

Mass Workforce Issuance

Workforce Issuance No. 11-72

☐ Policy ☒ Information

To: Chief Elected Officials
Workforce Investment Board Chairs
Workforce Investment Board Directors
Title I Administrators
Career Center Directors
Title I Fiscal Officers

cc: WIA State Partners

From: George Moriarty, Director
Department of Workforce Development

Date: November 22, 2011

Subject: **FY2012 Data Validation Initiative Process**

Purpose: To inform Local Workforce Investment Boards, One-Stop Career Center Operators, and Local Workforce Investment partners of the Department of Career Service's process, parameters and schedule for implementing the U.S. Department of Labor Employment and Training Administration's (ETA) implementation of its Data Validation Initiative.

Background: States are required to ensure reporting accuracy by reviewing samples of customer records against source documentation to ensure compliance with Federal definitions. The Department of Career Services (DCS) is charged with the responsibility of conducting the Data Validation compliance review on an annual basis and reporting its findings. ETA has mandated that this process be completed and submitted to DOL no later than February 1, 2012.

During the FY2012 initiative, DCS will be conducting Data Element Validation for WIA Program Year 2010.

The Data Element Validation initiative validates the accuracy of program activity, performance outcomes, and individual data elements. Validation will include elements of the Workforce Investment Act (WIA); Adult, Dislocated Worker, National Emergency Grants, and Older/Younger Youth programs.

ETA has developed standardized software that utilizes sampling methodology that each State will use in completing the required data validation. The software automatically selects the number of samples from each of the local areas. Based upon supporting documentation, each data element will either pass or fail. In order for the data element to pass, the supporting source documentation must be on the list of Federal Sources and/or adhere to State policy guidance.

The FY2012 Data Validation Review schedule will occur from December 12, 2011 through January 20, 2012. Local areas will be notified with exact date and time prior to the start of Data Validation.

Required: Local areas will be emailed a list of customer files to be reviewed three business days prior to the actual visit. It will not be necessary to convene an Entrance Meeting. DCS will require access to MOSES to conduct the Data Validation Review. In addition to the file access, DCS reviewers will need a secure location to review customer files and to power laptops.

DCS cautions against making any changes to the case files in advance of its review as it may cause data elements to fail validation. In addition, once the information has been reported to ETA, further changes can not be made.

Inquiries: Please direct all inquiries to Edward Bartkiewicz at ebartkiewicz@detma.org
