FY22 Annual Work Plan Highlights

Fiscal Year 2022 is the fourth year in the implementation schedule for the *DCR Watershed System Watershed Protection Plan FY19-FY23*. Selective land protection efforts will continue through purchase in fee and of Watershed Preservation Restrictions, guided by the new Land Acquisition Model that has been expanded to all three watersheds. The use of GIS and electronic field data collection will continue to streamline numerous protection efforts including Ranger daily logs, incident reporting and violation tracking. Staff will continue implementation of the bird harassment programs at both reservoirs to continue to meet source water quality standards.

Staff will continue to implement the Watershed Protection Act, which is in its 30th year of implementation. As the pandemic hopefully winds down, we expect to re-start review and update of our Ware River Watershed and Sudbury Watershed Public Access Management Plans. We will also begin planning for the update of the Wachusett Watershed Public Access Management Plan.

Staff will Administer the Payment in Lieu of Taxes (PILOT) program across the watershed system.

Highlights by Region are included below:

Wachusett/Sudbury Region

- Continue implementation of the system-wide comprehensive Land Management Plan.
- Continue forestry operations. Active forest lots will be monitored by Foresters and Environmental Quality staff to ensure there are no short-term water quality issues related to forestry operations. Continue a long-term, paired watershed study to investigate impact of silviculture on tributary water.
- Maintain lands around the Wachusett Reservoir including vegetation management, mowing, and monitoring of dam and dike structures.
- Continue to control beaver populations in the Pathogen Control Zone and work to reduce impacts of beaver in other areas of the watershed.
- Conduct the bird control program and continue efforts to manage wildlife in the watershed. Continue measures to reduce food sources and the overall gull population.

- Continue managing white-tailed deer populations in the Wachusett and Sudbury watersheds through deer hunting permits and through the Wachusett Reservoir Zone controlled hunt.
- Continue to maintain Ranger presence to monitor and control public access. Enforce DWSP regulations through targeted patrols and the use of citations, as needed. Issue written warnings and/or non-criminal citations for repeat offenders and serious violations.
- Continue to implement the Wachusett Internal Road Plan, including routine maintenance and upgrades to higher priority roads.
- Contract for removal of structures on purchased lands including Hulick riding ring and Kush property.
- Monitor and maintain major dams in the system, as well as smaller watershed dams.
- Monitor and analyze water quality, including monthly sampling of tributaries for bacteria, turbidity, temperature, and specific conductance. Continue monthly or more frequent sampling for nutrients and total suspended solids at tributaries. Continue weekly or more frequent sampling of the reservoir for plankton, pH, temperature, and dissolved oxygen. Continue extensive hydrologic monitoring (stream flow, groundwater, precipitation, and snowpack) by staff and in cooperation with U.S. Geological Service.
- Monitor watershed activities to ensure compliance with 313 CMR 11.09. Track activities in EQ database.
- Continue efforts to streamline data management, data storage, and data visualization tools to facilitate and enhance short term and long-term analysis of monitoring results.
- Continue efforts in concert with MWRA to maintain and document progress controlling aquatic invasive species, including the DASH (Diver Assisted Suction Harvest) removal of invasive plants in the Stillwater and Quinapoxet basins. Monitor watershed ponds and streams for presence of aquatic invasive species.
- Continue work on road salt issue including Year 2 of the grant program to encourage municipal improvements to salting efforts and work on tributary monitoring.
- Continue to expand education and outreach programs both online and in-person that showcase the mission and accomplishments of DWSP.
- Work with consultants and MassDOT to move final design approval of stormwater drainage improvements to treat the final remaining direct discharge to the Reservoir in Sterling.

- Continue expansion and update of GIS data layers such as hydrologic connectivity and septic/sewer layers to better characterize and analyze watershed attributes that impact water quality.
- Continue work with MWRA on preparedness for potential railroad spills.
- Finalize and begin implementation of the update to the Sudbury Reservoir Watershed Public Access Management Plan.

Quabbin/Ware River Region

- Implement the system-wide comprehensive Land Management Plan including development and implementation of controlled burns to enhance forest management activities.
- Continue forestry operations. Active forest lots will be monitored by Foresters and Environmental Quality staff to ensure there are no short-term water quality issues caused by the work. Initiate harvest in the paired watershed study to investigate impact of silvicultural activities (e.g., timber harvesting) on tributary water quality.
- Continue work on development of gravel resources in both watersheds for Division needs.
- Maintain lands around the Quabbin Reservoir, including vegetation management, mowing, and monitoring of dam and dike structures; seek to implement a reduced mowing schedule in other areas to enhance pollinator habitat.
- Continue efforts to manage wildlife in the watershed. Conduct the Quabbin Bird Harassment program. Continue managing white-tailed deer populations through the allowed hunts in access zones and through the annual controlled hunt. Identify and remove aquatic animals found within the Aquatic Pathogen Control Zone.
- Pursue implementation of the Quabbin Park Deer Management Plan for fall if the pandemic has abated in time to allow public review meetings.
- Continue drone work in conjunction with DOT aeronautics division to conduct gull monitoring at Quabbin Reservoir.
- Complete and begin implementation of the updated Ware River Public Access Management Plan.
- Continue to maintain Watershed Ranger presence to monitor and control public access in both the Quabbin and Ware River watersheds. Enhance enforcement of rules and

regulations through targeted patrols and the use of citations. Issue written warnings and/or non-criminal citations for repeat offenders and serious violations.

- Update the Interpretive Services Plan for the Quabbin Watershed and develop an Interpretive Services Plan for the Ware River Watershed.
- Monitor and maintain major dams in the system, as well as smaller watershed dams.
- Monitor and analyze water quality throughout the Reservoir and watersheds, including biweekly sampling of tributaries for bacteria, turbidity, temperature, pH, dissolved oxygen, and specific conductance. Continue biweekly sampling for alkalinity, nutrients and for Environmental Quality Assessments and quarterly sampling for nutrients at core sites. Continue at least monthly sampling of the reservoir for plankton, pH, temperature, dissolved oxygen, specific conductance, bacteria, turbidity, and alkalinity; reservoir sampling for nutrients is completed quarterly. Conduct hydrologic monitoring (monthly groundwater measurements) by staff, in cooperation with U.S. Geological Service.
- Continue monitoring of ponds and streams throughout both watersheds for presence of aquatic invasive species.
- Continue in conjunction with MWRA the facility improvements in the Quabbin Park Cemetery (focused on building rehab projects).
- Work closely with MWRA on the Quabbin Administration Complex capital improvement design study.
- Continue work with MWRA on development of a new drinking water source for the Quabbin Administration Complex.
- Continue use of new BLA process using boater ID cards, streamlined season pass sales, iPad scanning and implementation of credit card sales at BLAs.

6. Annual Land Acquisition Capital Spending Plan

Division of Water Supply Protection**

FY22 Proposed Watershed Land Acquisitions

DWSP staff will continue to pursue the purchase of lands that have importance to protecting the water supply. The most direct and proven method of protecting the water source's long-term quality is to own and manage watershed lands surrounding the water supply source. A major tenet of watershed management is protection through ownership of interests in watershed lands because:

- A forested landscape provides the best quality water.
- The purchase of undeveloped lands protects water sources from development, which can alter vegetation and drainage, and add impervious surfaces that can move pollutants quickly towards streams.
- The purchase of vegetated buffers provides natural "treatment" or protection to lessen water quality impacts of future development.
- The purchase of stream buffers provides protections against changing flow patterns due to climate change.
- The purchase of problem properties can halt the problem of activity or use and allows for proper clean-up or re-vegetation of the site.

Landowners continually solicit DCR interest in purchasing their land for watershed protection. DCR also approaches selected landowners holding acreages which are determined applicable to watershed acquisition criteria. Priority is given to those projects which:

- Rate favorably on the Watershed Land Acquisition Model Map for each of the three active watersheds.
- Are determined important for an administrative and/or strategic purpose (Agency access, boundary consolidation, prevention of assemblage threat).

In addition, consideration is given to landowners who are willing to consider the placement of a Watershed Protection Restriction on their land in place of a fee transfer.

The "Land List" remains fluid as proposed projects are brought before the Land Acquisition Panel (LAP) for approval to proceed with due diligence. All proposed acquisitions are subsequently approved by the MWRA Board of Directors.

The projected budget for watershed land acquisition in FY22 is estimated to be \$1 million.

FY22 Payments in Lieu of Taxes Estimate

Payments in Lieu of Taxes (PILOT), required under MGL c.59 s.5G, are based upon the valuation set by the Department of Revenue (DOR) and the local commercial tax rate. The process used by DOR for valuing State Owned Land (SOL – which includes DCR Watershed Management) under MGL c. 58 was established by the Mass Municipal Modernization Act – Chapter 218, Section 108 of the Acts of 2016.

Under this process, DOR determined a base year SOL valuation for each community as of January 1, 2017. After a hearing and appeal process, base year SOL valuations were finalized. These base year valuations will be adjusted every two years by a percentage equal to the change in a city or town's equalized cash value (EQV), as determined by DOR. Valuations are also updated annually to include the value of any acquisitions and/or dispositions in a community. Calculations for acquired lands will be made using the cost per acre average for each town, adjusted by the EQV.

MGL c.59 s.5G still requires that the Watershed PILOT amount can never be less than the previous year.

The FY21 PILOT was \$8,367,913. This figure is a 0.15% increase from the FY20 PILOT paid of \$8,355,687. FY21 PILOT took into account the addition of 255.5 acres of land. This increase was less than the 1.5% estimated in the FY21 Work Plan.

FY22 PILOT will be based on DOR's State Owned Land adjusted by EQV for FY22. An additional 168.3 acres of land will now be included in the valuation. Utilizing a generic estimated increase of 5% to all towns' tax rates from FY21 to FY22, **it is estimated that PILOT will increase by approximately 5% to approximately \$8.8 million.** This figure could be less depending on the actual tax rates set by each community.

NOTES:

1. Watershed PILOT, per MGL c. 59 s.5G, is determined by multiplying the DOR valuation by the local commercial tax rate. Property valuations available at https://dls.gateway.dor.state.ma.us/reports/rdPage.aspx?rdReport=BLA.DCR_WaterShedLand and https://dls.gateway.dor.state.ma.us/reports/rdPage.aspx?rdReport=BLA.DCR_WatershedAnnexLand. 2. The process used by MA Department of Revenue (DOR) for valuing State Owned Land (SOL – which includes DCR Watershed Management) under MGL c. 58 changed in FY 19. Under the new process, DOR determined a base year SOL valuation for each community as of January 1, 2017. After a hearing and appeal process, base year SOL valuations were finalized. Going forward under the new process, the base year valuations will be adjusted every two years by a percentage equal to the change in a city or town's equalized cash value (ECV). Valuations are also updated annually to include the value of any acquisitions and/or dispositions in a community.
3. "Hold Harmless" is a provision in the legislation that requires any payment never to be less than the previous year's payment. Therefore, if either valuations or tax rates drop, the municipality is guaranteed a consistent payment.
4. Framingham: The valuation for Framingham changed in FY21 due to DOR adjustment for lands surrounding Stearns and Brackett Reservoirs (Framingham #1 and #2) which are no longer part of the drinking water supply system. These lands have not been part of the Watershed PILOT calculation since their removal from the water supply system in 2007.
