance to property owners, renters, and businesses, and having this coverage helps them recover faster when floodwaters recede.</p> <p>Points will be assessed for every NFIP policy that is active as of the FMA application start date (Section D, Application and Submission Information, Key Dates and Times of this funding opportunity) and is verified within the benefiting area of the project. Full and partial points are assigned to this category.</p>	2 points per NFIP Policy, up to 200 points
FMA and NFIP defined Severe Repetitive Loss (SRL) and Repetitive Loss (RL) Properties ¹⁹	<p>FMA aims to implement projects that reduce flood risks posed to repetitively flooded properties insured under the NFIP, and the disruption to life caused by repeated flooding of the same properties.</p> <p>Points will be assessed for all FMA and NFIP defined SRL and/or RL structures verified within the benefiting area of the project. Full and partial points are assigned to this category.</p>	5 points per RL and 10 points per SRL, up to 175 points

¹⁹ Refer to Section E. Application Review Information, 2. Review and Selection Process, III. Individual Flood Mitigation Projects of this funding opportunity.

<p>Consideration for Climate Change²⁰ and Other Future Conditions</p>	<p>FEMA works with state, local, Tribal, and territorial governments to build and deliver resources and capabilities that ensure the nation can withstand climate hazards of today and those we anticipate for tomorrow.²¹ Applicants and subapplicants should use evidence-based, best-available climate data sets, information resources, and decision-support tools, including Federal resources, to identify current and future climate risks over the project’s expected service life. Climate projections, emission scenarios, or other suitable scenario conditions should be specified based on the project’s service life and applicant’s risk tolerance, as appropriate and available. Applicants should document how their planned project design and operations are resilient to any identified current and future climate risks.</p> <p>Subapplications will receive 100 points if the project describes how it will enhance climate adaptation and resilience using the best available data, detail how the project is being responsive to the effects of climate change (such as sea level rise²², increased rainfall, increased likelihood of flash flood due to wildfire, etc.) and/or other future conditions (population/demographic/land use, etc.), and cites data sources, assumptions, and models. No partial points are assigned to this category.</p>	<p>100</p>
--	--	------------

²⁰ Climate change is defined as “Changes in average weather conditions that persist over multiple decades or longer. Climate change encompasses both increases and decreases in temperature, as well as shifts in precipitation, changing risk of certain types of severe weather events, and changes to other features of the climate system.” (Fourth National Climate Assessment)

²¹ For more information on FEMA’s Role in Addressing Climate Change, please reference [FEMA and the Changing Climate.pdf](#)

²² Applicants and subapplicants may use any valid source that is based on recognized sea level rise estimation methods for sea level rise. Several federal government sources are available for relative sea level rise data along coastal areas. Some of these sources include, but are not limited to National Oceanic and Atmospheric Administration Center for Operational Oceanographic Products and Services’ Mean Annual SLR Trend Data (<https://tidesandcurrents.noaa.gov/sltrends/sltrends.html>) and U.S. Army Corps of Engineers Sea-Level Change Curve Calculator (Version 2022.72) (https://cwbi-app.sec.usace.army.mil/rccslc/slcc_calc.html). Additional information, data, and resources on sea level rise are available at [Sea Level Rise Technical Report: Download and FAQs \(noaa.gov\)](#).

Incorporation of Nature-Based Solutions ²³	<p>Nature-based solutions are actions to protect, sustainably manage, or restore natural or modified ecosystems to address societal challenges, simultaneously providing benefits for people and the environment. Refer to https://www.whitehouse.gov/wp-content/uploads/2022/11/Nature-Based-Solutions-Roadmap.pdf</p> <p>FEMA recognizes that strategies for nature-based solutions are diverse; one size does not fit all. As such, examples of nature-based solutions may include wetland restoration and protection; greenways; stormwater parks; floodplain restoration; rain gardens; green roofs; permeable pavement; coastal wetlands; and living shorelines.</p> <p>Subapplications will receive 100 points if the project incorporates nature-based solutions. No partial points are assigned to this category.</p>	100
FEMA FMA Capability and Capacity Building (C&CB) Activities	<p>FMA C&CB Activities are used to develop future Localized Flood Risk Reduction Projects and/or Individual Flood Mitigation Projects that will subsequently reduce flood claims against the NFIP. Before FY 2022 FMA NOFO, C&CB Activities were referred to as hazard mitigation plans, technical assistance, and project scoping.</p> <p>Subapplications will receive 50 points if the project was generated from a previous FMA award. No partial points are assigned to this category.</p>	50

²³ For more information on nature-based solutions, please reference Building Community Resilience with Nature-Based Solutions: A Guide for Local Communities and [Nature-Based Solutions | FEMA.gov](#)

Public and Private-Sector Partnerships	<p>FEMA encourages innovative use of public and private-sector partnerships, including incentivizing private organizations and businesses that partner with public organization to meet the non-federal cost share.</p> <p>Subapplication will receive 25 points if the subapplication incorporates partnerships (e.g., state, Tribal, private, local community, etc.) that will ensure the project meets community needs, including those of overburdened and underserved populations, and show the outcome of those partnerships (e.g., leveraging resources such as financial, material, and educational resources, coordinating multi-jurisdictional projects, heightened focus on equity related issues, etc.). No partial points are assigned to this category.</p>	25
Community Rating System (CRS) Participation	<p>The CRS recognizes and encourages community floodplain-management activities that exceed the minimum National Flood Insurance Program standards. Depending on the level of participation, flood insurance premium rates for policyholders can be reduced up to 45%.</p> <p>Subapplications will receive 25 points if they are a participate in CRS. No partial points are assigned to this category.</p>	25
Cooperating Technical Assistance Partners Program (CTP) Participation	<p>The CTP is a qualified partnership program in which communities commit to collaborate in maintaining up-to-date flood hazard maps and other flood hazard information.</p> <p>Subapplications will receive 25 points if they are a CTP participating community. No partial points are assigned to this category.</p>	25

After meeting the **\$520 million** available for Localized Flood Risk Reduction Projects or when all eligible Localized Flood Risk Reduction Project subapplications have been selected, FEMA will select eligible subapplications for the remaining funds in the following order.

III. INDIVIDUAL FLOOD MITIGATION PROJECT – UP TO \$220 MILLION

FEMA will then select Individual Flood Mitigation Project subapplication(s) based on projects meeting the below FEMA scoring criteria. FEMA will select eligible Individual Flood Mitigation Project subapplications on a competitive basis in the following prioritized order:

Individual Flood Mitigation Projects that will mitigate flood damage to at least 75 percent of structures included in the subapplication that meet **ANY** of the following FMA and/or NFIP SRL and RL definitions in order by program priority:

1. Meet the FMA definition of an SRL property in 42 U.S.C. § 4104c(h)(3)(B)(ii): At least two separate NFIP claim payments have been made with the cumulative amount of such claims exceeding the market value of the insured structure.
2. Meet the FMA definition of an SRL property in 42 U.S.C. § 4104c(h)(3)(B)(i): four or more separate NFIP claims payments have been made with the amount of each claim exceeding \$5,000, and with the cumulative amount of claims payments exceeding \$20,000.
3. Meet the FMA definition of a RL property definition in 42 U.S.C. § 4121(a)(7): have incurred flood-related damage on two occasions, in which the cost of the repair, on the average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event, and at the time of the second incidence of flood-related damage, the contract for flood insurance contains increased cost of compliance coverage.
4. Meet NFIP definition of an SRL property²⁴: four or more separate NFIP claim payments of more than \$5,000 each (including building and contents payments); or two or more separate claim payments (building payments only) where the total of the payments exceeds the current market value of the property.
5. Meet the NFIP definition of an RL property in Title 44 C.F.R. Part § 209.2: a structure covered by a contract for flood insurance under the National Flood Insurance Program (NFIP) that has incurred flood-related damage on two occasions during a 10-year period, each resulting in at least a \$1,000 claim payment.

In the event requested funding exceeds **\$220 million** funding for this priority, FEMA will prioritize subapplications based on:

- Count of properties meeting FMA and/or NFIP defined SRL and RL definitions in order by program priority (1-5) above, and
- Total dollars of all NFIP policy claims on record for all NFIP properties proposed for mitigation in the subapplication.

FEMA may rank subapplications lower where the average elevation federal cost share is greater than \$250,000 for all single dwelling units or the average acquisition federal cost share is greater than \$750,000 for all single dwelling units.

FEMA will further prioritize properties from subapplications if the building value of a single-family dwelling is less than \$750,000, according to best available data, to ensure maximization of the number of NFIP-insured properties selected for mitigation projects in

²⁴ For the NFIP definition of an SRL property, refer to 42 U.S.C. § 4014(h); see FEMA, National Flood Insurance Program, Flood Insurance Manual, Appendix I, pg. 1, and Appendix L, pg. 8 (Apr. 2021); FEMA, National Flood Insurance Program, Community Rating System Coordinator's Manual, pg. 120-8 (2017).

accordance with 44 C.F.R. § 77.4(a). To determine the building value of a single-family dwelling, homeowners can refer to the Replacement Cost Value (RCV)²⁵ documented in the most recent claim. If no RCV is provided, then homeowners can refer to the Actual Cash Value (ACV)²⁶ as documented on the most recent claim. If an RCV or ACV for the structure is not available or includes errors, FEMA will evaluate properties on a case-by-case basis for removal from the subapplication.

If the structure does not have an RCV, then FEMA will consider the Actual Cash Value (ACV) of the structure, as listed on the most current claim of the property. If the structure has neither RCV nor ACV, FEMA will consider the assessed market value.

If available funding requires prioritization within one of the above priorities, FEMA will apply the Final Priority Scoring Criteria for Individual Mitigation Project below. FEMA may reconsider Single-family dwellings that are not selected.

IV. FEMA WILL SELECT REMAINING ELIGIBLE SUBAPPLICATIONS ONCE ALL ABOVE PRIORITIES ARE MET BASED ON BENEFITS TO THE NFIP.

FEMA will verify project eligibility. However, applicants should ensure that accurate NFIP policy numbers, and FMA and/or NFIP defined SRL and RL numbers are included in all subapplications. After FEMA selects all subapplications in prioritized order above, FEMA will use the Final Priority Scoring Criteria below to determine the selection order for the remaining subapplications. The subapplications will be selected based on cumulative score, from highest to lowest.

Final Priority Scoring Criteria for Individual Flood Mitigation Project		
Priority	Description	Available Points
Substantial Damage ²⁷	Substantial damage applies to a structure in a Special Flood Hazard Area – or floodplain – for which the total cost of repairs is 50 percent or more of the structure’s market value before the disaster occurred, regardless of the cause of damage. This percentage rule can vary among jurisdictions. The decision about a structure being substantially damaged is made at the local community generally by a building-department official or floodplain manager. For communities that participate in the National Flood Insurance Program (NFIP), substantial damage determinations generally are required by local floodplain-management ordinances. These rules must be	10 points per Substantial Damage structure, no cap

²⁵ The cost to replace property with the same kind of material and construction without deduction for depreciation.

²⁶ The cost to replace an insured item of property at the time of loss, less the value of its physical depreciation.

²⁷ Damage of any origin sustained by a building whereby the cost of restoring the building to its before-damaged condition would equal or exceed 50 percent of the market value of the building before the damage occurred. (Hazard Mitigation Assistance Program and Policy Guide, 2023)

	<p>in place for residents of a community to purchase flood insurance.</p> <p>The subapplication will receive 10 points per structure that is determined Substantially Damaged by the community within five (5) years of the Application Submission Deadline and a verification letter is included in the subapplication. Full points are assigned to this category and there is no point cap/limit.</p>	
Justice40 Community or Community Disaster Resilience Zones	<p>A Justice40 community, also referred as a disadvantaged community, is identified using the version 1.0 of the Climate and Economic Justice Screening Tool (CEJST). Justice40 communities are considered disadvantaged if they are in census tracts that meet the thresholds for at least one of the tool's categories of burden, or if they are on lands within the boundaries of federally recognized Tribes. In addition, census tracts that are completely surrounded by disadvantaged communities are also considered disadvantaged if they meet an adjusted low-income threshold (at or above the 50th percentile). Justice40 communities have been marginalized by society, overburdened by pollution, and/or underserved by infrastructure and other basic services. Further, all federally recognized Tribes or Tribal entities are Justice40 communities (whether or not they have land).</p> <p>A Community Disaster Resilience Zone is defined in 42 U.S.C. § 5136(a)(1), and all Community Disaster Resilience Zone are located in Justice40 communities. For a complete listing of FEMA identified Community Disaster Resilience Zones, refer to https://www.fema.gov/flood-maps/products-tools/national-risk-index/community-disaster-resilience-zones</p> <p>Subapplications that primarily benefits a Community Disaster Resilience Zone will receive 50 points.</p> <p>OR</p> <p>Subapplications that primarily benefits a Justice40 community will receive 35 points. Full and partial points are assigned to this category.</p>	Up to 50 points
FMA and NFIP defined Severe Repetitive Loss	FMA aims to implement projects that reduce flood risks posed to repetitively flooded properties insured under the National Flood Insurance Program (NFIP), and the	Up to 30

(SRL) and Repetitive Loss (RL) Properties ²⁸	<p>disruption to life caused by repeated flooding of the same properties.</p> <p>Points will be assessed for FMA and NFIP defined SRL and/or RL structures verified within the subapplication. Full and partial points are assigned to this category.</p> <ul style="list-style-type: none"> • If greater than 35% of properties in the subapplication are SRL or RL, the subapplication will receive 30 points, or • If 25% - 35% of properties in the subapplication are SRL and/or RL, the subapplication will receive 15 points. 	
FEMA FMA Capability and Capacity Building (C&CB) Activities	<p>FMA C&CB Activities are used to develop future Localized Flood Risk Reduction Projects and/or Individual Flood Mitigation Projects that will subsequently reduce flood claims against the NFIP. Before FY 2022 FMA NOFO, C&CB Activities were referred to as hazard mitigation plans, technical assistance, and project scoping.</p> <p>Subapplications will receive 20 points if the project was generated from a previous FMA award. No partial points are assigned to this category.</p>	20

FEMA may select any subapplication out of priority order based on one or more of the following factors:

- Availability of funding
- Duplication of subapplications
- Program priorities and policy factors
- Other pertinent information

Subapplications that have made it through the selections process but will not be funded due to the limited availability of FMA funding, may be reviewed by other FEMA grant programs for eligibility and alternative funding. Additional information may be requested to ensure all applicable programmatic eligibility criteria are met.

b. Selection Status

After FEMA has completed its review of all subapplications across Capability and Capacity Building Activities, Localized Flood Risk Reduction Project, and Individual Flood Mitigation Project, FEMA will assign each of them one of the following three statuses:

²⁸ Refer to Section E. Application Review Information, 2. Review and Selection Process, III. Individual Flood Mitigation Projects of this funding opportunity.

- **Identified for Further Review (IFFR)** – This means the subapplication is selected and there is available funding under the applicable subtotals. Additional information may be requested from the applicant at this stage that may impact eligibility. Identified for Further Review (IFFR) status does not automatically imply an award will be made.
- **Not Selected** – This means the subapplication is eligible but was not selected due to a lack of available funding under the applicable subtotals.
- **Does Not Meet HMA Requirements** – This means the subapplication does not satisfy the eligibility or completeness requirements outlined in the statute, policy, or Section C.3.

c. ***Request for Reconsideration***

At its discretion, and at the request of the applicant or subapplicant (through the applicant), FEMA may reconsider a decision regarding any subapplication that is Not Selected or Does Not Meet HMA Requirements only where there is an indication of substantive technical or procedural error that may have influenced FEMA’s decision. There will be no reconsideration regarding the amount of planning subapplications, applicant management costs, or Technical Assistance costs. Applicants must send requests for reconsideration based on technical or procedural error to the FEMA Regional Office within 60 days of the posting of subapplication status. Subapplicants should contact their applicant agency regarding reconsideration requests, so that the applicant may submit it to the FEMA Regional Office on their behalf. Contact information for each State Hazard Mitigation Officer is provided at [State Hazard Mitigation Officers | FEMA.gov](#).

The FEMA Regional Office will review reconsideration requests received from applicants and submit the Regional recommendation to FEMA Headquarters. FEMA Headquarters will make a final determination to overturn or uphold the original decision and send the response to the applicant.

Prior to making an award, FEMA will evaluate recipients to determine the level of risk when there is a history of failure to comply with general or specific terms and conditions of a federal award or failure to meet the expected performance goals. If FEMA determines that a federal award will be made, special conditions that correspond to the degree of risk assessed may be applied to the award, as specified in Part 8: Award Administrative Requirements, Section C: Assessment of Risk Posed by Recipient and Subrecipient Prior to Award of the [2023 Hazard Mitigation Assistance Program and Policy Guide](#).

F. Federal Award Administration Information

1. Notice of Award

Before accepting the award, the AOR and recipient should carefully read the award package. The award package includes instructions on administering the grant award and the terms and conditions associated with responsibilities under federal awards. **Recipients must accept all**

conditions in this NOFO as well as any specific terms and conditions in the Notice of Award to receive an award under this program.

FEMA will provide the federal award package to the applicant electronically via FEMA GO. Award packages include an Award Letter, Summary Award Memo, Agreement Articles, and Obligating Document. An email notification of the award package will be sent through FEMA's grant application system to the Authorized Organization Representative (AOR) that submitted the application.

Recipients must accept their awards no later than 30 days from the award date. The recipient shall notify FEMA of its intent to accept and proceed with work under the award through the FEMA GO system.

Funds will remain on hold until the recipient accepts the award through the FEMA GO system and all other conditions of the award have been satisfied or until the award is otherwise rescinded. Failure to accept a grant award within the specified timeframe may result in a loss of funds.

When FEMA obligates funds for a grant to an applicant, the applicant and subapplicant are denoted as recipient and subrecipient, respectively. The recipient and subrecipient agree to abide by the grant award term and conditions as set forth in the Articles of Agreement provided in the award package. Recipients must accept all conditions in this NOFO as well as any Special Terms and Conditions.

FEMA or DHS may initiate a formal evaluation of programs, projects, or activities supported by this grant. By accepting grant funds, recipients agree to participate in the evaluation, which may include analysis of individuals who benefit from the grant (such as property owners), and providing access to program operating personnel and participants, as specified by the evaluator(s), including after the POP.

2. Administrative and National Policy Requirements

In addition to the requirements of in this section and in this NOFO, FEMA may place specific terms and conditions on individual awards in accordance with 2 C.F.R. Part 200.

a. *DHS Standard Terms and Conditions*

All successful applicants for DHS grant and cooperative agreements are required to comply with DHS Standard Terms and Conditions, which are available online at: [DHS Standard Terms and Conditions](#).

The applicable DHS Standard Terms and Conditions will be those in effect at the time the award was made. What terms and conditions will apply for the award will be clearly stated in the award package at the time of award.

b. *Ensuring the Protection of Civil Rights*

As the Nation works towards achieving the [National Preparedness Goal](#), it is important to continue to protect the civil rights of individuals. Recipients and subrecipients must carry out their programs and activities, including those related to the building, sustainment, and delivery of core capabilities, in a manner that respects and ensures the protection of civil rights for protected populations.

Federal civil rights statutes, such as Section 504 of the Rehabilitation Act of 1973 and Title VI of the Civil Rights Act of 1964, along with DHS and FEMA regulations, prohibit discrimination on the basis of race, color, national origin, sex, religion, age, disability, limited English proficiency, or economic status in connection with programs and activities receiving [federal financial assistance](#) from FEMA.

The DHS Standard Terms and Conditions include a fuller list of the civil rights provisions that apply to recipients. These terms and conditions can be found in the [DHS Standard Terms and Conditions](#). Additional information on civil rights provisions is available at <https://www.fema.gov/about/offices/equal-rights/civil-rights>.

Monitoring and oversight requirements in connection with recipient compliance with federal civil rights laws are also authorized pursuant to 44 C.F.R. Part 7.

In accordance with civil rights laws and regulations, recipients and subrecipients must ensure the consistent and systematic fair, just, and impartial treatment of all individuals, including individuals who belong to underserved communities that have been denied such treatment.

c. *Environmental Planning and Historic Preservation (EHP) Compliance*

As a federal agency, FEMA is required to consider the effects of its actions on the environment and historic properties to ensure that all activities and programs funded by FEMA, including grant-funded projects, comply with federal EHP laws, Executive Orders (EO), regulations, and policies, as applicable.

All FEMA actions, including grant-funded actions, must comply with National Flood Insurance Program criteria or any more restrictive federal, state, or local floodplain management standards or building code (44 CFR § 9.11(d)(6)).

All FEMA-funded non-critical actions in 1% annual chance floodplains (also known as 100-year floodplains) that involve structure elevation, mitigation reconstruction, dry floodproofing, new construction, repair of substantial damage or substantial improvement of structures must be elevated or floodproofed, at a minimum, to the lower of:

- Two feet above the 1% annual chance flood elevation (also known as the base flood elevation), in accordance with the Federal Flood Risk Management Standard (FFRMS) “Freeboard Value Approach” (FVA); or
- The 0.2% annual chance flood elevation. Where 0.2% annual chance flood elevations are not available, such actions must be elevated to at least two feet above the 1% annual chance flood elevation.

All FEMA-funded critical actions in 1% annual chance floodplains or 0.2% annual chance floodplains (also known as 500-year floodplains) that involve structure elevation, mitigation reconstruction, dry floodproofing, new construction, repair of substantial damage or substantial improvement of structures must be elevated, at a minimum, to the higher of:

- Three feet above the 1% annual chance flood elevation; or
- The 0.2% annual chance flood elevation. Where 0.2% annual chance flood elevations are not available, such actions must be elevated to at least three feet above the 1% annual chance flood elevation.

See Executive Order 11988, *Floodplain Management*, as amended by Executive Order 13690, *Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input*, and the [2023 Hazard Mitigation Assistance Program and Policy Guide](#)

Recipients and subrecipients proposing projects that have the potential to impact the environment, including, but not limited to, the construction of communication towers, modification or renovation of existing buildings, structures, and facilities, or new construction including replacement of facilities, must participate in the FEMA EHP review process. The EHP review process involves the submission of a detailed project description along with any supporting documentation requested by FEMA in order to determine whether the proposed project has the potential to impact environmental resources or historic properties.

In some cases, FEMA is also required to consult with other regulatory agencies and the public in order to complete the review process. Federal law requires EHP review to be completed before federal funds are released to carry out proposed projects. FEMA may not be able to fund projects that are not in compliance with applicable EHP laws, regulations, Executive Orders, and policies.

DHS and FEMA EHP policy is found in directives and instructions available on the [FEMA.gov EHP page](#), the FEMA website page that includes documents regarding EHP responsibilities and program requirements, including implementation of the National Environmental Policy Act and other EHP laws, regulations and Executive Orders. Individual FEMA programs have separate procedures to conduct and document EHP review. Guidance for individual grant programs is available from applicable program offices.

Presidential EO 11988 and EO 11990: Protection of Wetlands require that all federal actions in or affecting the floodplain or wetlands be reviewed for opportunities to relocate, and be evaluated for social, economic, historical, environmental, legal and safety considerations. FEMA's regulations at 44 C.F.R. Part 9 implement the EOs and require an 8-step review process if a proposed action is located in a floodplain or wetland consistent with 44 C.F.R. § 9.6.

The regulation also requires that the federal agency provide public notice of the proposed action at the earliest possible time to provide the opportunity for public involvement in the decision-making process (44 C.F.R. § 9.8). Where there is no opportunity to relocate the

federal action, FEMA is required to undertake a detailed review to determine what measures can be taken to minimize future damages to the floodplain or wetland.

Through this NOFO, FEMA is giving notice of projects that may be funded under the FMA program, consistent with the requirements of Section 9.8. The public is invited to participate in the process of identifying alternatives to locating a proposed project in the floodplain or wetland and analyzing the impacts of the alternatives on the floodplain or wetland. Comments may be provided by emailing ehphelpline@fema.dhs.gov within 15 days of its issuance. While analyzing alternatives, FEMA may determine there are no practicable alternatives to carrying out the proposed work within the floodplain or wetland. Relocating facilities may not be practicable and would adversely impact affected communities socially and economically.

In addition, no alternative actions may be practicable that serve the same purpose and have less potential to affect or be affected by the floodplain. The no action option would not be appropriate as it would fail to meet the purpose and need of the community. In the course of developing project proposals, subsequent public notices will be published, if necessary, as more specific information becomes available.

d. Construction Project Requirements

Acceptance of federal funding requires FEMA, the recipient, and any subrecipients to comply with all federal, state, and local laws and regulations prior to the start of any construction activity. Failure to obtain all appropriate federal, state, and local environmental permits and clearances may jeopardize federal funding. Also:

- Any change to the approved scope of work will require re-evaluation by FEMA for compliance with the NEPA and other laws and Executive Orders.
- If ground-disturbing activities occur during construction, the recipient and any subrecipients must ensure monitoring of ground disturbance, and if any potential archaeological resources are discovered, the subrecipient will immediately cease construction in that area and notify the recipient and FEMA.
 - All mitigation projects must be in in conformance with flood insurance requirements. This means that if the project is located in a SFHA: (a) the project must be in a jurisdiction participating in the NFIP; and (b) the property owner(s) must obtain and maintain flood insurance for the life of the structure, regardless of transfer of ownership, in an amount at least equal to the project cost or to the maximum limit of coverage made available with respect to the mitigated property, whichever is less.

3. Reporting

Recipients are required to submit various financial and programmatic reports as a condition of award acceptance. Future awards and funds drawdown may be withheld if these reports are delinquent.

a. *Financial Reporting Requirements*

I. FEDERAL FINANCIAL REPORT (FFR)

Recipients must report obligations and expenditures through the FFR form (SF-425) to FEMA.

Recipients may review the Federal Financial Reporting Form (FFR) (SF-425) at <https://www.grants.gov/web/grants/forms/post-award-reporting-forms.html#sortby=1>.

Recipients must file the FFR electronically using FEMA GO.

II. FFR REPORTING PERIODS AND DUE DATES

An FFR must be submitted quarterly throughout the POP, including partial calendar quarters, as well as in periods where no grant award activity occurs. The final FFR is due within 120 calendar days after the end of the POP. Future awards and fund drawdowns may be withheld if these reports are delinquent, demonstrate lack of progress, or are insufficient in detail.

Except for the final FFR due at 120 days after the end of the POP for purposes of closeout, the following reporting periods and due dates apply for the FFR:

Reporting Period	Report Due Date
October 1 – December 31	January 30
January 1 – March 31	April 30
April 1 – June 30	July 30
July 1 – September 30	October 30

b. *Programmatic Performance Reporting Requirements*

I. PERFORMANCE PROGRESS REPORT (PPR)

In addition to the FFR reports, recipients must report on the progress of the grant on a quarterly basis to DHS/FEMA using the Quarterly Performance Report in FEMA GO. The Quarterly Performance Reports must be submitted electronically in FEMA GO quarterly throughout the POP, including partial calendar quarters, as well as for periods where no grant award activity occurs. Reports are due within 30 days from the end of the first federal quarter following the initial grant award and thereafter until the grant ends.

c. *Closeout Reporting Requirements*

I. CLOSEOUT REPORTING

Within 120 calendar days after the end of the period of performance for the prime award or after an amendment has been issued to close out an award before the original POP ends, recipients must liquidate all financial obligations and must submit the following:

- i. The final request for payment, if applicable.
- ii. The final FFR (SF-425).
- iii. The final progress report detailing all accomplishments, including a narrative summary of the impact of those accomplishments throughout the period of performance.
- iv. Other documents required by this NOFO, terms and conditions of the award, or other FEMA guidance.
- v. An inventory of all construction projects that used funds from this program.

In addition, pass-through entities are responsible for closing out their subawards as described in 2 C.F.R. § 200.344; subrecipients are still required to submit closeout materials within 90 calendar days of the period of performance end date. When a subrecipient completes all closeout requirements, pass-through entities must promptly complete all closeout actions for subawards in time for the recipient to submit all necessary documentation and information to FEMA during the closeout of the prime award.

After the prime award closeout reports have been reviewed and approved by FEMA, a closeout notice will be completed to close out the grant. The notice will indicate the period of performance as closed, list any remaining funds that will be deobligated, and address the requirement of maintaining the grant records for at least three years from the date of the final FFR. The record retention period may be longer, such as due to an audit or litigation, for equipment or real property used beyond the period of performance, or due to other circumstances outlined in 2 C.F.R. § 200.334.

The recipient is responsible for refunding to FEMA any balances of unobligated cash that FEMA paid that are not authorized to be retained per 2 C.F.R. § 200.344(d).

II. ADMINISTRATIVE CLOSEOUT

Administrative closeout is a mechanism for FEMA to unilaterally move forward with closeout of an award using available award information in lieu of final reports from the recipient per 2 C.F.R. § 200.344(h)-(i). It is a last resort available to FEMA, and if FEMA needs to administratively close an award, this may negatively impact a recipient's ability to obtain future funding. This mechanism can also require FEMA to make cash or cost adjustments and ineligible cost determinations based on the information it has, which may result in identifying a debt owed to FEMA by the recipient.

When a recipient is not responsive to FEMA's reasonable efforts to collect required reports needed to complete the standard closeout process, FEMA is required under 2 C.F.R. § 200.344(h) to start the administrative closeout process within the regulatory timeframe. FEMA will make at least three written attempts to collect required reports before initiating administrative closeout. If the recipient does not submit all required reports in accordance

with 2 C.F.R. § 200.344, this NOFO, and the terms and conditions of the award, FEMA must proceed to administratively close the award with the information available within one year of the period of performance end date. Additionally, if the recipient does not submit all required reports within one year of the period of performance end date, per 2 C.F.R. § 200.344(i), FEMA must report in FAPIIS the recipient's material failure to comply with the terms and conditions of the award.

If FEMA administratively closes an award where no final FFR has been submitted, FEMA uses that administrative closeout date in lieu of the final FFR submission date as the start of the record retention period under 2 C.F.R. § 200.334.

In addition, if an award is administratively closed, FEMA may decide to impose remedies for noncompliance per 2 C.F.R. § 200.339, consider this information in reviewing future award applications, or apply special conditions to existing or future awards.

d. *Additional Reporting Requirements*

I. DISCLOSING INFORMATION PER 2 C.F.R. § 180.335

This reporting requirement pertains to disclosing information related to government-wide suspension and debarment requirements. Before a recipient enters into a grant award with FEMA, the recipient must notify FEMA if it knows if it or any of the recipient's principals under the award fall under one or more of the four criteria listed at 2 C.F.R. § 180.335:

- i. Are presently excluded or disqualified;
- ii. Have been convicted within the preceding three years of any of the offenses listed in 2 C.F.R. § 180.800(a) or had a civil judgment rendered against it or any of the recipient's principals for one of those offenses within that time period;
- iii. Are presently indicted for or otherwise criminally or civilly charged by a governmental entity (federal, state or local) with commission of any of the offenses listed in 2 C.F.R. § 180.800(a); or
- iv. Have had one or more public transactions (federal, state, or local) terminated within the preceding three years for cause or default.

At any time after accepting the award, if the recipient learns that it or any of its principals falls under one or more of the criteria listed at 2 C.F.R. § 180.335, the recipient must provide immediate written notice to FEMA in accordance with 2 C.F.R. § 180.350.

II. REPORTING OF MATTERS RELATED TO RECIPIENT INTEGRITY AND PERFORMANCE

Per 2 C.F.R. Part 200, Appendix I § F.3, the additional post-award reporting requirements in 2 C.F.R. Part 200, Appendix XII may apply to applicants who, if upon becoming recipients, have a total value of currently active grants, cooperative agreements, and procurement contracts from all federal awarding agencies that exceeds \$10,000,000 for any period of time during the period of performance of an award under this funding opportunity.

Recipients that meet these criteria must maintain current information reported in FAPIIS about civil, criminal, or administrative proceedings described in paragraph 2 of Appendix XII at the reporting frequency described in paragraph 4 of Appendix XII.

III. SINGLE AUDIT REPORT

For audits of fiscal years beginning on or after December 26, 2014, recipients that expend \$750,000 or more from all federal funding sources during their fiscal year are required to submit an organization-wide financial and compliance audit report, also known as the single audit report.

The audit must be performed in accordance with the requirements of U.S. Government Accountability Office's (GAO) Government Auditing Standards, located at <https://www.gao.gov/yellowbook/overview>, and the requirements of Subpart F of 2 C.F.R. Part 200, located at <http://www.ecfr.gov/cgi-bin/text-idx?node=sp2.1.200.f>.

4. Monitoring and Oversight

Per 2 C.F.R. § 200.337, FEMA, through its authorized representatives, has the right, at all reasonable times, to make site visits or conduct desk reviews to review project accomplishments and management control systems to review award progress and to provide any required technical assistance. During site visits or desk reviews, FEMA will review recipients' files related to the award. As part of any monitoring and program evaluation activities, recipients must permit FEMA, upon reasonable notice, to review grant-related records and to interview the organization's staff and contractors regarding the program. Recipients must respond in a timely and accurate manner to FEMA requests for information relating to the award.

Effective monitoring and oversight help FEMA ensure that recipients use grant funds for their intended purpose(s); verify that projects undertaken are consistent with approved plans; and ensure that recipients make adequate progress toward stated goals and objectives.

Additionally, monitoring serves as the primary mechanism to ensure that recipients comply with applicable laws, rules, regulations, program guidance, and requirements. FEMA regularly monitors all grant programs both financially and programmatically in accordance with federal laws, regulations (including 2 C.F.R. Part 200), program guidance, and the terms and conditions of the award. All monitoring efforts ultimately serve to evaluate progress towards grant goals and proactively target and address issues that may threaten grant success during the period of performance.

FEMA staff will periodically monitor recipients to ensure that administrative processes, policies and procedures, budgets, and other related award criteria are meeting Federal Government-wide and FEMA regulations. Aside from reviewing quarterly financial and programmatic reports, FEMA may also conduct enhanced monitoring through either desk-based reviews, onsite monitoring visits, or both. Enhanced monitoring will involve the review and analysis of the financial compliance and administrative processes, policies,

activities, and other attributes of each federal assistance award, and it will identify areas where the recipient may need technical assistance, corrective actions, or other support.

Financial and programmatic monitoring are complementary processes within FEMA's overarching monitoring strategy that function together to ensure effective grants management, accountability, and transparency; validate progress against grant and program goals; and safeguard federal funds against fraud, waste, and abuse. Financial monitoring primarily focuses on statutory and regulatory compliance with administrative grant requirements, while programmatic monitoring seeks to validate and assist in grant progress, targeting issues that may be hindering achievement of project goals and ensuring compliance with the purpose of the grant and grant program. Both monitoring processes are similar in that they feature initial reviews of all open awards, and additional, in-depth monitoring of grants requiring additional attention.

Recipients and subrecipients who are pass-through entities are responsible for monitoring their subrecipients in a manner consistent with the terms of the federal award at 2 C.F.R. Part 200, including 2 C.F.R. § 200.332. This includes the pass-through entity's responsibility to monitor the activities of the subrecipient as necessary to ensure that the subaward is used for authorized purposes, in compliance with federal statutes, regulations, and the terms and conditions of the subaward; and that subaward performance goals are achieved.

In terms of overall award management, recipient and subrecipient responsibilities include, but are not limited to: accounting of receipts and expenditures, cash management, maintaining adequate financial records, reporting and refunding expenditures disallowed by audits, monitoring if acting as a pass-through entity, or other assessments and reviews, and ensuring overall compliance with the terms and conditions of the award or subaward, as applicable, including the terms of 2 C.F.R. Part 200.

By accepting the award, all recipients agree to participate in monitoring or an evaluation of this grant, which may include analysis of the impact and providing access to program operating personnel and participants, as specified by the evaluator(s). FEMA, through the FMA program, encourages investments to protect communities and infrastructure. As part of performance evaluation and monitoring efforts, FEMA will conduct a series of grant effectiveness and cost-effectiveness case studies jointly with FMA recipients to highlight how recipients and subrecipients have used the FMA funds to increase resilience from natural hazards in their jurisdictions.

FEMA will not provide additional federal funding in the event of a cost overrun.

G. DHS Awarding Agency Contact Information

1. Contact and Resource Information

a. *Program Office Contact*

General questions about the FMA program can be directed to the appropriate FEMA Regional Office or State Hazard Mitigation Officer. Contact information for FEMA Regional Offices is provided at <https://www.fema.gov/about/contact>. Contact information for the State

Hazard Mitigation Officers is provided at <https://www.fema.gov/state-hazard-mitigation-officers>.

The HMA Helpline is available by telephone 1-866-222-3580.

For questions about cost-effectiveness and FEMA's BCA software, contact the BC Helpline by telephone 1-855-540-6744 or email BCHelpline@fema.dhs.gov.

The Building Science Helpline is available for guidance on FEMA Building Science publications by email FEMA-BuildingScienceHelp@fema.dhs.gov.

For questions about NEPA or EHP requirements, the EHP Helpline is available by telephone 1-866-222-3580 or email ehhelpline@fema.dhs.gov.

Resources and job aids intended to help prepare applications and subapplications are available on FEMA's Hazard Mitigation Assistance webpage at <https://www.fema.gov/grants/mitigation>.

Resources intended to help applicants and subapplicants prepare hazard mitigation plans and planning grants are available on FEMA's Mitigation planning webpage at <https://www.fema.gov/emergency-managers/risk-management/hazard-mitigation-planning>

FEMA publications that specify the documentation and information necessary for FEMA to review project applications for feasibility and effectiveness, cost-effectiveness, and potential impacts on environmental and cultural resources are available on the FEMA website at <https://www.fema.gov/grants/guidance-tools>.

b. *FEMA Grants News*

FEMA Grants News is a non-emergency comprehensive management and information resource developed by FEMA for grants stakeholders. This channel provides general information on all FEMA grant programs and maintains a comprehensive database containing key personnel contact information at the federal, state, and local levels. When necessary, recipients will be directed to a federal point of contact who can answer specific programmatic questions or concerns. FEMA Grants Information Desk can be reached by e-mail at fema-grants-news@fema.dhs.gov OR by phone at (800) 368-6498, Monday through Friday, 9:00 AM – 5:00 PM ET.

c. *FEMA Regional Offices*

FEMA Regional Offices manage, administer, and conduct the application budget review, create the award package, approve, amend, and close out awards, as well as conduct cash analysis, financial and programmatic monitoring, and audit resolution for FMA. The Regions also provide technical assistance to FMA recipients.

FEMA Regional Office contact information is available at <https://www.fema.gov/fema-regional-contacts>.

d. *Equal Rights*

The FEMA Office of Equal Rights (OER) is responsible for compliance with and enforcement of federal civil rights obligations in connection with programs and services conducted by FEMA and recipients of FEMA financial assistance. All inquiries and communications about federal civil rights compliance for FEMA grants under this NOFO should be sent to FEMA-CivilRightsOffice@fema.dhs.gov.

e. *Environmental Planning and Historic Preservation*

The FEMA Office of Environmental Planning and Historic Preservation (OEHP) provides guidance and information about the EHP review process to FEMA programs and FEMA's recipients and subrecipients. All inquiries and communications about EHP compliance for FEMA grant projects under this NOFO or the EHP review process should be sent to FEMA-OEHP- NOFOQuestions@fema.dhs.gov.

2. Systems Information

a. *FEMA GO*

For technical assistance with the FEMA GO system, please contact the FEMA GO Helpdesk at femago@fema.dhs.gov or (877) 611-4700, Monday through Friday, 8:00 AM – 6:00 PM ET.

H. Additional Information

1. Termination Provisions

FEMA may terminate a federal award in whole or in part for one of the following reasons. FEMA and the recipient must still comply with closeout requirements at 2 C.F.R. §§ 200.344-200.345 even if an award is terminated in whole or in part. To the extent that subawards are permitted under this NOFO, pass-through entities should refer to 2 C.F.R. § 200.340 for additional information on termination regarding subawards.

a. *Noncompliance*

If a recipient fails to comply with the terms and conditions of a federal award, FEMA may terminate the award in whole or in part. If the noncompliance can be corrected, FEMA may first attempt to direct the recipient to correct the noncompliance. This may take the form of a Compliance Notification. If the noncompliance cannot be corrected or the recipient is non-responsive, FEMA may proceed with a Remedy Notification, which could impose a remedy for noncompliance per 2 C.F.R. § 200.339, including termination. Any action to terminate based on noncompliance will follow the requirements of 2 C.F.R. §§ 200.341-200.342 as well as the requirement of 2 C.F.R. § 200.340(c) to report in FAPIIS the recipient's material failure to comply with the award terms and conditions. See also the section on Actions to Address Noncompliance in this NOFO.

b. *With the Consent of the Recipient*

FEMA may also terminate an award in whole or in part with the consent of the recipient, in which case the parties must agree upon the termination conditions, including the effective date, and in the case of partial termination, the portion to be terminated.

c. *Notification by the Recipient*

The recipient may terminate the award, in whole or in part, by sending written notification to FEMA setting forth the reasons for such termination, the effective date, and in the case of partial termination, the portion to be terminated. In the case of partial termination, FEMA may determine that a partially terminated award will not accomplish the purpose of the federal award, so FEMA may terminate the award in its entirety. If that occurs, FEMA will follow the requirements of 2 C.F.R. §§ 200.341-200.342 in deciding to fully terminate the award.

2. Program Evaluation

Recipients and subrecipients are encouraged to incorporate program evaluation activities from the outset of their program design and implementation to meaningfully document and measure their progress towards meeting the project(s) goals. Title I of the Foundations for Evidence-Based Policymaking Act of 2018 ([Evidence Act](#)), [Pub. L. No. 115-435 \(2019\)](#) urges federal awarding agencies and federal assistance recipients and subrecipients to use program evaluation as a critical tool to learn, to improve equitable delivery, and to elevate program service and delivery across the program lifecycle. Evaluation means “an assessment using systematic data collection and analysis of one or more programs, policies, and organizations intended to assess their effectiveness and efficiency.” Evidence Act § 101 (codified at 5 U.S.C. § 311). Evaluation costs are allowable costs (either as direct or indirect), unless prohibited by statute or regulation.

In addition, recipients are required to participate in a DHS-led evaluation if selected, which may be carried out by a third-party on behalf of the Program Office or DHS. By accepting grant funds, recipients agree to participate in the evaluation, which may include analysis of individuals who benefit from the grant, and provide access to program operating personnel and participants, as specified by the evaluator(s) during the award.

3. Period of Performance Extensions

Extensions to the period of performance (POP) for this program are allowed. Extensions to the POP identified in the award will only be considered through formal, written requests to the recipient’s FEMA Regional Office and must contain specific and compelling justifications as to why an extension is required. Recipients are advised to coordinate with the FEMA Regional Hazard Mitigation Assistance Specialist as needed when preparing an extension request.

All extension requests must address the following:

- a. The grant program, fiscal year, and award number;
- b. Reason for the delay –including details of the legal, policy, or operational challenges that prevent the final outlay of awarded funds by the deadline;

- c. Current status of the activity(ies);
- d. Approved POP termination date and new project completion date;
- e. Amount of funds drawn down to date;
- f. Remaining available funds, both federal and, if applicable, non-federal;
- g. Budget outlining how remaining federal and, if applicable, non-federal funds will be expended;
- h. Plan for completion, including milestones and timeframes for achieving each milestone and the position or person responsible for implementing the plan for completion; and
- i. Certification that the activity(ies) will be completed within the extended POP without any modification to the original statement of work, as described in the application and as approved by FEMA.

Extension requests will be granted only due to compelling legal, policy, or operational challenges. Extension requests will only be considered for the following reasons:

- ☐ Contractual commitments by the recipient or subrecipient with vendors prevent completion of the project, including delivery of equipment or services, within the existing POP;
- ☐ The project must undergo a complex environmental review that cannot be completed within the existing POP;
- ☐ Projects are long-term by design, and therefore acceleration would compromise core programmatic goals; or
- ☐ Where other special or extenuating circumstances exist.

Recipients should submit all proposed extension requests to FEMA for review and approval at least 60 days prior to the end of the POP to allow sufficient processing time.

Based on sufficiency of justification, the FEMA Regional Administrator can issue up to two extensions of the POP for up to 12 months each.

4. Disability Integration

Pursuant to Section 504 of the Rehabilitation Act of 1973, recipients of FEMA financial assistance must ensure that their programs and activities do not discriminate against other qualified individuals with disabilities.

Grant recipients should engage with the whole community to advance individual and community preparedness and to work as a nation to build and sustain resilience. In doing so, recipients are encouraged to consider the needs of individuals with disabilities into the activities and projects funded by the grant.

FEMA expects that the integration of the needs of people with disabilities will occur at all levels, including planning; alerting, notification, and public outreach; training; purchasing of equipment and supplies; protective action implementation; and exercises/drills.

The following are examples that demonstrate the integration of the needs of people with disabilities in carrying out FEMA awards:

- Include representatives of organizations that work with/for people with disabilities on planning committees, work groups and other bodies engaged in development and implementation of the grant programs and activities.
- Hold all activities related to the grant in locations that are accessible to persons with physical disabilities to the extent practicable.
- Acquire language translation services, including American Sign Language, that provide public information across the community and in shelters.
- Ensure shelter-specific grant funds are in alignment with FEMA’s [Guidance on Planning for Integration of Functional Needs Support Services in General Population Shelters](#).
- If making alterations to an existing building to a primary function area utilizing federal funds, complying with the most recent codes and standards and making path of travel to the primary function area accessible to the greatest extent possible.
- Implement specific procedures used by public transportation agencies that include evacuation and passenger communication plans and measures for individuals with disabilities.
- Identify, create, and deliver training to address any training gaps specifically aimed toward whole-community preparedness. Include and interact with individuals with disabilities, aligning with the designated program capability.
- Establish best practices in inclusive planning and preparedness that consider physical access, language access, and information access. Examples of effective communication access include providing auxiliary aids and services such as sign language interpreters, Computer Aided Real-time Translation (CART), and materials in Braille or alternate formats.

FEMA grant recipients can fund projects towards the resiliency of the whole community, including people with disabilities, such as training, outreach and safety campaigns, provided that the project aligns with this NOFO and the terms and conditions of the award.

5. Conflicts of Interest in the Administration of Federal Awards or Subawards

For conflicts of interest under grant-funded procurements and contracts, refer to the section on Procurement Integrity in this NOFO and 2 C.F.R. §§ 200.317 – 200.327.

To eliminate and reduce the impact of conflicts of interest in the subaward process, recipients and pass-through entities must follow their own policies and procedures regarding the elimination or reduction of conflicts of interest when making subawards. Recipients and pass-through entities are also required to follow any applicable federal and state, local, tribal, or territorial (SLTT) statutes or regulations governing conflicts of interest in the making of subawards.

The recipient or pass-through entity must disclose to the respective Program Analyst or Program Manager, in writing, any real or potential conflict of interest that may arise during the administration of the federal award, as defined by the federal or SLTT statutes or regulations or their own existing policies, within five days of learning of the conflict of interest. Similarly, subrecipients, whether acting as subrecipients or as pass-through entities, must disclose any real or potential conflict of interest to the recipient or next-level pass-

through entity as required by the recipient or pass-through entity's conflict of interest policies, or any applicable federal or SLTT statutes or regulations.

Conflicts of interest may arise during the process of FEMA making a federal award in situations where an employee, officer, or agent, any members of his or her immediate family, his or her partner has a close personal relationship, a business relationship, or a professional relationship, with an applicant, subapplicant, recipient, subrecipient, or FEMA employees.

6. Procurement Integrity

Through audits conducted by the DHS Office of Inspector General (OIG) and FEMA grant monitoring, findings have shown that some FEMA recipients have not fully adhered to the proper procurement requirements at 2 C.F.R. §§ 200.317 – 200.327 when spending grant funds. Anything less than full compliance with federal procurement requirements jeopardizes the integrity of the grant as well as the grant program. To assist with determining whether an action is a procurement or instead a subaward, please consult 2 C.F.R. § 200.331. For detailed guidance on the federal procurement standards, recipients and subrecipients should refer to various materials issued by FEMA's Procurement Disaster Assistance Team (PDAT), such as the [PDAT Field Manual](#) and [Contract Provisions Guide](#). Additional resources, including an upcoming trainings schedule can be found on the PDAT Website: <https://www.fema.gov/grants/procurement>.

The below highlights the federal procurement requirements for FEMA recipients when procuring goods and services with federal grant funds. FEMA will include a review of recipients' procurement practices as part of the normal monitoring activities. **All procurement activity must be conducted in accordance with federal procurement standards at 2 C.F.R. §§ 200.317 – 200.327.** Select requirements under these standards are listed below. The recipient and any of its subrecipients must comply with all requirements, even if they are not listed below.

Under 2 C.F.R. § 200.317, when procuring property and services under a federal award, states (including territories) must follow the same policies and procedures they use for procurements from their non-federal funds; additionally, states must now follow 2 C.F.R. § 200.321 regarding socioeconomic steps, 200.322 regarding domestic preferences for procurements, 200.323 regarding procurement of recovered materials, and 2 C.F.R. § 200.327 regarding required contract provisions.

All other non-federal entities, such as tribes (collectively, non-state entities), must have and use their own documented procurement procedures that reflect applicable SLTT laws and regulations, provided that the procurements conform to applicable federal law and the standards identified in 2 C.F.R. Part 200. These standards include, but are not limited to, providing for full and open competition consistent with the standards of 2 C.F.R. § 200.319 and the required procurement methods at § 200.320.

a. *Important Changes to Procurement Standards in 2 C.F.R. Part 200*

OMB recently updated various parts of Title 2 of the Code of Federal Regulations, among them, the procurement standards. States are now required to follow the socioeconomic steps in soliciting small and minority businesses, women’s business enterprises, and labor surplus area firms per 2 C.F.R. § 200.321. All non-federal entities should also, to the greatest extent practicable under a federal award, provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States per 2 C.F.R. § 200.322. More information on OMB’s revisions to the federal procurement standards can be found in [Purchasing Under a FEMA Award: OMB Revisions Fact Sheet](#).

The recognized procurement methods in 2 C.F.R. § 200.320 have been reorganized into informal procurement methods, which include micro-purchases and small purchases; formal procurement methods, which include sealed bidding and competitive proposals; and noncompetitive procurements. The federal micro-purchase threshold is currently \$10,000, and non-state entities may use a lower threshold when using micro-purchase procedures under a FEMA award. If a non-state entity wants to use a micro-purchase threshold higher than the federal threshold, it must follow the requirements of 2 C.F.R. § 200.320(a)(1)(iii)-(v). The federal simplified acquisition threshold is currently \$250,000, and a non-state entity may use a lower threshold but may not exceed the federal threshold when using small purchase procedures under a FEMA award. *See* 2 C.F.R. § 200.1 (citing the definition of simplified acquisition threshold from [48 C.F.R. Part 2, Subpart 2.1](#)).

See 2 C.F.R. §§ 200.216, 200.471, and Appendix II as well as section D.13.a of the NOFO regarding prohibitions on covered telecommunications equipment or services.

b. *Competition and Conflicts of Interest*

Among the requirements of 2 C.F.R. § 200.319(b) applicable to all non-federal entities other than states, in order to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, or invitations for bids or requests for proposals must be excluded from competing for such procurements. FEMA considers these actions to be an organizational conflict of interest and interprets this restriction as applying to contractors that help a non-federal entity develop its grant application, project plans, or project budget. This prohibition also applies to the use of former employees to manage the grant or carry out a contract when those former employees worked on such activities while they were employees of the non-federal entity.

Under this prohibition, unless the non-federal entity solicits for and awards a contract covering both development and execution of specifications (or similar elements as described above), and this contract was procured in compliance with 2 C.F.R. §§ 200.317 – 200.327, federal funds cannot be used to pay a contractor to carry out the work if that contractor also worked on the development of those specifications. This rule applies to all contracts funded with federal grant funds, including pre-award costs, such as grant writer fees, as well as post-award costs, such as grant management fees.

Additionally, some of the situations considered to be restrictive of competition include, but are not limited to:

- ☐ Placing unreasonable requirements on firms for them to qualify to do business;
- ☐ Requiring unnecessary experience and excessive bonding;
- ☐ Noncompetitive pricing practices between firms or between affiliated companies;
- ☐ Noncompetitive contracts to consultants that are on retainer contracts;
- ☐ Organizational conflicts of interest;
- ☐ Specifying only a “brand name” product instead of allowing “an equal” product to be offered and describing the performance or other relevant requirements of the procurement; and
- ☐ Any arbitrary action in the procurement process.

Per 2 C.F.R. § 200.319(c), non-federal entities other than states must conduct procurements in a manner that prohibits the use of statutorily or administratively imposed SLTT geographical preferences in the evaluation of bids or proposals, except in those cases where applicable federal statutes expressly mandate or encourage geographic preference. Nothing in this section preempts state licensing laws. When contracting for architectural and engineering services, geographic location may be a selection criterion provided its application leaves an appropriate number of qualified firms, given the nature and size of the project, to compete for the contract.

Under 2 C.F.R. § 200.318(c)(1), non-federal entities other than states are required to maintain written standards of conduct covering conflicts of interest and governing the actions of their employees engaged in the selection, award, and administration of contracts. **No employee, officer, or agent may participate in the selection, award, or administration of a contract supported by a federal award if he or she has a real or apparent conflict of interest.**

Such conflicts of interest would arise when the employee, officer or agent, any member of his or her immediate family, his or her partner, or an organization that employs or is about to employ any of the parties indicated herein, has a financial or other interest in or a tangible personal benefit from a firm considered for a contract. The officers, employees, and agents of the non-federal entity may neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or parties to subcontracts. However, non-federal entities may set standards for situations in which the financial interest is not substantial, or the gift is an unsolicited item of nominal value. The standards of conduct must provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the non-federal entity.

Under 2 C.F.R. 200.318(c)(2), if the recipient or subrecipient (other than states) has a parent, affiliate, or subsidiary organization that is not a state, local, tribal, or territorial government, the non-federal entity must also maintain written standards of conduct covering organizational conflicts of interest. In this context, organizational conflict of interest means that because of a relationship with a parent company, affiliate, or subsidiary organization, the non-federal entity is unable or appears to be unable to be impartial in conducting a procurement action involving a related organization. The non-federal entity must disclose in writing any potential conflicts of interest to FEMA or the pass-through entity in accordance with applicable FEMA policy.

c. Supply Schedules and Purchasing Programs

Generally, a non-federal entity may seek to procure goods or services from a federal supply schedule, state supply schedule, or group purchasing agreement.

d. Prohibition on Use of Funds to Support or Oppose Union Organizing

A recipient or subrecipient may not use federal grant funds or funds used to meet a cost share requirement to support or oppose union organizing. Using grant or cost share funds to hire unionized workers does not constitute a violation of this prohibition on use of funds to support or oppose union organizing.

I. GENERAL SERVICES ADMINISTRATION SCHEDULES

States, tribes, and local governments, and any instrumentality thereof (such as local education agencies or institutions of higher education) may procure goods and services from a General Services Administration (GSA) schedule. GSA offers multiple efficient and effective procurement programs for state, tribal, and local governments, and instrumentalities thereof, to purchase products and services directly from pre-vetted contractors. The GSA Schedules (also referred to as the Multiple Award Schedules and the Federal Supply Schedules) are long-term government-wide contracts with commercial firms that provide access to millions of commercial products and services at volume discount pricing.

Information about GSA programs for states, tribes, and local governments, and instrumentalities thereof, can be found at <https://www.gsa.gov/resources-for/programs-for-State-and-local-governments> and <https://www.gsa.gov/buying-selling/purchasing-programs/gsa-schedules/schedule-buyers/state-and-local-governments>.

For tribes, local governments, and their instrumentalities that purchase off of a GSA schedule, this will satisfy the federal requirements for full and open competition provided that the recipient follows the GSA ordering procedures; however, tribes, local governments, and their instrumentalities will still need to follow the other rules under 2 C.F.R. §§ 200.317 – 200.327, such as solicitation of minority businesses, women’s business enterprises, small businesses, or labor surplus area firms (§ 200.321), domestic preferences (§ 200.322), contract cost and price (§ 200.324), and required contract provisions (§ 200.327 and Appendix II).

II. OTHER SUPPLY SCHEDULES AND PROGRAMS

For non-federal entities other than states, such as tribes, local governments, and nonprofits, that want to procure goods or services from a state supply schedule, cooperative purchasing program, or other similar program, in order for such procurements to be permissible under federal requirements, the following must be true:

- ☐ The procurement of the original contract or purchasing schedule and its use by the non-federal entity complies with state and local law, regulations, and written procurement procedures;

- ☐ The state or other entity that originally procured the original contract or purchasing schedule entered into the contract or schedule with the express purpose of making it available to the non-federal entity and other similar types of entities;
- ☐ The contract or purchasing schedule specifically allows for such use, and the work to be performed for the non-federal entity falls within the scope of work under the contract as to type, amount, and geography;
- ☐ The procurement of the original contract or purchasing schedule complied with all the procurement standards applicable to a non-federal entity other than states under at 2 C.F.R. §§ 200.317 – 200.327; and
- ☐ With respect to the use of a purchasing schedule, the non-federal entity must follow ordering procedures that adhere to applicable state, tribal, and local laws and regulations and the minimum requirements of full and open competition under 2 C.F.R. Part 200.

If a non-federal entity other than a state seeks to use a state supply schedule, cooperative purchasing program, or other similar type of arrangement, FEMA recommends the recipient discuss the procurement plans with its FEMA Regional Grants Management Specialist.

d. *Procurement Documentation*

Per 2 C.F.R. § 200.318(i), non-federal entities other than states and territories are required to maintain and retain records sufficient to detail the history of procurement covering at least the rationale for the procurement method, selection of contract type, contractor selection or rejection, and the basis for the contract price. States and territories are encouraged to maintain and retain this information as well and are reminded that in order for any cost to be allowable, it must be adequately documented per 2 C.F.R. § 200.403(g).

Examples of the types of documents that would cover this information include but are not limited to:

- ☐ Solicitation documentation, such as requests for quotes, invitations for bids, or requests for proposals;
- ☐ Responses to solicitations, such as quotes, bids, or proposals;
- ☐ Pre-solicitation independent cost estimates and post-solicitation cost/price analyses on file for review by federal personnel, if applicable;
- ☐ Contract documents and amendments, including required contract provisions; and
- ☐ Other documents required by federal regulations applicable at the time a grant is awarded to a recipient.

Additional information on required procurement records can be found on pages 24-26 of the [PDAT Field Manual](#).

7. Financial Assistance Programs for Infrastructure

a. *Build America, Buy America Act*

Recipients and subrecipients must comply with the Build America, Buy America Act (BABAA), which was enacted as part of the Infrastructure Investment and Jobs Act §§ 70901-70927, Pub. L. No. 117-58 (2021); and Executive Order 14005, Ensuring the Future is Made in All of America by All of America's Workers. See also Office of Management and Budget (OMB), Memorandum M-22-11, Initial Implementation Guidance on Application of Buy America Preference in Federal Financial Assistance Programs for Infrastructure.

None of the funds provided under this program may be used for a project for infrastructure unless the iron and steel, manufactured products, and construction materials used in that infrastructure are produced in the United States.

The Buy America preference only applies to articles, materials, and supplies that are consumed in, incorporated into, or affixed to an infrastructure project. As such, it does not apply to tools, equipment, and supplies, such as temporary scaffolding, brought to the construction site and removed at or before the completion of the infrastructure project. Nor does a Buy America preference apply to equipment and furnishings, such as movable chairs, desks, and portable computer equipment, that are used at or within the finished infrastructure project but are not an integral part of the structure or permanently affixed to the infrastructure project.

To see whether a particular FEMA federal financial assistance program is considered an infrastructure program and thus required to include a Buy America preference, please see [Programs and Definitions: Build America, Buy America Act | FEMA.gov](#).

Waivers

When necessary, recipients (and subrecipients through their pass-through entity) may apply for, and FEMA may grant, a waiver from these requirements. A waiver of the domestic content procurement preference may be granted by the agency awarding official if FEMA determines that:

- a. Applying the domestic content procurement preference would be inconsistent with the public interest.
- b. The types of iron, steel, manufactured products, or construction materials are not produced in the United States in sufficient and reasonably available quantities or of a satisfactory quality.
- c. The inclusion of iron, steel, manufactured products, or construction materials produced in the United States will increase the cost of the overall project by more than 25%.

For FEMA awards, the process for requesting a waiver from the Buy America preference requirements can be found on FEMA's website at: ["Buy America" Preference in FEMA Financial Assistance Programs for Infrastructure | FEMA.gov](#).

Definitions

Construction materials: an article, material, or supply—other than an item primarily of iron or steel; a manufactured product; cement and cementitious materials; aggregates such as stone, sand, or gravel; or aggregate binding agents or additives—that is or consists primarily of non-ferrous metals, plastic and polymer-based products (including polyvinylchloride,

composite building materials, and polymers used in fiber optic cables), glass (including optic glass), lumber, paint, and drywall.

Domestic content procurement preference: Means all iron and steel used in the project are produced in the United States; the manufactured products used in the project are produced in the United States; or the construction materials used in the project are produced in the United States.

Federal financial assistance: Generally defined in 2 C.F.R. § 200.1 and includes all expenditures by a federal agency to a non-federal entity for an infrastructure project, except that it does not include expenditures for assistance authorities relating to major disasters or emergencies under sections 402, 403, 404, 406, 408, or 502 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act relating to a major disaster or emergency declared under section 401 or 501, respectively, or pre and post disaster or emergency response expenditures.

Infrastructure: infrastructure projects which serve a public function, including at a minimum, the structures, facilities, and equipment for, in the United States, roads, highways, and bridges; public transportation; dams, ports, harbors, and other maritime facilities; intercity passenger and freight railroads; freight and intermodal facilities; airports; water systems, including drinking water and wastewater systems; electrical transmission facilities and systems; utilities; broadband infrastructure; and buildings and real property; and structures, facilities, and equipment that generate, transport, and distribute energy.

Produced in the United States means the following for:

- **Iron and steel:** All manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States.
- **Manufactured products:** The product was manufactured in the United States, and the cost of the components of the manufactured product that are mined, produced, or manufactured in the United States is greater than 55 percent of the total cost of all components of the manufactured product, unless another standard for determining the minimum amount of domestic content of the manufactured product has been established under applicable law or regulation.
- **Construction Materials:** All manufacturing processes for the construction material occurred in the United States.

Project: is any activity related to the construction, alteration, maintenance, or repair of infrastructure in the United States.

8. Record Retention

a. *Record Retention Period*

Financial records, supporting documents, statistical records, and all other non-Federal entity records pertinent to a federal award generally must be maintained for at least three years from the date the final FFR is submitted. *See* 2 C.F.R. § 200.334. Further, if the recipient

does not submit a final FFR and the award is administratively closed, FEMA uses the date of administrative closeout as the start of the general record retention period.

The record retention period **may be longer than three years or have a different start date** in certain cases. These include:

- ☐ Records for real property and equipment acquired with Federal funds must be retained for **three years after final disposition of the property**. *See 2 C.F.R. § 200.334(c).*
- ☐ If any litigation, claim, or audit is started before the expiration of the three-year period, the records **must be retained until** all litigation, claims, or audit findings involving the records **have been resolved and final action taken**. *See 2 C.F.R. § 200.334(a).*
- ☐ The **record retention period will be extended if the non-federal entity is notified in writing** of the extension by FEMA, the cognizant or oversight agency for audit, or the cognizant agency for indirect costs, or pass-through entity. *See 2 C.F.R. § 200.334(b).*
- ☐ Where FEMA requires recipients to report program income after the period of performance ends, the **program income record retention period begins at the end of the recipient's fiscal year in which program income is earned**. *See 2 C.F.R. § 200.334(e).*
- ☐ For indirect cost rate computations and proposals, cost allocation plans, or any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates), the start of the record retention period depends on whether the indirect cost rate documents were submitted for negotiation. If the **indirect cost rate documents were submitted for negotiation, the record retention period begins from the date those documents were submitted** for negotiation. If indirect cost rate documents were **not submitted for negotiation, the record retention period begins at the end of the recipient's fiscal year or other accounting period covered by that indirect cost rate**. *See 2 C.F.R. § 200.334(f).*

b. *Types of Records to Retain*

FEMA requires that non-federal entities maintain the following documentation for federally funded purchases:

- ☐ Specifications
- ☐ Solicitations
- ☐ Competitive quotes or proposals
- ☐ Basis for selection decisions
- ☐ Purchase orders
- ☐ Contracts
- ☐ Invoices
- ☐ Cancelled checks

Non-federal entities should keep detailed records of all transactions involving the grant.

FEMA may at any time request copies of any relevant documentation and records, including

purchasing documentation along with copies of cancelled checks for verification. *See, e.g.*, 2 C.F.R. §§ 200.318(i), 200.334, 200.337.

In order for any cost to be allowable, it must be adequately documented per 2 C.F.R. § 200.403(g). Non-federal entities who fail to fully document all purchases may find their expenditures questioned and subsequently disallowed.

9. Actions to Address Noncompliance

Non-federal entities receiving financial assistance funding from FEMA are required to comply with requirements in the terms and conditions of their awards or subawards, including the terms set forth in applicable federal statutes, regulations, NOFOs, and policies. Throughout the award lifecycle or even after an award has been closed, FEMA or the pass-through entity may discover potential or actual noncompliance on the part of a recipient or subrecipient. This potential or actual noncompliance may be discovered through routine monitoring, audits, closeout, or reporting from various sources.

In the case of any potential or actual noncompliance, FEMA may place special conditions on an award per 2 C.F.R. §§ 200.208 and 200.339, FEMA may place a hold on funds until the matter is corrected, or additional information is provided per 2 C.F.R. § 200.339, or it may do both. Similar remedies for noncompliance with certain federal civil rights laws are authorized pursuant to 44 C.F.R. Parts 7 and 19.

In the event the noncompliance is not able to be corrected by imposing additional conditions or the recipient or subrecipient refuses to correct the matter, FEMA might take other remedies allowed under 2 C.F.R. § 200.339. These remedies include actions to disallow costs, recover funds, wholly or partly suspend or terminate the award, initiate suspension and debarment proceedings, withhold further federal awards, or take other remedies that may be legally available. For further information on termination due to noncompliance, see the section on Termination Provisions in the NOFO.

FEMA may discover and take action on noncompliance even after an award has been closed. The closeout of an award does not affect FEMA's right to disallow costs and recover funds as long the action to disallow costs takes place during the record retention period. *See* 2 C.F.R. §§ 200.334, 200.345(a). Closeout also does not affect the obligation of the non-federal entity to return any funds due as a result of later refunds, corrections, or other transactions. 2 C.F.R. § 200.345(a)(2).

The types of funds FEMA might attempt to recover include, but are not limited to, improper payments, cost share reimbursements, program income, interest earned on advance payments, or equipment disposition amounts.

FEMA may seek to recover disallowed costs through a Notice of Potential Debt Letter, a Remedy Notification, or other letter. The document will describe the potential amount owed, the reason why FEMA is recovering the funds, the recipient's appeal rights, how the amount can be paid, and the consequences for not appealing or paying the amount by the deadline.

If the recipient neither appeals nor pays the amount by the deadline, the amount owed will become final. Potential consequences if the debt is not paid in full or otherwise resolved by the deadline include the assessment of interest, administrative fees, and penalty charges; administratively offsetting the debt against other payable federal funds; and transferring the debt to the U.S. Department of the Treasury for collection.

FEMA notes the following common areas of noncompliance for FEMA's grant programs:

- ☐ Insufficient documentation and lack of record retention.
- ☐ Failure to follow the procurement under grants requirements.
- ☐ Failure to submit closeout documents in a timely manner.
- ☐ Failure to follow EHP requirements.
- ☐ Failure to comply with the POP deadline.

An eligible applicant, subapplicant, recipient, or subrecipient may request an appeal of a remedy FEMA has taken for noncompliance with federal statutes, regulations, or the terms and conditions of the award that results in suspension or termination of all or part of the award. The appeal must be submitted according to the following procedures:

- For remedies FEMA has taken for noncompliance, the appeal must contain documented justification supporting the appellant's position, specify the monetary figure in dispute, and identify the provisions in federal law, regulation, or policy with which the appellant believes the initial action was inconsistent.

The applicant, subapplicant, recipient, or subrecipient will be notified in writing of the disposition of the appeal or the need for additional information. All appeal decisions are final.

10. Audits

FEMA grant recipients are subject to audit oversight from multiple entities including the DHS OIG, the GAO, the pass-through entity, or independent auditing firms for single audits, and may cover activities and costs incurred under the award. Auditing agencies such as the DHS OIG, the GAO, and the pass-through entity (if applicable), and FEMA in its oversight capacity, must have access to records pertaining to the FEMA award. Recipients and subrecipients must retain award documents for at least three years from the date the final FFR is submitted, and even longer in many cases subject to the requirements of 2 C.F.R. § 200.334. In the case of administrative closeout, documents must be retained for at least three years from the date of closeout, or longer subject to the requirements of 2 C.F.R. § 200.334. If documents are retained longer than the required retention period, the DHS OIG, the GAO, and the pass-through entity, as well as FEMA in its oversight capacity, have the right to access these records as well. See 2 C.F.R. §§ 200.334, 200.337.

Additionally, non-federal entities must comply with the single audit requirements at 2 C.F.R. Part 200, Subpart F. Specifically, non-federal entities, other than for-profit subrecipients, that expend \$750,000 or more in federal awards during their fiscal year must have a single or program-specific audit conducted for that year in accordance with Subpart F. 2 C.F.R. § 200.501. A single audit covers all federal funds expended during a fiscal year, not just FEMA

funds. The cost of audit services may be allowable per 2 C.F.R. § 200.425, but non-federal entities must select auditors in accordance with 2 C.F.R. § 200.509, including following the proper procurement procedures. For additional information on single audit reporting requirements, see section F of this NOFO under the header “Single Audit Report” within the subsection “Additional Reporting Requirements”.

The objectives of single audits are to:

- ☐ Determine if financial statements conform to generally accepted accounting principles (GAAP);
- ☐ Determine whether the schedule of expenditures of federal awards is presented fairly;
- ☐ Understand, assess, and test the adequacy of internal controls for compliance with major programs; and
- ☐ Determine if the entity complied with applicable laws, regulations, and contracts or grants.

For single audits, the auditee is required to prepare financial statements reflecting its financial position, a schedule of federal award expenditures, and a summary of the status of prior audit findings and questioned costs. The auditee also is required to follow up and take appropriate corrective actions on new and previously issued but not yet addressed audit findings. The auditee must prepare a corrective action plan to address the new audit findings. 2 C.F.R. §§ 200.508, 200.510, 200.511.

Non-federal entities must have an audit conducted, either single or program-specific, of their financial statements and federal expenditures annually or biennially pursuant to 2 C.F.R. § 200.504. Non-federal entities must also follow the information submission requirements of 2 C.F.R. § 200.512, including submitting the audit information to the [Federal Audit Clearinghouse](#) within the earlier of 30 calendar days after receipt of the auditor’s report(s) or nine months after the end of the audit period. The audit information to be submitted include the data collection form described at 2 C.F.R. § 200.512(c) and Appendix X to 2 C.F.R. Part 200 as well as the reporting package described at 2 C.F.R. § 200.512(b).

The non-federal entity must retain one copy of the data collection form and one copy of the reporting package for three years from the date of submission to the Federal Audit Clearinghouse. 2 C.F.R. § 200.512; *see also* 2 C.F.R. § 200.517 (setting requirements for retention of documents by the auditor and access to audit records in the auditor’s possession).

FEMA, the DHS OIG, the GAO, and the pass-through entity (if applicable), as part of monitoring or as part of an audit, may review a non-federal entity’s compliance with the single audit requirements. In cases of continued inability or unwillingness to have an audit conducted in compliance with 2 C.F.R. Part 200, Subpart F, FEMA and the pass-through entity, if applicable, are required to take appropriate remedial action under 2 C.F.R. § 200.339 for noncompliance, pursuant to 2 C.F.R. § 200.505.

11. Payment Information

FEMA uses the Direct Deposit/Electronic Funds Transfer (DD/EFT) method of payment to recipients.

Payment requests are submitted through FEMA GO.

12. Whole Community Preparedness

Preparedness is a shared responsibility that calls for the involvement of everyone—not just the government—in preparedness efforts. By working together, everyone can help keep the nation safe from harm and help keep it resilient when struck by hazards, such as natural disasters, acts of terrorism, and pandemics.

[Whole Community](#) includes:

- ☐ Individuals and families, including those with access and functional needs
- ☐ Businesses
- ☐ Faith-based and community organizations
- ☐ Nonprofit groups
- ☐ Schools and academia
- ☐ Media outlets
- ☐ All levels of government, including state, local, tribal, territorial, and federal partners

The phrase “Whole Community” often appears in preparedness materials, as it is one of the guiding principles. It means two things:

1. Involving people in the development of national preparedness documents.
2. Ensuring their roles and responsibilities are reflected in the content of the materials.

13. Extraordinary Circumstances

Applicants and Subapplicants must have a FEMA-approved current mitigation plan at the time of application deadline and at the time of the award to receive FMA project subawards; hazard mitigation plans that are approvable pending adoption are not sufficient. The FEMA Regional Administrator may grant an exception to the plan requirements in extraordinary circumstances when the appropriate justification is provided. For FMA, Subapplicants are exempt from the hazard mitigation plan requirement for the mitigation plan development and mitigation plan updates in Capability and Capacity Building Activities types only.

Extraordinary circumstances exist when FEMA or the applicant determine that the proposed project is consistent with the priorities and strategies identified in the state or Tribal (standard or enhanced) mitigation plan and that the jurisdiction meets at least one of the criteria below:

- The jurisdiction meets the small and impoverished communities as defined in 44 C.F.R. 201.2.
- The jurisdiction has been determined to have had insufficient capacity because of lack of available assistance, staffing or other necessary expertise to satisfy the mitigation planning requirement prior to the current disaster or application deadline.
- The jurisdiction experienced significant disruption from a declared disaster or another event that impacts its ability to complete the mitigation planning process prior to award or final approval of a project award.

- The jurisdiction does not have a mitigation plan for reasons beyond the control of the state, federally recognized Tribal government or local community, such as Disaster Relief Fund restrictions, that delay FEMA from granting a subaward prior to the expiration of the local or Tribal mitigation plan.

The applicant must provide written justification that identifies the specific criteria from the above list and explains why the jurisdiction will be able to have a plan both approved by FEMA and adopted by the jurisdiction within 12 months. The justification must identify the specific actions or circumstances that have eliminated or will eliminate the deficiency that prevented the jurisdiction from previously having an approved plan. The justification must clearly demonstrate how the above circumstances impacted the community beyond just stating the above circumstances.

If FEMA grants an extraordinary circumstances exception, a local or Tribal mitigation plan must be approved by FEMA within 12 months of the award of the project subaward to that community. The recipient must acknowledge in writing to the Regional Administrator that the jurisdiction will complete a plan within 12 months of the subaward. The recipient must provide a Compliance Action Plan for completing the local or Tribal mitigation plan, including milestones and a timetable, to ensure the jurisdiction will complete the plan in the required time. This requirement must be incorporated into the award (both the planning and project subaward agreements if a planning subaward is also awarded). If a plan is not provided within this time frame, the project subaward will be terminated, and any costs incurred after notice of subaward termination will not be reimbursed by FEMA. FEMA must notify the recipient of the subaward termination. For more information on award termination, refer to Part 8 of the [2023 Hazard Mitigation Assistance Program and Policy Guide](#).

If the mitigation plan is not approved by FEMA within 12 months of the award, and if the subaward also involved a mitigation planning award, FEMA should notify the recipient of its failure to meet the additional specific award or subaward conditions and request that the issue be corrected following remedies for non-compliance procedures in Part 8 of the [2023 Hazard Mitigation Assistance Program and Policy Guide](#). If compliance cannot be achieved, FEMA will apply a remedy action to the planning subaward to address the non-compliance and may, as a result, withhold assistance, recoup assistance, suspend or terminate the planning subaward.

14. Phased Projects

In general, sufficient technical information is provided by the applicant or subapplicant to allow FEMA to make an eligibility determination on a subapplication. The costs to obtain this information are generally eligible as pre-award costs. However, in some cases it is beyond the subapplicant's technical and financial resources to provide the complete technical information required for a full eligibility or EHP review of a complex project. The applicant and FEMA may provide technical assistance to the subapplicant to develop this complete body of technical data by approving a subapplication to finalize Phase I analysis and design, conduct applicable engineering studies, prepare a Benefit-Cost Analysis (BCA), and provide documentation for an EHP review. The Phase I deliverables provide FEMA with a technical body of information mutually concurred on by the subrecipient, the recipient, and FEMA to

determine project eligibility, technical feasibility, and cost effectiveness. If the results of the Phase I review indicate that the project meets FMA requirements, the project would then be eligible for funding for construction under a Phase II approval. Phase I funding is part of the project's total estimated cost and is subject to FMA cost-share requirements.

The use of a phased approach should be limited to complex projects (i.e., Localized Flood Risk Reduction Project) that require technical or EHP data beyond the scope of that generally required for a typical FMA activity or project. The following provides guidelines and outlines the process for selecting projects for Phase I/Phase II project approval.

a. Pre-screening Process

The subapplicant must submit documentation showing the project meets the following criteria for a Phase I approval:

- *State or Tribal (Standard or Enhanced) Mitigation Plan:* The proposed project must be consistent with the State or Tribal (Standard or Enhanced) Mitigation Plan as well as the local or Tribal Mitigation Plan for the jurisdiction in which the activity is located.
- *Justification for Selection of the Proposed Project:* Justification must be provided for the selection of the proposed solution after consideration of at least two alternative options.
- *Potential Cost-Effectiveness:* The project demonstrates potential cost-effectiveness based on a preliminary assessment of anticipated project benefits and cost. The subapplicant must be aware that this preliminary assessment is solely for the purpose of the Phase I pre-screening process and is not the final cost-effectiveness determination. A preliminary BCA is required at the time of application. This requirement does not apply to a small and impoverished communities as defined in 44 C.F.R. 201.2., federally recognized Tribal government, or subapplication that benefits or primarily benefits a Community Disaster Resilience Zone, where the subapplicant is unable to calculate a BCR to demonstrate cost-effectiveness as stated in Section D.11.a
- *EHP Review:* The Phase I review generally is categorically excluded from further review under NEPA with some exceptions. EHP Phase I review should identify any potential EHP compliance issues and information needs required for Phase II review.
- *Relevant Technical Data:* The subapplicant provides available technical data such as existing or preliminary hydrologic and hydraulic data or preliminary geotechnical data, as appropriate.

b. Phase I Award

The applicant and FEMA may approve projects meeting the above requirements for technical assistance under a Phase I award. FEMA and the applicant will coordinate closely to ensure

mutual concurrence on all data and technical information as well as any conditions included in the Phase I Award as the Phase I technical review process proceeds. The following conditions must be met through the Phase 1 deliverables prior to progressing to Phase II:

- *Relevant Technical Data:* The applicant and FEMA will review technical data such as hydrologic and hydraulic, environmental, and geotechnical studies provided by the subapplicant, as appropriate.
- *Preliminary Engineering Design:* Based on the technical data, the subapplicant develops a preliminary engineering design and layout and cost estimates with ad hoc technical assistance from the applicant and FEMA.
- *Milestones:* As available, the subapplicant must provide clear milestones (including those that will have Go/No Go criteria for competition projects) and proposed timelines, and a list of potential final deliverables.
- *EO 11988, as amended by EO 13690:* If applicable, based on the technical data and revised engineering design, the project must demonstrate compliance with floodplain management requirements under this EO. If a Flood Insurance Rate Map (FIRM) amendment or revision will be necessary under the provisions of the National Flood Insurance Program (NFIP), the applicant and FEMA will provide the subapplicant with technical assistance to meet this requirement.
- *Refinement of the Cost-Effectiveness Assessment:* Based on the revised design and cost estimates, the applicant and FEMA will refine the preliminary assessment of cost-effectiveness conducted prior to Phase I approval. This will result in a final BCR to evaluate the project's cost-effectiveness, which will include all the project costs, including those associated with Phase I.
- *EHP Review:* The applicant and FEMA will conduct a review of the revised project design to ensure EHP compliance. The project will meet EHP requirements before Phase II approval.
- Note that eligible activities under a Phase I award are defined in the award package and are based on the submitted and reviewed Phase I scope of work. A complete and eligible Phase II application, including environmental consultations, demonstration of technical feasibility, and an updated benefit-cost analysis, must be submitted to and approved by FEMA prior to the initiation of any tasks not included in the approved Phase I scope of work.

c. Phase II Award Amendment - Construction Process

If the project is determined to be eligible, technically feasible, cost effective, and compliant with EHP requirements under the technical review of Phase I deliverables, the project may then be approved for construction under Phase II.

Additional federal funds may be approved in Phase II, subject to the availability of funds.

In general, a contractor who develops the HMA grant application project specifications or is contracted to provide direct assistance with the completion and submission of a grant application, is generally prohibited from competing for the related construction work *See* 2 CFR § 200.319(b) and subsection H.7.b: Procurement Integrity: Competition and Conflicts of interest of this NOFO.

15. Integrating Hazard Mitigation and Planning

In addition, SLTTs are encouraged, but not required, to pursue hazard mitigation planning and projects with co-benefits that advance shared outcomes for economic, environmental, and social resilience.

Alignment with SLTT planning mechanisms (economic development, housing, comprehensive plans, transportation plans, building codes, floodplain ordinances, etc.) by and vice versa is vital to build safer, more resilient, equitable communities. This two-way exchange of hazard mitigation principles, risk and vulnerability assessments, and mitigation strategies supports community-wide risk reduction, both before and after disasters occur. Not only will SLTT planning efforts be better integrated, but by going through this process there is a higher level of interagency coordination, which is just as important as the planning mechanisms. Additional information on Plan Integration can be found at [Implement, Integrate and Maintain Mitigation Planning Activities | FEMA.gov](#), [Guides to Expanding Mitigation | FEMA.gov](#), and <https://planning.org/nationalcenters/hazards/>.
