

## Massachusetts Grade 7 Immunization Survey Results 2016-2017

The Massachusetts Department of Public Health Immunization Program is pleased to make available the 2016-2017 Massachusetts grade 7 immunization survey results by school. Please be aware that the data are limited in a number of ways, including those listed below.

- All data are self-reported by the schools and discrepancies may exist. The Immunization Program continues to work with schools to resolve discrepancies and update immunization data, when possible.
- Data release standards do not allow for data to be shared for schools with fewer than 30 reported students in grade 7. Schools that submitted a survey and reported fewer than 30 students in grade 7 are indicated (†).
- Not all schools return their survey. Schools without data due to non-response are indicated (\*).
- Some schools returned surveys that contained discrepancies leading to mathematically impossible rates. When possible, we work with schools to resolve data discrepancies. Schools where rates were withheld due to unresolved discrepancies are indicated (¶).
- Data are primarily collected in the fall, but immunization data are often updated throughout the year and rates (during the same school year) may be higher than reported due to additional children receiving immunizations or bringing records to school. For this school year, schools were given the opportunity to submit updated numbers from their initial survey in the fall. Also, the student body is dynamic and as students arrive and leave school, the immunization rates are impacted.
- Children are allowed a medical or religious exemption to one or more vaccines.
- Children without the required number of doses of vaccine do not necessarily have an exemption on file.
- Children without a record of vaccination, but with serologic proof of immunity to certain diseases (measles, mumps, rubella, hepatitis b and varicella), meet school entry requirements, and may be counted as vaccinated.

### Data definitions:

*	School did not respond to survey
†	School returned survey and reported fewer than 30 total students, so data cannot be released
¶	School returned survey however, due to data discrepancies, rates are not available at this time
‡	Indicates a school with a negative Gap. The Gap is calculated by the Immunization Program based on submitted aggregate data. A school may have a negative Gap due to a student having both a medical and religious exemption,

or being fully vaccinated with an exemption. Data are self-reported, in aggregate, by schools so the Immunization Program is unable account for these students who may be double counted in the Gap calculation.

2 MMR	2 doses of MMR (measles, mumps and rubella) vaccine. Students with laboratory evidence of immunity to all three diseases are also included in this category.
3 Hep B	3 doses of hepatitis B vaccine. Students with laboratory evidence of immunity are also included in this category.
2 Varicella	2 doses of varicella vaccine. Students with a reliable history of chickenpox disease or laboratory evidence of immunity are also included in this category.
Tdap	1 dose of Tdap (tetanus, diphtheria, and pertussis) vaccine
Series	2 MMR + 3 Hep B + 2 Varicella + 1 Tdap
Exemption	Medical and religious exemptions combined
Unimmunized	Students with an exemption that have no documented vaccines
No Record	Students reported as not having an immunization record on file
Gap	Students that have neither all vaccines required for school nor an exemption

## Data Definitions:

\* School did not respond to survey

† Indicates school reported fewer than 30 total students, so data cannot be released.

\*School did not respond to the survey

†School reported fewer than 30 students, so data cannot be released

¶School returned survey however, due to data discrepancies, immunization and exemption rates are not available

‡School has a negative Gap calculated by the Immunization Program based on self-reported data from the school

Rates for vaccines are rounded to the nearest percentage and may slightly under- or overestimate true immunization rates

Series: 2 MMR + 3 HepB + 2 Varicella + 1 Tdap

Exemption data represents medical and religious exemptions combined

# Massachusetts Grade 7 Immunization Survey Results 2016-2017

School Name	School Type	City	County	2 MMR	3 HepB	2 Varicella	Tdap	Series	Exemption	Un-immunized	No Record	Gap
	¶	Indicates school returned survey however, due to data discrepancies, immunization and exemption rates are not available at this time.										
	‡	Indicates a school with a negative Gap. The Gap is calculated by the Immunization Program based on submitted aggregate data. A school may have a negative Gap due to a student having both a medical and religious exemption, or being fully vaccinated with an exemption. Data are self-reported, in aggregate, by schools so the Immunization Program is unable account for these students who may be double counted in the Gap calculation.										
	2 MMR	2 doses of MMR (measles, mumps and rubella) vaccine. Students with laboratory evidence of immunity to all three diseases are also included in this category.										
	3 Hep B	3 doses of hepatitis B vaccine. Students with laboratory evidence of immunity are also included in this category.										
	2 Varicella	2 doses of varicella vaccine. Students with a reliable history of chickenpox disease or laboratory evidence of immunity are also included in this category.										
	Tdap	1 dose of Tdap (Tetanus, diphtheria, and pertussis) vaccine.										
	Series	2 MMR + 3 HepB + 2 Varicella + 1 Tdap										
	Exemption	Medical and religious exemptions combined.										
	Unimmunized	Students with an exemption that have no documented vaccines.										
	No Record	Students reported as not having an immunization record on file.										
	Gap	Students that have neither all vaccines required for school nor an exemption. This rate is calculated by the Immunization Program based on submitted data.										

## Notes

- All data are self-reported by schools and discrepancies may exist. The Immunization Program continues to work with schools to resolve discrepancies and update immunization data, when possible.
- Not all schools return their survey. Schools without data due to non-response are indicated (\*).
- Some schools returned surveys that contained discrepancies leading to mathematically impossible immunization rates. When possible, we work with schools to resolve data discrepancies. Schools where rates were withheld due to unresolved discrepancies are indicated (¶).
- Data are primarily collected in the fall, but immunization data are often updated throughout the year and rates (during the same school year) may be higher than reported due to additional children receiving immunizations or bringing records to school. Schools were given the opportunity to submit updated numbers from their initial survey in the fall. Also, the student body is dynamic and as students arrive and leave school, the immunization rates are impacted.
- Children are allowed a medical or religious exemption to one or more vaccines.
- Children without the required number of doses of vaccine do not necessarily have an exemption on file.
