

Massachusetts Department of Correction

> Thomas A. Turco III Commissioner

This brief was written and prepared by Reentry and Program Services Division

Special Recognition: Adam Costa, Student Analyst

# Introduction

The Massachusetts Department of Correction's (MA DOC) vision is to effect positive behavioral change in order to eliminate violence, victimization, and recidivism. Motivating and recommending offenders to participate and complete evidence based programs is one of the many strategies the MA DOC utilizes to effect positive behavioral change. In order for the MA DOC to make informed decisions and document progress towards this vision, a *gap* analysis was implemented for measuring and reporting offenders' participation in evidence based programs.

The following analysis captures our programming gaps, provides benchmarks for strategic planning, promotes transparency, and creates a roadmap for efficiently managing resources. This leads to the development of numerous strategies to improve programming outcomes and reduce programming gaps, such as re-allocating resources, maximizing program capacity, and creating a culture of program compliance via the Program Engagement Strategy\*1. Additionally, programming outcomes within this report document progress towards the goals outlined in the MA DOC Classification, Programs, and Reentry Performance Based Plan.

In regards to the MA DOC's programming processes, the department conducts a risk assessment on male criminally sentenced offenders that are serving a minimum of one year and are not sentenced to life without parole. Offenders who score moderate-to-high risk to recidivate on their risk assessment are eligible for a needs assessment. An offender's needs assessment scores identify criminogenic need areas that should be addressed with corresponding evidence based programming prior to release in order to reduce the likelihood of recidivating.

Therefore, offenders with a substance abuse, anger, or criminal thinking need are recommended for the Correctional Recovery Academy (CRA) Program, Violence Reduction Program, Criminal Thinking Program, respectively. This report will illustrate the MA DOC's progress towards promoting positive behavioral change by means of programming prior to an offender's release.

\*1- Program Engagement Strategy is a tool piloted at MCI-Concord, MCI- Norfolk, and NCCI-Gardner that employs a balanced approach of incentives and consequences to increase program participation and decrease refusals and terminations. For example, offenders that refuse to participate in recommended programming may lose privileges, such as preferred housing, employment, preferred program placement, and seniority date.

### Section 1: Release Cohort

### Releases to the Street \*2:

From July 1, 2015 through June 30, 2016, a total of 1,566 male offenders released to the street from MA DOC custody that began this admission as a new court commitment\*3. Seventy-six percent (n=1,186) of releases completed a needs assessment, and were recommended for programming based on their assessed criminogenic need areas. The following analysis depicts this release cohort's progress towards addressing their criminogenic needs prior to release.

#### Methodology:

Offenders may have multiple outcomes for a specific program due to being recommended for a program until it is completed. For example, an offender may initially refuse to participate in a program; however, on a subsequent program recommendation decide to enroll and go on to complete a program. Therefore, a hierarchy of program outcomes has been established to measure the highest level of participation an offender has achieved during their incarceration. Each offender's highest program outcome within the hierarchy below is reflected in the following tables for each program.

#### **Program Outcome Hierarchy:**

- Completed Program
- Participated
- Refused to Participate
- Accepted
- Ineligible
- Program not Available
- No recommendation/No recommendation outcome/ Pending override approval (POA)\*4

The *gap* is the percentage of offenders <u>who did not *complete or participate*</u> corresponding core programming to a need area prior to their release:

<u>gap</u> = 100% - (% Completed Program + % Participated in Program)

The total sum of eligible offenders is based upon the sum of offenders with a corresponding need (i.e., substance abuse, anger, or criminal thinking) and those with a program override entry. \*5

\*2- A release to street occurs when an inmate is released from the custody of the Massachusetts Department of Correction by way of parole or discharge to the street. Conditions warranting a release to street include: parole, good conduct discharge, and expiration of sentence.

\*3- Individuals committed by the courts to the Massachusetts Department of Correction as a result of a criminal offense. Therefore, this analysis excludes offenders who were re-admitted and subsequently released.

\*4- Incomplete program recommendations due to an offender obtaining an early release via parole, or being transferred before a recommendation can be completed at their prior facility.

\*5– As part of the MA DOC case management model, when an offender does not score moderate to high risk for a criminogenic need area based on their needs assessment, a program recommendation is formulated by their Correctional Program Officer (CPO) due to documented evidence that the offender can benefit from participating in such a program.

### **Release Cohort Gap Analysis:**

#### <u>Chart 1: Release Cohort Male Substance Abuse Need Area by</u> <u>Correctional Recovery Academy (CRA) Outcomes</u>

#### <u>Chart 2: Release Cohort Male Criminal Thinking Need Area by</u> <u>Criminal Thinking Program Outcomes</u>

# <u>CRA Program</u>

## Outcomes:

- <u>41% gap</u>
- 59% completed or participated in programming, goal is <u>70%</u> <u>completion rate</u>
- **17%** released without being housed in a facility that offered CRA programming
- **9%** of eligible offenders refused to participate in programming

# **Criminal Thinking Program**

### Outcomes:

- <u>60% gap</u>
- 40% completed or participated in programming , goal is <u>40%</u> <u>completion rate</u>
- 14% released without being housed in a facility that offered Criminal Thinking Program, and an additional 30% released on the waitlist
- **9%** of eligible offenders refused to participate in programming

#### Chart 3: Release Cohort: Male Anger Need Area by Violence Reduction Program Outcomes

<u>Violence Reduction Program</u> Outcomes:

- <u>54% gap</u>
- 46% completed or participated in programming, goal is <u>40%</u> <u>completion rate</u>
- 8% released without being housed in a facility that offered Violence Reduction Program, and an additional 34% released on the waitlist
- **10%** of eligible offenders refused to participate in programming

# Section 2: Active Cohort

### Methodology:

Similar to the Release Cohort Gap Analysis, offenders may have multiple outcomes for a specific program due to being recommended for a program until it is completed. In contrast to the Release Cohort Gap Analysis, this section reflects the current progress of the active population toward program completion. The most recent outcome is reported for those offenders who have yet to complete.

<u>Gap</u>= 100% - (% Completed Program + % Enrolled + % Terminated Unsuccessfully + % Prior Engagement)

The total sum of eligible offenders is based upon the sum of offenders with a corresponding need (i.e., substance abuse, anger, or criminal thinking). The following analysis excludes offenders with a program override entry and is based solely on assessed need due to override processes varying from facility to facility.

The Active Cohort Gap Analysis is conducted to forecast future release cohort programming gaps, which in-turn identifies areas in need of improvement to reach the goals outlined in the MA DOC Classification, Programs, and Reentry Performance Based Plan. The following active cohort gap analysis is based on offenders housed in MA DOC custody as of July 1, 2016 with a maximum release date between July 1, 2017– June 30, 2021.

### Active Cohort Gap Analysis:

#### Chart 5: Active Cohort Male Anger Need Area by Violence Reduction Program Outcomes

# <u>CRA Program</u>

### **Outcomes :**

- <u>52% gap</u>
- 30% completed programming
- **14%** housed in a facility that does not offer CRA program
- 8% of eligible offenders refused to participate in programming

# Violence Reduction Program

### Outcomes :

- <u>66% gap</u>
- 23% completed programming
- **49%** of eligible offenders are on the program waitlist
- 15% housed in a facility that does not offer Violence Reduction program

#### <u>Chart 6: Active Cohort Male Criminal Thinking Need Area by</u> <u>Criminal Thinking Program Outcomes</u>

# Criminal Thinking Program

### Outcomes :

- <u>69% gap</u>
- 21% completed
- **51%** of eligible offenders are on the program waitlist
- **12%** housed in a facility that does not offer Criminal Thinking program

### FY15 vs. FY16

#### **Correctional Recovery Academy (CRA)**

 Due to the eligibility criteria shifting from FY15 to FY16 with the inclusion of the Texas Christian University Drug Screen (TCUD) to determine eligibility for programming, the percentage of offenders without a recommendation increased. As the MA DOC administered the TCUD to the standing population, offenders who were close to release and/or in lower security were found to be eligible for substance abuse treatment. These offenders did not have the opportunity to enroll or be recommended for the program due to proximity to release or being in a lower security facility that does not offer the CRA.

#### **Criminal Thinking**

#### **Release Cohort:**

- Gap decreased by 5% from 63% in FY15 to 60% in FY16
- Completions decreased by 4%, while the percent participated increased by 40%

#### **Active Cohort:**

- Gap deceased by 20%, from 86% on July 1, 2015 to 69% on July 1, 2016
- Completions increased by 163%, from 8% on July 1, 2015 to 21% on July 1, 2016
- Current Enrollments increased by 133%, from 3% on July 1, 2015 to 7% on July 1, 2016
- Declines decreased by 40%, from 5% on July 1, 2015 to 3% on July 1, 2016

#### Violence Reduction

#### **Release Cohort:**

- Gap increased by 2% from 53% in FY15 to 54% in FY16
- Completions decreased by 3%, while the percent participated remained at 14%

#### Active Cohort:

- Gap deceased by 22%, from 85% on July 1, 2015 to 66% on July 1, 2016
- Completions increased by 92%, from 12% on July 1, 2015 to 23% on July 1, 2016
- Current enrollments increased by 250%, from 2% on July 1, 2015 to 7% on July 1, 2016
- Declines decreased by 60%, from 5% on July 1, 2015 to 2% on July 1, 2016

The strategies outlined in previous Gap Analysis Reports have reduced the active cohort programming gaps, which will lead to the release cohort program gaps decreasing.

#### **GAP ANALYSIS REPORT INFORMATION**

**Risk Assessment-** Tool utilized by the MA DOC to identify offenders who are moderate to high risk to reoffend and prioritize them for programming.

**Need Assessment-** Tool utilized by the MA DOC to place offenders in the appropriate programs that will aid in their reentry to society, and will most likely reduce the offender's chance of reoffending.

**Program Override Entry-** Occurs when an offender does not score moderate to high risk for a criminogenic need area based on their needs assessment, and a program recommendation is formulated by their Correctional Program Officer (CPO) due to evidence that the offender can benefit from participating in such a program.

**Correctional Recovery Academy (CRA)** - is an intensive skill-based residential substance abuse treatment program located at four institutions with a capacity of 528 beds. The CRA targets substance abuse and relapse prevention. The program utilizes rolling admissions and combines the elements of a therapeutic community's social learning approach with an advanced cognitive behavioral curriculum.

**Criminal Thinking Program-** is designed to focus on altering the pro-criminal thinking patterns that have been identified as separating those who are serious repeat offenders from those who are not. The program focuses specifically on criminal sentiments and how to develop pro-social alternatives for them. The program assists the offender in developing pro-social alternatives to past activities and associates.

**Violence Reduction Program-** targets cognitions that contribute to violent behavior. The goals of the program are to decrease violent behavior and the likelihood of institutional disturbances. During the program inmates identify the specific cognitions which have led to their violent behavior. Once identified, they are taught pro-social strategies and skills to diminish the likelihood of continued violence.

Substance Abuse Need- Offenders with a score from 3 to 10 on their needs assessment for substance abuse need area, or score High on the Texas Christian University Drug Screen (TCUD).

Substance Abuse Total Number Eligible- The sum of offenders with a substance abuse need, and those with a program recommendation override.

Criminal Thinking Need- Offenders with a score from 6 to 10 on their needs assessment for criminal thinking need area.

**Criminal Thinking Total Number Eligible-** The sum of offenders with a criminal thinking need, and those with a program recommendation override.

Anger Need- Offenders with a score from 5 to 10 on their needs assessment for anger need area.

**Anger Total Number Eligible-** The sum of offenders with an anger need, and those with a program recommendation override.

Completed Program- Outcome issued when an offender satisfactorily completed the program.

**Participated-** Outcome issued when an offender participates in a program, but does not complete the program. The offender was terminated from the program, or enrolled in the program upon transfer to another facility or released.

**Terminated Unsuccessfully**- Outcome issued when an offender participates in a program, but does not complete the program due to various circumstances.

Refused to Participate- Outcome issued when an offender refuses to participate in programming.

**Waitlist**- Outcome issued when an offender accepts a program recommendation and is on the waitlist for programming.

**Ineligible**- Outcome issued when an offender has the need for corresponding programming, but is unable to participate in programming due to various reasons, such as length of time left to serve, or housing unit.

**Program not Available-** Outcome issued when an offender has the criminogenic need for programming; however, the program is not available at their facility.

**Prior Engagement**– Outcome issued in the active cohort gap analysis, indicates participation in programming in which an offender either released or transferred to another site while enrolled in the program.

**Pending Override Approval (POA)/no recommendation outcome/no recommendation-** Incomplete program recommendations, due to an offender obtaining an early release via parole, or being transferred before a recommendation can be completed at one's prior facility.
