Overview: Emerging Adults Reentry Initiative

With the goal of reducing recidivism and increasing public safety, the Executive Office of Public Safety and Security's Office of Grants and Research (OGR) is responsible for administering state funds for reentry programming for pre- and post-release offenders currently within and/or outside the prison walls. This initiative is being supported by state funds authorized by Chapter 126 of the Massachusetts Acts of 2022, An Act Making Appropriations for Fiscal Year 2023.

The Emerging Adults Reentry Initiative provides funds to nonprofit organizations with proven experience providing reentry services shown to reduce recidivism amongst the 18-25 years of age population and demonstrated history of working collaboratively with the MA Department of Correction (DOC) and/or Sheriff's Office serving that population. Funds will be awarded to up to six (6) community reentry program sites to provide pre- and post-release services to the target individuals and to work closely with a correctional partner to identify, serve, and monitor program participants. A Technical Assistance Provider will be selected through this competitive process to assist funded community reentry sites by providing strategic, analytic, technical and research support.

Definition for Research- or Evidence-based Programs and Practices

A program or practice with levels of effectiveness determined as a result of rigorous evaluation such as randomized controlled trials, statistically controlled evaluations that incorporate strong control or comparison group designs, or a single large multi-site randomized study. Typically, these programs have specified procedures that allow for successful replication.

Programs may include practices such as screening, assessment, case management, monitoring service delivery, referring and linking clients to services, and other activities targeted to recidivism reduction. For programs, applicants are expected to focus on treatment needs that are driving an individual's criminal behavior, such as criminal thinking and poor impulse control. Programs should target their resources solely on the specific factors of an offender's behavior and cognition that are related to risk for recidivism.

Resources for Evidence-Based Program or Practice

To assist in determining project activities for this initiative, applicants are encouraged to visit:

- a) the National Institute of Corrections' *What Works in Reentry Clearinghouse* website at: <https://whatworks.csgjusticecenter.org/>.

 - Incorporate the elements that are critical to their effectiveness; and
 - Use information gathered through monitoring to make any necessary adjustments.
